Executive Summary

There is a strong underlying demand for affordable housing provision in the Waverley LGA. An additional 600 affordable dwellings will be required by 2036 to address the current proportion of households in rental stress. The Waverley Affordable Housing Contributions Scheme (the Scheme) aims to ensure that lower income households can continue to live and work locally within the LGA, to facilitate a socially diverse and inclusive community. The Scheme intends to do this through capturing value attributed to individual landowners through uplift granted by the planning system for the public purpose of affordable housing, as well as through a 1% flat rate levy on new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development to expand Council's existing affordable housing portfolio.

Without intervention in the form of planning mechanisms, the provision of dedicated affordable housing stock in the Waverley LGA, the market will continue to produce housing that is only affordable to households on relatively high incomes. In early 2019, The Department of Planning, Industry and Environment announced that, under *State Environmental Planning Policy 70 – Affordable Housing (Revised Schemes)* (SEPP 70) (which has since been replaced by the Housing SEPP), all Councils were eligible to impose a condition of consent on new development for contributions to affordable housing. An affordable housing condition of consent would be any condition on a development consent that requires monetary or in-kind contributions to affordable housing.

Council's recently adopted Local Housing Strategy identifies that existing housing capacity under current controls would deliver the appropriate housing supply to meet our housing targets. Notwithstanding, the Local Housing Strategy identified a strong need for affordable housing in the Waverley LGA and indicated that new market housing was not addressing this need but exacerbating it by often reducing existing affordable housing. To this end, there is a clear case for intervention, in the form of an affordable housing contribution, to ensure that new housing delivery is contributing to the delivery of affordable housing. The LHS recommended a percentage range of 1-3% contribution on all new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development and 10-15% contribution on sites receiving uplift. It was identified that a specific percentage of 1% on all new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development, and a contribution (calculated at the time of planning proposal assessment) on sites receiving uplift through planning controls would be an appropriate starting point. The contribution will be excluded from employment generating only development and development for the primary purpose of social housing and affordable rental housing.

At present, feasibility testing found that a 3% contribution on new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development in the R3 zone is viable under a 15% development margin, but is unviable against an 18-20% development margin. For this reason, a 3% contribution is not being recommended at this time for such new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development in any zone and instead a 1% contribution is proposed for such development in all zones.

Facilitating the provision of more affordable housing through the Scheme will help to bridge the gap in housing inequality in Waverley and ensure that long term residents who are in rental stress are not displaced.

INTRODUCTION

In early 2019, DPIE announced that, all Councils were eligible to impose a condition of consent on new development for contributions to affordable housing. To do this, Council must have an affordable housing contributions scheme referenced in the LEP. This Planning Proposal (the Proposal) has been prepared to give the Waverley Council Affordable Housing Contributions Scheme (the Scheme) legislative weighting by referencing it in the Waverley Local Environmental Plan 2012 (WLEP 2012).

This Proposal will apply to all of the Waverley LGA. This Proposal will apply to all new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development. Employment generating only development and development for the primary purpose of social housing and affordable rental housing are excluded. The Proposal does not apply to single family homes (i.e. detached, semi-detached, attached) or dual occupancies. The Proposal will introduce a new affordable housing contribution requirement that consists of:

- A contribution on all new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development of 1% of gross floor area at a flat \$ rate/sqm.
- A contribution of gross floor area (calculated at the time of planning proposal assessment) towards affordable housing for sites that receive planning uplift through planning controls.

Background to this Planning Proposal

Legislative requirement

In early 2019, DPIE announced that all Councils were eligible to impose a condition of consent on new development for contributions to affordable housing. To do this, Council must have an affordable housing contributions scheme referenced in the LEP.

An affordable housing condition of consent would be any condition on a development consent that requires monetary or in-kind contributions to affordable housing.

Action from the adopted Local Housing Strategy (LHS)

The preparation of the scheme is also in line with actions from the LHS, where it was recommended to implement a contributions scheme that requires a 1-3% base rate monetary contribution on shop top housing and specific residential accommodation development and a higher 10-15% monetary contribution on sites receiving uplift. The scheme identified that a specific percentage of 1% on all new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development and contribution (calculated at the time of planning proposal assessment) for sites receiving uplift would be appropriate as a starting point.

At present, feasibility testing found that a 3% contribution on new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development in the R3 zone is viable under a 15% development margin, but is unviable against an 18-20% development margin. For this reason, a 3% contribution is not being recommended at this time for such new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development in any zone and instead a 1% contribution is proposed for such development in all zones. This component of the scheme is subject to Department of Planning and Environment (DPE) approval to update the LEP with such a clause via a Planning Proposal. Therefore, Council is required to prepare this Proposal in order to make an amendment to the Waverley LEP.

PART 1 – OBJECTIVES OR INTENDED OUTCOMES

1.1 Description Statement

This Proposal will apply to residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development excluding development for the primary purpose of social housing and affordable rental housing. It does not apply to single family homes (i.e. detached, semi-detached, and attached dwelling housing).

This Planning Proposal seeks to amend the Waverley Local Environmental Plan 2012 (WLEP 2012) by introducing a new affordable housing contribution as a requirement in the WLEP 2012, consistent with the recommendations from the Local Housing Strategy:

- A contribution on all new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development of 1% of gross floor area at a flat \$ rate/sqm.
- A contribution (calculated at the time of planning proposal assessment) of gross floor area at a flat \$ rate/sqm towards affordable housing for sites that receive planning uplift through planning controls.

1.2 Intended Outcomes

The objectives or intended outcomes of the proposed amendments to the WLEP 2012 are:

- Provide a transparent framework for development and uplift received through the planning proposal process to make equitable affordable housing contributions
- Increase the amount of affordable housing within Waverley LGA to achieve Waverley's affordable housing targets set out in the Local Housing Strategy for 2036
- Ensure affordable housing contribution rates do not impact on development viability
- Ensure certainty for landowners and developer seeking to develop land in the LGA in understanding the contribution rates applicable to their development

PART 2 – EXPLANATION OF PROVISIONS

2.1 A new additional local provision

The intended outcomes will be achieved by including two new local provisions and a new Schedule in the WLEP 2012 that enables the collection of affordable housing levy contribution. For the purposes of illustrating the intent of this, two new proposed clauses are provided as follows, with wording similar to Clauses 7.13 and 7.13B of the Sydney Local Environmental Plan 2012. The proposed provisions will be subject to legal drafting by Parliamentary Counsel, should the proposal proceed.

Part 6 Additional Local Provisions

6.13 Affordable housing contribution for certain development

(1) This clause applies to all land in the Waverley Local Government Area.

(2) This clause applies to development for the purposes of a new residential flat building, multi dwelling housing, independent living unit, and shop top housing development.

(3) The consent authority may impose a condition requiring a contribution equivalent to the affordable housing contribution levy of 1% of the total new gross floor area of the residential component of applicable development.

(4) A condition imposed under this clause must satisfy the affordable housing levy contribution

(a) by way of a monetary contribution to the Council that is the per square metre value calculated in accordance with subclause (5), or

(b) by way of a dedication in favour of the Council of land comprising 1 or more complete dwellings (each having a total gross floor area of no less than 50 square metres).

(5) For the purposes of this clause, the per square metre monetary value is to be calculated in accordance with the Waverley Affordable Housing Contributions Scheme.

(6) This clause does not apply to development for the purposes of any of the following –

(a) development for the purposes of new residential flat building, multi dwelling housing, independent living unit, and shop top housing development that is used to provide affordable housing or public housing, or

(b) development for the sole purposes of generating employment, or

(c) development where a contribution under Clause 6.14 has been paid.

(7) The demolition of a building, or a change in the use of land, does not give rise to a claim for a refund of a contribution.

6.14 Affordable housing contribution on Planning Proposal sites

(1) This clause applies to development on land identified in Schedule 7.

(2) The consent authority may, when granting development consent to development to which this clause applies, impose a condition requiring an affordable housing levy contribution equivalent to the contribution specified for the land in Schedule 7 (the contribution).

(3) A condition imposed under this clause must satisfy the affordable housing levy contribution

(a) by way of a monetary contribution to the Council that is the per square metre value calculated in accordance with subclause (4), or

(b) by way of a dedication in favour of the Council of land comprising 1 or more complete dwellings (each having a total gross floor area of no less than 50 square metres).

(4) For the purposes of this clause, the per square metre monetary value is to be calculated in accordance with the Waverley Affordable Housing Contributions Scheme.

(5) This clause does not apply to development for the purposes of any of the following –

(a) development for the purposes of residential accommodation that is used to provide affordable housing or public housing

(b) development for the sole purposes of generating employment.

(6) The demolition of a building, or a change in the use of land, does not give rise to a claim for a refund of a contribution.

Schedule 7 Planning Proposal Land

Planning Proposal Land	Contribution requirement
<i>[intentionally blank – future PP lot and dp’s would be added here]</i>	<i>[intentionally blank – contribution rate would be added here]</i>

PART 3 – JUSTIFICATION

3.1 Section A – Need for the planning proposal

There is an undeniable need to provide affordable housing within the Waverley LGA for low-moderate income households. In Waverley the household income to house price ratio has risen from 4 in 1994 to 12 in 2016. The house price to income ratio indicates that Sydney median household income of \$1,750 would need to spend 12 times their annual gross income to purchase the average house in Waverley. Furthermore, Waverley’s rent (for all dwellings) is 130% higher than the Sydney average. The median rent for a house of \$1,300/week is well beyond the affordable rental range (more than 30% of household income). In particular, the disparity between rents in Waverley compared to Greater Sydney are more pronounced for three or more-bedroom places. This reflects a high demand for this type of housing product in Waverley.

The median rent for a unit is \$680/week. The median unit rent is affordable for households on a moderate income that is 20% more than the gross median household income for Waverley. The median weekly unit rent in Waverley suburbs is approximately \$500 to \$1,500 more than Sydney suburbs. According to the latest Rental Affordability Index 2020, most of the Waverley LGA is unaffordable for rental households with an income of \$95,000. In 2016, 20% of households renting in Waverley are in rental stress. This is a growing issue as the current supply of affordable rental housing is only meeting 57% of demand and new developments in Waverley may result in the loss of affordable housing.

When looking at the apartment types by bedroom number, the affordable units were for one and two-bedroom apartments. Like rental prices for houses, there is a significant increase in price for three-bedroom dwellings. This points to a demand for larger affordable units and the potential forced relocation for those residents who cannot afford these dwellings.

The above analysis highlights how Waverley has become severely unaffordable. In order to reduce the impact of this exacerbation Council needs to be able to increase the supply of dedicated affordable housing available to low-moderate income households.

3.1.1 Is the planning proposal a result of any strategic study or report?

The Proposal is a result of the Waverley Affordable Housing Contributions Scheme. The Scheme identifies the clear and critical need for increased supply of affordable housing within Waverley. The scheme proposes a modest contribution levy on all new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development excluding development for the

primary purpose of social housing and affordable rental housing. The scheme also proposes a contribution for sites that receive uplift through the Planning Proposal process.

This Proposal also responds to the findings of the Local Housing Strategy. The Local Housing Strategy suggests that there is sufficient capacity under current controls to meet Waverley's set housing targets and accommodate housing needs up to 2036. The proposed Waverley scheme is inconsistent with the Department's *Guideline for Developing an Affordable Housing Contribution Scheme* ("the AHCS Guidelines"), which require precinct scale upzonings to levy affordable housing contributions. However, the proposed Waverley Affordable housing Scheme is consistent with cl 7.32(1) of the *Environmental Planning and Assessment Act 1979* (the Act). This Planning Proposal intends to explain why Waverley's circumstances are unique and – notwithstanding any inconsistencies with the AHCS Guidelines – are the most appropriate way to secure affordable housing.

3.1.2 Is the planning proposal the best means of achieving the objectives or intended outcomes, or is there a better way?

The Planning Proposal is the best means of facilitating new affordable housing contributions within the Waverley LGA as it is the only means of amending the LEP to reference the Scheme under the Housing SEPP. Currently Council allocates contributions from Planning Agreements towards public purposes including the provision of affordable housing. Council also levies contributions for affordable housing through the Housing SEPP if there is a reduction in affordable housing. Whilst Council can continue to secure contributions through these methods, they are not the most effective means of securing contributions for affordable housing. The contributions collected under the Housing SEPP are sent to NSW FACS and pooled into the *Boarding House Financial Assistance Program*, which provides grants for fire safety upgrading works to boarding houses across Greater Sydney.

Waverley has the second highest population density (80 people/Ha) in NSW with 66% of residents living in flats, units or apartments, compared to the Greater Sydney average where about 60% of the population live in detached houses. Even in relatively less dense parts of the LGA such as Dover Heights, the population density of 42 people/Ha still places it in the top 5% of most dense SA2s in NSW (30th out of 576 SA2s). Therefore, opportunities for 'significant' or 'large scale' rezoning (commonly known as "upzoning") are limited. The requirement for significant precinct-scale upzoning provides a windfall gain to landowners and imposes only a minimal requirement for affordable housing. We suggest that in instances where sites receive an upzoning that a higher percentage of affordable housing is required and would best form part of a value capture / value sharing scheme.

The District Plan requires that all Councils develop 6-10 year (2022-2026) and 11-20 (2027-2036) year housing targets. The GSC developed 0-5 year targets (2016-2021) for all Councils and Waverley's was 1,250 dwellings. This reflected the current housing supply pipeline that we were already on track to exceed. The proposed housing target of 3,400 dwellings to 2036 reflects a growth rate of 0.4% p.a to 2036. In comparison, DPIE's dwelling projection for Greater Sydney is that it will grow by 2% p.a to 2036.

The housing target projects a similar level of growth to historical supply because beyond being already significantly dense, there are number of additional constraints to any further growth above current capacity. There is only so much 'low hanging fruit' left i.e. feasible and profitable sites, and these have been picked up in the capacity assessment. Once these sites are redeveloped, the high number of existing sites are predominantly strata titled reducing the amount of developable areas. The feasibility of these remaining non-strata areas is limited because much of these are Heritage Conservation Areas,

heavily capitalised or in locations where single dwellings attract a higher premium compared to apartments (i.e. some apartment complexes have been converted to single dwellings). Whilst a housing target has been developed, it should be noted that ultimately the take up of the housing target will be left to the market.

Given the above, the LHS does not recommend any precinct upzonings and as such is inconsistent with the current version of the AHCS Guidelines, which focus on contributions being predicated on large scale precinct upzoning. Notwithstanding, the guidelines are much narrower in their scope than the Act, which provides for a broader range of conditions in which an Affordable Housing Contribution Scheme can apply. In particular, this Planning Proposal is consistent with the *CI 7.32(1)(c) of the Act* “the proposed development is allowed only because of the **initial zoning** of a site, or the rezoning of a site (emphasis added).” The AHCS Guidelines too narrowly circumscribe the conditions for when affordable housing contributions can be levied by only focusing on the ‘rezoning’ and not the ‘initial zoning’. Furthermore, the Act refers to a site, not precincts as the AHCS Guidelines focus on. The interpretation of ‘initial zoning’ indicates that if a development is permissible, whether that be through the existing zoning or rezoning, or proposes to remove affordable housing, then Council should be able to levy a contribution from the development; regardless of if the site has been a part of a significant rezoning.

It is acknowledged that DPE did not support an action in the LHS reading “develop an affordable housing contributions scheme that is inconsistent with DPE guidelines” and asked Council to “revise its Affordable Housing Contribution Scheme to commit Council to examining the feasibility of levying affordable housing contributions for any new planning proposals that would result in development uplift or an increase in land value in line with SEPP 70 and the Department’s Guideline for Developing an Affordable Housing Contribution Scheme.” In response to this feedback, the recommended LEP clause wording under this Planning Proposal has been adjusted to provide opportunity for case by case feasibility testing – see proposed clause 6.14(3).

Implementing a 1% contribution levy on all new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing developments and a levy on all sites that receive uplift through planning controls will allow Council to secure much needed housing for the purposes of affordable housing to be made available to low-moderate income households through community housing providers.

Why an LEP clause is more appropriate than Voluntary Planning Agreements

Historically Waverley has allocated funds received from Voluntary Planning Agreements (VPAs) to affordable housing. However, VPAs are ultimately voluntary and, in the absence of a clause in the LEP binding upzoned sites with an AH contribution, then there is nothing obligating developers to provide affordable housing as part of upzonings. Furthermore, VPAs must be entered into by each landowner and hence there may be circumstances where most landowners subject to an upzoning are supportive of an AH contribution, but an objecting landowner can undermine the VPA applying for affordable housing. For example, for the War Memorial Hospital Planning Proposal, the Uniting Church owns 90% of all lots, but there are other owners interspersed and this is undermining the ability to apply a VPA and hence why an LEP clause that binds all landowners is preferred.

Why the 1% affordable housing levy contribution is needed?

Given the significant need for affordable housing in the Waverley LGA and the limited opportunities for large scale upzoning (i.e. most of the LGA being either strata titled, heritage listed or heavily capitalised), applying a 1% levy across all new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development is the only way to achieve a meaningful number of new

affordable dedicated dwellings. Furthermore, the CI 7.32(1)(c) Act refers to the 'initial zoning' of a site regardless if the site has been a part of a significant rezoning.

Other Councils such as Willoughby and the City of Sydney, have applied a broad and low percentage rate across large area and this approach seeks to emulate these Councils. City of Sydney, for example, applied a 3% affordable housing contribution rate to all residential floorspace in Green Square and 1% to non-residential floorspace. In Ultimo/Pymont area, a 0.8% contribution rate was applied to residential floorspace and 1.1% applied to non-residential floorspace.

It is envisaged that the market could absorb a 1% affordable housing levy applying across the Waverley LGA as the only developer contributions that are payable are the 1% 7.12 levy – equating to approximately \$4,000 per dwelling – which is very low in the context of the typical 7.11 contribution across most Sydney Councils (which is around \$20,000 per dwelling on average). Furthermore, viability testing of case study sites showed that a 1% affordable housing levy is viable. Depending on the suburb, the 1% affordable housing contribution would equate to between \$8,000 and \$14,000 per dwelling (each suburb has pre-scheduled rates in the Affordable Housing Contribution Scheme). On balance, ***the total contribution level even with the 1% AH contribution would be lower than most Councils' existing developer contributions arrangements; therefore, the burden to development would be tolerable.*** See Section 3.3.3 for a detailed discussion in the financial feasibility modelling.

The impact of the 1% affordable housing levy is likely to be absorbed by landowners, resulting in lower land price as demonstrated by extensive research in this area.¹ Research showed that the costs cannot be passed onto purchasers and add to the price of housing, because if the purchaser is willing to pay a higher price for the land or development, the landowner would likely charge it in any case.² As the impact of 1% affordable housing levy on development cost is minimum, in the short-term, if a developer had not accounted for a cost (such as an inclusionary zoning mandate), the costs are borne by the developer. In the medium to long-term, these costs are built into the cost profile of any potential development prior to the acquisition of a development site, thereby directly reducing the sale price landowners could achieve for development sites as purchasers would require a tenable profit margin (effectively shifting the windfall 'planning gain' from private to public interests). This is reflected by the NSW Productivity Commission *Review of Infrastructure Contributions in NSW*:

“Contributions do not necessarily add to the final price of new housing. The maximum price achievable for a new apartment or dwelling will be determined to a large degree by the broader housing market, with consideration of the unique characteristics of the property and its location. When a contribution is levied, to the extent that the broader housing market and characteristics of the dwelling are no different, the maximum price achievable for the dwelling would remain unchanged.”³

3.2 Section B – Relationship to strategic planning framework.

3.2.1 Is the planning proposal consistent with the objectives and actions of the applicable regional or sub-regional strategy (including the Greater Sydney Region Plan and exhibited draft strategies)?

A Metropolis of Three Cities

A Metropolis of Three Cities – the Greater Sydney Region Plan (Region Plan) prepared by the Greater Sydney Commission is a high-level strategy applicable to the proposal. The Region Plan sets forward a vision for Greater Sydney of three 'Cities' of which Waverley falls into the 'Eastern Harbour City.' Each city has goals related to Infrastructure and Collaboration, Liveability, Productivity and Sustainability, as well as Ten Directions that relate to the whole of the Greater Sydney Region. Each of the above objectives within the Eastern City District Plan give effect to objectives within *A Metropolis of Three Cities*, the connections are set out below.

Eastern City District Plan

Planning priority E4: Fostering healthy, creative, culturally rich and socially connected communities

This Planning Proposal will help to target local responses to address spatial variations in socio-economic disadvantage across the Eastern City District as it will provide the supply of affordable housing in various suburbs throughout Waverley. The high connectivity and high accessibility of Waverley's public transport and proximity of surrounding suburbs to the Strategic Centre of Bondi Junction means that the affordable housing stock within Waverley will ensure that the tenants experience a higher quality of life.

Increased affordable housing stock will help to diversify Waverley's community by providing a greater emphasis on very low, low and moderate household incomes. This will ensure that Waverley isn't only affordable to those on high and very high household incomes.

This Proposal is in line with this direction of the Eastern City District Plan which in turn gives effect to the *Metropolis of Three Cities* this Planning Proposal delivers on the following objectives and corresponding strategies and actions:

- Objective 8 – Greater Sydney's communities are culturally rich with diverse neighbourhoods

Planning priority E5: Providing housing supply, choice and affordability, with access to jobs, services and public transport

Introducing the requirement for 1% affordable housing in all residential unit developments and a contribution (calculated at planning proposal assessment stage) for any site receiving uplift will increase the availability of affordable housing within Waverley. This housing will be given to a community housing supplier to manage so that the rent will be capped at a percentage of the market rate meaning those on very low, low and moderate household incomes can still afford to live in Waverley. This will help to improve housing inequalities within Waverley and ensure that there will be a variety of housing typologies available at low rental rates.

As the contributions are proposed to cover the entirety of the Waverley LGA there will be greater certainty that the supply of housing will be located with good access to jobs, services and public transport. The relatively small requirement will also ensure that the development will still be

economically feasible which in turn will ensure that the stock of affordable housing will grow with at least 1 dwelling per residential unit development being used for affordable housing purposes.

This Proposal is in line with this direction of the Eastern City District Plan which in turn gives effect to the *Metropolis of Three Cities* this Planning Proposal delivers on the following objectives and corresponding strategies and actions:

- Objective 10 – Greater housing supply
- Objective 11 – Housing is more diverse and affordable

Local Environmental Plan Making Guideline (August 2023) – Site Specific and Strategic Merit Tests

Table 1: Assessment of Proposal against Strategic Merit Test

Strategic Merit Test	
a) Does the proposal have strategic merit? Does the proposal:	
Give effect to the relevant regional plan outside of the Greater Sydney Region, the relevant district plan within the Greater Sydney Region, and/or corridor/precinct plans applying to the site. This includes any draft regional, district or corridor/precinct plans released for public comment or a place strategy for a strategic precinct including any draft place strategy.	<p>As listed above, the Planning Proposal is consistent with Planning Priority E4: Fostering healthy, creative, culturally rich and socially connected communities and Planning Priority E5: Providing housing supply, choice and affordability, with access to jobs, services and public transport.</p> <p>Introducing the requirement for 1% affordable housing in select new residential development and a levy (calculated during planning proposal assessment stage) of any site receiving uplift will increase the availability of affordable housing within Waverley. This housing will be given to a community housing supplier to manage so that the rent will be capped at a percentage of the market rate meaning those on very low, low and moderate household incomes can still afford to live in Waverley. This will help to improve housing inequalities within Waverley and ensure that there will be a variety of housing typologies available at low rental rates.</p>
Demonstrate consistency with the relevant LSPS or strategy that has been endorsed by the Department or required as part of a regional or district plan.	As seen below in Section 3.2.2 this Proposal is consistent with the LSPS, specifically <i>Planning Priority 6: Facilitate a range of housing opportunities in the right places to support and retain a diverse community.</i>
Respond to a change in circumstances that has not been recognised by the existing planning framework.	<p>This Proposal responds to the housing affordability crisis in Waverley that has been steadily growing for many years. The existing high house prices in Waverley continue to climb and are expected to have a detrimental impact on the socio-economic diversity of Waverley. There are great levels of inequality between those who can and cannot afford housing in Waverley. Increasing housing stress caused by the loss of affordable housing has detrimental ramifications such as the displacement of long-term residents in gentrifying areas, loss of cultural and social diversity, and key workers struggle to afford high housing costs proportionally to low incomes.</p> <p>This Proposal will ensure that there is housing available for those with very low, low and moderate household incomes. This Proposal</p>

	is the mechanism by which the LEP can secure this affordable housing.
--	---

Table 2: Assessment of Proposal against Site Specific Merit Test

Site-specific Merit Test	
b) Does the proposal have site-specific merit, having regard to the following:	
The natural environment on the site to which the proposal relates and other affected land (including known significant environmental areas, resources or hazards).	N/A. This Planning Proposal applies to the entirety of Waverley LGA. This Proposal will not have any impacts on the natural environment.
The existing uses, approved uses, and likely future uses of land in the vicinity of the proposal.	This Proposal will not inhibit any proposed development within Waverley. The Proposal will ensure that any development for residential units or Proposal seeking an uplift through the Planning Proposal process will provide affordable housing. The modest and relatively low percentages proposed to be levied will ensure that the proposals are still economically viable so that the development can still go ahead, and a social benefit can be achieved.
The services and infrastructure that are or will be available to meet the demands arising from the proposal and any proposed financial arrangements for infrastructure provision.	This will be assessed as part of any subsequent DA or Planning Proposal that is lodged. The Proposal will not lead to any increase in population, only subsequent DAs and PPs will lead to this and these will be dependent on market demand.
Any proposed financial arrangements for infrastructure provision.	Any arrangements for infrastructure provision will be secured through a VPA which will be assessed on its merits.

3.2.2 Is the planning proposal consistent with a council's local strategy or other local strategic plan?

Waverley Local Environmental Plan 2012

The Waverley LEP has seven main aims that all Planning Proposals and development should be consistent with where applicable. This Planning Proposal is consistent with the following key aims of the Waverley LEP.

to promote and co-ordinate a range of commercial, retail, residential, tourism, entertainment, cultural and community uses to service the local and wider community

This Proposal will promote a range of housing choices available to the Waverley community and importantly will service the needs of those on very low, low and moderate household incomes. This will in turn support the wider community as it will ensure equity in housing choices and promote diversity through allowing members of the community of a variety of socio-economic backgrounds to live in the area. This will also ensure long term residents are not displaced as a result of housing affordability.

to provide for a range of residential densities and range of housing types to meet the changing housing needs of the community

The Planning Proposal is the best means of facilitating new affordable housing contributions within the Waverley LGA which will allow Council to secure much needed affordable housing stock within Waverley. At present, Waverley is severely unaffordable. Waverley's rent for all dwellings is 1.3 times higher than the Sydney average. As a result, 30% of all renting households are in rental stress and, most strikingly, 85% of low-income households are in rental stress. The current forms of affordable housing supply are not going to meet the relevant demand. Waverley has the fifth lowest key worker population in Sydney. Where key workers are on a very low, low and moderate income, this is contributing to overall demand for affordable housing. This Planning Proposal responds to this need from the community for increased supply of affordable housing.

Waverley Local Strategic Planning Statement

Table 3: Assessment of the Proposal against the Local Strategic Planning Statement

Direction: Housing the city	
Planning Priority 6: Facilitate a range of housing opportunities in the right places to support and retain a diverse community	
<p>1. Prepare and implement a Local Housing Strategy that:</p> <ul style="list-style-type: none"> • Sets a 6-10 year and 20 year housing target; • Includes a review of the demand for seniors housing; • Investigates demand for student and worker housing to support the Randwick Health and Education Precinct, and other local needs. 	<p>The District Plan requires that all Councils develop 6-10 year (2022-2026) and 11-20 (2027-2036) year housing targets. The GSC developed 0-5 year targets (2016-2021) for all Councils and Waverley's was 1,250 dwellings. This reflected the current housing supply pipeline that we were already on track to exceed. The proposed housing target of 3,400 dwellings to 2036 reflects a growth rate of 0.4% p.a to 2036. In comparison, DPIE's dwelling projection for Greater Sydney is that it will grow by 2% p.a to 2036.</p> <p>The housing target projects a similar level of growth to historical supply because beyond being already significantly dense, there are number of additional constraints to any further growth above current capacity. There is only so much 'low hanging fruit' left i.e. feasible and profitable sites, and these have been picked up in the capacity assessment. Once these sites are redeveloped, the high number of existing sites are predominantly strata titled reducing the amount of developable areas.</p> <p>The Local Housing Strategy suggests that there is sufficient capacity under current controls to meet Waverley's set housing targets and accommodate housing needs up to 2036. Therefore, Waverley is not proposing any upzoning as part of the Comprehensive LEP Review 2021 as the housing demand can be met under current controls.</p>
<p>2. To increase the avenues to deliver affordable housing:</p>	<p>This Proposal is the implementation mechanism by which the affordable housing contributions</p>

Direction: Housing the city	
Planning Priority 6: Facilitate a range of housing opportunities in the right places to support and retain a diverse community	
<ul style="list-style-type: none"> • Work with Woollahra and Randwick Councils to prepare a regional approach to affordable housing; • Involve community housing providers in the preparation of the Affordable Housing Strategy; • Investigate opportunities to form partnerships to increase housing for very low to medium income groups; • Prepare and implement the Affordable Housing Strategy; • Review planning controls to support the delivery of affordable housing 	<p>scheme will be recognised in the LEP. This will help to increase housing supply available to very low, low- and medium-income households. As the contribution will apply to the entirety of the Waverley LGA, it will be the first step in preparing a regional approach to affordable housing in the Eastern City District. The Randwick Contribution Scheme's inclusion into the Housing SEPP (formerly SEPP 70) and Woollahra's application for an Affordable Housing Contribution Scheme will ensure that there are a variety of housing typologies available throughout the East to socio-economically disadvantaged groups.</p> <p>Once secured, the affordable housing will be managed by a community housing provider and rented out at rates that do not exceed a benchmark of 30% of the tenant's household income.</p> <p>Once this Proposal is gazetted by DPIE, this will be the avenue by which the planning controls have been amended to support the delivery of affordable housing.</p>
3. Work with the Department of Planning, Industry and Environment to prepare an affordable housing scheme to ensure the Housing SEPP is effective in Waverley	<p>This Planning Proposal will ensure that the Housing SEPP is effective within Waverley. The Planning Proposal provides the legislative means by which Council can require contribution payments for the purposes of affordable housing. As discussed throughout this report, the scheme requires some exemptions from the guidelines of the scheme but it does so in meeting the objectives of the scheme. As the Waverley Local Housing Strategy outlines there are no precincts left in Waverley to be upzoned as the LGA has the second highest population density in NSW among other issues which are discussed in Section 3.1.2. The proposed modest contribution rates will ensure that Waverley Council can still secure much needed affordable housing for its community without stifling development viability as seen in the economic feasibility modelling.</p>
4. Review planning controls to provide for diverse types of housing, and work with NSW Government to improve character considerations in the Codes SEPP	<p>This Proposal will help to promote affordable housing within Waverley by increasing the supply of affordable housing for socio-economically disadvantaged people. The Proposal applies to residential unit developments and sites seeking uplift through a Proposal and as such will ensure a mix of apartment types are made available to the affordable housing market.</p> <p>Whilst the Proposal is not specifically making any recommendations to provide diverse housing</p>

Direction: Housing the city	
Planning Priority 6: Facilitate a range of housing opportunities in the right places to support and retain a diverse community	
	typologies, Council will be implementing controls to target this issue as part of the Comprehensive LEP 2021.
5. Implement controls to regulate Short Term Holiday Letting in the LGA	Not applicable.
6. Advocate for changes to the ARHSEPP to increase the effective application of Part 3 to introduce a maximum cap on permissible rents, and increase effective and localised contributions schemes	Waverley Council has long advocated for changes to the former ARHSEPP and Housing SEPP to ensure the effectiveness of Part 3 and increase the effectiveness of securing localised contributions for affordable housing purposes. Whilst this Proposal does not impact the ARHSEPP or Housing SEPP at all, it does propose to ensure the effectiveness of securing contributions for localised affordable housing by introducing the 1% and uplift contribution levies. This Proposal is consistent with this action within the LSPS.

Waverley Community Strategic Plan 2022 - 2032

Table 4: Assessment of Proposal against Waverley Community Strategic Plan

Section	Consistency
1.7 Actively drive housing policy to meet the needs of the vulnerable, diverse and growing population	This Proposal will provide the mechanism that will ensure that affordable housing is secured in all future residential unit development and for any site receiving uplift. These units will be managed by community housing providers and strict conditions for tenants will be used so that the housing is made available only for those on very low, low and moderate household incomes. This Proposal is consistent with 1.7 of the Waverley Community Strategic Plan.

Waverley Local Housing Strategy

Table 5: Assessment of the Proposal against the Local Housing Strategy

Section	Consistency
Priority H2: Encourage a range of housing options to support and retain a diverse community	The Planning Proposal is consistent with this priority as the contributions will assist Council to increase affordable and social housing stock, contributing to greater housing options and providing accommodation that allows a diversity of individuals and families to continue residing in Waverley.
Priority H3: Increase amount of affordable rental and social housing. H3. 1. Develop an affordable housing contributions scheme for all new apartment developments. Initial modelling and analysis suggests the	The Planning Proposal is consistent with this priority as the contributions will assist Council to increase affordable and social housing stock.

<p>scheme could comprise the following elements:</p> <ul style="list-style-type: none"> * A small levy (1-3%) applying to all new residential apartment development. * A higher levy (10-15%) applying to sites receiving uplift through planning controls. * Contributions to offset the loss of affordable housing. 	
--	--

3.2.3 Is the planning proposal consistent with applicable State Environmental Planning Policies?

Table 6: Assessment of Proposal against relevant SEPPs

Title	Applicable	Consistent
Housing SEPP	Yes	<p>A key intention of the Housing SEPP is to facilitate more affordable rental housing by encouraging smaller and by nature, less expensive, dwellings into the local housing market. However, the SEPP purely relies on the smaller nature of the housing to make it affordable, with no formal requirements to cap rent at an affordable rate. In the 2016/17 financial year 20% of secondary dwellings were rented out on the private market and were more expensive than comparable product in the market. Anecdotal evidence indicates that the remaining 80% of secondary dwellings are being utilised under private, likely informal arrangements for extended family or adult children to live in. This reflects a wider shift towards multi-generational households for social and cultural reasons but also increasing housing affordability pressures particularly for young adults trying to get their foot in the market. Moreover, it is out of Council's control to monitor the rents to ensure that they are addressing the demand for affordable housing.</p> <p>Even when contributions are collected, they are not reinvested back into the Waverley LGA. Furthermore, developments only need to be available at a discounted affordable rate for 10 years, not in perpetuity.</p> <p>In early 2019, DPIE announced that, under (the now-repealed SEPP 70), all Councils were eligible to impose a condition of consent on new development for contributions to affordable housing. To do this, Council must have an affordable housing contributions scheme referenced in the LEP. This Proposal is the mechanism by which the contributions scheme is reference in the LEP.</p> <p>Waverley raised concerns in its submission to the draft SEPP 70 Guidelines that affordable housing contribution scheme should apply to all new development and that it is possible the guidelines misrepresent the Act by only focusing on the 'rezoning' and not</p>

		<p>the 'initial zoning'. To further address these concerns Council prepared the Local Housing Strategy.</p> <p>Council's recently adopted Local Housing Strategy does not propose any rezoning in the LGA. This is because it was determined that existing housing capacity under current controls would deliver the appropriate housing supply to meet housing targets. Notwithstanding, the Local Housing Strategy identified a strong need for affordable housing in the Waverley LGA and indicated that new market housing was not addressing this need but exacerbating it by often reducing existing affordable housing. To this end, there is a clear case for intervention, in the form of an affordable housing contribution, to ensure that new housing delivery is contributing to the delivery of affordable housing.</p> <p>The contribution will apply to all new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development excluding employment generating only development and development for the primary purpose of social housing and affordable rental housing and will consist of:</p> <ul style="list-style-type: none"> • A contribution on all new residential flat buildings, independent living units, multi-dwelling housing, and shop top housing development of 1% of gross floor space at a flat \$ rate/sqm. • A contribution of gross floor space towards affordable housing for sites that receive planning uplift through planning controls. <p>This Proposal justifies this proposed amendment further throughout. This Planning Proposal is the best means of facilitating new affordable housing contributions which will allow Council to secure much needed affordable housing stock within Waverley. This is consistent with the objectives of the SEPP.</p>
Transport and Infrastructure SEPP	N/A	Not inconsistent
Primary Production SEPP	N/A	Not inconsistent
Biodiversity and Conservation SEPP	N/A	Not inconsistent
Resilience and Hazards SEPP	Yes	Yes. This Planning Proposal does not contain provisions that contradict or would hinder the application of this SEPP
Industry and Employment SEPP	Yes	Yes. This Planning Proposal does not contain provisions that contradict or would hinder the application of this SEPP
Resources and Energy SEPP	N/A	Not inconsistent
Planning Systems SEPP	N/A	Not inconsistent
Precincts SEPPs: Eastern Harbour City SEPP, Western Parkland City SEPP, Central River City SEPP and Regional SEPP	N/A	Not inconsistent
Codes SEPP	Yes	Yes. This Planning Proposal does not contain provisions that contradict or would hinder the application of this SEPP

Sustainable Buildings SEPP	Yes	Yes. This Planning Proposal does not contain provisions that contradict or would hinder the application of this SEPP
----------------------------	-----	--

3.2.4 Is the planning proposal consistent with applicable Ministerial Directions (s.9.1 directions)?

Table 7: Assessment of Proposal against NSW Ministerial Directions

Ministerial Directions	Comment
<p>3.1 Residential Zones</p> <p>(1) The objectives of this direction are:</p> <p>(a) to encourage a variety and choice of housing types to provide for existing and future housing needs,</p> <p>(b) to make efficient use of existing infrastructure and services and ensure that new housing has appropriate access to infrastructure and services, and</p> <p>(c) to minimise the impact of residential development on the environment and resource lands</p> <p>(4) A planning proposal must include provisions that encourage the provision of housing that will:</p> <p>(a) broaden the choice of building types and locations available in the housing market, and</p> <p>(b) make more efficient use of existing infrastructure and services, and</p> <p>(c) reduce the consumption of land for housing and associated urban development on the urban fringe, and</p> <p>(d) be of good design.</p> <p>(5) A planning proposal must, in relation to land to which this direction applies:</p> <p>(a) contain a requirement that residential development is not permitted until land is adequately serviced (or arrangements satisfactory to the council, or other appropriate authority, have been made to service it), and</p> <p>(b) not contain provisions which will reduce the permissible residential density of land.</p>	<p>This Planning Proposal aligns with the relevant actions listed in this ministerial direction. The Proposal proposes to commit gross floor area to affordable housing for any site that receives uplift and 1% of gross floor area for any residential unit development. The Proposal will cover all of Waverley LGA so all resulting development for affordable housing will be well located to make use of existing infrastructure and public transport services to provide access to surrounding areas.</p> <p>This Proposal will not contain provisions which will reduce the permissible residential density of land.</p>
<p>3.2 Heritage Conservation</p> <p>(1) A planning proposal must contain provisions that facilitate the conservation of:</p> <p>(a) items, places, buildings, works, relics, moveable objects or precincts of environmental heritage significance to an area, in relation to the historical, scientific, cultural, social, archaeological, architectural, natural or aesthetic value of the item,</p>	<p>This Planning Proposal is not inconsistent with this direction, as clause 5.10 of the WLEP 2012 will continue to require heritage conservation.</p>

Ministerial Directions	Comment
<p>area, object or place, identified in a study of the environmental heritage of the area,</p> <p>(b) Aboriginal objects or Aboriginal places that are protected under the National Parks and Wildlife Act 1974, and</p> <p>(c) Aboriginal areas, Aboriginal objects, Aboriginal places or landscapes identified by an Aboriginal heritage survey prepared by or on behalf of an Aboriginal Land Council, Aboriginal body or public authority and provided to the relevant planning authority, which identifies the area, object, place or landscape as being of heritage significance to Aboriginal culture and people.</p>	
<p>5.1 Integrating Land Use and Transport</p> <p>(1) A planning proposal must locate zones for urban purposes and include provisions that give effect to and are consistent with the aims, objectives and principles of:</p> <p>(a) Improving Transport Choice – Guidelines for planning and development (DUAP 2001), and</p> <p>(b) The Right Place for Business and Services – Planning Policy (DUAP 2001).</p>	<p>This Planning Proposal is not inconsistent with this direction, as it is still proven to be financially viable to development the applicable residential land uses in well-connected areas with good access to jobs and services by cycling, walking and public transport particularly within the MU1, E1, R3 and R4 zones.</p>
<p>6.1 Approval and Referral Requirements</p> <p>(1) The objective of this direction is to ensure that LEP provisions encourage the efficient and appropriate assessment of development.</p>	<p>The proposal aims to ensure that the amended WLEP2012 would give effect to the redevelopment of the site and the appropriate assessment of development.</p>
<p>7.1 Employment Zones</p> <p>(1) A planning proposal must:</p> <p>(a) give effect to the objectives of this direction,</p> <p>(b) retain the areas and locations of Employment zones,</p> <p>(c) not reduce the total potential floor space area for employment uses and related public services in Employment Zones.</p> <p>(d) not reduce the total potential floor space area for industrial uses in E4, E5 and W4 zones, and</p> <p>(e) ensure that proposed employment areas are in accordance with a strategy that is approved by the Planning Secretary.</p>	<p>This Planning Proposal is not inconsistent with this direction as it will not discourage employment growth in suitable locations nor impact on the viability of identified centres.</p> <p>Employment-only generating development is excluded from either contribution.</p>

3.3 Section C – Environmental, social and economic impact

3.3.1 Is there any likelihood that critical habitat or threatened species, populations or ecological communities, or their habitats, will be adversely affected as a result of the proposal?

This Planning Proposal does not propose any physical development and the collection of contributions for the purposes of affordable housing will not have any environmental impacts. Any development that is lodged with Waverley Council will be assessed on its merits.

3.3.2 Are there any other likely environmental effects as a result of the planning proposal and how are they proposed to be managed?

There are no environmental impacts proposed as part of this Planning Proposal.

3.3.3 Has the planning proposal adequately addressed any social and economic effects?

Economic effects

Financial feasibility modelling was completed to understand the impact of a 10% levy across the LGA (see attachments). Local developers were contacted to discuss assumption parameters. The following assumptions were used in the modelling.

Assumption	Comment
Cost assumptions	
High standard finish	Applied to all development tested and revenues reflected this level of finish.
Contingency	The building costs in the DPIE spreadsheet reflect Rawlinsons 'Australian Construction Handbook' costs, which have contingency built into the costs. Therefore, additional contingency was not added (cell reference E113 of 'Assumptions' tab).
Revenue Assumptions	
Sales prices	Where possible new apartment sales in the suburb were used. Where there has been a lack of new sales, existing apartments (typically 1970s stock) has been used with a 20% premium added to reflect a new sale.
Other Assumptions	
Apartment mix	Adopted the standard apartment mix as this covers off a broad section of development types in the LGA.
Uplift %	An uplift % of typically 30% was used across scenarios. Though most planning proposals seek uplift greater than this amount, this low uplift % was used to be conservative.
Land premium	Typically, 20% premium on existing use value has been used, although this was reduced to 15% in areas where prices are really high. Local developers indicated that a lower premium was offered in these areas.
Examples	Where possible actual developments were used in each suburb that was tested. Not all suburbs were tested as they had similar characteristics of neighbouring suburbs that were tested.

Overall, the modelling demonstrated that a 10% affordable housing levy applying to new developments with modest uplift was financially viable and hence would have an acceptable effect from a developer's

financial point of view. However, it is important to make the distinction that *private feasibility* occurs when industry can generate a return on capital that is sufficient to proceed with a project. This will arise when a purchaser's willingness to pay exceeds delivery costs and a minimum acceptable profit to developers. This is very different from an economic perspective, which is concerned with the public interest and measures changes to society's welfare and economic benefits or costs. The economic case for affordable housing contributions is strong.

The benefits of affordable housing are based on the social and economic sustainability associated with a greater social mix. Quality of life and well-being are enhanced if people transact their citizenship in diverse communities rather than polarised districts. Health outcomes, engagement in civic process and social capital building are supposed to be superior for rich and poor alike in mixed communities. The failure to provide affordable housing permanently in well serviced locations as the city develops leads to the geographic isolation, and subsequent marginalisation of low income and at-risk groups. There is evidence that concentration exacerbates disadvantage and diminishes the potential for involvement in training and work. Therefore, the inclusion of affordable housing in established areas with good access to opportunity is fundamental to social function and to avoid foregone human capital.⁴

Social Impacts

The existing high house prices in Waverley continue to climb and are expected to have a detrimental impact on the socio-economic diversity of Waverley. There are great levels of inequality between those who can and cannot afford housing in Waverley. Increasing housing stress caused by the loss of affordable housing has detrimental ramifications such as the displacement of long-term residents in gentrifying areas, loss of cultural and social diversity, and key workers struggle to afford high housing costs proportionally to low incomes.

Rental stress is a growing issue across Sydney as more people choose or can only afford to rent in a competitive housing market. In 2016, 30% of households renting in Waverley are in rental stress, which makes up 13% of all households in Waverley. When broken down into the income brackets below, there is a stark comparison between the proportion of households in rental stress when compared to Greater Sydney. This is markedly noticeable for very low income and low-income households where 81% and 85% of these households are in rental stress. Based on anecdotal evidence, these households are likely to be those on a pension or single income families.

The proportion of households in rental stress has been translated as a base level demand target for the provision of affordable rental housing. In 2016, 13% of Waverley households were in rental stress equating to 3,440 dwellings (assuming one household equals one dwelling). This made up 11% of the total dwelling stock in 2016. The Waverley Local Housing Strategy highlights that just to address the current proportion of households in rental stress, an additional 600 affordable dwellings will be required by 2036, equating to approximately 30 affordable rental dwellings per annum.

Facilitating the provision of more affordable housing through the Scheme will help to achieve this target set for approximately 30 affordable rental dwellings per year as it is a much more consistent and certain way of securing the contribution for affordable rental housing as opposed to a VPA. This will have a positive social impact as it will help to bridge the gap in housing inequality in Waverley and ensure that long term residents who are in rental stress are not displaced.

⁴ Spiller M and Anderson-Oliver M, 'Revisiting the economics of inclusionary zoning', SGS Economics and Planning, April 2015.

It is important to understand the demand for key worker housing as key workers are essential to the social and economic wellbeing of cities. The financial ability of key workers to live somewhere is often used as a measure of housing affordability because they are generally in lower-paid occupations and need to live close to their place of work because of irregular shifts (e.g. at night) or the need to respond to emergency situations. Typically, key workers are teachers, nurses, ambulance, paramedic and emergency services and police officers.

In 2016, there were 1,600 key workers on very low, low to moderate incomes living in Waverley. Between 2006 and 2011, there was a 15.2% net loss of these key workers in the Eastern Suburbs, and now Waverley LGA has the fifth lowest key worker population in Sydney.⁵ The loss of key workers is telling of the broader picture that Waverley has grown as an increasingly unaffordable area for very low and low income households. This entrenches and exacerbates disadvantages as it “can force long distance commutes and increasingly displace asset poor older and younger people from areas where they have historically lived; thereby excluding those who play a valuable role in the Waverley’s economic and social fabric”.⁶

3.3.4 Is there adequate public infrastructure for the planning proposal?

While this Planning Proposal will facilitate more affordable housing, it does not propose an increase in density above that which is currently permissible under the Waverley LEP. As such, it will not result in an increase in residential or worker population greater than what have already been anticipated and is not expected to result in any additional burden on existing public infrastructure.

Any Planning Proposals or DAs proposing uplift above the development standards will be considered on their merits.

PART 4 – MAPPING

This Planning Proposal will apply to all of Waverley LGA and as such no changes to mapping are required.

PART 5 – COMMUNITY CONSULTATION

Public exhibition is likely to include a newspaper advertisement, hard copy display in the Council’s Library and Customer Service Centre, a display on the Council’s website and written notification to landowners. The gateway determination will specify the level of public consultation that must be undertaken in relation to the planning proposal.

Pursuant to Division 3.4 of the Act, a planning proposal must be placed on public exhibition for a minimum of 28 days, or as specified in the gateway determination for the proposal. The Responsible Planning Authority must consider any submissions made concerning the proposed instrument and the report of any public hearing.

⁶ Judith Stubbs and Associates, 2016, SSROC Affordable Housing Submission: Background report part 1 – demographic and housing market analysis.

PART 6 – PROJECT TIMELINE

The following indicative project timeline will assist with tracking the progress of the planning proposal through its various stages of consultation and approval. It is estimated that this amendment to WLEP will be completed by December 2021.

The detail around the project timeline is expected to be prepared following the referral to DPIE for a Gateway Determination.

Table 7: Project Timeline

Tasks	Timeframe
First Gateway Determination	January 2023
Second Gateway Determination	September 2023
Resubmission of Planning Proposal	October 2023
Community Consultation	November 2023
Post Exhibition Review	January 2024
Update Planning Proposal / Report to Council	February 2024
Parliamentary Counsel drafting of LEP	March 2024
DPIE to finalise LEP	March 2024
