

SHADOW ANALYSIS SUMMARY

NEIGHBOURING TERRACE WINDOWS IMPACTED BY OVERSHADOWING

LEGEND

- BED ROOM WINDOW
- LIVING ROOM WINDOW
- SITE BOUNDARY

	TOTAL HOURS OF SUN ON JUNE 21 BETWEEN 9AM - 3PM		
WINDOW	EXISTING BUILDING	PROPOSED ENVELOPE	DCP COMPLIANT ENVELOPE
10L1	1.25 hours	0.25 hours	0 hours
10B1	2.5 hours	1 hour	0 hours
12B1	2.25 hours	1.25 hours	1.25 hours
12B2	2.5 hours	2.5 hours	2.5 hours
14L1	2.75 hours	2.75 hours	2.75 hours
14B1	2.75 hours	2.75 hours	2.75 hours
14B2	2.75 hours	2.75 hours	2.75 hours

10 Caldwell Street - The proposed building envelope reduces solar access from 2.5 hours to 1 hour. The DCP compliant envelope reduces solar access to 0.

12 Caldwell Street - The proposed development reduces solar access to one bedroom window (12B1) however does not reduce overall existing solar access of 2.5 hours. This is consistent with DCP compliant envelope.

14 Caldwell Street - The proposed development does not reduce overall solar access. This is consistent with DCP compliant envelope.

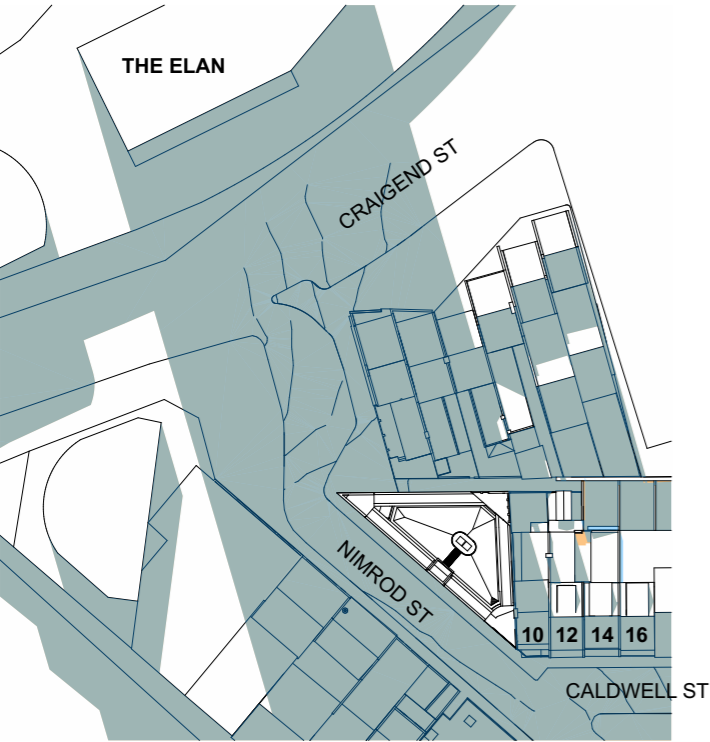

NOTE: Windows 10B2 and 10B3 of number 10 Caldwell st are not included in calculations as they are along site side boundary and are not windows to primary living areas. Refer excerpt from City of Sydney DCP 2012 below:

4.1.3.1 Solar access

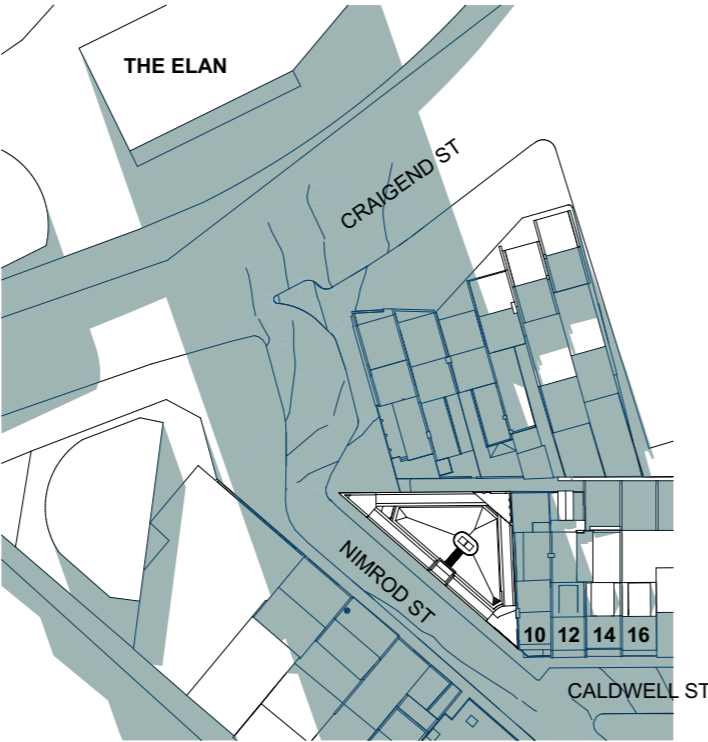

- (5) Overshadowing of windows along side boundaries by new development is permissible, except in the circumstances within provision (6) below.
- (6) Daylight access is to be addressed where:
 - (a) the side windows of an adjoining dwelling are facing and/or perpendicular to the boundary and are less than 1.5m from the side boundary; and
 - (b) the side windows in (a) are the only windows to the primary living area of a neighbouring dwelling;

CONCLUSION:
Proposal with a shaped roof form will mitigate overshadowing to neighbouring residences better than the DCP envelope

LIVINGROOM WINDOWS

BEDROOM WINDOWS

- PROPOSED BUILDING ENVELOPE
1. Walls of proposed development that are above 9m are folded back to minimise shadow cast on neighbouring dwellings.

2. Rear corner of the proposed development is chamfered to significantly reduce shadow cast on neighbouring dwellings.

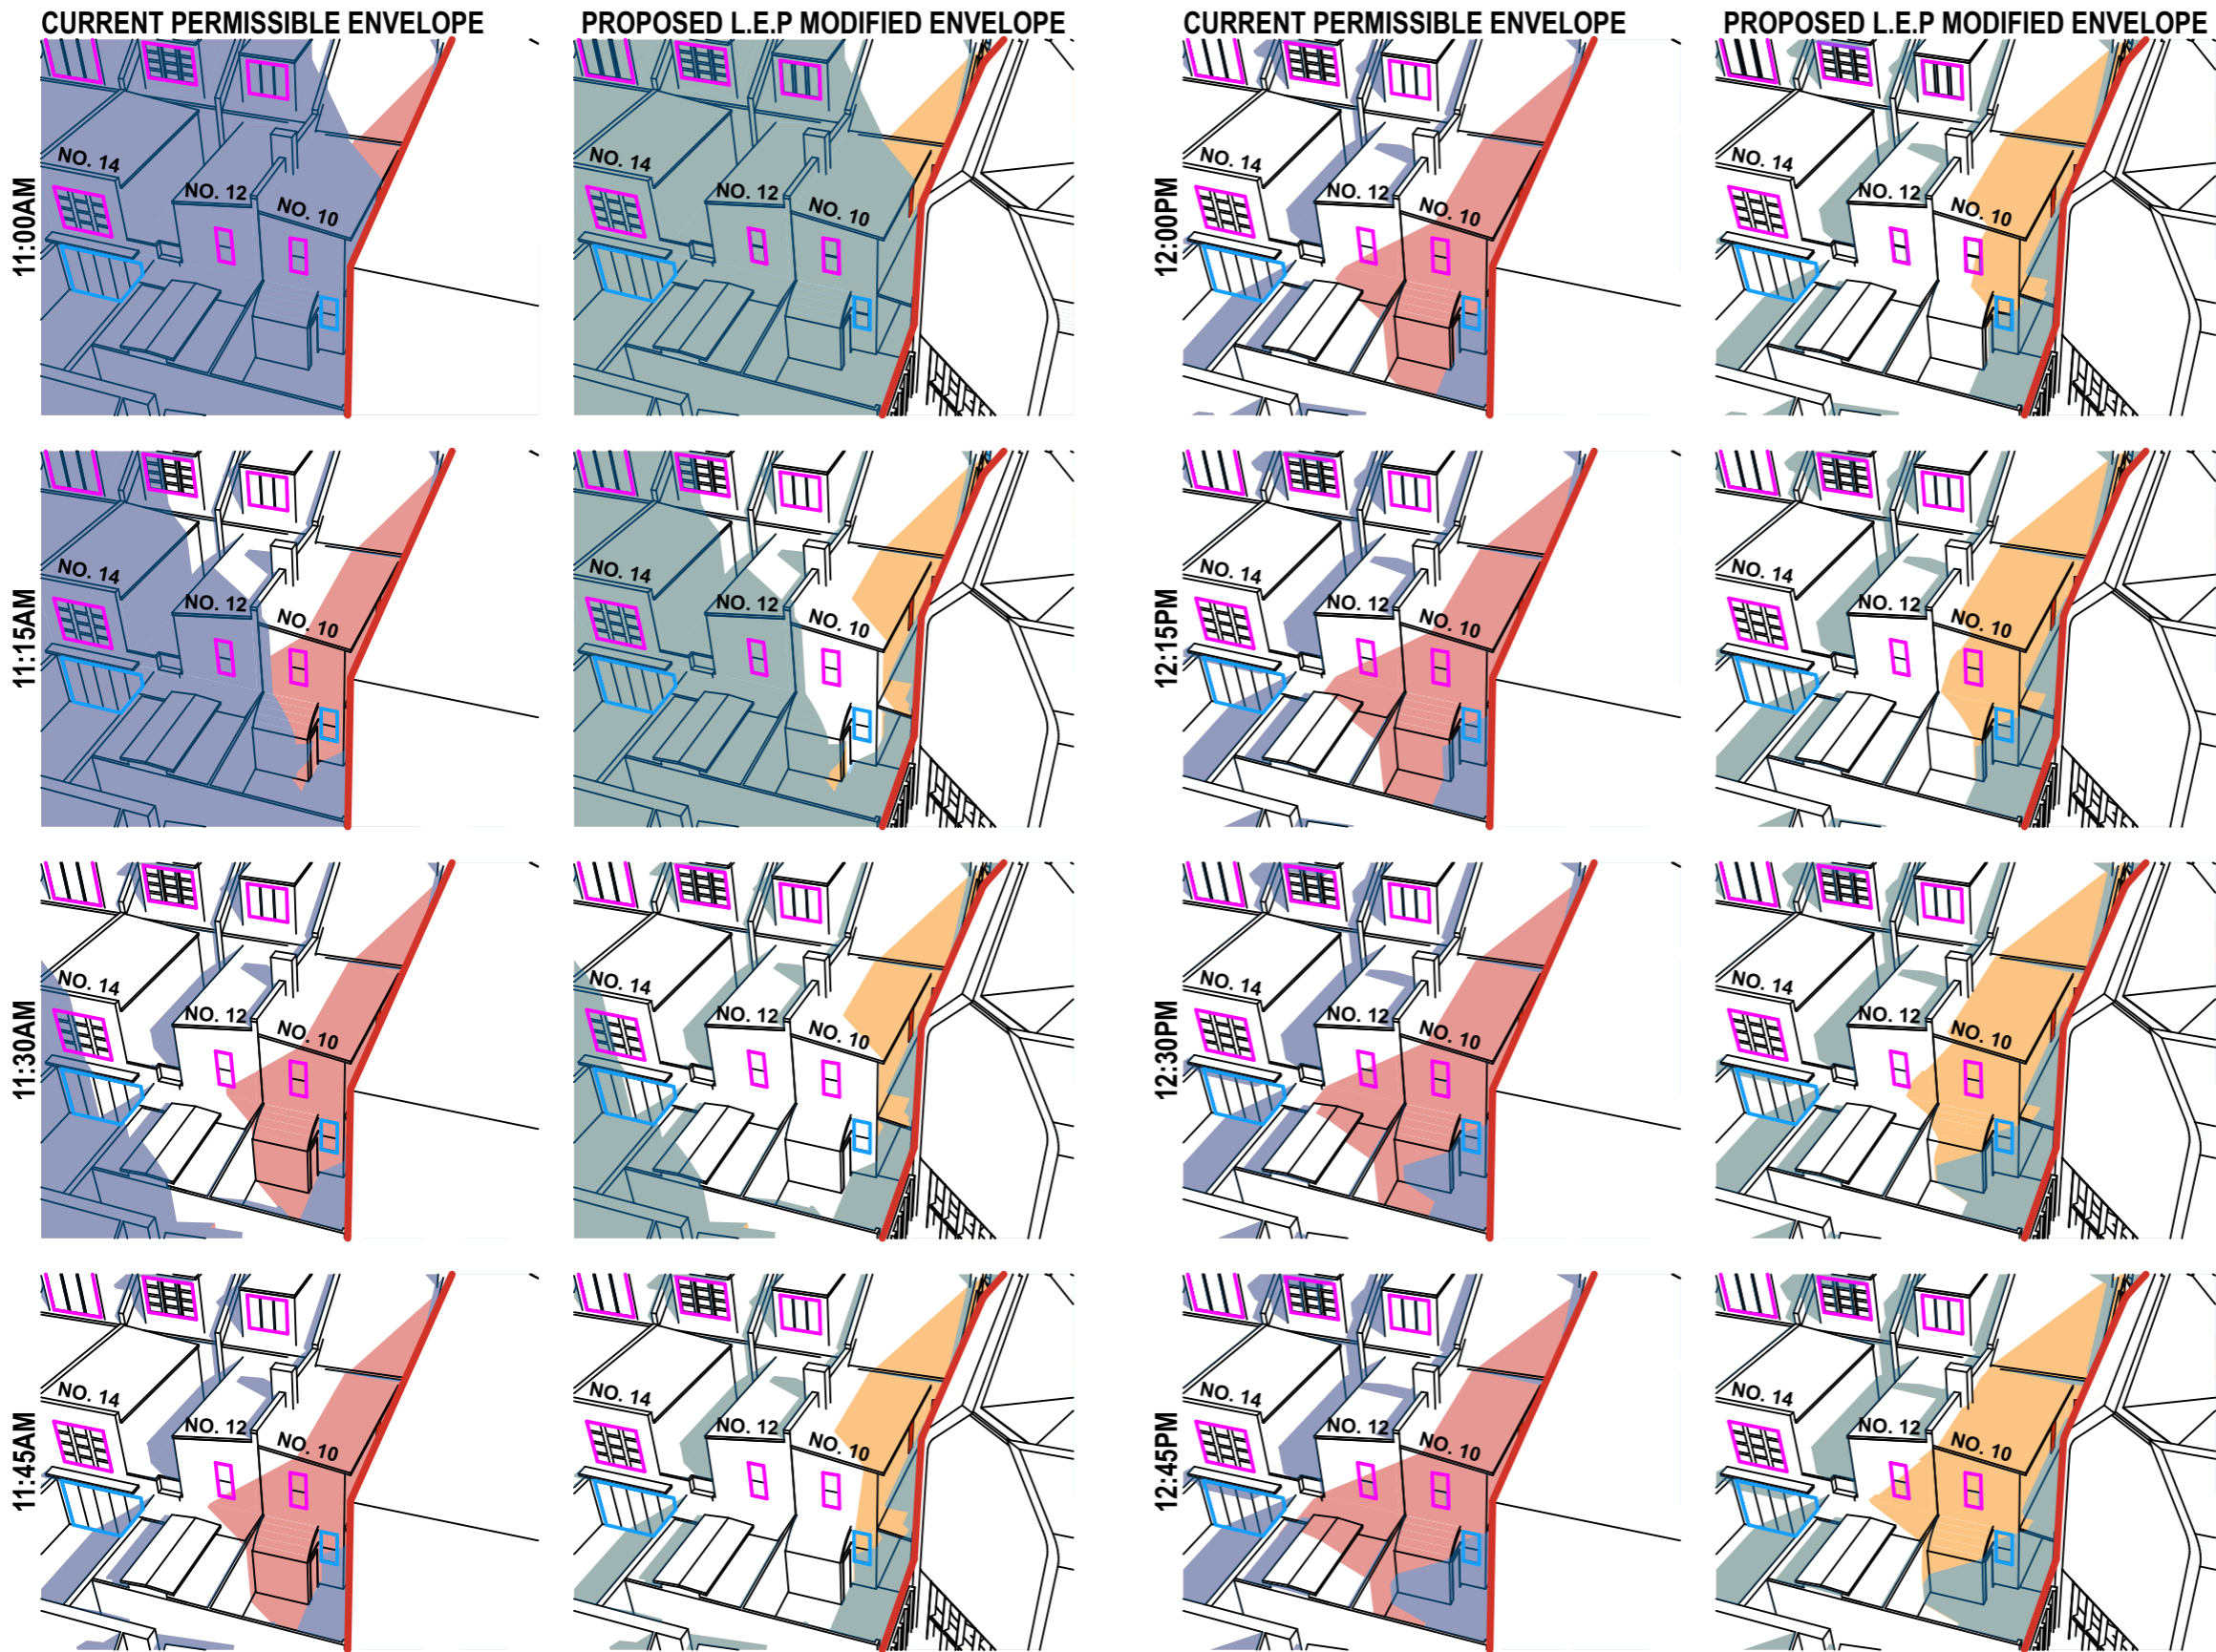

3. Plant enclosure (bringing proposed height from 10.24m to 12.725m) is placed at the centre of the roof and does not cast any additional shadow to neighbouring dwellings between 9am and 3pm.

NOTE: WINDOWS OF NO. 10 CALDWELL ST HIGHLIGHTED IN RED ARE NOT TO BE INCLUDED IN OVERSHADOWING ANALYSIS AS THEY ARE ALONG THE SITE SIDE BOUNDARY AND ARE NOT WINDOWS TO PRIMARY LIVING AREAS. REFER DCP 4.1.3.1 SOLAR ACCESS (5)(6)
