Report on Preliminary Site Investigation (Contamination)

Proposed Rezoning

490 Chapel Rd & 347A Hume Highway, Bankstown

1. Introduction

Douglas Partners Pty Ltd (DP) has been engaged by City of Canterbury Bankstown Council (Council) to complete this preliminary site investigation for Contamination (PSI) at 490 Chapel Rd & 347A Hume Highway, Bankstown (the site). The site is shown on Drawing 1, Appendix A.

The investigation was undertaken in accordance with DP's proposal P208123.00.P.001.Rev1 dated 26 August 2021. The report also addresses a subsequent request to expand the original boundary of the investigation area to that shown on Drawing 1, Appendix A.

Based on the information provided by Council, it is understood that the Bankstown Master Plan was adopted by Council on 28 September 2021. The master plans propose a rezoning of various sites currently zoned SP2 - Special Purpose to B4 Mixed Use and B3 Commercial Core in Bankstown City Centre. It is also proposed to make Health Services Facilities permissible on an existing SP2 - Educational Establishment Site (currently containing Bankstown TAFE). This PSI is required to address NSW Government Ministerial Directions on rezoning of land, to confirm whether the site is suitable (or will be suitable, after remediation) for dwellings and other more sensitive land uses than is currently permitted on the site.

The objectives of the PSI are to:

- Address Ministerial Direction 2.6 (Remediation of Contaminated Land);
- Based on site history searches and a brief inspection from publicly accessible areas, identify potential sources of contamination on the site;
- Assess potential contamination risks that may preclude rezoning of the site; and
- Comment on the need for further detailed investigation where contamination may be present.

This report must be read in conjunction with all appendices including the notes provided in Appendix B.

The following key guidelines were consulted in the preparation of this report:

- NEPC *National Environment Protection (Assessment of Site Contamination) Measure 1999 (as amended 2013)* [NEPM] (NEPC, 2013); and
- NSW EPA *Guidelines for Consultants Reporting on Contaminated Land* (NSW EPA, 2020).

2. Scope of Works

The scope of works for the PSI comprised the following:

- Review of the following site / history information, provided to DP by Council:
 - o Section 10.7 (2&5) Planning Certificates;
 - o Council records available under an Informal application under the Government Information (Public Access) Act 2009 (GIPA Act); and
 - o Available records / documents on current and historic site use / activities.
- Review of the following site history information / records, obtained by DP:
 - o Historical aerial photographs;
 - o SafeWork NSW database search for records of dangerous goods licenses registered to the site;
 - o Historical title deed searches for a number of lots within the site;
 - o NSW EPA databases held under the CLM and POEO Acts for the site and adjoining properties;
 - o Registered groundwater bores;
 - o Regional geological, soil and hydrogeological mapping; and
 - o Acid sulfate soil and salinity risk maps.
- A site walkover to observe and record the external appearance of each property, current land uses, signs of historical uses, hydrogeological features (i.e., streams, dams, water wells, catchments and drainage), presence of fill, waste disposal practices, etc. The walkover was undertaken from publicly accessible areas and did not comprise a detailed walkover within the premises unless it was a publicly accessible area;
- Based on the above information identify areas of environmental concern (AEC) and contaminants of potential concern (CoPCs);
- Preparation of a conceptual site model (CSM); and
- Prepare this PSI report.

3. Site Information

Site Address	490 Chapel Rd & 347A Hume Highway, Bankstown
Legal Description	Lot 1 in DP 853675; Lot 202 in DP 1231757; Lot 2 in DP 109612; Lot 4 in DP 132511; Lot 5 in DP 132511; Lot 1 in DP 1154975; Lot 2 in DP 1154975; Lot 10 in DP 132511; and Lot 11 in DP 132511.

Area	9.11 Ha
Current Zoning	Zone SP2 Educational Establishment Zone B4 Mixed Use (southern portion of the site)
Proposed Zoning	Retain the existing SP2 Educational Establishment zoning, and expand the permitted uses to include Health Services Facilities Retain B4 Mixed Use zoning on southern portion of site
Local Council Area	City of Canterbury Bankstown Council
Current Use	Bankstown TAFE; Road-level car park; and La Salle College School Facilities and Playing Fields.
Surrounding Uses	North - La Salle Catholic College, then Hume Highway East - Chapel Road, then mixed use residential and commercial South - French Avenue, then commercial West - Urban residential properties

Figure 1: Site Location

4. Environmental Setting

4.1 Topography

The regional topography is generally sloping towards the south.

Site topography falls moderately towards the south-east, with levels between 31 m in the south-east corner and 60 m in the north-west corner of the site relative to Australian Height Datum (AHD).

4.2 Site Geology

The Sydney 1:100,000 Soils Landscape Sheet indicates that the site is underlain by the Glenorie erosional soils and Blacktown residual soils, as the site is located on an interface between the two groups.

The Glenorie soils group comprises shallow to moderately deep red podzolic soils on crests, red and brown podzolic soils on upper slopes, deep yellow podzolic soils on lower slopes and humic gleys, yellow podzolic soils and gleyed podzolic soils along drainage lines.

The Blacktown soils group comprises shallow to moderately deep red and brown podzolic soils crests, upper slopes and well drained areas, deep yellow podzolic soils and soloths on lower slopes and in areas of poor drainage.

The Sydney 1:100,000 Geology Sheet indicates that the site is underlain by Bringelly Shale which comprises shale, carbonaceous claystone, laminite, fine to medium grained lithic sandstone and rare coal.

4.3 Acid Sulphate Soils and Salinity

Published acid sulphate soils (ASS) risk mapping indicates that the site has a low probability of having ASS.

There are no mapped areas of ASS occurrence within 2 km of the site.

Published salinity risk mapping indicates that the site has moderate to high salinity potential.

4.4 Surface Water and Groundwater

The closest watercourse to the site is Salt Pan Creek, located approximately 1 km south (down gradient) of the site, which flows into Georges River. Other watercourses are significantly further from the site. With respect to surface water, given the highly urbanised nature of the area, most surface water is anticipated to be collected by the local stormwater network.

A search of the publicly available registered groundwater bore database indicated that there are a cluster of nine monitoring bores approximately 745 m to the north-east currently occupied by the 7-Eleven Greenacre service station. No data on standing water level was publicly listed.

Based on regional topography, the anticipated flow direction of groundwater beneath the site is to the south, towards Salt Pan Creek, the likely receiving surface water body for the groundwater flow path. Salt Pan Creek flows into Georges River, which ultimately flows into Botany Bay.

Given the local geology (Bringelly Shale), the groundwater in the fractured rock beneath the site is anticipated to be saline and very low yield. Accordingly, there would be no significant potential beneficial uses of the groundwater.

5. Site History

5.1 Title Deeds

A historical title deeds search was used to obtain ownership and occupancy information including company names and the occupations of individuals. The title information can assist in the identification of previous land uses by the company names or the site owners and can, therefore, assist in establishing whether there were potentially contaminating activities occurring at the site.

The results of the title deeds search are included in Appendix C. A summary of the title deeds and possible or known land uses is presented in Tables 1 to 17. Historical aerial photographs (refer Section 5.2) were used to assist in determining land uses. Note that the title deeds were only obtained for Lot 1, DP 853675 and Lot 2, DP 109612, being the lots comprising the site prior to the requested boundary adjustment (refer Section 1).

Table 1: Historical Title Deeds - Lot 1 in DP 853675, As regards to the part formerly known as Volume 5638 Folio 157

Date of Acquisition and Term Held	Registered Proprietor(s) & Occupations	Inferred Land Use

5.2 Historical Aerial Photography

Several historical aerial photographs were obtained from public databases. Extracts of the aerial photographs are included in Appendix D. A summary of key features observed for the site and surrounding land is presented in Table 18.

Table 18: Summary of Historical Aerial Photographs

Year	Site	Surrounding Land Use
1943	<p>The site appears to be generally vacant with three areas (lots) being utilised.</p> <p>The northern area of site is occupied by the La Selle Catholic College school grounds in the northern most portion of the site and appears to be under construction. Residential houses are located along the north-eastern boundary.</p> <p>The centre area is mostly vacant with three residential houses located in the south-eastern corner.</p> <p>The south-eastern area is almost entirely occupied by residential properties.</p>	<p>The surrounding area appears to comprise residential properties to the north, east, south and west.</p>
1955	<p>A large development is now present at the eastern centre of the site and the southern area is now occupied by residential houses located in the south-eastern corner.</p> <p>Construction of La Selle Catholic College has been completed.</p> <p>No significant changes to the western and south-eastern areas of the site.</p> <p>No other significant changes were observed when compared with the 1943 aerial photograph.</p>	<p>No significant changes to the site surroundings were observed when compared with the 1943 aerial photograph.</p>

Year	Site	Surrounding Land Use
1961	<p>The western area of site has been partially developed with evidence of earthworks and a shed structure present along the eastern boundary.</p> <p>La Selle Catholic College has been expanded southward with new buildings present.</p> <p>The eastern centre of the site's development of the TAFE has expanded north.</p> <p>No significant changes to the site were observed when compared with the 1955 aerial photograph.</p>	No other significant changes were observed to the areas surrounding site
1971	<p>The western areas shed structure along the eastern boundary has been demolished and a new square building is now present in the north.</p> <p>La Selle Catholic College has been expanded southward with new buildings present.</p> <p>The eastern area of site is now entirely occupied by the TAFE, the previous residential buildings have since been demolished and replaced with buildings for the TAFE.</p> <p>No other significant changes to the site were observed when compared with the 1961 aerial photograph.</p>	No other significant changes to the site surroundings were observed when compared with the 1961 aerial photograph.
1982	<p>The vacant area in the western portion of site is now clearly attached to the La Selle Catholic College and has been developed with school infrastructure in the north and the remaining portions of the lot south is open space playing fields with a small shed structure at the centre.</p> <p>The eastern area occupied by the TAFE appears relatively unchanged.</p> <p>The south-eastern area has been cleared of all previous residential properties save for four properties in the south-eastern corner and redeveloped into a carpark.</p> <p>No other significant changes to the site were observed when compared with the 1971 aerial photograph.</p>	<p>The area east of site has increased in medium density residential properties.</p> <p>Commercial developments are now present south of site.</p> <p>No other significant changes to the site surroundings were observed when compared with the 1971 aerial photograph.</p>

Year	Site	Surrounding Land Use
1991	<p>The western area of site appears to be relatively unchanged.</p> <p>The south-eastern carpark has expanded with two residential properties demolished and the carpark has been expanded.</p> <p>The eastern area occupied by the TAFE has been developed in the south.</p> <p>No other significant changes to the site were observed when compared with the 1982 aerial photograph.</p>	<p>The area east and west of site has increased in medium density residential properties. Commercial properties are now present east of site.</p> <p>No other significant changes to the site surroundings were observed when compared with the 1982 aerial photograph.</p>
1998	<p>A building in the south-eastern area of site, along with a shed at the western boundary has been demolished. No other significant changes to the site were observed when compared with the 1991 aerial photograph.</p>	<p>The area east and west of site has increased in medium density residential properties. Commercial properties are now present east of site.</p> <p>No other significant changes to the site surroundings were observed when compared with the 1991 aerial photograph.</p>
2007	<p>A building in the western area of site has been demolished.</p> <p>La Salle Catholic College has constructed new buildings in the north of site.</p> <p>No other significant changes to the site were observed when compared with the 1998 aerial photograph.</p>	<p>The area east and west of site has increased in medium density residential properties. Commercial properties have replaced residential properties south of site.</p> <p>No other significant changes to the site surroundings were observed when compared with the 1998 aerial photograph.</p>
2016	<p>No significant changes to the site were observed when compared with the 2007 aerial photograph.</p>	<p>No significant changes to the site surroundings were observed when compared with the 2007 aerial photograph.</p>

5.3 Public Registers and Planning Records

EPA Notices available under Section 58 of the Contaminated Lands Management Act (CLM Act) [accessed 21/2/2022]	<p>The results of a search of the public database of records of notices for contaminated sites indicated that there were no records of notices for the site. The search also indicated that there was one record of notice for a property within a 1 km search buffer of the site:</p> <ul style="list-style-type: none"> • A 7-Eleven service station located 170 m north-east of site.
Sites notified to EPA under Section 60 of the CLM Act [accessed 21/2/2022]	<p>The results of a search of the public database of contaminated sites notified to the EPA indicated that the site was not listed as a notified contaminated site. The search also indicated that there was one record of notice for a property within a 1 km search buffer of the site:</p>

	<ul style="list-style-type: none"> A 7-Eleven service station 170 m north-east of site was listed and regulation under the CLM Act was not required.
Licenses listed under Section 308 of the Protection of the Environment Operations Act 1997 (POEO Act) [accessed 21/2/2022]	<p>The results of a search of the public database or records of environmental protection licences, applications, notices or audits under POEO Act indicated that there are no current records issued to the site. The search also indicated that there was one record for a property within a 1 km search buffer of the site:</p> <ul style="list-style-type: none"> Bankstown City Council located 618 m south of the site was listed and the property had a POEO license which has since been surrendered.
SafeWork NSW [conducted 26/11/2021]	A search of SafeWork NSW records for Schedule 11 hazardous chemicals on premises did not locate any records. Refer Appendix E.
Planning Certificate(s) [dated 21/2/2022]	Planning certificates for the site indicate that the council is not aware of the land being affected by any matters as prescribed by Section 59 (2) of the <i>Contaminated Land Management Act</i> 1997. Refer Appendix F.
Council Records	<p>Council provided the SafeWork NSW records for Schedule 11 hazardous chemicals on premises search from a Greencap PSI (project reference not listed) at 500 Chapel Road, Bankstown which is a part of the Bankstown TAFE facilities and therefore within the boundary of this investigation.</p> <p>The search detailed the storage of pressurised gas such as liquified petroleum gas (LPG), acetylene, oxygen, argon and migshield. Chemical storage including acids, turpentine, kerosene, various paints, paint thinners and strippers, wax and grease removers.</p> <p>Council also provided a PSI from Alliance Geotechnical for 544 Chapel Road, Bankstown (ref: 8876-ER-1-1, dated 26 September 2019) which is occupied by the La Salle College and was limited to two lots (portion of Lot 2 in DP109612, and Lot 202 in DP1231757) within the greater La Salle College and a portion of the neighbouring high density residential property. The report did not find any evidence of gross signs of contamination, chemical storage, above ground or underground storage tanks, waste or asbestos at the site. Refer to Section 5.5 for more information.</p>

5.4 Other Sources

A brief search of Google maps on 03 December 2021 for potentially contaminating activities (such as 'dry cleaners' or 'mechanic' etc.) in the surrounding area located two potentially contaminating operating activities within a 500 m buffer zone and upgradient of the site:

- Bankstown Fire Station [27 m north-west];
- BP Service Station [268 m west]; and
- Valet Dry Clean [275 m north-east].

5.5 Previous Reports

A PSI prepared by Alliance Geotechnical (AG) was provided by Council and is relevant to one of the lots comprising 347A Hume Highway. The report details are as follows:

- Alliance Geotechnical (2019). Report on Preliminary Site Investigation (Contamination), Proposed Redevelopment, *544 Chapel Rd, Bankstown NSW Portion of Lot 2 in DP109612, & Lot 202 in DP1231757*. Reference 8876-ER-1-1, dated 26 September 2019.

AG completed the PSI for a portion of Lot 2 in DP109612 occupying a portion of 544 Chapel Rd and Lot 202 in DP1231757 occupying a portion 347A Hume Highway, Bankstown (part of the subject site) in September 2019. The PSI comprised a desktop review of available site history information and a site walkover to identify past and present areas of environmental concern (AEC) and contaminants of potential concern (CoPC) relevant to the site for a proposed redevelopment.

The site history information review noted that the site has been used as the La Selle College School since at least the 1950s, when construction of the primary school began on the site. Historical photographs also suggested that the surrounding area had remained predominately residential and an increase in medium density residential development gradually occurring over time. A search of properties with EPA notices and licences did not identify the site to be notified to the EPA as contaminated, be regulated under the CLM Act, or hold a licence or have received any EPA notices. No nearby properties were found to have notices or licenses listed with the EPA that were considered to have an impact on the contamination status of the site.

A review of a SafeWork NSW records for Schedule 11 hazardous chemicals on premises search was not undertaken from the site and AG considered that further assessment of the storage of licensable quantities of dangerous goods was not warranted.

The main AECs identified during the desktop review and site walkover were fill material associated with levelling and forming the site and uncontrolled demolition of former buildings. The main CoPC identified were metals, TRH, OCP, OPP and asbestos.

AG concluded that, based on the results of the PSI, the following was recommended:

- A detailed site investigation (DSI) targeting the identified AECs; and
- In the event that the AECs are not accessible during the DSI, then a remedial action plan (RAP) setting out required supplementary assessment works would be required.

5.6 Data Gaps

The original scope of this investigation was limited to Lot 1, DP 853675, which encompasses the entirety of 490 Chapel Road and Lot 2, DP 109612, which partially encompasses 347A Hume Highway. Council has since requested that the entirety of 347A Hume Highway be captured in this PSI report. The inclusion of the following lots: Lot 202, DP 1231757, Lots 4, 5, 10 and 11, DP 132511 and Lots 1 and 2, DP 1154975, has been incorporated into this report as shown on the adjusted site boundary (refer to Drawing 1, Appendix A) and information already available to DP regarding site history which is limited to the historical aerial imagery (Section 5.2) and the public registers and planning records (Section 5.3).

While the PSI prepared by AG for 544 Chapel Road, Bankstown (ref: 8876-ER-1-1, dated 26 September 2019) provided information for Lot 202 in DP1231757, no other information has been obtained for the remaining additional lots. It is recommended that a supplementary desktop investigation be carried out to detail the history of the site (such as historical title deeds) and an updated conceptual site model (CSM) be made to incorporate information for the additional lots.

Comment on the overall risk matrix for the site (Section 8) cannot be made until the aforementioned information regarding the additional lots be acquired and reviewed and the risk matrix provided in this report is limited to Lot 1, DP 853675 and Lot 2, DP 109612.

5.7 Site History Integrity Assessment

The information used to establish the history of the site was sourced from reputable and reliable reference documents, many of which were official records held by Government departments / agencies. The databases maintained by various Government agencies potentially can contain high quality information, but some of these do not contain any data at all.

In particular, aerial photographs provide generally high quality information that is generally independent of memory or documentation. They are only available at intervals of several years, so some gaps exist in the information from this source. The observed site features are open to different interpretations and can be affected by the time of day and / or year at which they were taken, as well as specific events, such as flooding. Care has been taken to consider different possible interpretations of aerial photographs and to consider them in conjunction with other lines of evidence.

5.8 Summary of Site History

The aerial photographs suggest that the site was a mix of vacant undeveloped land and residential until at least the 1960s, when construction of the TAFE and La Salle College began on the vacant portions of the site. Residential houses at the area now occupied by Bankstown TAFE were demolished and redeveloped as part of the TAFE during the 1970s. The remaining residential houses were slowly demolished and replaced with a carpark to be utilised by the TAFE starting in at least the 1980s until present day.

The historical photographs also suggest that the surrounding area was predominantly residential around the 1940s, with commercial, retail and medium to high density residential development gradually occurring over time.

A search of properties with EPA notices and licences and review of Section 10.7 Planning Certificates did not identify the site to be notified to the EPA as contaminated, be regulated under the CLM Act, or hold a licence or have received any EPA notices. It did identify one site within a 1 km search buffer of the site, a 7-Eleven service station located 170 m north-east of site and regulation under the CLM Act was not required. Bankstown City Council located 618 m south of the site and had a POEO license which has since been surrendered. A review of council records detailed a SafeWork NSW records for Schedule 11 hazardous chemicals on premises search from an unknown Greencap PSI at 500 Chapel Road, Bankstown which is a part of the Bankstown TAFE facilities and therefore within the boundary of this investigation. The search detailed the storage of various pressurised gases and chemical storage not listed in the SafeWork NSW Schedule 11 search conducted by DP.

6. Site Walkover

A site walkover was undertaken by an environmental scientist on 29 November 2021 for Lot 1, DP 853675 and Lot 2, DP 109612. The general site topography was consistent with that described in Section 4.1. The lot layouts appear to have remained relatively unchanged from the 2016 aerial photograph. The following key site features pertinent to the PSI were observed (refer to photographs in Appendix G).

490 Chapel Road - Bankstown TAFE and Carpark

- The portion of the site occupied by 490 Chapel Road was the Bankstown TAFE in the north and carpark with childcare centre in the south separated by Raw Avenue;
- The northern portion of 490 Chapel Road was by the Bankstown TAFE and access into the internal areas of the TAFE was not available;
- Several signs referring to the storage of hazardous chemicals on the premise was seen on the exterior fencing;
- The southern portion of 490 Chapel Road was an active car park utilised by TAFE staff and students;
- The carpark was entirely paved concrete with areas of exposed topsoil and trees; and
- A childcare centre was located in the south-western corner of the carpark and was associated with the TAFE.

347A Hume Highway - La Salle College School Facilities and Playing Fields

- The portion of the site occupied by 347A Hume Highway was a mixed open space series of playing fields including a tennis court and school facilities attached to the La Salle College in the northern portion of the site;
- Access to this portion of the site was not made available to DP at the time of this investigation and the following assumptions made for the site uses are derived from aerial photography;
- The south-western portion of 347A Hume Highway was occupied entirely by open space playing fields, a tennis court and shed structure was present at the centre of the playing fields;
- In regards to the additional lots, recent aerial photography shows that the northern portion of 347A Hume Highway was dominated by school facilities. It cannot be confirmed from the aerial photography what specific uses these building facilities are specifically utilised for;
- Two carparks utilised for La Salle College staff were present at the north-eastern and southern areas of the school facilities; and
- Hardstand playing courts were present in the north-western corner of 347A Hume Highway.

7. Preliminary Conceptual Site Model

A Conceptual Site Model (CSM) is a representation of site-related information regarding contamination sources, receptors and exposure pathways between those sources and receptors. The CSM provides the framework for identifying how the site became contaminated and how potential receptors may be exposed to contamination either in the present or the future i.e., it enables an assessment of the potential source - pathway - receptor linkages (complete pathways).

Potential Sources

Based on the current investigation, the following potential sources of contamination and associated contaminants of potential concern (COPC) have been identified.

- S1: Fill: Associated with levelling, demolition of former buildings on the site and backfilling (a common characteristic of Sydney suburbs):
 - o COPC include metals, total recoverable hydrocarbons (TRH), benzene, toluene, ethylbenzene, xylene (BTEX), polycyclic aromatic hydrocarbons (PAH), polychlorinated biphenyls (PCB), organochlorine pesticides (OCP), phenols and asbestos.
- S2: Former buildings and structures on the site:
 - o COPC include hazardous building materials such as asbestos containing materials (ACM), lead (in paint), synthetic mineral fibres (SMF) and polychlorinated biphenyls (PCB).
- S3: Chemical storage at the TAFE:
 - o COPC include metals, TRH, BTEX, PAH, phenols, and volatile organic compounds (VOC).
- S4: Current use as a car park:
 - o COPC include metals, TRH, BTEX, PAH, phenols.
- S5: Offsite source: Bankstown Fire Station:
 - o COPC include per- and poly-fluoroalkyl substances (PFAS).

Potential Receptors

The following potential human receptors have been identified:

- R1: Current users [TAFE staff and students / La Salle staff and students / car park users];
- R2: Construction and maintenance workers;
- R3: End users [mixed use]; and
- R4: Adjacent site users [residential and commercial].

The following potential environmental receptors have been identified:

- R5: Surface water [Salt Pan Creek];
- R6: Groundwater; and
- R7: Terrestrial ecology.

Potential Pathways

The following potential pathways have been identified:

- P1: Ingestion and dermal contact;
- P2: Inhalation of dust and / or vapours;
- P3: Surface water run-off;
- P4: Lateral migration of groundwater providing base flow to water bodies;
- P5: Leaching of contaminants and vertical migration into groundwater; and
- P6: Contact with terrestrial ecology.

Summary of Potentially Complete Exposure Pathways

A 'source-pathway-receptor' approach has been used to assess the potential risks of harm being caused to human or environmental receptors from contamination sources on or in the vicinity of the site, via exposure pathways (potential complete pathways). The possible pathways between the above sources (S1 to S4) and receptors (R1 to R7) are provided in below Table 19.

Table 19: Summary of Potentially Complete Exposure Pathways

Source and COPC	Transport Pathway	Receptor	Risk Management Action
S1: Fill - Metals, TRH, BTEX, PAH, PCB, OCP, phenols and asbestos. S2: Former buildings - ACM, lead, SMF and PCB. S3: Chemical storage - Metals, TRH, BTEX, PAH, phenols, VOCs	P1: Ingestion and dermal contact	R2: Construction and maintenance workers R3: End users [mixed use]	An intrusive investigation is recommended to assess the presence or otherwise of the identified potential sources and/or the contaminants associated with those sources. The investigation is recommended to include soil and groundwater sampling and testing.
	P2: Inhalation of dust and/or vapours	R1: Current users [TAFE staff and students / La Salle staff and students / car park users] R2: Construction and maintenance workers R3: End users [mixed use] R4: Adjacent site users [residential and commercial]	
	P3: Surface water run-off	R5: Surface water [Salt Pan Creek]	
	P4: Lateral migration of groundwater providing base flow to water bodies P5: Leaching of contaminants and vertical migration into groundwater	R5: Surface water [Salt Pan Creek] R6: Groundwater	

Source and COPC	Transport Pathway	Receptor	Risk Management Action
	P6: Contact with terrestrial ecology	R7: Terrestrial Ecology	
S4: Current use carpark- Metals, TRH, BTEX, PAH, phenols	P2: Inhalation of dust and/or vapours	R1: Current users TAFE staff and students / La Salle staff and students / car park users] R2: Construction and maintenance workers R3: End users [mixed use] R4: Adjacent site users [residential and commercial]	
	P4: Lateral migration of groundwater providing base flow to water bodies P5: Leaching of contaminants and vertical migration into groundwater	R5: Surface water [Salt Pan Creek] R6: Groundwater	
	P6: Contact with terrestrial ecology	R7: Terrestrial Ecology	
S5: Offsite source: Bankstown Fire Station - Metals, TRH, BTEX, PAH, phenols, VOCs.	P2: Inhalation of dust and/or vapours	R1: Current users [TAFE staff and students / La Salle staff and students / car park users] R2: Construction and maintenance workers R3: End users [mixed use] R4: Adjacent site users [residential and commercial]	
	P4: Lateral migration of groundwater providing base flow to water bodies P5: Leaching of contaminants and vertical migration into groundwater	R5: Surface water [Salt Pan Creek] R6: Groundwater	
	P6: Contact with terrestrial ecology	R7: Terrestrial Ecology	

The CSM is based on information presented in this report. As noted previously, some historical information for the additional lots comprising the site have not been obtained and reviewed. Whilst it is considered unlikely that the CSM will change significantly once the additional information is obtained, the CSM does require a review at that time.

8. Risk Rating

Based on the preliminary CSM and using the methodology outlined in Appendix H, a qualitative risk rating for the identified contamination sources listed in the CSM has been developed.

Table 20 presents the results of the application of the risk matrix (Appendix H) to each identified potential AEC.

Table 20: AEC Risk Rating

AEC	AEC Description	Probability	Consequence	Risk Number
S1	Fill	3	2	6
S2	Former Buildings	3	2	6
S3	Chemical Storage	2	5	10
S4	Current Use	2	2	4
S5	Bankstown Fire Station	2	5	10
			Site Risk Rating	10

The risk rating is based on information presented in this report. As noted previously, some historical information for the additional lots comprising the site have not been obtained and reviewed. Whilst it is considered unlikely that the risk rating will change significantly once the additional information is obtained, the risk rating does require a review.

9. Conclusions and Recommendations

Based on the available site history information obtained and reviewed, the site appears to have had a mix of vacant undeveloped land and residential uses until at least the 1960s, when construction of the TAFE and La Salle College began on the vacant portions of the site. Residential houses at the area now occupied by Bankstown TAFE were demolished and redeveloped as part of the TAFE during the 1970s. The remaining residential houses were slowly demolished and replaced with a carpark to be utilised by the TAFE starting in at least the 1980s until present day.

The historical photographs also suggest that the surrounding area was predominantly residential around the 1940s, with commercial, retail and medium to high density residential development gradually occurring over time.

A search of properties with EPA notices and licences and review of Section 10.7 Planning Certificates did not identify the site to be notified to the EPA as contaminated, be regulated under the CLM Act, or hold a licence or have received any EPA notices. It did identify one site within a 1 km search buffer of the site, a 7-Eleven service station located 170 m north-east of site and regulation under the CLM Act was not required. Bankstown City Council located 618 m south of the site had a POEO license which has since been surrendered. A review of council records identified SafeWork NSW records for Schedule 11 hazardous chemicals on premises from an unknown Greencap PSI at 500 Chapel Road, Bankstown which is a part of the Bankstown TAFE facilities and therefore within the site boundary for this investigation. The search detailed the storage of various pressurised gases and chemical storage not listed in the SafeWork NSW Schedule 11 search conducted by DP.

At the time of the site walkover, the site was a mix of the La Salle College including playing fields in the west and school facilities in the north, the Bankstown TAFE north-east and a mixed use carpark and childcare centre south-east.

At the time of this investigation, parts of the site were outside of the original scope of works and details regarding the identified data gaps are discussed in Sections 5.5 and 6. A supplementary desktop investigation will be required to close out the aforementioned data gaps and it is anticipated that this work will be completed alongside any future works, including a detailed site investigation (DSI).

Potential sources of contamination identified in this investigation include imported fill, former buildings / structures, chemical storage in the TAFE, the active car parks and the Bankstown Fire Station upgradient to the site. Based on the review of results of this PSI, and in accordance with the process outlined in Appendix H, the site has been assigned a contamination risk rating of 10, corresponding to a medium risk, noting however that the risk rating should be reviewed once identified data gaps are filled.

As the current investigation was limited to a desktop study, comments on the actual contamination status of the site cannot be provided unless intrusive investigations are undertaken to obtain quantitative data on the contamination status of the soil and groundwater. Notwithstanding, the desktop results to date suggest that the identified sources of potential contamination and assigned contamination risk for the site are not necessarily uncommon when compared to other similar properties in urban settings.

Accordingly, based on the results of this PSI, the following is recommended:

- **Detailed Site Investigation** - A detailed site investigation (DSI) for contamination with intrusive soil and groundwater / soil vapour (potentially) sampling to evaluate the potential contamination status of the site and assess the site's suitability (from a contamination standpoint) for a more sensitive land use. In addition, the DSI should provide recommendations on the need for any further targeted investigation(s) and / or site remediation if deemed necessary. As the details of the proposed development are not known at this stage, the DSI could be undertaken around the Development Application (DA) stage i.e., when particulars of the proposed development are known.

Based on the results of the PSI, it is considered that the site can be made suitable for the proposed SP2 Infrastructure (Educational Establishment and Health Services Facilities) zoning subject to implementation of the recommended investigations and remediation and / or management of contamination that may be identified from the investigations.

Whilst the extent and need for remediation, if any, will be dependent on the results of the intrusive investigation/s and the details of the proposed development, typical soil remediation options that may be viable (to be selected or revised based on type of contamination identified) have been provided below for information purposes only:

- Excavation and Offsite Disposal - Excavation of the impacted fill and off-site disposal to a suitably licensed landfill. Subject to complete removal (and validation) of the contamination source (including groundwater remediation if required), this option could likely render the site compatible with a proposed land use without the need for long term management strategies; or
- Capping and containment: This option typically comprises placement of a geotextile marker layer (such as bidum) over the contaminated profile and subsequently placement/installation of a layer of suitable capping material such as verified clean fill, or a permanent engineered pavement over the contaminated fill with a view to limiting the exposure of site users to contaminants. A physical barrier will require the preparation of and compliance with an Environmental Management Plan (EMP) for long term management of the capping layer, with provisions made for regular inspection and maintenance if necessary. Furthermore, a cap and contain remediation strategy will need to have an appropriate mechanism for public notification of any restrictions applying to the land to ensure that potential purchasers or other interested individuals are aware of the restrictions (e.g., appropriate notations on a planning certificate issued under Section 10.7 of the Environmental Planning and Assessment Act 1979 or a covenant registered on the title to land under section 88B of the Conveyancing Act 1919).

Should hydrocarbon contamination in groundwater be identified as part of the DSI, then dependent on the nature and severity of the contamination, Monitored Natural Attenuation (MNA) could be utilised as a groundwater remediation option.

11. Limitations

Douglas Partners (DP) has prepared this report for this project at 490 Chapel Rd & 347A Hume Highway, Bankstown in accordance with DP's proposal dated 26 August 2021 and acceptance received from Liam Rogers dated 26 October 2021. The work was carried out under DP's Conditions of Engagement. This report is provided for the exclusive use of City of Canterbury Bankstown Council for this project only and for the purposes as described in the report. It should not be used by or relied upon for other projects or purposes on the same or other site or by a third party. Any party so relying upon this report beyond its exclusive use and purpose as stated above, and without the express written consent of DP, does so entirely at its own risk and without recourse to DP for any loss or damage. In preparing this report DP has necessarily relied upon information provided by the client and/or their agents.

DP's advice is based upon the conditions encountered during this investigation. The accuracy of the advice provided by DP in this report may be affected by undetected variations in ground conditions across the site between and beyond the sampling and/or testing locations. The advice may also be limited by budget constraints imposed by others or by site accessibility.

The assessment of atypical safety hazards arising from this advice is restricted to the environmental components set out in this report and based on known project conditions and stated design advice and assumptions. While some recommendations for safe controls may be provided, detailed 'safety in design' assessment is outside the current scope of this report and requires additional project data and assessment.

This report must be read in conjunction with all of the attached and should be kept in its entirety without separation of individual pages or sections. DP cannot be held responsible for interpretations or conclusions made by others unless they are supported by an expressed statement, interpretation, outcome or conclusion stated in this report.

This report, or sections from this report, should not be used as part of a specification for a project, without review and agreement by DP. This is because this report has been written as advice and opinion rather than instructions for construction.

Notes About this Report

About this Report

Douglas Partners

Introduction

These notes have been provided to amplify DP's report in regard to classification methods, field procedures and the comments section. Not all are necessarily relevant to all reports.

DP's reports are based on information gained from limited subsurface excavations and sampling, supplemented by knowledge of local geology and experience. For this reason, they must be regarded as interpretive rather than factual documents, limited to some extent by the scope of information on which they rely.

Copyright

This report is the property of Douglas Partners Pty Ltd. The report may only be used for the purpose for which it was commissioned and in accordance with the Conditions of Engagement for the commission supplied at the time of proposal. Unauthorised use of this report in any form whatsoever is prohibited.

Borehole and Test Pit Logs

The borehole and test pit logs presented in this report are an engineering and/or geological interpretation of the subsurface conditions, and their reliability will depend to some extent on frequency of sampling and the method of drilling or excavation. Ideally, continuous undisturbed sampling or core drilling will provide the most reliable assessment, but this is not always practicable or possible to justify on economic grounds. In any case the boreholes and test pits represent only a very small sample of the total subsurface profile.

Interpretation of the information and its application to design and construction should therefore take into account the spacing of boreholes or pits, the frequency of sampling, and the possibility of other than 'straight line' variations between the test locations.

Groundwater

Where groundwater levels are measured in boreholes there are several potential problems, namely:

- In low permeability soils groundwater may enter the hole very slowly or perhaps not at all during the time the hole is left open;

- A localised, perched water table may lead to an erroneous indication of the true water table;
- Water table levels will vary from time to time with seasons or recent weather changes. They may not be the same at the time of construction as are indicated in the report; and
- The use of water or mud as a drilling fluid will mask any groundwater inflow. Water has to be blown out of the hole and drilling mud must first be washed out of the hole if water measurements are to be made.

More reliable measurements can be made by installing standpipes which are read at intervals over several days, or perhaps weeks for low permeability soils. Piezometers, sealed in a particular stratum, may be advisable in low permeability soils or where there may be interference from a perched water table.

Reports

The report has been prepared by qualified personnel, is based on the information obtained from field and laboratory testing, and has been undertaken to current engineering standards of interpretation and analysis. Where the report has been prepared for a specific design proposal, the information and interpretation may not be relevant if the design proposal is changed. If this happens, DP will be pleased to review the report and the sufficiency of the investigation work.

Every care is taken with the report as it relates to interpretation of subsurface conditions, discussion of geotechnical and environmental aspects, and recommendations or suggestions for design and construction. However, DP cannot always anticipate or assume responsibility for:

- Unexpected variations in ground conditions. The potential for this will depend partly on borehole or pit spacing and sampling frequency;
- Changes in policy or interpretations of policy by statutory authorities; or
- The actions of contractors responding to commercial pressures.

If these occur, DP will be pleased to assist with investigations or advice to resolve the matter.

About this Report

Site Anomalies

In the event that conditions encountered on site during construction appear to vary from those which were expected from the information contained in the report, DP requests that it be immediately notified. Most problems are much more readily resolved when conditions are exposed rather than at some later stage, well after the event.

Information for Contractual Purposes

Where information obtained from this report is provided for tendering purposes, it is recommended that all information, including the written report and discussion, be made available. In circumstances where the discussion or comments section is not relevant to the contractual situation, it may be appropriate to prepare a specially edited document. DP would be pleased to assist in this regard and/or to make additional report copies available for contract purposes at a nominal charge.

Site Inspection

The company will always be pleased to provide engineering inspection services for geotechnical and environmental aspects of work to which this report is related. This could range from a site visit to confirm that conditions exposed are as expected, to full time engineering presence on site.

MARION

 \mathcal{ST} 

D.P. 16888 E

I, William Deane Cowdery, of Sydney, licensed Surveyor, specially licensed under the Real Property Act 1900, do hereby solemnly and sincerely declare (a) that all boundaries and measurements shown on this plan are correct (b) that all survey marks found, and relevant physical objects on or adjacent to the boundaries are correctly represented (c) that all physical objects indicated actually exist in the positions shown (d) that the whole of the material facts in relation to the land are correctly represented (e) that the survey has been made by me, and I make this solemn declaration conscientiously believing the same to be true and by virtue of the provisions of the Oaths Act 1900.

W. D. Cowdery.

Licensed Surveyor

Subscribed and declared before me, at Sydney, this 11th day of March A.D. 1930.

Henry J. Russell

- No. 13,537 (average lands), to Francis Norman Christian, of Urunga, situated at Bellinger River, frontage 100 yards (plan cat. No. B. 126-21), six years from 4th October, 1925; annual rental £1, section B of northern training wall—under section 12 (33), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).
- No. 13,538 (average lands), to Francis Norman Christian, of Urunga, situated at Bellinger River, frontage 100 yards (plan cat. No. B. 127-21), six years from 4th October, 1925; annual rental, £1, section C of northern training wall—under section 12 (33), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).
- No. 13,539 (average lands), to Francis Norman Christian, of Urunga, situated at Bellinger River, frontage 100 yards (plan cat. No. B. 128-21), six years from 16th November, 1925; annual rental, £1, section E of northern training wall—under section 12 (33), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).

Special Conditions.

1. It is a condition of these leases that under Regulation 63 made under the abovementioned Acts the whole or any part of the land comprised therein may be resumed at any time without compensation for any public purpose or for the granting thereof of a Special Lease under the Crown Lands Acts.

2. The stones in the training wall are not to be removed, disturbed or injured in any way, and only oysters on the outside of the exterior stones shall be removed.

3. Should the District Engineer of the Public Works Department consider that the stability of the training wall in any leased area has been impaired in any way by the lessee, he shall direct the local Inspector of Fisheries to order the immediate forfeiture of the lease, as well as any rent which may have been paid in advance.

4. The leased areas are to be properly marked on the wall at each end by notice-boards erected at the expense of the lessee.

5. Should it be found necessary to add stones to or take stones away from any leased area of the wall for public purposes, notice of one month will be given the lessee, but no compensation is to be paid for such interference with his lease other than a reduction of rental.

6. Should it be found necessary to dredge near or deposit dredgings on or in the vicinity of any leased area, no compensation will be paid for any injury caused thereby other than a remission of such proportion of the rental as may be deemed equitable by the Minister.

[5942] Sydney, 13th April, 1926.

NOTIFICATION OF GRANTING OF OYSTER CULTURE LEASES.

IT is hereby notified that leases, for the purpose of oyster culture, of the lands specified in the Schedule hereunder have been granted to the undermentioned persons.

The leases are subject to the Fisheries Acts and the Regulations thereunder, and to the special conditions set out at the foot of the Schedule.

C. C. LAZZARINI.

SCHEDULE.

- No. 13,576 (average lands), to Commonwealth Oyster Company Limited, of Sydney, situated at Port Stephens, frontage 200 yards (plan cat. No. P. 1,201-36), fifteen years from 1st October, 1925; annual rental, £2—under section 12 (33), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).
- *No. 13,611 (inferior lands), to William Henry Shoemsmith, junior, of Jones Island, situated at Manning River, about 3 a. 1 r. 17 p. (plan cat. No. M. 381-31), five years from 13th April, 1926; annual rental, £1 14s.—under section 12 (33b), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).
- *No. 13,622 (inferior lands), to Charles Cuzco Diemar, of Nelson's Bay, situated at Port Stephens, about 1 a. 0 r. 17 p. (plan cat. No. P. 1,223-36), five years from 13th April, 1926; annual rental, £1 2s.—under section 12 (33b), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).
- *No. 13,658 (inferior lands), to Donald Robertson, of Newcastle, situated at Hunter River, frontage 150 yards (plan cat. No. H. 149-37), five years from 13th April, 1926; annual rental, 15s.—under section 12 (33b), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).

*No. 13,702 (inferior lands), to Edward James Ross, of Brooklyn, situated at Hawkesbury River, about 1 a. 0 r. 35 p. (plan cat. No. H. 505-41), five years from 13th April, 1926; annual rental, £1 4s.—under section 12 (33b), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).

*No. 13,709 (inferior lands), to Albert Nordstrom, of Bermagui, situated at Cuttagee Lake, frontage 100 yards (plan cat. No. C. 17-87), five years from 13th April, 1926; annual rental, 10s.—under section 12 (33b), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).

*No. 13,726 (inferior lands), to Arthur King Trethowan, of Sydney, situated at Nadgee River, frontage 758 yards (plan cat. No. N. 2-109), five years from 13th April, 1926; annual rental, £4 15s.—under section 12 (33b), Fisheries (Amendment) Act, 1910 (Fisheries Act, 1902).

Special Conditions.

1. It is a condition of these leases that under Regulation 63 made under the abovementioned Acts the whole or any part of the land comprised therein may be resumed at any time without compensation for any public purpose or for the granting thereof of a Special Lease under the Crown Lands Acts.

*2. No oysters may be removed from Oyster Leases Nos. 13,611, 13,622, 13,658, 13,702, 13,709 and 13,726 during the first year of their term. If any such lease be renewed for a second term of five years, it shall be subject to redetermination of rental during the ninth or any later year for a further (third) term of five years.

GOVERNMENT RAILWAYS.

REGENT'S PARK TO BANKSTOWN RAILWAY—NOTICE OF CONFIRMATION OF PLAN AND BOOK OF REFERENCE.

WITH reference to the notice of the Constructing Authority, dated the 28th January, 1926, relative to the taking of certain lands required for the purpose of constructing a railway from Regent's Park to Bankstown, and to make and complete certain works and conveniences in connection therewith: Notice is hereby given that no valid objection having been made to the taking of the lands required for the said railway, or to the erection of the said works, the said plan and book of reference have been duly confirmed by His Excellency the Governor, with the advice of the Executive Council, in accordance with the Public Works Act, 1912.

Dated at Sydney, this twenty-first day of April, 1926.

(L.S.) JAMES FRASER.
O. W. BRAIN.

... be resident without the State, but in any other part of the British Dominions, the instrument must be signed or acknowledged before the Registrar-General or Recorder of Titles of such Possession, or before any Judge, Notary Public, Justice of the Peace for New South Wales, or Commissioner for taking affidavits for New South Wales, or the Mayor or Chief Officer of any municipal or local government corporation of such part, or the Governor, Government Resident, or Chief Secretary of such part or such other person as the Chief Justice of New South Wales may appoint.

If resident in the United Kingdom then before the Mayor or Chief Officer of any corporation or a Notary Public.

If resident at any foreign place, then the parties should sign or acknowledge before a British Minister, Ambassador, Envoy, Minister Charge d'Affaires, Secretary of the Embassy or Legation, Consul-General, Consul, Vice-Consul, Acting Consul, Pro-consul or Consular Agent, who should affix his seal of office, or the attesting witness may make a declaration of the due execution thereof before one of such persons (who should sign and affix his seal to such declaration), or such other person as the said Chief Justice may appoint.

The fees are:—Lodgment fee 12/6 (includes endorsement on first certificate), and 2/6 for each additional certificate included in the Transfer, and 1/1 for every new Certificate of Title issued, unless the consideration is over £1,000, in which case the Certificate fee will be £1 5s. Additional fees, however, may be necessary in cases involving more than a simple diagram or more than six folios of engrossing.

Tenants in common must receive separate Certificates.

If part only of the land is transferred a new Certificate must issue, but the old Certificate may remain in the Office, or the Transferrer may take out a new Certificate for the residue.

SafeWork NSW Hazardous Chemicals Search

From: Licensing <licensing@safework.nsw.gov.au>
Sent: Wednesday, 1 December, 2021 4:25 PM
To: Henri Dubourdieu
Subject: SafeWork NSW: 00630223 –Site Search application – Result not found - 490 Chapel Rd and 347A Hume Hw Bankstown NSW 2200 [ref:_00D281hl6J._5004a5mXDS:ref]

Security Classification: Sensitive Personal
Please do not amend the subject line of this email

Dear Henri

Re: Site Search for Schedule 11 Hazardous Chemicals on premises Application – Result not found

I refer to your application for a Site Search for Schedule 11 Hazardous Chemicals on premises for the following site: 490 Chapel Rd and 347A Hume Hw Bankstown NSW 2200.

A search of the records held by SafeWork NSW has not located any records pertaining to the above-mentioned premises.

If you have any further information or if you have any questions, please use one of the following options, quoting the SafeWork NSW enquiry reference number: 00630223

- Email: licensing@safework.nsw.gov.au
- Phone: 13 10 50

Kind regards

Gabriela Draper

Council Planning Certificates

Nizam Ahamed
Douglas Partners Pty Ltd
96 Hermitage Road
WEST RYDE NSW 2114

PLANNING CERTIFICATE

Section 10.7 of the Environmental Planning and Assessment Act, 1979.

Certificate No: 20218918
3 November 2021

Land which Certificate is issued for:

Lot 2 DP 109612

347A Hume Highway, BANKSTOWN NSW 2200

**INFORMATION PROVIDED UNDER SECTION 10.7 (2)
OF THE ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979.**

Land which Certificate is issued for:

Lot 2 DP 109612

347A Hume Highway, BANKSTOWN NSW 2200

**PART 1:
ENVIRONMENTAL PLANNING INSTRUMENTS**

1.1 Principal Environmental Planning Instrument

Bankstown Local Environmental Plan 2015

Date effective from

5 March 2015

Land Use Zone

ZONE SP2 INFRASTRUCTURE: Educational Establishment

1. Permitted without consent

Nil

2. Permitted with consent

Aquaculture; Roads; The purpose shown on the [Land Zoning Map](#), including any development that is ordinarily incidental or ancillary to development for that purpose

3. Prohibited

Any development not specified in item 1 or 2

The above information will assist in determining how the subject land may be developed. It is recommended that you read this section in conjunction with a full copy of any relevant environmental planning instrument as there may be additional provisions that affect how the land may be developed.

1.2 **State Environmental Planning Policies**

Note: The following information indicates those State Environmental Planning Policies (SEPP) which may apply to the subject land. A summary explanation of each SEPP can be sourced from the Department of Planning, Industry and Environment (DPIE) website at www.planning.nsw.gov.au. The full wording of each SEPP can also be accessed via the DPIE website.

State Environmental Planning Policies:

No. 19 - Bushland in Urban Areas

No. 21 - Caravan Parks

No. 33 - Hazardous and Offensive Development

No. 50 - Canal Estates

No. 55 - Remediation of Land

No. 64 - Advertising and Signage

No. 65 - Design Quality of Residential Apartment Development

State Environmental Planning Policy (Affordable Rental Housing) 2009

State Environmental Planning Policy (Building Sustainability Index: BASIX) 2004

State Environmental Planning Policy (Coastal Management) 2018

State Environmental Planning Policy (Educational Establishments and Child Care Facilities) 2017

State Environmental Planning Policy (Exempt and Complying Development Codes) 2008

State Environmental Planning Policy (Housing for Seniors or People with a Disability) 2004

State Environmental Planning Policy (Infrastructure) 2007

State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007

State Environmental Planning Policy (Primary Production and Rural Development) 2019

State Environmental Planning Policy (State and Regional Development) 2011

State Environmental Planning Policy (Vegetation in Non-Rural Areas) 2017

Greater Metropolitan Regional Environmental Plan

Georges River Catchment

Aims to protect the water quality of the Georges River and its tributaries and the environmental quality of the whole catchment. The objectives of the plan are to be achieved through coordinated land use planning and development control. The plan establishes the framework within which local, State and Federal agencies will consult so that there is a consistent approach to planning and development within the catchment.

Proposed State Environmental Planning Policies

Not applicable

1.3 **Proposed Environmental Planning Instruments (including any Planning Proposals) that are or have been the subject of community consultation or on public exhibition under the Act**

The land is affected by Planning Proposal (PP_2019_CBANK_005) which has been placed on public exhibition. The Planning Proposal seeks to produce a single set of planning rules for the Canterbury Bankstown Local Government Area and to implement key actions of current land use strategies.

1.4 **Development Control Plans**

BANKSTOWN DEVELOPMENT CONTROL PLAN 2015

Contains detailed design guidelines and development standards for development in the former Bankstown City.

1.5 **Contribution Plans**

BANKSTOWN DEVELOPMENT CONTRIBUTIONS PLAN 2019

Development Contributions Plan prepared and adopted under the Environmental Planning and Assessment Act, 1979 and Environmental Planning and Assessment Regulation 2000.

PART 2: RESTRICTIONS ON DEVELOPMENT

2.1 Heritage

The land is not affected by a heritage item or within a heritage conservation area under the relevant Principal Environmental Planning Instrument.

2.2 Mine Subsidence

The subject land is not within a mine subsidence district within the meaning of Section 20 of the *Coal Mine Subsidence Compensation Act 2017*.

2.3 Road Widening and Road Realignment

Whether or not the land is affected by a road widening or road realignment proposal under Division 2 or Part 3 of the Roads Act 1993 or an environmental planning instrument;

The land is not affected by a road widening or road realignment proposal under Division 2 or Part 3 of the Roads Act 1993, or an environmental planning instrument.

Whether or not the land is affected by a road widening or road realignment proposal under any resolution of Council.

The land is not affected by a road widening or road realignment proposal under any resolution of Council.

2.4 Council and Other Public Authority Policies on Hazard Risk Restrictions

Whether or not the land is affected by a policy adopted by Council or adopted by any other public authority (and notified to the Council for the express purpose of its adoption by that authority being referred to) that restricts the development of the land because of the likelihood of:

- **Land Slip**

The land is not affected by a policy restriction relating to landslip

- **Bushfire**

Not applicable

- **Tidal Inundation**

The land is not affected by a policy restriction relating to tidal inundation

- **Subsidence**

The land is not affected by a policy restriction relating to subsidence

- **Acid Sulfate Soils**

The land is not affected by a policy restriction relating to acid sulfate soils.

- **Unhealthy Building Land**

The land is not affected by a policy restriction relating to Unhealthy Building Land.

- **Any Other Risk**

Not applicable.

2.5 Flooding

The land, or part of the land, **is within** the flood planning area (FPA) and consequently the probable maximum flood (PMF).

The land, or part of the land, **is subject to** flood related development controls.

Please note that a Stormwater Systems Report (SSR) will be required from Council (cost applies) to further understand constraints that may relate to development of the property. An SSR can be ordered online from Council's website.

You are advised to refer to the following:

- The relevant Development Control Plan (noted in Section 1.4 of this certificate) for further information on Council's approach to Flood Risk Management, and
- Frequently Asked Questions and details on the study relevant to your catchment area are available at Council's Floodplain Management webpage (<https://cb.city/flooding>).

NB: The FPA is the 1% Annual Exceedance Probability (AEP) plus generally a 0.5m freeboard or as outlined in relevant Development Control Plan.

2.6 Matters arising under the Contaminated Land Management Act, 1997.

Council is not aware of the land being affected by any matters as prescribed by Section 59 (2) of the *Contaminated Land Management Act 1997*.

Please refer to the *NSW Environmental Protection Agency (EPA)* for more information.

2.7 Land Reserved For Acquisition

There is no environmental planning instrument, or proposed environmental planning instrument, applying to the land that makes provision for the acquisition of the land (or any part thereof) by a public authority, as referred to in Section 3.15 of the Environmental Planning and Assessment Act 1979.

2.8 Property Vegetation Plans

Not applicable

2.9 Orders under Trees (Disputes Between Neighbours) Act 2006

Not applicable

2.10 Directions under Part 3A

Not applicable

2.11 Site Compatibility Certificates and Conditions for Seniors Housing

Not applicable

2.12 Site Compatibility Certificates for Infrastructure

Not applicable

2.13 Site Compatibility Certificates and Conditions for Affordable Rental Housing

Not applicable

2.14 Annual charges under Local Government Act 1993 for coastal protection services that relate to existing coastal protection works

Not applicable

2.15 Biodiversity Certified Land

Not applicable

2.16 Paper Subdivision Information

Not applicable

2.17 Site Verification Certificates

Not applicable

2.18 Loose-Fill Asbestos Ceiling Insulation

Not applicable

2.19 Affected Building Notices and Building Product Rectification Orders

Not applicable

2.20 State Environmental Planning Policy (Western Sydney Aerotropolis) 2020

Not applicable

2.21 Complying Development

*Whether or not the land is land on which complying development may be carried out under each of the Codes for complying development because of the provisions of clauses 1.17A(1) (c) to (e), (2), (3) and (4), 1.18(1)(c3) and 1.19 of State Environmental Planning Policy (Exempt and Complying Development Codes) 2008 and, if no complying development may be carried out on that land under that Policy, the reasons why complying development may not be carried out on that land. **Note that in order for complying development to be able to be carried out, it must be permissible in the relevant zone in the first place.***

Housing Code (if in a residential zone)	Yes
Rural Housing Code (if in a rural residential zone)	Not applicable
Low Rise Housing Diversity Code	Yes
Housing Alterations Code	Yes
General Development Code	Yes
Greenfield Housing Code	Not applicable
Inland Code	Not applicable
Commercial and Industrial (New Building and Alterations) Code	Yes
Commercial and Industrial Alterations Code	Yes
Container Recycling Facilities Code	Yes
Demolition Code	Yes
Subdivision Code	Yes
Fire Safety Code	Yes

Important Disclaimer: This clause of the Certificate only contains information in respect of that required by clause 3 of Schedule 4 of the Environmental Planning and Assessment Regulation 2000, in relation to Complying Development under State Environmental Planning Policy (Exempt and Complying Development Codes) 2008. Other provisions contained in the SEPP, including but not limited to, minimum allotment size requirements, specified development standards or any other general exclusions, may preclude Complying Development under the SEPP from being able to be carried out. You will need to refer to the SEPP for complete details. It is your responsibility to ensure that you comply with all other general requirements of the SEPP. Failure to comply with these provisions may mean that any Complying Development Certificate issued under the provisions of the SEPP is invalid.

**PART 3:
INFORMATION PROVIDED UNDER SECTION 10.7 (5)
OF THE ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979.**

Note: When information pursuant to Section 10.7(5) is requested the Council is under no obligation to furnish any of the information supplied herein pursuant to that Section. Council draws your attention to Section 10.7(6), which states that a Council shall not incur any liability in respect of any advice provided in good faith pursuant to sub-section (5). The absence of any reference to any matter affecting the land shall not imply that the land is not affected by any matter not referred to in this Certificate.

3.1 Additional Flood Planning Advice

In addition to Section 2.5 of this certificate, the following information may assist in interpreting the DCP:

Flooding - Salt Pan C17 Study 2009, Policy

The land, or part of the land, is subject to flood related development controls under the principal EPI (noted in section 1.1 of this certificate) and the Development Control Plan (noted in section 1.4 of this certificate).

These flood related development controls are informed by the Salt Pan Creek Stormwater Catchment Study (June 2007) and Report Addendum (October 2009). The study can be viewed online at <https://cb.city/flooding> – Council’s Floodplain Management webpage. The study identifies where the land, or part of the land, is affected by the 100 year flood and which, or both, of the following flood risk precincts may apply:

- High flood risk precinct – Land below the 100 year flood that is either subject to a high hydraulic hazard or where there are significant evacuation difficulties; and
- Medium flood risk precinct - Land below the 100 year flood that is not subject to a high hydraulic hazard and where there are no evacuation difficulties.

The principal EPI can be viewed online at the NSW legislation website – www.legislation.nsw.gov.au. The relevant Development Control Plan includes flood related development controls for properties based on the relevant flood risk precinct in the Flood Risk Management Chapter. This can be viewed on Council’s website - www.cbcity.nsw.gov.au.

3.2 Tree Preservation Order

A tree preservation order applies to the whole of the City of Canterbury Bankstown.

3.3 Council Policy on Contaminated Land

On 22 August 2017 Council adopted a policy on contaminated land. This policy will restrict development of land:

- a) which is affected by contamination;
- b) which has been used for certain purposes;
- c) in respect of which there is not sufficient information about contamination;
- d) which is proposed to be used for certain purposes;
- e) in other circumstances contained in the policy.

3.4 General Advice Regarding Use of Property

Persons considering commencing a use of or purchasing a property are advised to seek confirmation that the current, or intended, use (as the case may be) has been approved by Council, or does not require Council approval. It is pointed out that the question of “existing use rights” within the meaning of the Environmental Planning and Assessment Act, 1979, is a complex matter, and that the commencement of a use without Council approval (where required) is unlawful and may be subject to enforcement action.

3.5

Other Matters
Not applicable.

Boarding houses; Building identification signs; Business identification signs; Centre-based child care facilities; Commercial premises; Community facilities; Educational establishments; Entertainment facilities; Function centres; Hotel or motel accommodation; Information and education facilities; Medical centres; Oyster aquaculture; Passenger transport facilities; Recreation facilities (indoor); Registered clubs; Residential flat buildings; Respite day care centres; Restricted premises; Roads; Seniors housing; Shop top housing; Tank-based aquaculture; Any other development not specified in item 1 or 3

3. Prohibited

Agriculture; Air transport facilities; Airstrips; Animal boarding or training establishments; Biosolids treatment facilities; Boat building and repair facilities; Boat launching ramps; Boat sheds; Camping grounds; Caravan parks; Cemeteries; Charter and tourism boating facilities; Crematoria; Depots; Eco-tourist facilities; Electricity generating works; Exhibition homes; Exhibition villages; Extractive industries; Farm buildings; Forestry; Freight transport facilities; Heavy industrial storage establishments; Highway service centres; Home occupations (sex services); Industrial retail outlets; Industrial training facilities; Industries; Jetties; Marinas; Mooring pens; Moorings; Mortuaries; Open cut mining; Pond-based aquaculture; Port facilities; Residential accommodation; Resource recovery facilities; Rural industries; Sewage treatment plants; Sex services premises; Signage; Storage premises; Transport depots; Truck depots; Vehicle body repair workshops; Warehouse and distribution centres; Waste disposal facilities; Water recreation structures; Water recycling facilities; Wharf or boating facilities; Wholesale supplies

Bankstown Local Environmental Plan 2015

Date effective from

5 March 2015

Land Use Zone

ZONE SP2 INFRASTRUCTURE: Educational Establishment

1. Permitted without consent

Nil

2. Permitted with consent

Aquaculture; Roads; The purpose shown on the [Land Zoning Map](#), including any development that is ordinarily incidental or ancillary to development for that purpose

3. Prohibited

Any development not specified in item 1 or 2

The above information will assist in determining how the subject land may be developed. It is recommended that you read this section in conjunction with a full copy of any relevant environmental planning instrument as there may be additional provisions that affect how the land may be developed.

1.2 **State Environmental Planning Policies**

Note: The following information indicates those State Environmental Planning Policies (SEPP) which may apply to the subject land. A summary explanation of each SEPP can be sourced from the Department of Planning, Industry and Environment (DPIE) website at www.planning.nsw.gov.au. The full wording of each SEPP can also be accessed via the DPIE website.

State Environmental Planning Policies:

No. 19 - Bushland in Urban Areas

No. 21 - Caravan Parks

No. 33 - Hazardous and Offensive Development

No. 50 - Canal Estates

No. 55 - Remediation of Land

No. 64 - Advertising and Signage

No. 65 - Design Quality of Residential Apartment Development

State Environmental Planning Policy (Affordable Rental Housing) 2009

State Environmental Planning Policy (Building Sustainability Index: BASIX) 2004

State Environmental Planning Policy (Coastal Management) 2018

State Environmental Planning Policy (Educational Establishments and Child Care Facilities) 2017

State Environmental Planning Policy (Exempt and Complying Development Codes) 2008

State Environmental Planning Policy (Housing for Seniors or People with a Disability) 2004

State Environmental Planning Policy (Infrastructure) 2007

State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007

State Environmental Planning Policy (Primary Production and Rural Development) 2019

State Environmental Planning Policy (State and Regional Development) 2011

State Environmental Planning Policy (Vegetation in Non-Rural Areas) 2017

Greater Metropolitan Regional Environmental Plan

Georges River Catchment

Aims to protect the water quality of the Georges River and its tributaries and the environmental quality of the whole catchment. The objectives of the plan are to be achieved through coordinated land use planning and development control. The plan establishes the framework within which local, State and Federal agencies will consult so that there is a consistent approach to planning and development within the catchment.

Proposed State Environmental Planning Policies

Not applicable

1.3 **Proposed Environmental Planning Instruments (including any Planning Proposals) that are or have been the subject of community consultation or on public exhibition under the Act**

The land is affected by Planning Proposal (PP_2019_CBANK_005) which has been placed on public exhibition. The Planning Proposal seeks to produce a single set of planning rules for the Canterbury Bankstown Local Government Area and to implement key actions of current land use strategies.

1.4 **Development Control Plans**

BANKSTOWN DEVELOPMENT CONTROL PLAN 2015

Contains detailed design guidelines and development standards for development in the former Bankstown City.

1.5 **Contribution Plans**

BANKSTOWN DEVELOPMENT CONTRIBUTIONS PLAN 2019

Development Contributions Plan prepared and adopted under the Environmental Planning and Assessment Act, 1979 and Environmental Planning and Assessment Regulation 2000.

PART 2: RESTRICTIONS ON DEVELOPMENT

2.1 Heritage

The land is not affected by a heritage item or within a heritage conservation area under the relevant Principal Environmental Planning Instrument.

2.2 Mine Subsidence

The subject land is not within a mine subsidence district within the meaning of Section 20 of the *Coal Mine Subsidence Compensation Act 2017*.

2.3 Road Widening and Road Realignment

Whether or not the land is affected by a road widening or road realignment proposal under Division 2 or Part 3 of the Roads Act 1993 or an environmental planning instrument;

The land is not affected by a road widening or road realignment proposal under Division 2 or Part 3 of the Roads Act 1993, or an environmental planning instrument.

Whether or not the land is affected by a road widening or road realignment proposal under any resolution of Council.

The land is not affected by a road widening or road realignment proposal under any resolution of Council.

2.4 Council and Other Public Authority Policies on Hazard Risk Restrictions

Whether or not the land is affected by a policy adopted by Council or adopted by any other public authority (and notified to the Council for the express purpose of its adoption by that authority being referred to) that restricts the development of the land because of the likelihood of:

- **Land Slip**

The land is not affected by a policy restriction relating to landslip

- **Bushfire**

Not applicable

- **Tidal Inundation**

The land is not affected by a policy restriction relating to tidal inundation

- **Subsidence**

The land is not affected by a policy restriction relating to subsidence

- **Acid Sulfate Soils**

The land is not affected by a policy restriction relating to acid sulfate soils.

- **Unhealthy Building Land**

The land is not affected by a policy restriction relating to Unhealthy Building Land.

- **Any Other Risk**

Not applicable.

2.5 Flooding

The land, or part of the land, **is within** the flood planning area (FPA) and consequently the probable maximum flood (PMF).

The land, or part of the land, **is subject to** flood related development controls.

Please note that a Stormwater Systems Report (SSR) will be required from Council (cost applies) to further understand constraints that may relate to development of the property. An SSR can be ordered online from Council's website.

You are advised to refer to the following:

- The relevant Development Control Plan (noted in Section 1.4 of this certificate) for further information on Council's approach to Flood Risk Management, and
- Frequently Asked Questions and details on the study relevant to your catchment area are available at Council's Floodplain Management webpage (<https://cb.city/flooding>).

NB: The FPA is the 1% Annual Exceedance Probability (AEP) plus generally a 0.5m freeboard or as outlined in relevant Development Control Plan.

2.6 Matters arising under the Contaminated Land Management Act, 1997.

Council is not aware of the land being affected by any matters as prescribed by Section 59 (2) of the *Contaminated Land Management Act 1997*.

Please refer to the *NSW Environmental Protection Agency (EPA)* for more information.

2.7 Land Reserved For Acquisition

There is no environmental planning instrument, or proposed environmental planning instrument, applying to the land that makes provision for the acquisition of the land (or any part thereof) by a public authority, as referred to in Section 3.15 of the Environmental Planning and Assessment Act 1979.

2.8 Property Vegetation Plans

Not applicable

2.9 Orders under Trees (Disputes Between Neighbours) Act 2006

Not applicable

2.10 Directions under Part 3A

Not applicable

2.11 Site Compatibility Certificates and Conditions for Seniors Housing

Not applicable

2.12 Site Compatibility Certificates for Infrastructure

Not applicable

2.13 Site Compatibility Certificates and Conditions for Affordable Rental Housing

Not applicable

2.14 Annual charges under Local Government Act 1993 for coastal protection services that relate to existing coastal protection works

Not applicable

2.15 Biodiversity Certified Land

Not applicable

2.16 Paper Subdivision Information

Not applicable

2.17 Site Verification Certificates

Not applicable

2.18 Loose-Fill Asbestos Ceiling Insulation

Not applicable

2.19 Affected Building Notices and Building Product Rectification Orders

Not applicable

2.20 State Environmental Planning Policy (Western Sydney Aerotropolis) 2020

Not applicable

2.21 Complying Development

*Whether or not the land is land on which complying development may be carried out under each of the Codes for complying development because of the provisions of clauses 1.17A(1) (c) to (e), (2), (3) and (4), 1.18(1)(c3) and 1.19 of State Environmental Planning Policy (Exempt and Complying Development Codes) 2008 and, if no complying development may be carried out on that land under that Policy, the reasons why complying development may not be carried out on that land. **Note that in order for complying development to be able to be carried out, it must be permissible in the relevant zone in the first place.***

Housing Code (if in a residential zone)	Yes
Rural Housing Code (if in a rural residential zone)	Not applicable
Low Rise Housing Diversity Code	Yes
Housing Alterations Code	Yes
General Development Code	Yes
Greenfield Housing Code	Not applicable
Inland Code	Not applicable
Commercial and Industrial (New Building and Alterations) Code	Yes
Commercial and Industrial Alterations Code	Yes
Container Recycling Facilities Code	Yes
Demolition Code	Yes
Subdivision Code	Yes
Fire Safety Code	Yes

Important Disclaimer: This clause of the Certificate only contains information in respect of that required by clause 3 of Schedule 4 of the Environmental Planning and Assessment Regulation 2000, in relation to Complying Development under State Environmental Planning Policy (Exempt and Complying Development Codes) 2008. Other provisions contained in the SEPP, including but not limited to, minimum allotment size requirements, specified development standards or any other general exclusions, may preclude Complying Development under the SEPP from being able to be carried out. You will need to refer to the SEPP for complete details. It is your responsibility to ensure that you comply with all other general requirements of the SEPP. Failure to comply with these provisions may mean that any Complying Development Certificate issued under the provisions of the SEPP is invalid.

**PART 3:
INFORMATION PROVIDED UNDER SECTION 10.7 (5)
OF THE ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979.**

Note: When information pursuant to Section 10.7(5) is requested the Council is under no obligation to furnish any of the information supplied herein pursuant to that Section. Council draws your attention to Section 10.7(6), which states that a Council shall not incur any liability in respect of any advice provided in good faith pursuant to sub-section (5). The absence of any reference to any matter affecting the land shall not imply that the land is not affected by any matter not referred to in this Certificate.

3.1 Additional Flood Planning Advice

In addition to Section 2.5 of this certificate, the following information may assist in interpreting the DCP:

Flooding - Salt Pan C17 Study 2009, Policy

The land, or part of the land, is subject to flood related development controls under the principal EPI (noted in section 1.1 of this certificate) and the Development Control Plan (noted in section 1.4 of this certificate).

These flood related development controls are informed by the Salt Pan Creek Stormwater Catchment Study (June 2007) and Report Addendum (October 2009). The study can be viewed online at <https://cb.city/flooding> – Council’s Floodplain Management webpage. The study identifies where the land, or part of the land, is affected by the 100 year flood and which, or both, of the following flood risk precincts may apply:

- High flood risk precinct – Land below the 100 year flood that is either subject to a high hydraulic hazard or where there are significant evacuation difficulties; and
- Medium flood risk precinct - Land below the 100 year flood that is not subject to a high hydraulic hazard and where there are no evacuation difficulties.

The principal EPI can be viewed online at the NSW legislation website – www.legislation.nsw.gov.au. The relevant Development Control Plan includes flood related development controls for properties based on the relevant flood risk precinct in the Flood Risk Management Chapter. This can be viewed on Council’s website - www.cbcity.nsw.gov.au.

3.2 Tree Preservation Order

A tree preservation order applies to the whole of the City of Canterbury Bankstown.

3.3 Council Policy on Contaminated Land

On 22 August 2017 Council adopted a policy on contaminated land. This policy will restrict development of land:

- a) which is affected by contamination;
- b) which has been used for certain purposes;
- c) in respect of which there is not sufficient information about contamination;
- d) which is proposed to be used for certain purposes;
- e) in other circumstances contained in the policy.

3.4 General Advice Regarding Use of Property

Persons considering commencing a use of or purchasing a property are advised to seek confirmation that the current, or intended, use (as the case may be) has been approved by Council, or does not require Council approval. It is pointed out that the question of “existing use rights” within the meaning of the Environmental Planning and Assessment Act, 1979, is a complex matter, and that the commencement of a use without Council approval (where required) is unlawful and may be subject to enforcement action.

3.5

Other Matters
Not applicable.

EXECUTIVE SUMMARY

Alliance Geotechnical Pty Ltd (AG) was engaged by Sydney Catholic Schools c/ Munns Sly Moore, to undertake a stage 1 preliminary site investigation (PSI) for 544 Chapel Rd, Bankstown NSW (refer **Figure 1** with the 'site' boundaries outlined in **Figure 2**).

AG has the following project appreciation:

- The site is proposed for redevelopment, comprising a new classroom building construction; and
- A contamination assessment of the site is required for inclusion in a development application for the proposed redevelopment.

The objectives of this investigation were to:

- Assess the potential for contamination to be present on the site as a result of past and current land use activities;
- Provide advice on whether the site would be suitable (in the context of land contamination) for proposed land use setting; and
- Provide recommendations for further investigation, management and/or remediation (if warranted).

The scope of works undertaken to address the investigation objectives, included:

- A desktop review;
- A site walkover and intrusive soil sampling; and
- Data assessment and reporting.

Based on AG's assessment of the desktop review information and fieldwork data, in the context of the proposed apartment land use, AG makes the following conclusions:

- One (1) Areas of environmental concern (AEC) has been identified for the site; and
- Further assessment of the identified AEC, and subsequent management / remediation of identified unacceptable land contamination risks (if warranted), would be required to confirm land use suitability (in the context of land contamination) for the proposed redevelopment works.

Based on these conclusions, AG makes the following recommendations:

- A stage 2 detailed site investigation (DSI) should be undertaken for the identified AEC.
- In the event that the identified AEC is not accessible during the undertaking of the stage 2 DSI, consideration should be given to preparation of a remedial action plan (RAP), setting out what supplementary assessment works would be required; and
- Any further contamination assessment works should be undertaken by a suitably experienced environmental consultant.

1. INTRODUCTION

1.1. Background

Alliance Geotechnical Pty Ltd (AG) was engaged by Sydney Catholic Schools c/ Munns Sly Moore, to undertake a Stage 1 Preliminary Site Investigation (PSI) for La Salle Catholic College, 544 Chapel Rd, Bankstown NSW (refer **Figure 1** with the 'site' boundaries outlined in **Figure 2**).

AG has the following project appreciation:

- The site is proposed for redevelopment, comprising a new classroom building construction; and
- A contamination assessment of the site is required for inclusion in a development application for the proposed redevelopment.

1.2. Objectives

The objectives of this project were to:

- Assess the potential for contamination to be present on the site as a result of past and current land use activities;
- Provide advice on whether the site would be suitable (in the context of land contamination) for the proposed land use setting; and
- Provide recommendations for further investigation, management and/or remediation (if warranted).

1.3. Scope of Work

Alliance Geotechnical undertook the following scope of works to address the project objective:

- A desktop review;
- A site walkover and intrusive soil sampling; and
- Data assessment and reporting.

2. SITE IDENTIFICATION

The site is identified as Portion of Lot 2 in DP109612, & Lot 202 in DP1231757.

The approximate geographic coordinates of the middle of the site, inferred from Google Earth were 33°54'30" S and 151°02'03" E.

The locality of the site is set out in **Figure 1**.

The general layout and boundary of the site is set out in **Figure 2**.

The site is located within the existing school grounds, and covers an area of approximately 2,200m².

3. GEOLOGY, ACID SULPHATE SOILS, TOPOGRAPHY AND HYDROGEOLOGY

3.1. Geology

A review of the Penrith 1:100,000 Geological Series Sheet 9030 (Edition 1) 1991, indicated that the site is likely to be underlain by Middle Triassic Bringelly Shale (Rwb), comprising shale, carbonaceous claystone, laminite, fine to medium-grained lithic sandstone, rare coal.

3.2. Acid Sulphate Soils

A review of the DLWC Botany Bay Acid Sulfate Soil Risk Map indicates that the site lies in an area mapped as '*No Known Occurrence*' with respect to acid sulfate soils. This infers that land management activities are not likely to be affected by acid sulfate soil materials.

Further assessment of acid sulfate soils in the context of this investigation is considered by AG as not warranted.

3.3. Topography

The site topography is generally flat, with a slight north west facing slope. AG understands that the sites are located between elevations of approximately 53m to 64m Australian Height Datum.

3.4. Hydrogeology

Surface water courses proximal to the site included Coxs Creek (an upper tributary to the Cooks River), approximately 2.15km to the east, and then the Georges River, located approximately 5.4km to the west.

Based on distances to the nearest surface water course and the site topography, groundwater flow in the vicinity of the site is considered likely to be towards the south-east.

A review of the NSW Office of Water groundwater database ([www.http://allwaterdata.water.nsw.gov.au/water](http://allwaterdata.water.nsw.gov.au/water)) implemented on 12 September 2019 indicated there was no registered groundwater features located within a 500m radius of the site.

A copy of the NSW Office of Water search record is presented in **Appendix E**.

4. SITE HISTORY AND LAND USE

4.1. Land Titles

A search of historical land title ownership was undertaken. The search results indicate that registered proprietors of the site since 1916 have been Trustees of Trustees of the Sisters of Saint Joseph, prior to the Trustees of the Roman Catholic Church in 1952.

The results of the land title ownership search indicate a low potential for land contaminating activities to have been undertaken on the site. Further assessment of potential land contaminating activities, in the context of other historical information identified during this investigation and site walkover observations, is considered warranted.

A copy of the land title search record is presented in **Appendix B**.

4.2. Aerial Imagery

A review of selected historical aerial imagery of the site was undertaken. Observations made of the imagery considered relevant to this investigation, are presented in **Table 4.2**.

Table 4.2. Aerial Imagery Observations

Image Date	Site Features	Surrounding Land Use Settings
1930	Site appears to be undeveloped, and used as pastoral land.	Rural residential and pastoral / grazing land.
1955	A few buildings (potentially school buildings) have been constructed within the site.	Further residential development.
1970	Several large buildings and hardstand areas are taking up the majority of the site.	No significant change from previous image.
1986	No significant change from previous image	No significant change from previous image.
1998	No significant change from previous image.	No significant change from previous image.
2007	No significant change from previous image	No significant change from previous image.
2018 (Nearmap)	No significant change from previous image	No significant change from previous image.

The aerial imagery review indicated that the site has been used for its current purposes since its initial development. As such the potential for land contaminating activities to have been undertaken (between 1930 and 2018) is low, with the exception of localised uncontrolled filling across the site with earthworks.

Further assessment of the localised filling activities across the site, in the context of other historical information identified during this investigation and site walkover observations, is considered warranted.

4.3. Anecdotal Information

There was no anecdotal information provided to AG as part of this project.

4.4. Incident Reports

There was no anecdotal information provided to AG as part of this project.

4.5. Complaints History

There was no complaints history provided to AG during the investigation.

4.6. Previous Contamination Assessments

There were no previous contamination assessment reports made available to AG during this investigation.

5. REGULATORY RECORDS

5.1. NSW EPA CLM Act Record of Notices

A search of the publicly available online NSW EPA CLM Act Record of Notices was completed on 12 September 2019. The results indicated that the site was not the subject of any notifications under Section 58 of the *Contaminated Land Management Act 1997*.

A copy of the CLM Act Record of Notices search record is presented in **Appendix C**.

5.2. NSW EPA POEO Act Register of Licences, Applications and Notices

A search of the publicly available online NSW EPA Record of Notices was completed on 12 September 2019. The results indicated that the site was not the subject of any licences, applications, notices, audits or pollution studies or reduction programs under Section 308 of the *Protection of the Environment Operations Act 1997*.

A copy of the POEO Act Register of Licences, Applications and Notices search record is presented in **Appendix C**.

5.3. NSW EPA CLM Act Register of Notified Sites

A search of the publicly available online register of sites notified to the NSW EPA under Section 60 of the *Contaminated Land Management Act 1997*, was undertaken on 12 September 2019. The results indicated that the site was not listed on the register, nor were any properties located on adjacent land.

5.4. Section 10.7 Planning Certificate

A copy of the planning certificate issued for the site under Section 10.7 of the Environmental Planning and Assessment Act was reviewed. The certificate indicated that, within the meaning of the Contaminated Land Management Act, the site was not:

- Significantly contaminated land;
- Subject to a management order;
- The subject of an approved voluntary management proposal;
- Subject to an ongoing maintenance order; or
- The subject of a site audit statement.

A copy of the planning certificate is presented in **Appendix D**.

5.5. SafeWork NSW Stored Chemical Information Database (SCID)

A search of Safe Work NSW stored chemical information database (SCID) was not undertaken for the site. A review of historical aerial imagery and historical land title ownership records for the site did not indicate a potential for licensable quantities of dangerous goods to have been historically stored on the site. AG considers that further assessment of storage of licensable quantities of dangerous goods on the site is not warranted.

6. SITE WALKOVER

A site walkover was undertaken on 10th September 2019 by a suitably experienced AG environmental consultant (Mr Steven Wallace). The purpose of the site walkover was to make observations of land use activities on the site, and on properties immediately adjacent to the site.

6.1. Current Land Use Activity

The land use setting on the site appeared to be for educational purposes.

6.2. Buildings and General Infrastructure

The following buildings and infrastructure were observed on the site:

- Multi-storey classroom buildings

The remainder of the site was covered with associated hardstand, carpark or landscaping.

Photograph 6.2.1. Photograph of the proposed building footprint (Facing East).

Photograph 6.2.2. Photograph of the proposed building footprint (Facing North).

6.3. Boundary Fencing

The site boundary was fenced or met with neighbouring buildings.

6.4. Adjacent Land Use Activities

Observations made during the site walkover indicated the following land use activities adjacent to the site:

- North - Primary School, and then Commercial;
- East - Residential;
- West - Residential; and
- South - TAFE NSW.

6.5. Odours and Staining

There was no olfactory evidence of odours or visual evidence of staining observed on the surface of the site, during the site walkover.

6.6. Chemical Storage

There was no visual evidence observed of significant or widespread chemical storage on the site, during the site walkover.

6.7. Underground and Aboveground Storage Tanks

There was no visual evidence to suggest the presence of underground or aboveground storage tanks on the site.

6.8. Filling Material

There was some visual evidence observed of filling on the site, albeit not widespread.

6.9. Wastes

There was no visual evidence observed of significant or widespread wastes being stored on the site.

6.10. Asbestos Containing Materials

There was no visual evidence observed of potential asbestos containing materials on the site.

6.11. Phytotoxicity

There was no visual evidence observed to suggest significant or widespread phytotoxic impact (in the form of dieback or plant stress) in vegetation at the site. Similar observations were made of visible vegetation on land adjacent to the site.

6.12. Site Drainage

Visual observations made in the context of site drainage during the walkover, indicated that drainage mechanisms on the site are likely to include:

- Downpipes from roofs and gutters into subsurface drainage infrastructure; and
- Infiltration into underlying soils, where soil permeability permits.

7. DATA INTEGRITY ASSESSMENT

AG has relied on the following sources of data while undertaking this investigation:

- AG field observations during the site walkover
- Local Council
- Department of Land and Water Conservations
- Department of Minerals and Energy
- Australian Soil Resource Information System
- Google Earth
- National Environment Protection Council
- Nearmap
- NSW Environment Protection Authority
- NSW Land and Property Information
- NSW Office of Water

Based on AG's experience and professional judgement, the data obtained from the sources relied upon, is considered to be adequately precise, accurate, representative, complete and comparable within the objectives of this investigation and for the purpose of drawing conclusions regarding land contamination risks at the site.

8. CONCEPTUAL SITE MODEL

8.1. Areas of Environmental Concern

The site history data collected and site walkover observations made were assessed within the objectives of this investigation and in the context of the proposed development works. That assessment identified areas of environmental concern (AEC) and contaminants of potential concern (COPC) which have the potential to be present on site. The AEC identified are presented in attached **Figure 3** and associated COPC are presented in **Table 8.1**.

Table 8.1: AEC and COPC

ID	Area of Environmental Concern	Land Use Activity	Contaminants of Potential Concern
AEC01	Proposed Development footprint	Uncontrolled demolition and uncontrolled filling	Hydrocarbons, metals, asbestos, pesticides

The potential contamination pathways are considered to be as follows:

- Inhalation/ingestion of contaminants released in dust during redevelopment by Site workers;
- Direct contact, ingestion or inhalation of soil by future site inhabitants;
- Migration of volatile compounds into proposed buildings/basements causing toxic effects, asphyxiation or risk of explosion;
- Migration of vapours into confined spaces within proposed on-site buildings/basements followed by inhalation by future residents; and
- Permeation of hydrocarbons / organic contamination into underground service pits on site.

Relevant potential receptors are considered to include:

- Onsite construction and maintenance workers;
- Third parties during construction (adjacent site users and adjacent residents);
- Onsite flora and fauna;
- Future site occupiers/end users; and
- Neighbouring residential land users.

8.2. Land Use Setting

AG understands that the site is proposed for redevelopment, comprising a new storage facility for the Powerhouse museum.

Based on the proposed development works and guidance provided in NEPM ASC 2013, AG considers it reasonable to adopt the 'HIL C – Developed open space such as parks, playgrounds, playing fields (e.g. ovals), secondary schools and footpaths', as the appropriate land use setting for the purpose of assessing land contamination exposure risks at the site.

8.3. Direct Contact – Human Health

AG notes that the proposed development includes building footprints and hardstand pavement areas across most of the site, which would act as a direct contact barrier between potential land contamination and onsite receptors during operation of the site. However, some open space and landscaping areas will be established on site. In these areas, it is considered that a direct contact exposure pathway may be present between potential contamination and onsite receptors.

8.4. Inhalation / Vapour Intrusion – Human Health

In order for a potentially unacceptable inhalation / vapour intrusion human health exposure risk to exist, a primary vapour source (e.g. underground storage tank) or secondary vapour source (e.g. significantly contaminated soil or groundwater) must exist.

The historical evidence reviewed indicated a low likelihood for a potential primary source to be present on the site.

Potential sources of groundwater contamination in the immediate vicinity of the site were not observed. A groundwater source of vapours was therefore considered unlikely at the site.

8.5. Aesthetics – Human Health

Section 3.7 of Schedule B1 NEPM ASC advises that there are no specific numeric aesthetic guidelines, however site assessment requires a balanced consideration of the quantity, type and distribution of foreign material or odours in relation to the specific land use and its sensitivity.

Due to visual observations made during site visit and the nature of the proposed development concept, AG consider further aesthetics assessment and management warranted for the site.

8.6. Ecological Health - Terrestrial Ecosystems

Section 3.4.2 of schedule B1 NEPM ASC 2013, advises a pragmatic risk-based approach should be taken when assessing ecological risks in residential and commercial / industrial land use settings.

AG notes that the proposed development includes building footprints and hardstand pavement areas across most of the site, which would act as a direct contact barrier between potential land contamination and onsite receptors during operation of the site.

Due to the lack of open space areas, further ecological assessment is considered not warranted.

8.7. Management Limits for Petroleum Hydrocarbon Compounds

NEPM ASC 2013 notes that there are a number of policy considerations which reflect the nature and properties of petroleum hydrocarbons:

- Formation of observable light non-aqueous phase liquids (LNAPL);
- Fire and explosive hazards; and
- Effects on buried infrastructure (e.g. penetration of or damage to, in-ground services by hydrocarbons).

Schedule B1 of NEPM ASC 2013 includes 'management limits' to avoid or minimise these potential effects. Application of the management limits requires consideration of site-specific factors such as the depth of building basements and services and depth to groundwater, to determine the maximum

depth to which the limits should apply. NEPC (2013) also notes that management limits may have less relevance at operating industrial sites which have no or limited sensitive receptors in the area of potential impact, and when management limits are exceeded, further site-specific assessment and management may enable any identified risk to be addressed.

9. CONCLUSIONS AND RECOMMENDATIONS

Based on AG's assessment of the desktop review information and fieldwork data, in the context of the proposed apartment land use, AG makes the following conclusions:

- One (1) Areas of environmental concern (AEC) has been identified for the site; and
- Further assessment of the identified AEC, and subsequent management / remediation of identified unacceptable land contamination risks (if warranted), would be required to confirm land use suitability (in the context of land contamination) for the proposed redevelopment works.

Based on these conclusions, AG makes the following recommendations:

- A stage 2 detailed site investigation (DSI) should be undertaken for the identified AEC.
- In the event that the identified AEC is not accessible during the undertaking of the stage 2 DSI, consideration should be given to preparation of a remedial action plan (RAP), setting out what supplementary assessment works would be required; and
- Any further contamination assessment works should be undertaken by a suitably experienced environmental consultant.

This report, including its conclusions and recommendations, must be read in conjunction with the limitations presented in **Section 10**.

10. STATEMENT OF LIMITATIONS

The findings presented in this report are based on specific searches of relevant, government historical databases and anecdotal information that were made available during the course of this investigation. To the best of our knowledge, these observations represent a reasonable interpretation of the general condition of the site at the time of report completion.

This report has been prepared solely for the use of the client to whom it is addressed and no other party is entitled to rely on its findings.

No warranties are made as to the information provided in this report. All conclusions and recommendations made in this report are of the professional opinions of personnel involved with the project and while normal checking of the accuracy of data has been conducted, any circumstances outside the scope of this report or which are not made known to personnel and which may impact on those opinions is not the responsibility of Alliance Geotechnical Pty Ltd. Should information become available regarding conditions at the site including previously unknown sources of contamination, AG reserves the right to review the report in the context of the additional information.

This report must be reviewed in its entirety and in conjunction with the objectives, scope and terms applicable to AG's engagement. The report must not be used for any purpose other than the purpose specified at the time AG was engaged to prepare the report.

Logs, figures, and drawings are generated for this report based on individual AG consultant interpretations of nominated data, as well as observations made at the time site walkover/s were completed.

Data and/or information presented in this report must not be redrawn for its inclusion in other reports, plans or documents, nor should that data and/or information be separated from this report in any way.

Should additional information that may impact on the findings of this report be encountered or site conditions change, AG reserves the right to review and amend this report.

APPENDIX B

NSW EPA

[Home](#) [Contaminated land](#) [Record of notices](#)

Search results

Your search for:Suburb: BANKSTOWN

did not find any records in our database.

If a site does not appear on the record it may still be affected by contamination. For example:

- Contamination may be present but the site has not been regulated by the EPA under the Contaminated Land Management Act 1997 or the Environmentally Hazardous Chemicals Act 1985.
- The EPA may be regulating contamination at the site through a licence or notice under the Protection of the Environment Operations Act 1997 (POEO Act).
- Contamination at the site may be being managed under the [planning process](#).

More information about particular sites may be available from:

- The [POEO public register](#)
- The appropriate planning authority: for example, on a planning certificate issued by the local council under [section 149 of the Environmental Planning and Assessment Act](#).

See [What's in the record and What's not in the record](#).

If you want to know whether a specific site has been the subject of notices issued by the EPA under the CLM Act, we suggest that you search by Local Government Area only and carefully review the sites that are listed. This public record provides information about sites regulated by the EPA under the Contaminated Land Management Act 1997, including sites currently and previously regulated under the Environmentally Hazardous Chemicals Act 1985. Your inquiry using the above search criteria has not matched any record of current or former regulation. You should consider searching again using different criteria. The fact that a site does not appear on the record does not necessarily mean that it is not affected by contamination. The site may have been notified to the EPA but not yet assessed, or contamination may be present but the site is not yet being regulated by the EPA. Further information about particular sites may be available from the appropriate planning authority, for example, on a planning certificate issued by the local council under section 149 of the Environmental Planning and Assessment Act. In addition the EPA may be regulating contamination at the site through a licence under the Protection of the Environment Operations Act 1997. You may wish to search the POEO public register:[POEO public register](#)

PROPERTY DESCRIPTION

PROPERTY	347A Hume Highway, BANKSTOWN NSW 2200		
TITLE	Lot 202 DP 1231757		
PARISH	Bankstown	COUNTY	CUMBERLAND

PLANNING INSTRUMENTS

In accordance with Section 10.7(2) and at the date of this certificate the following Environmental Planning Instruments apply to the land.

Bankstown Local Environmental Plan 2015 Gazetted on 05-Mar-2015

LAND ZONING

SP2 Infrastructure: Educational Establishment
R4 High Density Residential

PLANNING CERTIFICATE

UNDER SECTION 10.7 (2) OF THE ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979

SECTION 10.7(2) DETAILS

In accordance with section 10.7(2) of the Environmental Planning and Assessment Act 1979 (as amended) and at the date of this certificate, the following prescribed matters relate to the land.

1. NAMES OF RELEVANT PLANNING INSTRUMENTS AND DCPs

Affected by Bankstown Local Environmental Plan 2015 Amendments and Planning Proposals in respect of general information as detailed in Appendix 1.

Affected by State Environmental Planning Policies (SEPP's), Proposed State Environmental Planning Policies and Deemed State Environmental Planning Policies as detailed in Appendix 2.

Affected by Bankstown Development Control Plan 2015 (refer to Appendix 3 which lists the contents chapters within the DCP).

2. ZONING AND LAND USE UNDER RELEVANT LEPs

Unless specified otherwise in this section of the certificate, the land does not include or comprise critical habitat, is not in a conservation area and has no environmental heritage item on the land.

The purposes for which the plan or instrument provides that development may be carried out within the zone without the need for development consent are specified in clause 3.1 of the LEP 2015 plan and the land use table as detailed in Appendix 4. Reference should be made to the LEP 2015 plan as a whole for details.

The purposes for which the plan or instrument provides that development may not be carried out within the zone except with development consent are specified in Part 2 and clause 3.2 of the LEP 2015 plan and detailed in Appendix 4. Reference should be made to the LEP 2015 plan as a whole for details.

The purposes for which the plan or instrument provides that development is prohibited within the zone are specified in Part 2 and clauses 4.1A-2(c), 4.1B-2(4), 6.6 and 6.8 of the LEP 2015 plan and detailed in Appendix 4. Reference should be made to the LEP 2015 plan as a whole for details.

A Heritage item.

Affected by an item of environmental heritage. Refer to clause 5.10 and a list of heritage item sites under Schedule 5 of the LEP 2015 plan. For further information please contact Council's Sustainable Development Unit on 9707 9000.

(Non complying development land exemption under the Housing Code, Housing Alterations Code, Subdivisions Code, Rural Housing Code, General Development Code, Demolition Code, Fire Safety Code, Commercial and Industrial Alterations Code & Commercial and Industrial (New Buildings and Additions) Code).

2A. ZONING AND LAND USE UNDER STATE ENVIRONMENTAL PLANNING POLICY (SYDNEY REGION GROWTH CENTRES) 2006

Unless specified otherwise in this section of the certificate, the land is not within any zone or land use under a Precinct Plan, a proposed Precinct Plan or Part 3 of State Environmental Planning Policy (Sydney Region Growth Centres) 2006.

PLANNING CERTIFICATE

UNDER SECTION 10.7 (2) OF THE ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979

3. COMPLYING DEVELOPMENT

Housing Code

Complying development under the Housing Code within "State Environmental Planning Policy (Exempt and Complying Development Codes) 2008" **may not** be carried out on the land.

The land is non complying because the land has been identified by an environmental planning instrument as being either one of the following zones:-

- B5 Business Development, B6 Enterprise Corridor, B7 Business Park
- IN1 General Industrial, IN2 Light Industrial
- SP1 Special Activities, SP2 Infrastructure
- RE1 Public Recreation, RE2 Private Recreation
- E1 National Park and Nature Reserves
- Land unzoned under LEP 2015.....refer to the Land Zoning of this certificate on page 1.

OR

The land is affected by one or more of the following 4 exemptions:-

- A Heritage item refer to clause 2 of this certificate,
- Land in the 25 or higher ANEF contour refer to clause 7 of this certificate,
 (Unless the development is only for the erection of ancillary development, the alteration of or an addition to ancillary development or the alteration of a dwelling house)
- Acid sulfate soils class 1 or 2 refer to clause 7 of this certificate,
- Land in a vegetated buffer area refer to clause 7 of this certificate,
- An Environmentally Sensitive Area refer to clause 1 of this certificate.

Note: If the land has been rendered non complying due to an exemption listed above, you are advised to check with Council for the extent of the exemption. The Code may render the land complying for any land which is outside the extent of the exemption. Reference should be made to the "Planning Maps" on Council's website www.bankstown.nsw.gov.au which identifies the land exemptions.

Housing Alterations Code

Complying development under the Housing Alterations Code within the provisions of "State Environmental Planning Policy (Exempt and Complying Development Codes) 2008" **may not** be carried out on the land.

The land is non complying because the land has been identified by an environmental planning instrument as being either one of the following zones:-

- B5 Business Development, B6 Enterprise Corridor, B7 Business Park
- IN1 General Industrial, IN2 Light Industrial
- SP1 Special Activities, SP2 Infrastructure
- RE1 Public Recreation, RE2 Private Recreation
- E1 National Park and Nature Reserves
- Land unzoned under LEP 2015.....refer to the Land Zoning of this certificate on page 1.

OR

The land is affected by the following exemption:-

- A Heritage item refer to clause 2 of this certificate,
- An Environmentally Sensitive Area refer to clause 1 of this certificate.

Note: If the land has been rendered non complying due to an exemption listed above, you are advised to check with Council for the extent of the exemption. The Code may render the land complying for any land which is outside the extent of the exemption. Reference should be made to the "Planning Maps" on Council's website www.bankstown.nsw.gov.au which identifies the land exemptions.

Subdivisions Code (strata subdivision)

Complying development under the Subdivisions Code within the provisions of "State Environmental Planning Policy (Exempt and Complying Development Codes) 2008" **may not** be carried out on the land.

The land is non complying because the land is affected by the following exemption:-

- A Heritage item refer to clause 2 of this certificate,
- An Environmentally Sensitive Area refer to clause 1 of this certificate.

Note: If the land has been rendered non complying due to an exemption listed above, you are advised to check with Council for the extent of the exemption. The Code may render the land complying for any land which is outside the extent of the exemption. Reference should be made to the "Planning Maps" on Council's website www.bankstown.nsw.gov.au which identifies the land exemptions.

Rural Housing Code

Complying development under the Rural Housing Code within "State Environmental Planning Policy (Exempt

PLANNING CERTIFICATE

UNDER SECTION 10.7 (2) OF THE ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979

and Complying Development Codes) 2008" **may not** be carried out on the land.

The land is non complying because the land has been identified by an environmental planning instrument as being either one of the following zones:-

- R2 Low Density Residential, R3 Medium Density Residential, R4 High Density Residential
- B1 Neighbourhood Centre, B2 Local Centre, B4 Mixed Use, B5 Business Development, B6 Enterprise Corridor, B7 Business Park
- IN1 General Industrial, IN2 Light Industrial
- SP1 Special Activities, SP2 Infrastructure
- RE1 Public Recreation, RE2 Private Recreation
- E1 National Park and Nature Reserves
- Land unzoned under LEP 2015.....refer to the Land Zoning of this certificate on page 1.

OR

The land is affected by one or more of the following 4 exemptions:-

- A Heritage item refer to clause 2 of this certificate,
- Land in the 25 or higher ANEF contour..... refer to clause 7 of this certificate,
(Unless the development is only for the erection of ancillary development, the alteration of or an addition to ancillary development or the alteration of a dwelling house)
- Acid sulfate soils class 1 or 2 refer to clause 7 of this certificate,
- Land in a vegetated buffer area refer to clause 7 of this certificate,
- An Environmentally Sensitive Area refer to clause 1 of this certificate.

Note: If the land has been rendered non complying due to an exemption listed above, you are advised to check with Council for the extent of the exemption. The Code may render the land complying for any land which is outside the extent of the exemption. Reference should be made to the "Planning Maps" on Council's website www.bankstown.nsw.gov.au which identifies the land exemptions.

General Development Code

Complying development under the General Development Code within the provisions of "State Environmental Planning Policy (Exempt and Complying Development Codes) 2008" **may not** be carried out on the land.

The land is non complying because the land is affected by the following exemption:-

- A Heritage item refer to clause 2 of this certificate,
- An Environmentally Sensitive Area..... refer to clause 1 of this certificate.

Note: If the land has been rendered non complying due to an exemption listed above, you are advised to check with Council for the extent of the exemption. The Code may render the land complying for any land which is outside the extent of the exemption. Reference should be made to the "Planning Maps" on Council's website www.bankstown.nsw.gov.au which identifies the land exemptions.

Demolition Code

Complying development under the Demolition Code within the provisions of "State Environmental Planning Policy (Exempt and Complying Development Codes) 2008" **may not** be carried out on the land.

The land is non complying because the land is affected by the following exemption:-

- A Heritage item refer to clause 2 of this certificate,
- An Environmentally Sensitive Area refer to clause 1 of this certificate.

Note: If the land has been rendered non complying due to an exemption listed above, you are advised to check with Council for the extent of the exemption. The Code may render the land complying for any land which is outside the extent of the exemption. Reference should be made to the "Planning Maps" on Council's website www.bankstown.nsw.gov.au which identifies the land exemptions.

Fire Safety Code

Complying development under the Fire Safety Code within the provisions of "State Environmental Planning Policy (Exempt and Complying Development Codes) 2008" **may not** be carried out on the land.

The land is non complying because the land is affected by the following exemption:-

- A Heritage item refer to clause 2 of this certificate,
- An Environmentally Sensitive Area refer to clause 1 of this certificate.

Note: If the land has been rendered non complying due to an exemption listed above, you are advised to check with Council for the extent of the exemption. The Code may render the land complying for any land which is outside the extent of the exemption. Reference should be made to the "Planning Maps" on Council's website www.bankstown.nsw.gov.au which identifies the land exemptions.

Commercial and Industrial Alterations Code

PLANNING CERTIFICATE

UNDER SECTION 10.7 (2) OF THE ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979

Complying development under the Commercial and Industrial Alterations Code within the provisions of "State Environmental Planning Policy (Exempt and Complying Development Codes) 2008" **may not** be carried out on the land.

The land is non complying because the land has been identified by an environmental planning instrument as being either one of the following zones:-

- RU4 Primary Production Small Lots
- R2 Low Density Residential, R3 Medium Density Residential, R4 High Density Residential
- SP1 Special Activities, SP2 Infrastructure
- RE1 Public Recreation, RE2 Private Recreation
- E1 National Park and Nature Reserves
- Land unzoned under LEP 2015.....refer to the Land Zoning of this certificate on page 1.

OR

The land is affected by one of the following exemptions:-

- A Heritage item refer to clause 2 of this certificate.
- A Flood Control Lotrefer to clause 7A of this certificate.

Note: If the land has been rendered non complying due to an exemption listed above, you are advised to check with Council for the extent of the exemption. The Code may render the land complying for any land which is outside the extent of the exemption. Reference should be made to the "Planning Maps" on Council's website www.bankstown.nsw.gov.au which identifies the land exemptions.

Further: Although the land is non complying for Subdivisions 9 & 10, the Code may render the land complying for Subdivisions 1-8 and 11-12. Reference should be made to "Part 5 – Commercial and Industrial Alterations Code" of the SEPP for details.

Commercial and Industrial (New Buildings and Additions) Code

Complying development under the Commercial and Industrial (New Buildings and Additions) Code within the provisions of "State Environmental Planning Policy (Exempt and Complying Development Codes) 2008" **may not** be carried out on the land.

The land is non complying because the land has been identified by an environmental planning instrument as being either one of the following zones:-

- RU4 Primary Production Small Lots
- R2 Low Density Residential, R3 Medium Density Residential, R4 High Density Residential
- SP1 Special Activities, SP2 Infrastructure
- RE1 Public Recreation, RE2 Private Recreation
- E1 National Park and Nature Reserves
- Land unzoned under LEP 2015.....refer to the Land Zoning of this certificate on page 1.

OR

The land is affected by one of the following exemptions:-

- A Heritage item refer to clause 2 of this certificate
- Acid Sulfate Soils class 1 or 2 refer to clause 7 of this certificate
- A Vegetated Buffer Area refer to clause 7 of this certificate
- An Environmentally Sensitive Area refer to clause 1 of this certificate

Note: If the land has been rendered non complying due to an exemption listed above, you are advised to check with Council for the extent of the exemption. The Code may render the land complying for any land which is outside the extent of the exemption. Reference should be made to the "Planning Maps" on Council's website www.bankstown.nsw.gov.au which identifies the land exemptions.

4. COASTAL PROTECTION

Unless specified otherwise in this section of the certificate, the land is not affected by the operation of Section 38 or 39 of the Coastal Protection Act 1979.

PLANNING CERTIFICATE

UNDER SECTION 10.7 (2) OF THE ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979

4A. CERTAIN INFORMATION RELATING TO BEACHES AND COASTS

Unless specified otherwise in this section of the certificate, the land is not subject to an order under Part 4D of the Coastal Protection Act 1979 in relation to temporary coastal protection works (or on public land adjacent to the land) and, Council has not been notified under Section 55X of the Coastal Protection Act 1979 that temporary coastal protection works have been placed on the land (or on public land adjacent to the land).

4B. ANNUAL CHARGES UNDER LOCAL GOVERNMENT ACT 1993 FOR COASTAL PROTECTION SERVICES THAT RELATE TO EXISTING COASTAL PROTECTION WORKS

Unless specified otherwise in this section of the certificate, the owner (or any previous owner) has not consented in writing that the land is subject to annual charges under Section 496B of the Local Government Act 1993 for coastal protection services that relate to existing coastal protection works.

5. MINE SUBSIDENCE

Not affected by Section 15 of the Mine Subsidence Compensation Act 1961, proclaiming land to be a mine subsidence district.

6. ROAD WIDENING AND REALIGNMENT

Not affected by any road widening or road realignment under (1) Division 2 of Part 3 of the Roads Act 1993; or (2) any Environmental Planning Instrument; or (3) any resolution of Council. However, the property fronts an existing or proposed arterial/main road. Please check with the Roads and Maritime Services for possible effects.

7. COUNCIL AND OTHER PUBLIC AUTHORITY POLICIES ON HAZARD RISK RESTRICTIONS

Unless specified otherwise in this section of the certificate, the land is not affected by policies adopted by Council or by any other authority (that has notified Council of its adoption) that restricts development of the land. For bush fire prone land refer to section 11. For flood prone land refer to section 7A.

Affected by a resolution of Council adopting a policy concerning the management of contaminated land. That policy applies to all land in the City of Canterbury-Bankstown and will restrict development of the land if the circumstances set out in the policy prevail. A copy of the policy is available on Council's website at www.bankstown.nsw.gov.au or from the Customer Service Area.

Note: Additional information regarding contaminated land matters for this property may also be provided on part 5 of this section 10.7 planning certificate. For further information contact Council on 9707 9000.

7A. FLOOD RELATED DEVELOPMENT CONTROLS INFORMATION

Unless specified otherwise in this section of the certificate, the land is not affected by flood related development controls.

PLANNING CERTIFICATE

UNDER SECTION 10.7 (2) OF THE ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979

8. LAND RESERVED FOR ACQUISITION

Not affected by either an Environmental Planning Instrument or proposed Environmental Planning Instrument referred to in clause 5.1 providing for the acquisition of the land or part of the land by a public authority, as referred to in Section 27 of the Environmental Planning & Assessment Act. Reference should be made to the LEP 2015 plan as a whole for details.

9. CONTRIBUTION PLANS

Affected by Bankstown City Council Section 94A Development Contributions Plan 2009 which allows Council to impose a levy on development within the City of Canterbury-Bankstown in accordance with Directions issued by the Minister for Planning. The levy will be spent on the provision of public works and infrastructure. Date of commencement 8th June 2009. For further details on the plan contact Council on 9707 9000 or visit Council's website – www.bankstown.nsw.gov.au

9A. BIODIVERSITY CERTIFIED LAND

Unless specified otherwise in this section of the certificate, the land is not biodiversity certified land within the meaning of Part 7AA of the Threatened Species Conservation Act 1995.

10. BIOBANKING AGREEMENTS

Unless specified otherwise in this section of the certificate, the land is not subject to a Biobanking Agreement under Part 7A of the Threatened Species Conservation Act 1995, made by the Department of Environment, Climate Change and Water that has notified Council of the existence of the agreement.

11. BUSHFIRE PRONE LAND

Unless specified otherwise in this section of the certificate, the land is not bushfire prone.

12. PROPERTY VEGETATION PLANS

Unless specified otherwise in this section of the certificate, the land is not subject to a Property Vegetation Plan under the Native Vegetation Act 2003, as approved by any other authority that has notified Council of the existence of the plan.

13. ORDERS UNDER TREES (DISPUTES BETWEEN NEIGHBOURS) ACT 2006

Unless specified otherwise in this section of the certificate, the land is not subject to a Tree Order under the Trees (Disputes Between Neighbours) Act 2006, made by an authority that has notified Council of the existence of the order.

PLANNING CERTIFICATE

UNDER SECTION 10.7 (2) OF THE ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979

14. DIRECTIONS UNDER PART 3A

Unless specified otherwise in this section of the certificate, the land is not subject to a Direction by the Minister under section 75P (2) (c1) of the Act that a provision of an EPI does not have an effect.

15. CONDITIONS AFFECTING SENIORS HOUSING

Unless specified otherwise in this section of the certificate, the land is not subject to a development application granted after 12.10.2007 under SEPP (Housing for Seniors or People with a Disability) 2004 setting out the terms of any conditions imposed under clause 18(2) or a current site compatibility certificate issued under clause 25 of the SEPP.

16. SITE COMPATIBILITY CERTIFICATES FOR INFRASTRUCTURE

Unless specified otherwise in this section of the certificate, the land is not subject to a development application under clause 19 of SEPP (Infrastructure) 2007 where a valid site compatibility certificate has been issued.

17. SITE COMPATIBILITY CERTIFICATES & CONDITIONS FOR AFFORDABLE RENTAL HOUSING

Unless specified otherwise in this section of the certificate, the land is not subject to a development application under SEPP (Affordable Rental Housing) 2009 where a valid site compatibility certificate and conditions have been issued.

18. PAPER SUBDIVISION INFORMATION

Unless specified otherwise in this section of the certificate, the land is not subject to a paper subdivision or subdivision order.

19. SITE VERIFICATION CERTIFICATES

Unless specified otherwise in this section of the certificate, the land is not subject to a current site verification certificate of which the Council is aware in respect to Division 3 of Part 4AA of State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007.

20. LOOSE-FILL ASBESTOS INSULATION

A residential dwelling erected on this land has not been identified in the Loose-Fill Asbestos Insulation Register as containing loose-fill ceiling insulation. Contact NSW Fair Trading for more information.

PLANNING CERTIFICATE

UNDER SECTION 10.7 (2) OF THE ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979

MATTERS ARISING UNDER THE CONTAMINATED LAND MANAGEMENT ACT, 1997

Unless specified otherwise in this section of the certificate, there are no matters arising under Section 59(2) of the Contaminated Land Management Act 1997.

MATTERS ARISING UNDER THE NATION BUILDING AND JOBS PLAN (STATE INFRASTRUCTURE DELIVERY) ACT, 2009

Unless specified otherwise in this section of the certificate, there are no matters arising under Section 26 of the Nation Building and Jobs Plan (State Infrastructure Delivery) Act 2009.

Nation Building and Jobs Plan (State Infrastructure Delivery) Act 2009

The NSW Infrastructure Co-ordinator General has issued an Order under Section 23 and an Authorisation under Section 24 of the Nation Building and Jobs Plan (State Infrastructure Delivery) Act 2009 for the carrying out of development being Construction of a new library and multi-purpose hall building including subdivision and other associated site works at St Felix De Valois Primary School.

The Order and Authorisation may exempt the above project from complying with certain development control legislation. For further details please contact the Nation Building and Jobs Plan Taskforce on Ph. (02) 9226 2520.

This completes the prescribed matters for the certificate under section 10.7(2) of the Environmental Planning and Assessment Act 1979, as amended. While this certificate indicates the zoning of the land, it is suggested that the relevant Planning Instrument be inspected on Council's website under Development – Planning Maps or at Council's Customer Service Centre to provide an overall view of the area and the site's surrounding zonings.

Please contact Council's general enquiries number listed at the bottom of this sheet for further information about any matter referred to in this certificate.

Appendix 4

Land Use Table

Note. A type of development referred to in the Land Use Table is a reference to that type of development only to the extent it is not regulated by an applicable State environmental planning policy. The following State environmental planning policies in particular may be relevant to development on land to which this Plan applies:

State Environmental Planning Policy (Affordable Rental Housing) 2009 (including provision for secondary dwellings)

State Environmental Planning Policy (Housing for Seniors or People with a Disability) 2004

State Environmental Planning Policy (Infrastructure) 2007 (relating to public facilities such as those for air transport, correction, education, electricity generation, health services, ports, railways, roads, waste management and water supply systems)

State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007

State Environmental Planning Policy (Rural Lands) 2008

State Environmental Planning Policy No 33—Hazardous and Offensive Development

State Environmental Planning Policy No 50—Canal Estate Development

State Environmental Planning Policy No 62—Sustainable Aquaculture

State Environmental Planning Policy No 64—Advertising and Signage

Zone RU4 Primary Production Small Lots
Permitted without consent Home occupations
Permitted with consent Agriculture; Animal boarding or training establishments; Building identification signs; Business identification signs; Dwelling houses; Environmental facilities; Environmental protection works; Extensive agriculture; Farm buildings; Flood mitigation works; Intensive plant agriculture; Kiosks; Plant nurseries; Recreation areas; Recreation facilities (indoor); Recreation facilities (outdoor); Roads; Roadside stalls; Water supply systems
Prohibited Any development not specified in item 2 or 3
Zone R2 Low Density Residential
Permitted without consent Home occupations
Permitted with consent Bed and breakfast accommodation; Boarding houses; Boat sheds; Building identification signs; Business identification signs; Car parks; Child care centres; Community facilities; Dual occupancies; Dwelling houses; Emergency services facilities; Environmental facilities; Environmental protection works; Exhibition homes; Flood mitigation works; Group homes; Health consulting rooms; Home-based child care; Hospitals; Information and education facilities; Jetties; Multi dwelling housing; Places of public worship; Public administration buildings; Recreation areas; Respite day care centres; Roads; Secondary dwellings; Semi-detached dwellings; Seniors housing; Water recreation structures; Water supply systems
Prohibited Any development not specified in item 2 or 3

Mineral Spirit - includes petrol, benzene, benzolene, benzol and naphtha, and compositions containing same.

Dangerous Goods -

Class 1 - acetal, acetaldehyde, acetone, acrolein, amyl mercaptan, butyl acetate, butyl mercaptan, butyl propionate, crotonaldehyde, dichloro-ethylene, diethylketone, dioxane, diethylamine, dimethyl hydrozine, dipropylamine, divinyl ether, dipropyl ether, ethyl acetate, ethyl acrylate, ethyl chloride, ethyl ether, dichloroethane (ethylene dichloride), ethyl mercaptan, ethyl methacrylate, ethyl methyl ether, ethyl propyl ether, ethyl propionate, methyl propyl ketone, methyl acetate, methyl acrylate, methylal, methyl ethyl ether, methyl ethyl ketone, methyl methacrylate, methyl vinyl ketone, methyl vinyl acetate, piperidine, propanal, propyl acetate, propylamine, propylene oxide, pyridine, tetrahydrofuran, thiophene, triethylamine, valeraldehyde, vinyl acetate, vinyl allyl ether, vinyl butyl ether, vinyl butyrate, vinyl cyanide (acrylonitrile), vinylidene chloride, vinyl ethyl ether, vinyl propyl ether, vinyl propionate, any combination of substances of an inflammable character suitable for use as an industrial solvent and having a true flashing point of less than 73 degrees Fahrenheit, manufactured products, containing organic solvents, having a true flashing point of less than 73 degrees Fahrenheit.

Class 2 - acetic acid, acetyl acetone, acetic anhydride, allyl alcohol, amyl acetate, amyl alcohol, butyl alcohol, butyl methacrylate, chlorobenzene, cyclohexanone, dibutyl ether, dibutyl ketone, dipentene, epichlorohydrin, ethanol (ethyl alcohol), ethyl benzene, ethylene diamine, furfural, mesityl oxide, methyl alcohol, methyl amyl ketone, methyl butyl ketone, pine oil (having a flashing point below 150°F), propyl benzene, propanol, vegetable turpentine, vinyl benzene (styrene monomer), any liquid containing more than 50 per centum ethyl alcohol, manufactured products, containing organic solvents, having a true flashing point of 73 degrees Fahrenheit and above but not exceeding 150 degrees Fahrenheit.

Class 3 - nitro-cellulose moistened with an alcohol, nitro-cellulose product.

Class 4 - compressed or dissolved acetylene contained in a porous substance.

Class 5 (A) - liquefied inflammable gases (liquefied petroleum gas, vinyl chloride, ethylene chloride, ethylene oxide, butadine, methylamine, dimethylamine and trimethylamine).

Class 9 - Carbon disulphide, ethyl nitrite.

DIRECTIONS

Applications must be forwarded to the Chief Inspector of Inflammable Liquid, Explosives Department, Department of Mines, Sydney, and must be accompanied by the prescribed fee, as set out in Regulation 7.

1. Name in full of occupier

2. Occupation

3. Locality of the premises in which the depot or depots are

situated

4. Nature of premises (Dwelling, Garage, Store, etc.)

DEPT. TECHNICAL EDUCATION.
BANKSTOWN.

TECHNICAL TEACHING.

No. or Name 500

Street CHAPEL RD

Town BANKSTOWN.

STORES.

Postcode 2200.

5. Particulars of construction of depots and maximum quantities of inflammable liquid and/or Dangerous Goods to be kept at any one time

PLEASE ATTACH PLAN OF PREMISES.

Depot No.	Construction of depots*			Inflammable liquid		Dangerous goods					
	Walls	Roof	Floor	Mineral Spirit gallons	Mineral Oil gallons	Class 1 gallons	Class 2 gallons	Class 3 lb	Class 4 cu ft	Class 5 A water gallons	Class 9 gallons
1	Brick	Concrete	Concrete	88	100	88	100				
2	2 Brk 2 of m	Iron	Timber						5000

adjacent buildings, also distances separating depots and buildings.

also inside dimensions (length, width, and depth) of pit or lower portion, designed to prevent outflow.

MANIFOLD

Sheet Metal on 6"x2" Purlins

OIL & SPIRIT STORE

CERTIFICATE OF INSPECTION

I, Raymond B. Calliso being an Inspector under the Inflammable Liquid Act, 1915 (as amended), do hereby certify that the premises or store herein referred to and described is suitable with regard to its situation and construction for the safe keeping of inflammable liquid and/or dangerous goods in quantity and nature specified.

Appendix H

Risk Matrix

Appendix H

Risk Rating Matrix

The overall risk rating for the site has been determined by using the approach outlined in Tables H1 and H2 below. The risk matrix is based on:

- Probability of occurrence of each potential area of environmental concern (AEC), and / or contamination resulting from the potential AEC, based on the desktop site history and characterisation review, and
- Consequences of the AEC and / or contamination resulting from the AEC, which have been estimated on the basis of the contaminant type(s), likely impacted media, contaminant migration potential and prior project experience for similar sites. For the purpose of the risk rating, the contamination affects on human health and ecology have not been considered.

The risk rating is calculated using the formula: Risk Rating = Probability x Consequence. The final risk rating for the site has then been given by the maximum risk rating of all AECs. If contamination has already occurred, the risk rating is considered high irrespective of probability and consequence.

Table H1: Qualitative Probabilities and Consequences

Item	Description	Value
Probability	AEC / contamination unlikely to occur	1
	AEC / contamination may occur	2
	AEC / contamination likely to occur	3
	AEC / contamination will occur	4
Consequence	Minimal impact not felt at source	1
	Impact limited to soil, and localised	2
	Widespread soil impact	3
	Impacts on multiple media (soil, groundwater, and soil vapour) but limited to site boundary	4
	Impacts on multiple media (soil, groundwater, and soil vapour) beyond the site boundary	5

Table H2: Risk Matrix

		Consequence				
		1	2	3	4	5
Probability	1	1	2	3	4	5
	2	2	4	6	8	10
	3	3	6	9	12	15
	4	4	8	12	16	20
Risk 1-6=		Low				
Risk 7-12=		Medium				
Risk 13-20=		High
