# Executive Summary

JBS&G Australia Pty Ltd (JBS&G) was engaged by City of Canada Bay (Council, the client) for the delivery of a Preliminary Site Investigation (PSI) relating to the Parramatta Road Corridor Urban Transformation Strategy (PRCUTS) Stage 2.

Council is currently implementing the NSW Government's PRCUTS and is commencing background studies for Stage 2 (Canada Bay portions) of three Precincts (the site) referred to as Kings Bay Precinct, Burwood Precinct, and the Bakehouse Quarter of the Homebush Precinct. Precinct locations are detailed on **Figure 1**, with distinct sub-areas comprising each Precinct detailed on **Figures 2A to 2F**. The combined site area across the three precincts occupies approximately 57 ha.

Much of the Stage 2 site contains low density residential land use as well as areas of commercial/industrial land use noted, including commercial office buildings, industrial parks, mechanics/car yards/car washes, petrol stations and retail spaces. Additionally, a number of educational facilities including a high school, primary schools, and early learning centres, are present on the site.

*State Environmental Planning Policy (Resilience and Hazards) 2021* requires consideration of contamination issues when rezoning land. If a rezoning allows a change of use that may increase the risk to health or the environment from contamination, then the planning authority must be satisfied that the land is suitable for the proposed use or can be remediated to make it suitable. Council has identified the need to assess the potential for contamination which could constrain future development of sites within the Precincts for Mixed Use and Medium Density Residential uses.

As such, Council requires completion of a PSI to satisfy SEPP (Resilience and Hazards) 2021 requirements for rezoning application. Council has also requested the scope allow for risk-ranking of sites to identify areas which may require follow-up sampling to be undertaken as a separate investigation.

The objective of the project is to assess the potential for contamination within the Precincts and whether the land is suitable for rezoning for mixed use and medium-density residential uses, or can be remediated to make the land suitable, and whether further targeted investigation is required to confirm such findings prior to rezoning.

Based on the information provided in this report, the scope of the investigation, and in accordance with the limitations in **Section 8**, the following conclusions are made:

- An assessment of the site history has identified that the primary land uses across the three Precincts appeared to have been industrial/commercial, residential and educational land uses. Notably properties along Parramatta Road in all three precincts have served for a variety of industrial/commercial activities, including as mechanics workshops and car yards and service stations. Additionally, a significant portion of the Bakehouse Quarter within the Homebush Precinct has historically served as the Arnott's Biscuits Factory;
- The site is located within an area of 'no known occurrence' of acid sulfate soil materials, with the exception of a minor portion of the east Burwood Precinct, underlying a small portion of Concord High School. A further assessment of this area would be required to confirm the acid sulfate soils risk;
- Based on an assessment of the history, environmental setting and a detailed site inspection, there is considered to be a low potential for widespread or gross contamination across the majority of the site, although there are portions where the risk of contamination has been assessed as moderate to high. There is a greater potential for contamination associated with previous onsite storage and use of fuels and/or chemicals within industrial/commercial businesses, particularly relating to former or existing underground petroleum storage systems (UPSS) and potential hazardous building materials at properties that have not been recently redeveloped.

- Identified potential contamination issues relate to common potentially contaminating land use activities which can be readily dealt with during the development application (DA) stage (i.e. including completion of preliminary and detailed site investigations consistent with relevant development control plans (DCPs) and *State Environmental Planning Policy (Resilience and Hazards) 2021* remediation of land requirements) for redevelopment and assessment for site suitability; and
- In the absence of gross or widespread contamination, the requirements of the DUAP/EPA (1998) *Managing Land Contamination: Planning Guidelines* for rezoning are considered to have been satisfied, namely that the rezoning can proceed, "provided that measures are in place to the ensure that the potential for contamination and the suitability of the land for any proposed use are assessed once detailed proposals are made".

It is recommended that project-specific preliminary and/or detailed site investigations be undertaken upon submission of DA for redevelopment of any land within the Precinct areas with a low to moderate or higher preliminary contamination risk ranking, to assess the suitability of that land for the use(s) proposed and whether any contamination of the land requires remediation to make the land suitable.

It is also recommended that Hazardous Building Material Surveys (HBMS) be undertaken prior to any demolition and redevelopment works on individual land parcels where there is the potential for hazardous materials to be present, irrespective of the preliminary risk ranking herein.

# 1. Introduction

## 1.1 Background and Objectives

JBS&G Australia Pty Ltd (JBS&G) was engaged by City of Canada Bay (Council, the client) for the delivery of a Preliminary Site Investigation (PSI) relating to the Parramatta Road Corridor Urban Transformation Strategy (PRCUTS) Stage 2.

Council is currently implementing the NSW Government's PRCUTS and is commencing background studies for Stage 2 (Canada Bay portions) of three Precincts (the site) referred to as Kings Bay Precinct, Burwood Precinct, and the Bakehouse Quarter of the Homebush Precinct. Precinct locations are detailed on **Figure 1**, with distinct sub-areas comprising each Precinct detailed on **Figures 2A to 2F**. The combined site area across the three precincts occupies approximately 57 ha.

Much of the Stage 2 site contains low density residential land use as well as areas of commercial/industrial land use noted, including commercial office buildings, industrial parks, mechanics/car yards/car washes, petrol stations and retail spaces. Additionally, a number of educational facilities including a high school, primary schools, and early learning centres, are present on the site.

*State Environmental Planning Policy (Resilience and Hazards) 2021* requires consideration of contamination issues when rezoning land. If a rezoning allows a change of use that may increase the risk to health or the environment from contamination, then the planning authority must be satisfied that the land is suitable for the proposed use or can be remediated to make it suitable. Council has identified the need to assess the potential for contamination which could constrain future development of sites within the Precincts for Mixed Use and Medium Density Residential uses.

As such, Council requires completion of a PSI to satisfy SEPP (Resilience and Hazards) 2021 requirements for rezoning application. Council has also requested the scope allow for risk-ranking of sites to identify areas which may require follow-up sampling to be undertaken as a separate investigation.

The objective of the project is to assess the potential for contamination within the Precincts and whether the land is suitable for rezoning for mixed use and medium-density residential uses, or can be remediated to make the land suitable, and whether further targeted investigation is required to confirm such findings prior to rezoning.

## 1.2 Scope of Works

The scope of work was prepared based upon an understanding of the client's requirements together with consideration of guidelines made or approved by the NSW Environment Protection Authority (EPA) including the National Environment Protection Council (NEPC)*National Environment Protection (Assessment of Site Contamination) Measure 1999*, as amended 2013 (NEPC 2013 ASC NEPM). The scope of work also considers Council's *Contaminated Land Policy* (adopted June 2016) and SEPP (Resilience and Hazards) 2021 remediation of land requirements. The specific scope of works completed as part of the PSI is summarised below:

- Review of all available previous site investigation reports and property documentation available from Council and as may be readily publicly available;
- Review of current and historical land title records for a selection of properties within the Precincts, (up to 10 lots selected based on a preliminary assessment of potential risk considering current land use and historical aerial photography);
- Review of historical aerial photographs covering the Precincts to identify potential changes in land use;
- Review of heritage records available online through NSW Office of Environment and Heritage (OEH) and others applicable;

- Review of records of environmental incidents or former environmental licences and notices as held by the EPA;
- Review of the environmental setting of the site including geology, hydrogeology, acid sulfate soils, groundwater, topography, etc;
- Review of licensed groundwater usage in the vicinity of the Precincts, as may be available on the Office of Water website;
- Site Inspection by a qualified environmental scientist from publicly accessible areas of the site;
- Risk ranking of the properties within each of the site areas; and
- Preparation of this PSI report.

It is noted no searches of Dangerous Goods records were made, which would require individual landowner consent. An assessment of potential for dangerous goods / hazardous materials to be stored and used on properties within the study area is provided based on historical land use desktop review and inspection.

# 2. Site Condition and Surrounding Environment

## 2.1 Site Identification

The site location is shown on **Figure 1**. The site layout and associated cadastral boundaries are shown on **Figure 2**. The general site details are summarised in **Table 2.1** and described in detail in the following sections.

**Table 2.1: Site details**

| Site | Kings Bay Precinct – Stage 2 | Burwood Precinct – Stage 2 | Bakehouse Quarter, Homebush Precinct – Stage 2 |
|---|---|---|---|
| Lot / DP Number | Various, see table in **Appendix A** | Various, see table in **Appendix A** | Various, see table in **Appendix A** |

## 2.2 Site Description

A site inspection was completed by a qualified and experienced environmental consultant on 30 to 31 March 2023. A photographic log of the site inspection is presented in **Appendix B**. To assist in the site description, the Precincts were divided up into areas as shown on **Figure 2A, 2B, 2C, 2D, 2E** and **2F**.

### 2.2.1 Kings Bay Precinct (East) – Stage 2

**Commercial/Industrial Area 1**

A Hertz car rental was located on the corner of Parramatta Road and Courland Street, which comprised a car lot as well as office structure and carwash. Adjacent to this, a retail car lot was located to the north, which additionally also appeared to serve as a smash repairs and mechanic, however detailed inspection of any potential workshop was not possible at the time. Areas of the retail car lot appeared to have been subject to filling activities to achieve the car lot levels. The majority of visible external surfaces were sealed with either concrete or asphalt.

**Residential Area 1**

The residential area comprised single and double storey homes. Front yards contained a combination of garden beds, turf and concrete sealed paths/driveways. They were enclosed by a combination of Colorbond, timber fencing, metal fencing and brick walls. Residences were noted to be in generally good condition.

**Historically Reported Area 1**

The area comprised a Sydney Tools retail store with both outdoor and undercover parking, situated on the corner of Parramatta Road and Courland Street. The structure was noted to be in good condition. A general slope towards the east was observed. This area is understood to have been subject to previous assessment, as discussed in **Section 4.1.1**.

**Commercial/Industrial Area 2**

Area 2 comprised a retail car lot and double storey brick structure which served as the retail office and for a mechanic. At the time of the inspection the mechanic workshop was unable to be inspected in a detailed manner, however storage of chemicals, tools and machinery associated with the servicing of vehicles was evident. Surfaces were sealed with concrete and areas of both the mechanic workshop and car lot appeared to have been subject to filling activities to achieve the final levels.

**Residential Area 2**

The residential area comprised a single storey home of brick construction. The front yard contained turfed areas and sealed paths. The residence was enclosed by a low brick wall. The residence was noted to be in generally good condition.

**Commercial/Industrial Area 3**

Area 3 was bound to the east by York Avenue, Lavender Street to the west and Parramatta Road to the south. The southern portion of Area 3 was occupied by a number of car yards which displayed numerous vehicles for sale. Surfaces were covered with sealed concrete and areas of raised levels were noted and were likely to have historically been subject to filling activities. Surfaces were observed to be in generally good condition and no staining was observed. Office structures associated with the car lots were present and were of brick construction and noted to be in generally good condition. Car wash facilities were noted to be present within the westernmost car lot. In the northwestern portion of Area 3, two commercial/ industrial structures were noted, each two-storey and of brick construction. The southernmost was occupied by a vehicle smash repairs business and the north appeared to serve as office space. A single-storey, brick residence was present in the northeast portion of Area 3.

**Commercial/Industrial Area 4**

The western portion of Area 4 was occupied by a sealed, vacant car lot and a single-storey commercial/industrial structure which appeared to be unoccupied. The surface of the car lot was noted to be in generally good condition, with no staining observed. At the time of inspection the car lot appeared to serve as parking space for the Illinois Hotel which was present in the eastern portion of Area 4. The Illinois Hotel was located on the corner of Parramatta Road and Arlington Street, and was a two-storey, brick structure, which included dining space, gaming facilities, and an outdoor dining area. The area was noted to slope generally to the southeast.

**Commercial/Industrial Area 5**

Area 5 was occupied by a car smash repairs business in the western portion and a new car dealership in the east. Limited observation of either internal space was able to be made at the time of the site inspection. Both businesses also included an outdoor car parking space. The entirety of Area 5 was either occupied by structures or sealed with concrete surface.

**Historically Reported Area 2**

The area was bound by Great North Road to the west, Parramatta Road to the south and Henley Marine Drive to the east. The area was noted to comprise a fenced portion of land which was predominantly grassed. An area of sealed concrete and ballast/gravel was present in the northeast. A number of mature plants were present within the fenced area and grass appeared to have been maintained. Small portions of dumping of generally domestic materials were noted. Several groundwater monitoring wells were visible within the fenced boundary. This area is understood to have historically been occupied by a service station and been subject to previous assessment, as discussed in **Section 4.1.2** and **Section 4.1.3**.

### 2.2.2 Kings Bay Precinct (West) – Stage 2

**Commercial/Industrial Area 1**

The area was located immediately north of Parramatta Road and comprised a number of used car lots in the eastern portion. Two double-storey brick commercial structures serving as office space for the car lots were also present in this area, along with car wash facilities between the two office structures. The car lots were sealed either with concrete or asphalt surfaces. To the west, on the corner of Parramatta Road and Taylor Street, a Bupa Dental business was present, accompanied by an outdoor sealed carpark. A two-storey brick structure in the southwestern corner of the area was occupied by a private dentistry practice. The structures were noted to be in generally good condition. A general slope towards the west was observed for the area.

**Residential Area 1**

Residences were present to the north of the commercial businesses north of Parramatta Road and south of Gipps Street. Residences were observed to be a combination of single-storey and double-storey structures, generally of brick construction. Front yards contained a combination of garden beds, turf and concrete sealed paths/driveways. They were enclosed by a combination of Colorbond, timber fencing, metal fencing and brick walls. Residences were noted to be in generally good condition. Isolated observations of peeling paint and deteriorating roofing were observed.

### 2.2.3 Burwood Precinct (East) – Stage 2

**Commercial/Industrial Area 1**

The area comprised four double-storey, brick, townhouses occupied by commercial businesses. Commercial occupants included a carpet cleaner, a sports store, an e-cigarette store and a real estate agent. The structures were noted to be in generally good condition. No evidence of onsite storage of chemicals was noted however detailed inspection of businesses was limited. No unsealed surfaces were noted within the area.

**Residential Area 1**

Residences were bound by Crane Street, Stanley Street, Broughton Street and Salisbury Street, and were noted to generally be comprised of single or double-storey, brick structures. Isolated townhouses were noted along Salisbury Street. Front yards contained a combination of garden beds, turf and concrete sealed paths/driveways. They were enclosed by a combination of Colorbond, timber fencing, metal fencing, concrete and brick walls. Residences were noted to generally be in good condition.

**Residential Area 2**

Residences were positioned to the south of Crane Street and noted to be of similar construction and design to those in Residential Area 1. A number of higher density, brick flats were observed, which included multiple off-street car spaces. The area was noted to slope to the east.

**Concord Public School**

The school was bound by Stanley Street, Burwood Road and Salisbury Street. A detailed inspection of the school grounds was unable to be completed as part of this investigation. The school grounds were noted to

comprise single and double-storey brick structures, sealed asphalted areas as well as unsealed grassed areas. Buildings were noted to generally be in good condition and vegetation within the grounds appeared in healthy condition. Raised, mulched growing beds were also observed in proximity to Salisbury Street. Concord Public School has a publicly accessible asbestos register[1] indicating asbestos in some building materials and the potential for asbestos in ground, although no in-ground investigations were noted to have occurred.

**Commercial/Industrial Area 2**

Three double-storey townhouses in use for commercial business were present on the corner of Crane Street and Burwood Road. The buildings appeared to be in good condition and at the time of inspection were occupied by a gelato store, personal training business and curtains and blinds store.

**Residential Area 3**

Residences were located along Burwood Road and observed to be of similar construction and design to those low-density, free-standing residences in Residential Area 1. The area was noted to slope to the south east. A number of residences were noted to be undergoing renovation at the time of the inspection.

**Concord High School**

Bound by Crane Street, Crane Lane and Stanley Street, Concord High School was unable to be subject to a detailed inspection at the time of this investigation as it was occupied. The school grounds were noted to comprise a number of multi-storey structures, grassed areas with mature vegetation, sports field and facilities and asphalted surfaces. The boundary was surrounded with metal fencing with entry accessible from both Crane Street and Stanley Street. A general slope to the east was noted. Concord High School has a publicly accessible asbestos register and a site-specific Asbestos In Grounds Management Plan[2] indicating asbestos in some building materials and on or below (in) ground surfaces.

**Residential Area 4**

The area was bound to the east and west by Concord High School and to the north by Crane Street. The area comprised a single mid-density residential brick structure, with multiple dwellings and underground car parking facilities. Limited garden beds were present, within which vegetation appeared in good health.

**Residential Area 5**

Residences were bound by Stanley Street, David Street and Burwood Road. The residences were observed to be of similar construction and design to those low-density, free-standing residences in Residential Area 1. A number of medium-density two-storey, multi-dwelling structures were present, generally of brick construction. A number of commercial businesses were observed to be present along Burwood Road, including a Veterinary Clinic and Denture Clinic. Residences were observed to be in generally good condition, however isolated instances of peeling paint and minor disrepair were noted.

**Residential Area 6**

Bound by David Street, Broughton Street and Gipps Street, residences were observed to be of similar construction and design to those low-density, free-standing residences observed in other residential areas. Houses were observed to be in generally good condition.

---

[1] Asbestos Register (Hazardous Materials and Risk Assessment), Concord Public School (1607), last revised 24 June 2022, https://www.schoolinfrastructure.nsw.gov.au/content/infrastructure/www/what-we-do/we-look-after-our-schools/schools-asbestos-register.html

[2] Asbestos Register (Hazardous Materials and Risk Assessment), Concord High School (8535), last revised 27 April 2022, and Concord High School Asbestos In Grounds Management Plan, 16 June 2020, https://www.schoolinfrastructure.nsw.gov.au/content/infrastructure/www/what-we-do/we-look-after-our-schools/schools-asbestos-register.html

**Residential Area 7**

The area was bound by Stanley Street, Gipps Street and Burwood Road. The area comprised a combination of low-density standalone dwellings, medium-density flats and a number of health-related services including Concord Private Hospital, a physiotherapy and sports injury clinic and a chiropractor clinic. Two asphalt/concrete sealed car parks associated with the private hospital and larger residential complex were present within the area. Structures appeared to be in good condition at the time of inspection and vegetation within the area appeared in good health.

**Residential Area 8**

Residences were bound by Gipps Street, Burton Street, Broughton Street and Lansdowne Street. Residences were observed to be similar in construction and design to those in the broader area, generally comprising single or double-storey brick residences, in good condition. Isolated instances of peeling paint and similar disrepair were noted at the time of inspection. Larger double-storey townhouses were present at the southern boundary of the area and precinct.

**Residential Area 9**

Residences were observed to be similar in construction and design to those low-density standalone dwellings in the broader area. A number of double-storey brick duplexes were also present, predominantly along Burwood Road. Houses were observed to be in good condition and a general slop towards the east was noted across the area.

**Commercial/Industrial Area 3**

The area was positioned on the corner of Burton Street and Burwood Road, adjacent to Residential Area 9. The area was occupied by a BP petrol station which at the time was undergoing redevelopment works. General infrastructure such as fuel dispensers, refill points and petrol station store/pay point were visible. Due to redevelopment works detailed observations were limited at the time of inspection. No evidence of staining or odours were apparent during the inspection. The area was noted to gradually slope to the southeast towards residences, and further afield commercial and industrial structures along Parramatta Road.

**Residential Area 10**

The area was bound by Gipps Street, Loftus Street, Burton Street and Burwood Street. Residences comprised a combination of standalone dwellings, duplexes and medium-density flats. Construction of residences was consistent with that observed in the broader area. St Luke's Anglican Church was positioned at the southern boundary of the area. A higher density residential complex which included a number of multi-dwelling double-storey buildings was present within the centre of the area. This portion of the area included a larger portion of unsealed grassed area. Vegetation appeared to be in healthy condition at the time of inspection.

### 2.2.4 Burwood Precinct (West) – Stage 2

**Residential Area 1**

The area was bound by Parramatta Road, Ada Street and the Western Motorway, and included Franklyn Street in the central portion. The western portion of the area comprised generally single and double-storey standalone dwellings generally of brick construction. Front yards contained a combination of garden beds, turf and concrete sealed paths/driveways. They were enclosed by a combination of Colorbond, timber fencing, metal fencing and brick walls. In isolated locations signs of weathering such as peeling paint were observed. The eastern portion of the area was occupied by a larger high-density multi-storey block of apartments of brick construction, which included underground parking. The residence was surrounded by a metal fence line, which also bound an unsealed grassed garden area as part of the residence.

**Commercial/Industrial Area 1**

Situated on Parramatta Road, the area was occupied by a retail used car lot which included an office structure and a number of motor vehicles. All surfaces were covered with sealed concrete, with some cracking observed. Areas of the car lot appeared to have been subject to filling activities in order to raise levels. The onsite structure appeared in a state of moderate disrepair, with some peeling paint and loose roof sheeting.

**Residential Area 2**

The area was positioned to the south of Ada Street and bound also by Ada Lane and Lloyd George Avenue. Residences were generally consistent to those low-density standalone dwellings observed in Residential Area 1. Residences were observed to be in good condition and garden vegetation appeared to be in good health.

**Commercial/Industrial Area 2**

The area comprised a combination of commercial/industrial structures and storefronts and high-density apartment dwellings. Outdoor car ports and underground parking were included as part of residential structures. Commercial businesses included a dry cleaners and restaurant. Commercial structures were positioned between Parramatta Road and Ada Lane. At the rear of the dry cleaning business, along Ada Lane, containers for the storage of chemicals associated with dry cleaning activities were visible, as well as areas of staining on sealed concrete surfaces. The area was noted to gradually slope downwards towards the east and further commercial/industrial structures and some residences. In adjacent properties, stockpiled tins of paint and other painting supplies were observed. Along Parramatta Road, a number of storefronts were observed to be in various states of disrepair, with peeling paint and peeling roofing noted. Several storefronts appeared to be unoccupied at the time of inspection. A single high density -multi storey residence was positioned on Parramatta Road between commercial storefronts.

**Residential Area 3**

The area was positioned to the north of Ada Street and occupied the northern portion of the West Burwood Precinct. The area was comprised of predominantly low-density standalone dwellings as observed in the broader precinct. A number of multi-storey brick townhouses were observed in the eastern portion of the area, off Melbourne Street. Within the central portion of the area off Ada Street a larger residential complex with a number of double-storey duplexes were positioned. Residences throughout the area appeared in generally good condition, with limited signs of disrepair.

**Commercial/Industrial Area 2**

Bound by Parramatta Road, Lloyd George Avenue and Ada Street, the area was occupied by a large multi-storey commercial structure which appeared to offer office spaces, the Ausgrid Burwood Zone Substation, and commercial structures which included a business offering fitness training and an unoccupied shopfront. It is noted that no transformers of the substation were visible at the time of inspection. Structures were noted to be in generally good condition, with limited signs of disrepair. At the time of the inspection detailed observations of the internal condition of commercial structures were unable to be made. Undercover parking was noted within the central portion of the area.

**Historically Reported Area 3**

The area comprised a large mechanic workshop, an unoccupied double-storey brick commercial space, an active commercial yard that appeared to rent scaffolding equipment, and three unoccupied, fenced off residential lots, one of which had no structure present. The mechanic workshop included a large asphalt carpark which was noted to be in poor condition. Storage of chemicals, machinery and equipment associated with car maintenance were observed within the workshop. The unoccupied commercial space was noted to be in poor condition with peeling paint, rusted external downpipes and cracked glass windows. The two residential structures were noted to be in poor condition with peeling paint, rusted guttering and roofing in poor condition. Evidence of minor dumping was apparent on these unoccupied lots including of general

rubbish and a car tyre. Due to the active nature of the commercial yard, limited inspection was possible however the storage of timber and scaffolding was apparent as well as vehicles associated with business function such as trucks and forklifts. This area is understood to have been subject to previous assessment as discussed in **Section 4.2.1**.

**Residential Area 4**

Residences comprised a similar construction and design to those low-density standalone dwellings seen in the broader Precinct. Residences were observed to be notably larger in the western portion of the area. Underground parking facilities were noted at a single residence. Some signs of disrepair such as peeling paint were observed.

**Commercial/Industrial Area 3**

The western portion of the area on the corner of Coles Street and Parramatta Road was occupied by an Ampol petrol station, which included the petrol station structure and store, associated refuelling pumps and refill points. A large above-ground LPG tank was noted at the western end of the area. Minor areas of unsealed garden beds were noted, with the majority of the area covered with sealed concrete that was noted to be in good condition. A number of groundwater monitoring wells were noted within the lot. The eastern portion of the site was occupied by two retail used car lots, with two structures onsite serving as offices. Car lots comprised predominantly sealed concrete surfaces which appeared in good condition with limited cracking and no staining evident. Some areas appeared to have been subject to cut and fill activities to achieve raised site levels. The eastern portion of the area also included one single-story residence that appeared to be unoccupied. The residence was in moderate condition, with minor peeling of paint, and overgrown lawns.

**Commercial/Industrial Area 4**

The area comprised of two retail used car lots which included sealed concrete surfaces, retail offices and numerous vehicles on display. As with other car lots in the Precinct some areas of cut and fill activities appeared to have occurred. Between the two care lots, a mechanics workshop was situated with associated equipment and machinery. At the time of the inspection, limited observations of this space of possible to be made.

**Historically Reported Area 4**

The area comprised a brick double-story unoccupied residential block of apartments and a brick double-storey commercial structure which was also unoccupied. Both structures were in poor condition and had been subject to vandalism. The remaining portion of the area was surfaced with sealed concrete and fenced with aluminium fencing. A number of mature palm trees and historic infrastructure associated with previous commercial activities such as signage and fencing were present onsite. This area is understood to have been subject to previous assessment as discussed in **Section 4.2.2**.

**St Mary's Parish**

Bound by Burton Street, Forster Street, Broughton Street and Parramatta Road, St Mary's Parish was positioned in the eastern portion of the Precinct. The area included a number of large multi-storey brick structures functioning primarily as educational spaces for St Mary's Catholic Primary School. The area also included St Mary's Concord Catholic Church and St Mary's Villa Residential Aged Care. Along with associated structures onsite park and garden bed were also present within the area, as well as underground car parking beneath the aged care facility. Most of the area was surrounding by high metal fencing. Limited observations were possible within the area, however structures appeared to be in good condition, with no signs of disrepair visible.

### 2.2.5 Homebush Precinct (East) – Stage 2

**Commercial/Industrial Area 1**

Bound by the Western Motorway, Concord Road and Parramatta Road the East Homebush Precinct comprised a large multi-storey commercial structure operating as a motorcycle store. A large number of vehicles were displayed both within and external to the retail store. The area also comprised of sealed asphalt car parking, with surfaces appearing in good condition. The northeastern portion of the motorcycle store was observed to function as a maintenance and service shop for motorcycles, with entry from the north. Underground parking was available beneath the retail store. A smaller structure adjoined to the main store served as a café for customers. Minor areas of unsealed garden beds were present, with vegetation appearing to be in good health. Two large skip bins were located in the eastern portion of the area, as well as a number of stacked pallets and two drums labelled with four-stroke motor oil.

### 2.2.6 Bakehouse Quarter, Homebush Precinct – Stage 2

**Commercial/Industrial Area 1**

The area was positioned on the corner of Hamilton Street and George Street and was occupied by a single large multi-storey commercial structure which housed a number of early learning children's education and day-care facilities, as well as a fitness gym and a number of other commercial businesses. The facility offered undercover parking beneath the structure with entry from George Street. Large areas of unsealed garden beds were present with well maintained vegetation appearing in good health. A playground associated with an early learning centre was located in the southern portion of the area.

**Historically Reported Area 5**

The area was occupied by a multi-storey concrete parking lot. Along George Street, the ground floor offered retail spaces, which were occupied by businesses including a personal training business and a children's clothing store. A number of spaces were unoccupied. The undercover parking space and associated surfaces and structures appeared to be in good condition. This area is understood to have been subject to previous assessment as discussed in **Section 4.3.1**.

**Residential Area 1**

The area was occupied by a mid-density residential complex which included five multi-storey blocks of brick apartments. The apartments appeared to be in good condition with no signs of disrepair. As part of the complex sealed concrete driveways and undercover parking was available. Small portions of unsealed garden beds housed maintained vegetation which appeared in good health.

**Historically Reported Area 6**

The area was bound by Allen Street, George Street and Powells Creek, and comprised of cleared car parking spaces surfaced with a combination of asphalt and concrete, noted to be in generally good condition with some cracks visible. The perimeter of the area was fenced as it appeared it was not presently in use. Overgrown vegetation was present throughout the area, and isolated areas of building and demo waste and dumping of domestic waste were apparent. It appeared as though some cut and fill activities may have occurred in establishing the car park levels, particularly in proximity to Powells Creek. This area is understood to have been subject to previous assessment as discussed in **Section 4.3.2**.

**Commercial/Industrial Area 2**

The area occupied the majority of the Bakehouse Quarter and was positioned between George Street and the rail line. The northern portion included a number of brick multi-storey historic structures which historically were part of the Arnott's Biscuit Factory. These structures included a substation as well as office spaces for businesses such as a construction company. To the south of these structures the largest historic structure was situated, a multi-storey brick building. Ground floor spaces along George Street were occupied with

predominantly store fronts including a number of dining options. The majority of the historic structure had been refurbished to provide contemporary office spaces for a variety of business, as well as undercover parking. All surfaces and structures appeared in good condition. Similar refurbished historic structures were noted further south, housing a range of services, businesses and restaurants. The southern portion of the site was occupied primarily by asphalt covered car parking, and some areas of grassed or unsealed garden beds. At the southern boundary of the area a substation was noted. Within the car park area some areas of dumping of predominantly domestic goods were noted. The Western Motorway was observed to pass above this southern portion of the area.

**Commercial/Industrial Area 3**

The area is comprised primarily of a combination of larger multi-storey commercial buildings and parking space. These commercial buildings were occupied by a range of businesses and services including a range of health services and The Arnott's Biscuits head offices. Ground floor spaces along George Street were occupied by a range of dining options as well as an Aldi supermarket. The western portion of the area, adjacent to Powells Creek, provided parking spaces as well as loading docks for the adjacent businesses. The southern portion of the area was utilised for car parking and similarly had the Western Motorway pass overhead. Two structures were present in the southern portion of the site, one a multi-storey commercial structure and the other a drive through car wash facility. The majority of the area which was unoccupied by structures was sealed with asphalt or concrete, however minor unsealed garden bed areas were present.

## 2.3 Surrounding Land Use

### 2.3.1 Kings Bay Precinct (East)– Stage 2

Surrounding land-uses at the time of site inspection are described following:

- **North:** Mainly low density residential dwellings to the immediate north and the Five Dock Town Centre retail to the northeast, with Five Dock Public School beyond, and further the Parramatta River (1.0 km from the site);
- **East:** Mainly low density residential dwellings, Iron Cove Creek, Croker Park, with Trimbrell Park and the A4 Motorway beyond, and further the Parramatta River;
- **South:** Commercial/industrial buildings, including a BP petrol station, and predominantly low density residential dwellings, with Centenary Park and Hammond Park beyond, and further the Croydon train station and train line (1.4 km from the site); and
- **West:** Commercial/industrial buildings including car yards, Rosebank College, Great Western Highway to the west, with Barnwell Park Golf Club to the northwest and predominantly low density residential dwells to the south west.

### 2.3.2 Kings Bay Precinct (West) – Stage 2

Surrounding land-uses at the time of site inspection are described following:

- **North:** Predominantly low density residential dwellings, Lucas Gardens School, recreational turfed and asphalted sporting fields, with Barnwell Golf Course and Parramatta River beyond;
- **East:** Lucas Gardens School, retail structures with areas of asphalted carpark, Shell petrol station, with commercial/industrial buildings and Barnwell Park Golf Club beyond;
- **South:** Commercial/industrial structures, mainly low density residential dwellings, with Wangal Park, Blair Park, Burwood Girls High School and Westfield Burwood beyond, and further the rail line; and
- **West:** Commercial/industrial structures, Concord Oval and associated carparks, with low to mid density residential structures beyond in addition to commercial/industrial buildings along Parramatta Road.

### 2.3.3 Burwood Precinct (East) – Stage 2

Surrounding land-uses at the time of site inspection are described following:

- **North:** Low to mid density residential dwellings, with Massey Park Golf Club and Saltwater Creek beyond;
- **East:** St Lukes, Oval, St Lukes Park and Concord oval, with mainly low density residential dwellings and commercial/industrial structures beyond, and further Barnwell Park Golf Club;
- **South:** Low to mid density residential dwellings, commercial/industrial structures and Parramatta Road, with similar dwellings and structures beyond as well as Burwood Park and Westfield Burwood, and further Burwood Station; and
- **West:** Queen Elizabeth Park, Concord Park and Goddard Park, with low to mid density residential dwellings beyond, and further the North Strathfield train station and the Bakehouse Quarter.

### 2.3.4 Burwood Precinct (West) – Stage 2

Surrounding land-uses at the time of site inspection are described following:

- **North:** Low to mid density residential dwellings, with Goddard Park, Queen Elizabeth Park, Concord Park and Henley Park beyond, and further Concord town centre;
- **East:** Low to mid density residential dwellings, commercial/industrial structures and Parramatta Road, with Concord Oval beyond, and further the Stage 2 west Kings Bay Precinct;
- **South:** Commercial/industrial structures including Ampol Burwood petrol station and a car wash, and low to mid density residential dwellings, with MLC School, Burwood Park and Strathfield train station beyond; and
- **West:** Low to mid density residential dwellings, with the M4 motorway and motorcycle dealerships beyond, and further the train line.

### 2.3.5 Homebush Precinct (East) – Stage 2

Surrounding land-uses at the time of site inspection are described following:

- **North:** The M4 Motorway with low to mid density residential dwellings beyond, and further Henley Park, the North Strathfield Shopping Village Central Park and Concord Library;
- **East:** Stage 2 west Burwood Precinct;
- **South:** Parramatta Road and predominantly low to mid with some high density residential dwellings, cleared grassed lots, with Strathfield station and the train line beyond; and
- **West:** Concord Road, a car dealership as well as the M4 and A44 Motorways, with a combination of mid to high density residential structures and the train line beyond.

### 2.3.6 Bakehouse Quarter, Homebush Precinct – Stage 2

Surrounding land-uses at the time of site inspection are described following:

- **North:** Primary education facilities, North Strathfield train station and low to mid density residential dwellings, with Mason Park Wetlands to the northwest, and further to the north Concord West station;
- **East:** The train line, with low to mid density residential structures and a number of retail business beyond as well as Strathfield North Public School to the northeast, and further east Concord Bowling Club and Concord Library;
- **South:** The A44 Motorway and mid to high density residential dwellings, with Homebush train station, rail line and mid density residential dwellings beyond, and further Strathfield Plaza and Strathfield Girls High School; and
- **West:** Powells Creek, Arnotts Reserve and a combination of low to mid residential dwellings and commercial/industrial structures, in addition to the M4 and A44 Motorways, with the Sydney Markets, Sydney Olympic Park and Flemington train station beyond.

©JBS&G Australia Pty Ltd

## 2.4 Topography

**Kings Bay Precinct**

Review of the regional topographic information obtained from Google Earth Pro (Google Earth 2022[3]) indicated that the western portion of the Kings Bay Precinct has an elevation ranging from 6 m to 24 m Australian Heigh Datum (AHD). The adjacent surrounding area generally slopes down towards the west. Review of the regional topographic information indicated that the eastern portion of the Kings Bay Precinct has an elevation ranging from 4 m to 24 m AHD. The adjacent surrounding area generally slopes down towards the southeast, towards Iron Cove Creek.

**Burwood Precinct**

Review of the regional topographic information indicated that the Burwood Precinct has an elevation ranging from 6 m to 12 m AHD. The adjacent surrounding area generally slopes to the east and west away from a ridgeline which is situated approximately between Burwood Road and Broughton Street.

**Bakehouse Quarter, Homebush Precinct**

Review of the regional topographic information indicated that the Bakehouse Quarter has an elevation ranging from 4 m to 14 m AHD. The adjacent surrounding area generally slopes to the west/southwest towards Powells Creek.

## 2.5 Geology and Soils

**Kings Bay Precinct**

A review of the Sydney 1:100 000 Geological Map[4] indicated that the Kings Bay Precinct was in an area predominantly underlain by Triassic Ashfield Shale of the Wianamatta Group. Typical geological characteristics of this profile are black to dark grey shale. The western portion of the precinct included an area partially underlain by Quaternary alluvial to estuarine silty to peaty quartz sand, silt, and clay sediments with ferroginous and humic cementation in places with common shell layers. These sediments are mapped as extending beneath the residential structure to the south of Gipps Street and west of Taylor Street. The southeastern most portions of the Precinct in proximity to Iron Cove Creek are underlain by middle Triassic medium to coarse-grained quartz sandstone with very minor shale and laminate lenses.

Reference to the online ESPADE 2.2 tool hosted by the NSW Office of Environment and Heritage (OEH 2023[5]) indicates that majority of the Precinct is present within the Blacktown Residual Group and the eastern most portion is within Gymea Residual Group.

The Blacktown Residual Group is characterised by:

- **Landscape**: Gently undulating rises on Wianamatta Group shales and Hawkesbury sandstone. Local relief is to 30 m, with slopes usually <5%. Typically has broad rounded crests and ridges with gently inclined slopes. Vegetation is generally characterised by cleared eucalpyt woodland and tall open forest (wet sclerophyll forest).
- **Soils**: Shallow to moderately deep (<100 cm) Red and Brown Podzolic Soils on crests, upper slopes and well-drained areas; deep (150-300 cm) Yellow Podzolic Soils and soloths on lower slopes and in areas of poor drainage.
- **Limitations**: Moderately reactive highly plastic subsoil, low soil fertility, poor soil drainage.

[3] Google Earth Pro, imagery date June 2022, accessed 24 March 2023, (Google Earth 2022)

[4] Sydney 1:100 000 Geological Map, map sheet 9130, 1st Edition (1983) (*Accessed 24 March 2023)*

[5] ESPADE 2.2. NSW Office of Environment and heritage, accessed 24 March 2023 (OEH 2023)

The Gymea Residual Group is characterised by:

- **Landscape**: Undulating to rolling rises and low hills on Hawkesbury Sandstone. Local relief is 20-80 m, slopes usually 10-25%. Rock outcrop is <25%. Broad convex crests, moderately inclined sideslopes with wide benches, localised rock outcrop on low broken scarps. Extensively cleared open-forest (dry schlerophyll forest) and eucalypt woodland.
- **Soils**: Shallow to moderately deep (30-100 cm) Yellow Earths and Earthy Sands on crests and inside of benches; shallow (<20 cm) Siliceous Sands on leading edges of benches; localised Gleyed Podzolic Soils and Yellow Podzolic Soils on shale lenses; shallow to moderately deep (<100 cm) Siliceous Sands and Leached Sands along drainage lines.
- **Limitations**: Localised steep slopes, high soil erosion hazard, rock outcrop, shallow highly permeable soil, very low soil fertility.

**Burwood Precinct**

A review of the Sydney 1:100 000 Geological Map indicated that the Burwood Precinct was in an area underlain by Triassic Ashfield Shale of the Wianamatta Group. Typical geological characteristics of this profile are black to dark grey shale.

Reference to the online ESPADE 2.2 tool hosted by the NSW OEH (OEH 2023) indicates that the Precinct is present within the Blacktown Residual Group, as described above.

**Bakehouse Quarter, Homebush Precinct**

A review of the Sydney 1:100 000 Geological Map indicated that the Bakehouse Quarter, Home Homebush Precinct was in an area underlain by Triassic Ashfield Shale of the Wianamatta Group. Typical geological characteristics of this profile are black to dark grey shale.

Reference to the online ESPADE 2.2 tool hosted by the NSW OEH (OEH 2023) indicates that the Precinct is present within the Blacktown Residual Group, as described above.

## 2.6 Hydrology

The site was predominantly sealed and as such, rainfall within the site is anticipated to follow the topographic gradient before being collected by municipality stormwater network.

In unsealed sections of the site such as nature strips and garden beds, it is anticipated surface water generated during periods of rainfall is likely to seep into the ground surface at a rate reflective of the clay soil permeability and flow in the direction of either Powells Creek or Iron Cove Creek, dependent on a Precinct's proximity to either, to eventually enter Parramatta River. No major surface water bodies were located on any of the Precinct site areas.

## 2.7 Hydrogeology

A search for registered groundwater bore information was undertaken through the Lotsearch Reports included as **Appendix C**.

### Kings Bay Precinct

One registered bore was located within the Precinct boundary and the relevant information is summarised in **Table 2.2**. Further information regarding boreholes surrounding the site can be found in the full report in **Appendix C**.

**Table 2.2: Groundwater Bore Information, Kings Bay Precinct**

| Bore ID | Standing Water Level (SWL) (m below ground surface (bgs)) | Final Drilled Depth (m) | Salinity | Lithology |
|---|---|---|---|---|
| GW112143 | - | 67 | - | Not available. |

### Burwood Precinct

Three registered bores were located within the Precinct boundary and their relevant information is summarised in **Table 2.3**. Further information regarding boreholes surrounding the site can be found in the full report in **Appendix C**.

**Table 2.3: Groundwater Bore Information, Burwood Precinct**

| Bore ID | SWL (m bgs) | Final Drilled Depth (m) | Salinity | Lithology |
|---|---|---|---|---|
| GW112139 | - | 36 | - | Not available. |
| GW102215 | - | 15 | - | 0.00 m - 15.00 m - Fill |
| GW112140 | - | 52 | - | Not available. |

### Bakehouse Quarter, Homebush Precinct

No bores were located within the Precinct boundary. Further information regarding boreholes surrounding the site can be found in the full report in **Appendix C**.

It is noted that a number of groundwater monitoring wells were observed at the existing petrol stations within the Burwood Precinct and as well at the historic petrol station site in the Kings Bay Precinct (East) (**Figure 2A**, Historical Report 2), however the details of these wells are unknown.

As mentioned in **Section 2.5** the site is predominantly underlain by Ashfield Shale. There is potential for intermittent perched groundwater at the fill/soil or soil/bedrock interfaces. Permanent groundwater is anticipated to occur in permeable zones with the underlying Ashfield Shale. Given the proximity to the Parramatta River and general elevation of the site it is anticipated that the depth to perched groundwater would be relatively shallow (<10m).

Shallow, perched groundwater within the site, if present, would be anticipated to follow the local topographic gradient, either towards Powells Creek in the Homebush Precinct, towards Parramatta River in the Burwood Precinct, or towards Iron Cove Creek in the Kings Bay Precinct.

## 2.8 Acid Sulfate Soils

Review of the Acid Sulfate Soil Risk Map for Prospect/Parramatta (DLWC 1997[6]) indicated that the majority of all three Precincts fall within areas of no known occurrence of acid sulfate soils with the exception of small area within the northeastern portion of the Burwood Precinct, underlying a small portion of Concord High School. This portion falls within an area of disturbed terrain, including filled areas which often occur during reclamation of low lying areas for urban development, where the potential for acid sulfate soils has not been mapped.

## 2.9 Meteorology

A review of average climate data for the nearest relevant Bureau of Meteorology monitoring location (Macquarie Park[7]), indicates the site is located within the following meteorological setting:

- Average minimum temperatures vary from 7.8°C in July to 19.4°C in February;
- Average maximum temperatures vary from 17.6°C in July to 28.4°C in January;
- The average annual rainfall is approximately 911.8 mm with rainfall greater than or equal to 1 mm occurring on an average of 82.3 days per year; and
- Monthly rainfall varies from 52.7 mm in September to 109.8 mm in February, with the wettest periods occurring on average in January to March.

## 2.10 Salinity

A review of The Central Resource for Sharing and Enabling Environmental Data in NSW Portal (SEED, 2023[8]), indicates that the site is not located within an area of any salinity potential.

# 3. Site History Assessment

A review of the Lotsearch Reports obtained for this site showed the following results. Full versions of the report are provided in **Appendix C**.

## 3.1 EPA Records

- NSW EPA public register of licence, applications and notices maintained under Section 308 of the *Protection of the Environment Operations Act 1997* (POEO Act).
    - A number of licences, applications and notices have been issued to individuals and organisations within the site and the area surrounding the site.
        - Sydney Trains and Metro Trains Sydney Pty Ltd for railway activities
        - Ferrovial Agroman for railway infrastructure construction and concrete works
        - Acciona Infrastructure Projects for road constructions associated with WestConnex
        - WCX PT for road tunnel emissions associated with WestConnex
        - Ausgrid for the storage of hazardous waste, restricted solid, liquid, clinical and related waste and asbestos waste
- NSW EPA contaminated land public register of record of notices (under Section 58 of the *Contaminated Land Management Act 1997* (CLM Act)).
    - A STA bus depot south of the Burwood Precinct and west of the Kings Bay Precinct has been notified to EPA, who have noted the site as formerly being regulated under the CLM Act, as noted below. Notices relating to this site were repealed by EPA in early 2010 following a Site Audit in 2009. Based on the EPA records impacts at the bus depot are not likely to be migrating from the depot nor toward the Precincts.
- NSW contaminated sites notified to the EPA (under Section 60 of the CLM Act).
    - Current Petrol Station, 89 Parramatta Road, Concord, located in the central southern portion of the western Burwood Precinct and is currently classed with no regulation under the CLM Act required.
    - Previous Petrol Station, 92a Concord Road, North Strathfield, located approximately 350 m east of the western Homebush Precinct and is currently classed with no regulation under the CLM Act required.
    - Current Petrol Station, 143 Concord Road, North Strathfield, located approximately 400 m northeast of the western Homebush Precinct and is currently classed with no regulation under the CLM Act required.
    - A STA bus depot, Cnr Shaftesbury and Parramatta Roads, Burwood, located approximately 150 m west of the western Kings Bay Precinct and is currently classed as having contamination formerly regulated under the CLM Act.
    - Current Petrol Station, 584 Parramatta Road, Croydon, located to the south of the eastern Kings Bay Precinct and is currently classed with no regulation under the CLM Act required.
    - Current Petrol Station, 47 Ramsay Road, Five Dock, located approximately 400 m northeast of the eastern Kings Bay Precinct and is currently classed with no regulation under the CLM Act required.
    - Current Petrol Station, 231-235 Great Northern Road, Five Dock, located approximately 700 m northeast of the eastern Kings Bay Precinct and is currently classed with no regulation under the CLM Act required.
- Per- and polyfluoroalkyl substances (PFAS) Investigation Program.
    - The site nor any properties in the surrounding area are not listed by EPA on the NSW Government PFAS Investigation program.

## 3.2 Australian and NSW Heritage Register

A search of the National Australian Heritage database did not identify any heritage listed items at any of the Precincts or in the immediate surroundings.

Review of the NSW Heritage Inventory and the included Lotsearch Reports (**Appendix C**) identified the following Australian and NSW heritage information summarised below for each Precinct.

**Kings Bay Precinct**

No heritage listed items are located at either the eastern or western portions of the Kings Bay Precinct. A pair of semi-detached residences, immediately north of the east Kings Bay Precinct are heritage listed under the Local Environmental Plan.

**Burwood Precinct**

A number of heritage listed items are located at both the eastern and western portions of the Burwood Precinct and in the immediate surrounds of these areas. These heritage listings are under the Local Environmental Plan and include a combination of heritage structures such as houses, churches and schools, as well as landscapes such as gardens and parks.

**Bakehouse Quarter, Homebush Precinct**

A number of heritage listed items are located at the Bakehouse Quarter and in the immediate surrounds of both portions of the Bakehouse Quarter and the east Homebush Precinct. These heritage listings located onsite are listed are under the Local Environmental Plan and include the bakehouse quarter structure, the railway bridge over Parramatta Road, a sub-station and shops on the western side of George Street.

## 3.3 Section 10.7 Planning Certificate Search

Section 10.7 (2) and (5) Planning Certificates for a selection of lots across the Precincts were obtained from the City of Canada Bay Council (**Appendix D**). The details of theses lots are included in **Table 3.1**.

**Table 3.1: Section 10.7 (2) and (5) Planning Certificate Information**

| Address | Lot, Section | DP |
|---|---|---|
| **Kings Bay Precinct** | | |
| 1 Walker Street Five Dock NSW 2046 | 12 | DP 12158 |
| 259 Parramatta Road Five Dock NSW 2046 | 1 | DP 456940 |
| 27 Parramatta Road Five Dock NSW 2046 | A | DP 360991 |
| 19 Courland Street Five Dock NSW 2046 | 7, 1 | DP 1286 |
| **Burwood Precinct** | | |
| 149 Parramatta Road Concord NSW 2137 | 152 | DP 1149617 |
| 95 Parramatta Road Concord NSW 2137 | 19 | DP 192035 |
| 93 Parramatta Road Concord NSW 2137 | 2 | DP 306360 |
| 71 Parramatta Road Concord NSW 2137 | 61 | DP 1219960 |
| 9 Lloyd George Avenue Concord NSW 2137 | 36 | DP 1220987 |

| Address | Lot, Section | DP |
|---|---|---|
| 10 Melbourne Street Concord NSW 2137 | 10 | DP 1221601 |
| 9 Loftus Street Concord NSW 2137 | 3 | DP 14112 |
| 28 Burwood Road Concord NSW 2137 | 22, 1 | DP 8045 |
| 16 Stanley Street Concord NSW 2137 | 9 | DP 166958 |
| 13 Gipps Street Concord NSW 2137 | A | DP 338430 |
| 103 Burwood Road Concord NSW 2137 | 13 | DP 8687 |
| **Bakehouse Quarter, Homebush Precinct** | | |
| 1-11 George Street North Strathfield NSW 2137 | 51 | DP 1219136 |
| Railway Street North Strathfield NSW 2137 | 102 | DP 717983 |
| 7/2A Hamilton Street North Strathfield NSW 2137 | 7 | SP 70573 |
| 213 Parramatta Road North Strathfield NSW 2137 | 200 | DP 1087484 |
| 153-165 Parramatta Road North Strathfield | 700 | DP 1213362 |

The planning certificates included the following pertinent information regarding the Precincts:

- The sites were zoned as a mixture of B1 – Neighbourhood Centre, B3 – Commercial Core, B6 – Enterprise Corridor, SP2 – Infrastructure, R2 – Low Density Residential, R3 – Medium Density Residential. All under *Canada Bay Local Environmental Plan 2013*;
- The lots are not affected by policy that restricts the development of the land because of the likelihood of landslip, tidal inundation and subsidience;
- Of the representative lots, 16 are identified as being within Class 5 on the Acid Sulfate Soil Map under the Canada Bay LEP 2013, and as such works within 500 metres of adjacent Class 1, 2, 3 or 4 land that is below 5 m AHD by which the watertable is likely to be lowered below 1 metre Australian Height Datum on adjacent Class 1, 2, 3 or 4 land are prohibited without Council approval;
- The land is not identified as bushfire prone land;
- The land is either unknown as to whether it is within the flood planning area due to Council having not yet undertaken a flood study in the location or not subject to flood related development controls, except for Lot 19 DP 192035 and Lot 2 DP 306360, but is found between land that is subject to flood related development controls;
- The land does not include or comprise critical habitat, is not in a conservation area and is not in an area of outstanding biodiversity value under the *Biodiversity Conservation Act* 2016;
- The land does not appear on the loose-fill asbestos insulation register;
- No items of environmental heritage are situated on the land, with the exception of Lot 51 DP 1219136 of which details are provided in **Section 3.2**; and
- The land is not significantly contaminated, subject to a management order, an approved voluntary management proposal, an ongoing maintenance order, or subject of a site audit statement within the meaning of the CLM Act 1997.

## 3.4 Aerial Photographs

Historical aerial photographs provided by the Land and Property Information Division of the Department of Finances, Services and Innovation or Near-Map Imagery were reviewed for this assessment (**Appendix E**).

**Kings Bay Precinct (East)**

The aerial photograph review identified the following features in relation to historical use of the site:

**Table 3.2: Historical Aerial Information, Kings Bay Precinct (East)**

| | |
|---|---|
| **1943** | The site comprised of predominantly low density residences in the west and central portions. A number of commercial/industrial structures were present along Parramatta Road in the southeast and southwest. A petrol station was present in the south east corner of the site.<br>The surrounding area comprised of a mixture of low density residences and some industrial/commercial structures, primarily lining Parramatta Road. Some vacant lots were present to the west of the site. Iron Cove Creek was visible to the east of the site as a concrete channel, with cleared, grassed land present to the north of the creek. |
| **1955** | A number of car lots were visible along Parramatta Road in positions central to the area previously occupied by residences. The remainder of the site remains relatively unchanged from the 1955 imagery.<br>Additional industrial/commercial structures were evident to the west of the site. Some renovations had occurred to industrial/commercial structures to the south of the site. Landscaping appeared to be taking place in the cleared, grassed areas to the northeast of the site. |
| **1965** | Redevelopment of properties had occurred along Parramatta Road, with an increased number of car lots and commercial/industrial structures. Residences within the site remained relatively unchanged, except at the southwest corner where a car yard had replaced one or more residences.<br>Larger industrial structures were present to the west of the site. A car lot was present to the north Iron Cove Creek. |
| **1971** | The site was largely consistent with the previous aerial imagery. Some renovations had occurred on the properties along Parramatta Road.<br>The surrounding area was relatively unchanged from the 1965 image. |
| **1986** | The site was relatively unchanged from the 1971 imagery. A property on the corner of Parramatta Road and Great Northern Road had been demolished and was occupied by an asphalt car display area.<br>The surrounding area was relatively unchanged from the previous aerial imagery. Tennis courts and facilities were located to the east of southeast portion of the site, adjacent to Iron Cove Creek. A cleared, grassed area was visible to the south of the site, opposite Great Northern Road. An area to the southeast of the site previously utilised as a car park, appeared to have undergone landscaping activities. |
| **1994** | Minor renovations were evident across the site, both in residences and commercial/industrial structures. A newly constructed residence was evident in a previously vacant lot in the northwest corner of the site.<br>The surrounding area appeared similar to the previous aerial image. Additional industrial structures were present to the west of the site. |
| **2004** | The site appeared consistent with the previous aerial image. |

| | |
|---|---|
| | Additional commercial/industrial structures were present to the south of Parramatta Road. The previously, cleared, grassed are opposite Great Northern Road, was occupied with a petrol station and asphalt car parking. |
| **2014** | Additional industrial/commercial structures were present in the central/western portion of the site. A large renovation to the new car yard display was visible in the southeast portion of the site. The remainder of site remained relatively unchanged.<br>The surrounding area remained consistent with the previous aerial image. A new car lot is evident south of Parramatta Road opposite Lavender Street. |
| **2023** | The portion of site in the southeast corner previously occupied by a petrol station is vacant and partially grassed. The remainder of the site is consistent with the previous aerial imagery. structures have occurred.<br>The surrounding area is generally similar to the 2014 aerial image, with minor renovations and redevelopments on both industrial/commercial and residential structures. |

**Kings Bay Precinct (West)**

The aerial photograph review identified the following features in relation to historical use of the site:

**Table 3.3: Historical Aerial Information, Kings Bay Precinct (West)**

| | |
|---|---|
| **1943** | The site comprised of predominantly low density residences. A number of small, possible commercial/industrial structures were present along Parramatta Road.<br>Cleared vacant land lied to the west of the site, whilst the north and south were bordered by predominantly residences. To the east of the site an industrial/commercial structure was present, in addition to vacant land. |
| **1955** | The site appeared relatively unchanged from the previous aerial image. Some renovation to a structure in the southeast portion of site had occurred.<br>The surrounding area remained predominantly unchanged to the 1943 imagery. Some renovation to the structures lying to the south of Parramatta Road had occurred. |
| **1965** | A structure on the corner of Taylor Street and Parramatta Road had been demolished and in its place a car lot was evident. In the southwest corner of the site, two structures had been either demolished or partially demolished, with a service station in their place, as indicated by the LotSearch reports. A service station was also present in the southeast corner of site, as confirmed by the LotSearch reports.<br>Gipps Road was present along the northern boundary of the site, extending to the northwest of the site. Car lots were present along the southern side of Parramatta Road. |
| **1971** | The site was largely consistent with the previous aerial imagery. Some renovations had occurred on the properties along Parramatta Road.<br>The surrounding area was relatively unchanged from the 1965 image. |
| **1986** | The residences onsite remained largely unchanged from the previous aerial imagery, with some minor renovations evident. Regarding the properties along Parramatta Road, some demolition had occurred with a larger car lot present central to the southern boundary. The commercial property in the southwest appears to have changed use and is now also a car yard.<br>The surrounding area was relatively unchanged from the previous aerial imagery. |
| **1994** | Minor renovations were evident across the site, primarily in residences.<br>Lucas Gardens School was present to the northeast of the site. The industrial/commercial structure to the east of the site had been demolished, leaving a cleared lot or exposed earth. Earthworks appeared evident to the west of the site. |

| | |
|---|---|
| **2004** | The site appeared consistent with the previous aerial image, with some renovations to a structure in the southeast corner of site.<br>A new retail shopping centre was present to the east of the site, in the lot which was previously cleared. A new sporting field is present to the west of the site. |
| **2014** | The site remained relatively unchanged from the 2004 imagery. Minor renovations to existing structures had occurred. The car yard in the southwest appears largely unused/vacant.<br>The surrounding area remained relatively unchanged from the previous aerial image. |
| **2023** | The site remains relatively unchanged from the 2014 imagery. Minor renovations to existing structures have occurred.<br>Renovations to Lucas Gardens School are visible, in addition to an active worksite to the south of the site. New facilities to the west of the site are visible, associated with Concord Oval and the West Tigers Centre. |

**Burwood Precinct (East)**

The aerial photograph review identified the following features in relation to historical use of the site:

**Table 3.4: Historical Aerial Information, Burwood Precinct (East)**

| | |
|---|---|
| **1943** | The site comprised of predominantly low density residences. In the northern and northeastern portions of the site larger structures likely associated with Concord Public School and Concord High School were evident. Within the southern portion of the site there was a larger cleared, unoccupied plot of land, between Burwood Road and Loftus Street.<br>The surrounding area to the north and south of the site was predominantly low density residences. To the west of the site Queen Elizabeth Park was present. To the east of the site cleared, unoccupied, grassed land was evident as well as a drainage channel running north to south. |
| **1955** | The site appeared relatively unchanged from the previous aerial image. Some previously vacant lots within the residential zones had been developed with new residences. Increased vegetation was evident within Concord High School.<br>The surrounding area remained predominantly unchanged to the 1943 imagery. A portion of the land on Gipps Road, adjacent east to the site, appeared to have been subject to landscaping, with a structure built upon it. To the northeast there appears to have been filling of vacant land, and possibly encroaching on the east of the high school area. |
| **1965** | The site remained relatively unchanged to the 1955 imagery. To the southwest of Concord High School a number of new residences were visible, as well as to the east of St Luke's Anglican Church on Burton Street. A petrol station on the corner of Burwood Road and Burton Street, appeared to have been built, in the position of the current Concord BP petrol station.<br>Gipps Road had been extended to the east of the site. The structure to the east of the site identified in the 1955 imagery had been demolished and a new structure built, as well as an asphalt carpark and what appear to be two lawn bowling greens. |
| **1971** | All structures within the northeastern portion of site, at the location of Concord High School, had been demolished, with cleared land and exposed soil present instead. Additional renovations to residences and newly constructed residences were apparent particularly in the south eastern portion of the site.<br>The surrounding area appeared relatively unchanged to the previous aerial image. |
| **1986** | A large number of structures likely associated with a new Concord High School were present within the northeastern portion of the site, as well as sporting grounds. New structures were also evident within Concord Public School. Additional residences had been built/renovated throughout the site, in addition to a number of commercial/industrial structures within the |

| | |
|---|---|
| | centre of the site, along Burwood Road. A cleared lots of land in areas previously occupied by residences were present in the southern portion of site.<br>The surrounding area appeared predominantly unchanged to the 1986 imagery. The Concord Oval and St Lukes Oval were present to the east of the site, in addition to a tennis courts and facilities. Mid density residences and Crane Street were constructed to the north/northeast of the site, as well as carparks associated with St Lukes Oval. |
| **1994** | New residences were evident in the southern portion of the site, in lots which were previously cleared. Renovations to existing residences/structures were also evident, particularly in the central portion of site along Burwood Road.<br>The surrounding area appeared relatively unchanged to the previous aerial image. Additional facilities were visible around Concord Oval. |
| **2004** | The site appeared consistent with the previous aerial image. Two residences to the northwest of Concord High School had been demolished and a new residential structure built in their place. In close proximity a number of residences had been cleared leaving an empty lot along Burwood Road.<br>The surrounding area appeared relatively unchanged to the previous aerial image. |
| **2014** | A new residential structure along Burwood Road was present in the previously vacant lot. New structures as part of Concord Public School and Concord High School were also present.<br>In the surrounding area, sports fields associated with St Lukes Park to the east of the site had been established. Landscaping in the western portion of Queen Elizabeth Park, to the west of the site, was evident. |
| **2023** | The site is predominantly consistent with the 2014 imagery. New structures and infrastructure are evident on both the public school and high school.<br>The carpark to the northeast of the site has been expanded and additional facilities associated with Concord Oval are evident. |

**Burwood Precinct (West)**

The aerial photograph review identified the following features in relation to historical use of the site:

**Table 3.5: Historical Aerial Information, Burwood Precinct (West)**

| | |
|---|---|
| **1943** | The site comprised of predominantly residences, structures associated with St Mary's Parish at the eastern end of site, and commercial/ industrial structures along Parramatta Road. An industrial/commercial structure is evident in the northeast among residential properties. The eastern portion of the site included a roadway.<br>The surrounding area comprised of predominantly residential areas, with Goddark Park visible to the north of the site. |
| **1955** | The site appeared relatively unchanged from the previous aerial image, with some renovation to residences, commercial/industrial structures and St Mary's Parish evident. The large industrial structure between Melbourne Street and John Stret was no longer present, with six standalone residences in its place.<br>The surrounding area remained predominantly unchanged to the 1943 imagery. |
| **1965** | A number of residences on Parramatta Road had been demolished and in their place additional industrial/commercial structures had been constructed, including what appears to be a petrol station in the position of the current day Ampol petrol station. Renovations to residences and St Mary's Parish were apparent.<br>Additional industrial/commercial structures were present along the southern side of Parramatta Road, including a number of car lots. Residences in the surrounding area had undergone further development/renovations. |

| | |
|---|---|
| **1971** | The site appeared relatively unchanged from the previous aerial image. A number of residences on the corner of Ada Street and Lloyd George Avenue had been demolished and a large industrial structure constructed in the footprint of what now is the substation. Additional renovations on industrial/commercial structures along Parramatta Road were evident, including a number of car lots.<br>The surrounding area appeared relatively unchanged to the previous aerial image. |
| **1986** | The site appeared relatively unchanged from the previous aerial image. Additional car lots were visible along Parramatta Road. Residences at the corner of Ada and Franklyn Street had been demolished and an asphalt carpark was present. Additional medium density residential structures were evident in the central portion of the site, off Ada Street. Transformers are now visible in the northwest of the substation area.<br>The site was bound to the west by the M4 motorway. Additional car lots were present on the southern side of Parramatta Road. |
| **1994** | The site remained similar to the previous aerial image. A new large industrial/commercial structure was present on the corner of Lloyd George Avenue and Parramatta Road.<br>The surrounding area appeared relatively unchanged to the previous aerial image. A worksite was visible to the southeast of the site. |
| **2004** | Additional residences and renovations to residences were present, as well as structures as part of St Mary's Parish. The carpark on the corner of Ada and Franklyn Street was no longer present and the residence to the south had been extended into a portion of this area, while the remainder was occupied by a cleared area likely a park space.<br>The surrounding area appeared relatively unchanged to the previous aerial image. The construction site to the southeast of the site was instead occupied by MLC Junior School. |
| **2014** | Additional structures on St Mary's Parish were visible, as well as additional residences and renovations to pre-existing residences.<br>Further development to the industrial/commercial structures south of Parramatta Road had occurred. What is currently the Crystal Car Wash and the Ampol petrol station were evident, as well as additional structures on MLC Junior School. |
| **2023** | The site is predominantly consistent with the 2014 imagery, with additional renovations to residences. The service station has undergone redevelopment with a new shop and canopy and forecourt area.<br>The surrounding area remains relatively unchanged to the previous aerial image. Major roadway upgrades are evident to the northwest of the site. |

**Homebush Precinct (East)**

The aerial photograph review identified the following features in relation to historical use of the site:

**Table 3.6: Historical Aerial Information, Homebush Precinct (East)**

| | |
|---|---|
| **1943** | The site comprised of predominantly industrial/commercial structures, the nature of which are unclear. The eastern portion of the site included a roadway, with a lane through the north of the area, with the rear yard of a residence in the northwest corner across the lane, and a residence in the northeast south of the lane.<br>The site was bound to the south by Parramatta Road and to the northeast by another roadway. The remainder of surrounds appeared predominantly residences. |
| **1955** | The site appeared to undergo some changes from the previous aerial image, mainly in the southwest and central areas with some new industrial/commercial structures and paved car parking apparent. The southeast and north of the area remains largely unchanged. |

| | |
|---|---|
| | The surrounding area remained predominantly unchanged to the 1943 imagery, with the demolition of a few residences to the west of the site. |
| **1965** | A single large industrial/commercial structure was present across the site as well as a paved car park. The large structure incorporates structures in the southeast and central south from previous images but extends to the laneway and replaces the residence in the northeast. The facility has the appearance of a car sales and maintenance operation.<br>The demolition of residences to the west of the site was evident, as well as renovations/development of residences to the north and east. |
| **1971** | The aerial imagery presented limited detail of the site and surrounding area due to reduced image quality. Nonetheless the site and surrounding area appeared to have undergone limited change to the previous 1965 image. |
| **1986** | Additional renovations to the commercial structure were evident, as well as car parking on both the eastern and western sides, and pavement in the north replacing the residences and laneway. The parking area on the east is in the area where the road previously bounding the facility was present.<br>Significant roadway developments were evident, with the site bound on all sides by major roadways including Concord Road to the west, Parramatta Road to the south and the eastern extent of the M4 Motorway to the north and east. Residential structures were no longer apparent in the surrounding area. |
| **1994** | The site had undergone significant development, including the demolition of previous commercial structure, and the development of a new commercial structure. Asphalt car parking is visible across the remainder of the site. The facility may still operate as a car sales and maintenance operation.<br>Additional vegetation was present along the northeastern boundary of the site and the motorways. |
| **2004** | The site and surrounding area were consistent with the previous aerial imagery. |
| **2014** | Further development had occurred to the onsite structure, in the northeast and eastern portion of the site. A road ramp leading underground is evident in the southeast portion of the site.<br>The surrounding area remained relatively unchanged. |
| **2023** | The site is consistent with the 2014 imagery.<br>North of the site, roadway developments are evident, associated with the M4 tunnel ramp. |

**Bakehouse Quarter, Homebush Precinct**

The aerial photograph review identified the following features in relation to historical use of the site:

**Table 3.7: Historical Aerial Information, Bakehouse Quarter, Homebush Precinct**

| | |
|---|---|
| **1943** | The site comprised a combination of industrial/commercial structures with sawtooth roofing and cleared grassed areas. Structures associated with the Arnott's Biscuit Factory were visible between George Street and the rail line. A number of smaller residential structures were present within primarily the southern portion of the Precinct. The northern end appeared to have disturbed ground and appears to show exposed soil, which may relate to filling.<br>The surrounding area comprised of predominantly residences with some open grassed areas to the northwest and west. The rail line was present on the eastern boundary of the Precinct, as well as Parramatta Road on the southern boundary, along which a number of commercial/industrial structures were present to the southwest of the site. To the west of the site Powells Creek was evident. |

| | |
|---|---|
| **1955** | The site remained similar to the 1943 historical aerial image. Some renovations and extensions to structures were visible on residences in the southern portion of site and the structures that made up the Arnott's Biscuit Factory. A number of new structures were evident in the northern and northwestern portions of the site on the cleared grassed areas. Some stockpiles are evident in the southwest.<br>The surrounding area appeared consistent with the 1943 imagery, with the cleared grassed area to the west appearing to have been subject to landscaping to serve as a park/reserve. Further residential structures were apparent in the surrounds. |
| **1965** | Additional structures which appear to be associated with the Bakehouse are evident in the northern cleared area, as well as a parking area in the western portion of the site. Additional residences were evident in the western and southern portion of the site.<br>The surrounding area appeared consistent with the 1955 imagery. Additional vegetation was present in the grassed area to the west of the Powells Creek. |
| **1971** | Additional parking areas were visible in the northern and southern portions of the site, as well as some new industrial/commercial structures in the western portion of the site.<br>Within the surrounding area, new structures were present to the north of the site. The remainder of the surrounding area appeared relatively unchanged. |
| **1986** | Some redevelopment had occurred at the site, including the demolition of a number of residential structures present in the western and southern portions of the site. Paved parking areas were visible in the western, southern and northern areas. Additional commercial/industrial structures were evident in the northern portion of site. The M4 motorway was present above the southern end of the site.<br>A large number of residences to the east and west of site had been removed as part of the construction of the M4 motorway. Some development and renovations to industrial/commercial structures to the southwest of site were apparent. Structures associated with the North Strathfield Station were visible to the northeast of the site. |
| **1994** | Further industrial/commercial structures were present in the north of the site. Otherwise the site appeared largely unchanged.<br>The surrounding area remained relatively unchanged from the previous aerial imagery. Some demolition has occurred to the northwest of the site to expand the cleared grassed areas along Powells Creek. Demolition and development of industrial/commercial structures to the southwest of the site along Parramatta Road had occurred. |
| **2004** | A number of industrial/commercial structures in the northern portion of site had been removed and multi-storey residential structures were evident in their place. In the southern portion of the site demolition of some structures had occurred, with new industrial/commercial structures present.<br>The surrounding area appeared consistent with the previous aerial imagery. |
| **2014** | A multistorey cark park had been constructed in the northern portion of the site. Demolition of structures had occurred in the northwest portion of the site which instead was utilised for car parks. Renovations on the primary Bakehouse structure were visible, as well as the demolition of structures in the south of the site for additional car spaces and new structures.<br>The surrounding area was consistent with the 2004 imagery. To the northeast of the site works associated with the rail line were evident. |
| **2023** | The majority of site is consistent with the 2014 imagery.<br>West of the site, a number of residences have been demolished with new grassed cleared areas, sporting facilities and some industrial structures. Works associated with the North Strathfield Station to the northwest of the site appear to have been completed. |

## 3.5 Historical Title Review

Copies of the historical title documentation obtained for selected lots across the site are provided in **Appendix F**. Details of the historical titles have been outlined in **Table 3.8**.

**Table 3.8: Historical Titles Information**

| Property | Precinct | Title Search Records |
|---|---|---|
| 10 Melbourne Street, Concord NSW<br>Lot 10, DP 1221601 | Burwood (West) (Residential 3) | A number of private landowners have owned the property since 1915 up until the present time, with a variety of occupations among the property owners, including builders, a clerk and a tailor. |
| 103 Burwood Road, Concord NSW<br>Lot 13 DP 8687 | Burwood (East) (Residential 7) | Private landowners owned the property from 1918 to 1974, with varying occupations including greengrocer, butchers, and a labourer.<br>The property was acquired by Gladwie Pty Limited in 1974, and then again by Richland Holdings Pty Limited in the same year. In 1979 the property was acquired by Ratnasabapathy Pty Limited, and then in 1986 by Kevtel Pty Limited. The property was acquired in 1994 by F & J Kazzo Pty Limited before being acquired by private owners in 2012. who retain the title till the current day.<br>The property was leased in 1989, before a transfer of the lease in 1994, which was followed in the same year by the surrender of the lease. Details of the lessees are not available. |
| 28 Burwood Road, Concord NSW<br>Lot 22 Section 1 DP 8045 | Burwood (East) (Residential 9) | A number of private landowners have owned the property since 1919 up until the present time, with a variety of occupations among the property owners, including as a locomotive driver, a farmer, a number of married women, a sales representative, technician and a bank manager. For a period between 1952 and 1970 the property title was held by a married woman as well as Perpetual Trustee Company Limited, before returning exclusively to private landowners. |
| 19 Courland Street, Five Dock NSW<br>Lot 7 Section 1 DP 1286 | Kings Bay (East) (Residential 1) | Private landowners owned the property from 1913 to 1973 until the property was acquired by Tempest Properties Pty Limited.<br>The property was again owned by a number of private landowners from 1978 until the present time, with varying occupations including a shop assistant and printer. |
| 13 Gipps Street, Concord NSW<br>Lot A DP 360991 | Burwood (East) (Residential 7) | A number of private landowners had owned the property from 1917 to 1954, with varying occupations including jewellers and married woman.<br>The site was purchased by C.G. Phillips Pty Limited in 1954 who held ownership until 2000.<br>The land was again owned by a private individual from 2000 until 2008, when ownership was transferred to the current private owner.<br>The property was leased to an unknown party between 2014 to 2018, and again to Golden Pacific Carwash Pty Ltd in 2021. |
| 71 Parramatta Road, Concord NSW<br>Lot 61 DP 1219960 | Burwood (West) (Comm/Ind 5) | The western portion of the site was owned by a number of private landowners between 1922 and 1969. The eastern portion of the site was owned by two separate groups of private landowners between 1921 and 1969. Both lots were combined and purchased by Bob Griffiths Motors Pty Ltd until 1990, when the property was held by two groups of private individuals until 2021. The property has been owned by 71 Concord Pty Ltd since that time, who maintain property ownership to the current time.<br>The property was leased in 2017 to an unknown group, when the lease then was either surrendered or expired before the most recent transfer of ownership. |

| Property | Precinct | Title Search Records |
|---|---|---|
| 259 Parramatta Road, Five Dock NSW<br>Lot 1 DP 456940 | Kings Bay (West)<br>(Comm/Ind 1) | Private landowners owned the property from 1927 to 1978, with a variety of occupations includings a number of Motor Mechanics and a Garage Proprietor. In 1978 the property was transferred to Muirs Motors (Ashfield) Pty Ltd who since became Muir Burnside Pty Ltd who currently maintain ownership.<br>A number of leases have existed on the propertied most notably to Ampol Petroleum Limited from 1955 to 1965 and again from 1965 to an unknown period. |
| 1-11 George Street, North Strathfield NSW<br>Lot 51 DP 1219136 | Bakehouse Quarter, Homebush<br>(Comm/Ind 3) | A thin area at the northern extent of the lot was held by James Pearce Limited from 1917 to 1928, the Homebush Flour Mills Limited from 1928 to 1993. The lot was transferred then to Defiance Milling Co. Pty Ltd who held ownership until Arnott's Biscuits Pty Ltd took ownership in 1994 and held until 1997. A larger portion of the lot within the northern extent was held by William Arnott Limited from 1917 until 1984, when ownership was transferred to Arnott's Biscuits Pty Ltd who held ownership until 1997. The majority of the lot was owned by William Arnott Limited from 1907 until 1984 when it was similarly transferred to Arnott's Biscuits Pty Ltd who held ownership until 1997. A small area at the southern portion of the lot was owned by James Pearce Limited from 1917 to 1928, then by Homebush Flour Mills Limited from 1928 to 1934. Ownership was then transferred to William Arnott Limited who held until 1984, when it was transferred to Arnott's Biscuits Pty Ltd, who held ownership until 1997.<br>All portions of the overall lot were then acquired by Kirela Pty Ltd, who became Austramp North Strathfield One Pty Ltd then 3 George One Pty Ltd, and who currently hold ownership. |
| 153 – 165 Parramatta Road,<br>North Strathfield NSW<br>Lot 700 DP 1213362 | Homebush (East)<br>(Comm/Ind 1) | The lot has historically been separated into 11 smaller allotments with a variety of ownerships.<br>A narrow portion in the northern area was historically owned by the Excelsior Land Investment & Building Company & Bank Limited from 1883 to 1886, at which time it served as a Lane, known as Taylor Lane. Ownership was transferred to the Commissioner for Main Roads 1986 who held it until 1991, when it was transferred to E.D. Cullen (Holdings) Pty. Limited who appeared to have potentially operated service station/garages.<br>Two smaller portions of the lot also in the northern area were owned by a number of private landowners, under a variety of occupations, including a refrigeration mechanic, a nurse, a labourer and a fitter. Both properties were then owned by the Commissioner for Main Roads before being amalgamated in 1991, when ownership was also transferred to E.D. Cullen (Holdings) Pty Ltd.<br>The eastern portion of the lot historically formed part of Concord Street, with ownership listed under the Commissioner for Main Roads between 1986 to 1991. A small adjacent area was listed as being owned by two private landholders as well as E. A. Percival Ltd for different periods between 1922 and 1938, before ownership was transferred to the Commissioner for Main Roads in 1938. Both these areas were transferred to E.D. Cullen (Holdings) Pty Ltd in 1991.<br>The remaining portions of the lot were generally owned by a variety of private individuals with a range of occupations, including grocers, produce merchants, public accountant, a brake tester and a service station proprietor. A smaller number of organisations also held ownership of some areas for periods of time. Between the yeas of 1955 |

| Property | Precinct | Title Search Records |
|---|---|---|
| | | and 1973 these lots were gradually acquired by Rothwell & Cullen (Holdings) Pty Ltd, who came to be E.D Cullen (Holdings) Pty Ltd.<br>All lots were amalgamated, with ownership transferred to Montrose Investments Australia Pty Ltd in 2005, with whom ownership remains.<br>A number of leases have historically existed for different parts of the lot, with areas being leased to grocers, bakers, motor mechanics, accountants and garage proprietors. |
| 213 Parramatta Road, North Strathfield NSW<br>Lot 200 DP 1087484 | Bakehouse Quarter, Homebush (Comm/Ind 3) | The lot has historically been separated into 8 smaller areas with a variety of ownerships.<br>The northwesternmost area was owned by Arnott's Biscuits Pty Ltd, under different names, between 1936 to 1992, before ownership was transferred to American Auto Parts Pty Ltd, an automotive parts supplier.<br>Another area in the northwest of the lot was formally part of Powells Creek, being Crown Title, before being owned by American Auto Parts Pty Ltd between 1985 to 2006.<br>A small area adjacent to the area mentioned above, positioned to the southeast, was historically owned by S. Barr and Company Ltd from 1925 to 1962, before ownership was transferred to Vellim Investments Pty Ltd and then again to American Auto Parts Pty Ltd in 1977.<br>The remaining areas of the lot, with the exception of a single narrow area in the eastern portion, were owned by a variety of private landowners, including an agent, student and produce merchant, before all were acquired by Meldon Pty Ltd in 1967, and then by American Auto Parts Ptd Ltd in 1977.<br>The narrow area in the eastern portion of the lot was owned by a private landowner between 1913 to 2002, before being acquired by American Auto Parts Pty Ltd.<br>All eight areas were amalgamated in 2006, when ownership was transferred to Kirela Pty Ltd, and then by Austrump North Strathfield One Pty Ltd in 2019, who then became 3 George One Pty Ltd.<br>During these periods a number of leases also existed on the property. |

## 3.6 Summary of Site History and Integrity Assessment

Historically, the site appeared to have been used for a combination of generally low-density residential and commercial/industrial land uses since the 1940s. A number of structures, both residential and commercial/industrial, have remained present onsite since the earliest aerial photographs, remaining generally unchanged. Some portions of the site including schools, the Bakehouse Quarter and commercial/industrial lots along Parramatta Road have been subject to redevelopment and, in the case of commercial/industrial areas, repurposing. A number of potentially contaminating land uses have occurred within the Precincts including service stations and mechanical workshops.

Based on the range of sources and the general consistency of the historical information along with historical aerial photographs, it is considered that the historical assessment has an acceptable level of accuracy with respect to the potentially contaminating activities historically occurring at the site. These appear to relate predominantly to the commercial/industrial land use.

# 4. Previous Investigations

A summary of Council supplied historical environmental investigation reports completed for a number of sites within the site are provided below.

## 4.1 Kings Bay Precinct (East)

### 4.1.1 Historical Report 1 - Site Audit Statement, 37-45 Parramatta Road & 2A Courland Street, Five Dock

A Site Audit Statement (SAS) was prepared by EPA accredited Site Auditor Christopher M. Jewell for 37-45 Parramatta Road and 2A Courland Street, Five Dock (C.M. Jewell 2002[9]) (See **Figure 2A**, Historical Report 1) in 2002. The SAS referred to a number of reports prepared by Douglas Partners in 2002 for the site, including a Contamination Assessment, a RAP and a Validation Assessment for an underground storage tank pit. These reports were not made available to JBS&G for review. The SAS concluded that the site was suitable for commercial/industrial land use under the conditions that the SAS should be used in conjunction with the Site Audit Report (SAR) and any soil imported to the site shall be virgin excavated material (VENM) and validated in accordance with Section 4.3 of the NSW EPA *Guidelines for Assessing Service Station Sites 1994*. It is noted that the SAR was not available for review by JBS&G.

### 4.1.2 Historical Report 2.1 - Construction Environment Management Plan, 1 Parramatta Road, Five Dock

AECOM Australia Pty Ltd (AECOM) was engaged by Transport for NSW (TfNSW) to prepare a construction environmental management plan (CEMP) for a portion of the property located at 1 Parramatta Road, Five Dock (AECOM 2021[10]), which falls within the east Kings Bay Precinct (see **Figure 2A**, Historical Report 2).

The site is noted to be a former service station, and has been owned by TfNSW since 2018, with the aim of conducting road widening works utilising the site. The CEMP was prepared to manage the retention and eventual removal of three decommissioned USTs associated with the historical site usage and surrounding potentially petroleum hydrocarbon impacted soil. The locations of these USTs are shown on **Figure 3R**.

The site is known to have operated as a service station until 1972, since which is has been used for commercial business, including a tiling and flooring retail centre, and a mechanical and auto panel beating and spray painting workshop. All infrastructure including buildings and petroleum related infrastructure was demolished in 2019 with the exception of the three USTs located along Parramatta Road, which were unable to be removed due to their depth and alignment under the Parramatta Road footpath. These USTs remain in-situ with the CEMP to apply until the USTs and associated impacts could be managed and the road widening works commence.

It is noted that the demolition and remediation of the broader site was audited by an NSW EPA accredited Site Auditor who was engaged by TfNSW. The three USTs are noted to have been degassed and decommissioned using foam in accordance with Workcover regulations. The CEMP details the procedures and management required during the in-situ retention of the USTs, during the subsequent removal of USTs and remediation of any potential hydrocarbon impacted soils, and eventual validation and sign off by the designated NSW EPA site Auditor.

---

[9] *Site Audit Statement, 37-45 Parramatta Road and 2A Courland Street, Five Dock NSW,* C.M. Jewell & Associates Pty Ltd, December 2002 (C.M. Jewell 2002)

[10] *Construction Environment Management Plan, Easing Sydney's Congestion Works – Parramatta Road Five Dock NSW,* AECOM Australia Pty Ltd, March 2021 (AECOM 2021)

### 4.1.3 Historical Report 2.2 - Site Audit Statement, 1 Parramatta Road, Five Dock

A SAS was prepared by EPA Accredited Site Auditor Rowena Salmon in 2021 for a property located at 1 Parramatta Road, Five Dock (Ramboll 2021[11]), which falls within the east Kings Bay Precinct (see **Figure 2A**, Historical Report 2). The SAS referred to a number of reports prepared for the site, including a DSI, a RAP, a pre-remediation baseline groundwater monitoring event, a Sampling Analysis and Quality Plan (SAQP), a Proposed Remedial Works Plan (RWP), a Validation Report and a CEMP (AECOM 2021). These reports were not made available to JBS&G for review, with the exception of AECOM (2021) which is detailed in **Section 4.1.2**.

THE SAS concluded that the site was suitable for its proposed use subject to the implementation of the CEMP (AECOM 2020) which detailed the management procedures associated with the in situ retention and eventual excavation of three USTs, as detailed in **Section 4.1.2**. It is noted that the SAR was not available for review by JBS&G.

## 4.2 Burwood Precinct (West)

### 4.2.1 Historical Report 3 - Detailed Site Investigation, 91-97 Parramatta Road & 2-4 Coles Street, Concord

EI Australia (EI) was engaged by Rent A Space Self Storage to conduct a Detailed Site Investigation (DSI) at 91 – 97 Parramatta Road and 2 – 4 Coles Street, Concord (EI 2022a[12]), which falls within the west Burwood Precinct (see **Figure 2D**, Historical Report 3). The DSI was completed following EI's initial PSI (not obtained by JBS&G) where further investigation of the contamination status of the site was recommended. The investigation was carried out in support of a Development Application (DA) for a proposed self-storage commercial development. The site comprised two residential dwellings, one lot of vacant land and commercial buildings.

The DSI involved the review of previous environmental reports and a soil and groundwater investigation program that included the advancement of eight soil boreholes and the construction of three groundwater monitoring wells.

The DSI identified that the site was historically used for a combination of mixed residential, commercial and industrial purposes, with occupants including retail shops, car dealers, moto mechanics and building hardware manufacturers/distributors. The soil program reported fill to a maximum depth of 1.6 m bgs. Laboratory analysis of soil samples reported concentrations predominantly below the proposed site criteria, with exceedances of the health criteria in fill for lead at one location and asbestos in three samples, and exceedances of the ecological criteria in fill for benzo(a)pyrene at six locations, copper at one location and zinc at four locations. Statistical analysis determined that the 95% UCL of the average concentration of lead within fill was below the adopted health-based criteria. The three constructed monitoring wells were noted to be dry and as such no groundwater data was reported.

Data gaps following the investigation were noted to include an inaccessible area within the northwest portion of the site, which was inaccessible, as well as the location of underground storage tanks (USTs) within this portion of the site as identified from the SafeWork NSW hazardous chemicals schedule onsite and any subsequent potential contamination from these tanks.

[11] *Site Audit Statement - 1 Parramatta Road, Five Dock, NSW,* Ramboll Australia Pty Ltd, September 2021 (Ramboll 2021)

[12] *Detailed Site Investigation, 91 – 97 Parramatta Rd & 2 – 4 Coles St, Concord NSW,* EI Australia, December 2022 (EI 2022a)

### 4.2.2 Historical Report 4 - Preliminary Site Investigation, 65-69 Parramatta Road, Concord

Compass Environmental (CE) was engaged by Reece Group to undertake a PSI of the property located at 65 – 69 Parramatta Road, Concord (CE 2022[13]), which falls within the west Burwood Precinct (see **Figure 2D**, Historical Report 4). The assessment was undertaken to determine potential contamination issues associated with the intended future re-development of the property for commercial use.

The PSI involved the collation and review of background information for the property as well as the advancement of five boreholes across the property, and subsequent sample collection and laboratory analysis.

Review of background information noted the site was historically used for a combination residential and commercial purposes, including as a car yard. Fill material was encountered across the site, to depths ranging between 0.6 m and 1.5 m bgs. During the soil investigation program anthropogenic inclusions including brick, concrete, plastic ash and glass were noted within fill material. No asbestos containing material (ACM) was identified during the investigation. Laboratory analysis of soil samples reported levels below the health and ecological criteria based on the proposed commercial use. Based on the findings of the PSI, Compass Environmental concluded that the site was suitable for the proposed use as a Reece Plumbing Store.

## 4.3 Bakehouse Quarter, Homebush Precinct

### 4.3.1 Historical Report 5 - Site Audit Report, Bakehouse Building L, 11-13 George St, North Strathfield

A SAR was prepared for the 'Bakehouse Building L' located at 11-13 George Street, North Strathfield NSW by EPA accredited Site Auditor Graeme Nyland (See **Figure 2F**, Historical Report 5) in 2008 (Environ 2008[14]). The SAR referred to a number of reports prepared for the site, including a Preliminary Environmental Investigation Work Plan and two Environmental Site Investigations. These reports, as well as the SAS, were not made available to JBS&G for review, with the exception of the second Environmental Site Investigation prepared by EIS (2008[15]) which was included as an attachment to the SAR.

The SAR concluded that the site could be made suitable for the proposed development provided that the measure outlined in the site RAP included as Section 10 of EIS (2008). The RAP detailed the required removal of underground fuel storage tanks and any associated contaminated soil, followed by validation of the excavation. No significant contamination was known to exist on site.

### 4.3.2 Historical Report 6 - Site Audit Statement – 16 George Street, North Strathfield

A Site Audit Statement (SAS) was prepared by EPA Accredited Site Auditor David Gregory in 2022 for a property located at 16 George Street, North Strathfield (Geo-Logix 2022[16]), which falls within the west Homebush Precinct (see **Figure 2F**, Historical Report 6). The SAS referred to a number of reports prepared for the site, including a SAQP, a DSI, a RAP (EI 2022b[17]) and an Acid Sulfate Management Plan. These reports were not made available to JBS&G for review, with the exception of the RAP (EI 2022b) which included as an attachment to the SAS.

[14] *Site Audit Report, Bakehouse Building L for Kirela Pty Ltd,* Environ Australia Pty Ltd, May 2008 (Environ 2008)

[15] *Environmental Site Investigation for Proposed Carpark Development at Bakehouse Quarter 'Building L', 11-13 George St, North Strathfield, (Draft),* Environmental Investigation Services, April 2008 (EIS 2008)

[16] *Site Audit statement – 16 George Street, North Strathfield NSW,* Geo-Logix Pty, Ltd, July 2022 (Geo-Logix 2022)

[17] *Remediation Action Plan, 16 George Street, North Strathfield NSW*, EI Australia Pty Ltd, Ref# E25039.E06_Rev2, July 2022 (EI 2022b)

As detailed in the RAP, prior field investigations undertaken as part of the DSI identified areas of contamination within the site, including petroleum hydrocarbon impacts within soil exceeding the management limit and asbestos (bonded and friable) impacts within soil exceeding the adopted health based criteria. Following a review of the available remedial strategies, the most appropriate strategy was evaluated to be the capping and containment of asbestos impacted fill and the excavation and disposal of localized petroleum hydrocarbon impacted fill. It is noted that the capped and contained asbestos impacted fill would require a long term passive management under an environmental management plan (EMP).

The SAS concluded that the site could be made suitable for the proposed commercial/industrial use if the identified contamination was remediated/managed in accordance with the prepared RAP. Conditions were noted on the SAS which stated that groundwater monitoring wells were grout filled prior to remediation and that a Section A2 Audit was completed by an accredited Site Auditor following site remediation confirming that the site had been remediated in accordance with the RAP, the site was suitable for the proposed use, and the EMP is acceptable for the long term management of asbestos contaminated soils.

©JBS&G Australia Pty Ltd

# 5. Preliminary Conceptual Site Model (CSM)

NEPC (2013) identifies a conceptual site model (CSM) as a representation of site related information regarding contamination sources, receptors and exposure pathways between those sources and receptors. The development of a CSM is an essential part of all site assessments.

NEPC (2013) identified the essential elements of a CSM as including:

- Known and potential sources of contamination and contaminants of concern including the mechanism(s) of contamination;
- Potentially affected media (soil, sediment and ambient air);
- Potential receptors; and
- Potential and complete exposure pathways.

## 5.1 Potential Aeras of Environmental Concern

Based on the history review and observations made during the JBS&G inspection of the site, potential areas of environmental concern (AECs) have been identified and are presented together with associated contaminants of potential concern (COPC) in **Table 5.1**.

**Table 5.1: Potential Areas of Environmental Concern**

| Area of Environmental Concern (AEC) | Primary Contaminants of Potential Concern (4ww) |
|---|---|
| Potential historic fill material used to create current site levels and structural foundations | Total Recoverable Hydrocarbons (TRH)/Benzene, Toluene, Ethylbenzene and Xylene (BTEX), Polycyclic Aromatic Hydrocarbons (PAHs), heavy metals, Organochlorine Pesticides (OCPs), Polychlorinated Biphenyl (PCBs), PFAS and asbestos |
| Hazardous building materials associated with existing and former site structures | Asbestos, heavy metals (lead-based paint) and OCPs |
| Anthropogenic material storage areas | TRH/BTEX, PAHs, heavy metals, OCPs, PCBs, PFAS and asbestos |
| Potential storage of equipment/chemicals | TRH, Volatile Organic Compounds (VOC), Semi-Volatile Organic Compounds (sVOC), heavy metals, PFAS |
| Commercial/industrial activities including petrol stations, mechanics, car yards and dry cleaners/laundries | TRH, BTEX/VOCs, PAHs and other sVOCs, heavy metals, PFAS, asbestos |
| USTs and associated backfill sands associated with industrial historical activities | Heavy metals, PAHs, TRH, BTEX, VOCs and PFAS |

## 5.2 Potentially Contaminated Media

Potentially contaminated media present at the site includes:

- Surface/fill soils;
- Natural soils/bedrock;
- Surface water;
- Groundwater; and
- Soil Vapour.

Within the commercial/industrial areas of each precinct, the potential use and storage of fuel, oil, lubricants, degreasers and other chemicals associated with current and historical land use activities including car dealerships, car washing facilities, vehicle repair and maintenance, industrial storage yards, and petrol stations, have been identified during the review of historical site use. In addition, a single dry-cleaning facility was identified in the Burwood Precinct (West, Comm/Ind Area 2). During such land use activities, spillage/leakage and general site activities may have resulted in migration of contaminants through the former/current sealed surfaces and via surface soils within any unsealed surfaces at the site. As a result surface soils are considered to be a potentially contaminated media.

Given the likelihood of historic cut and fill activities to achieve site levels associated with industrial/commercial areas as well as educational areas, there is potential for fill material from unknown sources to be located across these areas. Additionally, it is acknowledged that fill material from unknown sources may have been sourced from areas in which industrial activities had historically been occurring at the time. Based on this, the fill material underlying the site has been identified as a potentially contaminated medium.

Based on the potential leachability of contaminants within surface soils/fill material and the historical use of some areas of the site the site including underground fuel, chemical or waste storage, vertical migration of contamination from the fill material/surface soils and/or leakage from underground storage vessels into the underlying natural soils/bedrock may have occurred. As such, the natural site soils and bedrock are considered to be potentially contaminated media.

As commercial/industrial areas within each of the Precincts have a long history of commercial/industrial land use and given the extensive stormwater infrastructure present, there is the potential that surface water is a potentially contaminated media from contaminants carried from site surfaces or subsurface areas into stormwater infrastructure.

Given the likelihood of fill material associated with the sites extended history for industrial/commercial activities, there is a possibility shallow perched groundwater within either fill materials or occurring across the fill/soil/bedrock interfaces may be impacted, which may result in the lateral migration of contaminants within subsoil water across the bedrock interface in surface and near-surface fill material and/or natural soil.

Given the occurrence of identified and suspected petroleum/chemical/waste storage infrastructure at some locations within both all Precincts, and the potential leachability of the identified COPC, it is considered that groundwater is a potentially contaminated medium, particularly where such storage was/is underground. As with the natural soils, the potential for contamination of groundwater will depend upon the actual nature, occurrence and characteristics of contamination within the overlying fill material and natural soils.

Given the potential for volatile soil and groundwater contamination across commercial/industrial portions of each precinct area, associated with USTs and the former/current petroleum/chemical storage and use, car washing and automotive repair centres, soil vapour is also considered to be a potentially contaminated medium in some areas.

## 5.3 Potential for Migration from Site

Contaminants where present can migrate from site AECs via a combination of windblown dusts, rainwater infiltration, groundwater migration, and surface water runoff. The potential for contaminants to migrate is a combination of:

- The nature of the contaminants (solid/liquid and mobility characteristics);
- The extent of the contaminants (isolated or widespread);
- The location of the contaminants (surface soils or at depth); and
- The site topography, geology, hydrology and hydrogeology.

The COPC identified as part of the site history review and site inspection are potentially present in solid form (e.g. heavy metals, asbestos etc.) or liquid form (e.g. pesticides, fuels, oils, solvents). Dependent upon concentrations, there is also the potential for impacts from volatile contaminant impacts to occur in a vapour form also in soils and groundwater.

As all three Precincts are primarily paved with asphaltic concrete or concrete pavements or vegetated with grass cover, the potential for windblown dust migration of contamination from the site is generally low. The potential for contamination migration via surface water movement and infiltration of water and subsequent migration through the soil profile is also considered generally to be low given the extent of impermeable pavements and stormwater control systems where required, although the risk is increased for some activities where surface spills may have entered stormwater drains (e.g. service station forecourts, workshop areas). Given the generally sealed nature of the site and the proximity of some Precincts to either Powells Creek or Iron Cove Creek there is potential for surface water run off to enter these water systems, however as noted above, it is anticipated surface water on sealed surfaces would mostly be collected by stormwater systems.

Given the potential for perched groundwater along the soil-rock interface and/or within fill material, migration of contamination via groundwater movement is considered to be a potential migration pathway for contaminants. However, where the site lies within residual silty clay soils with little or no fill, natural soils are anticipated to be relatively impermeable. As such, migration of contamination via groundwater movement is considered to be a potential migration pathway and will vary. The greatest potential is likely in reclaimed/disturbed terrain areas.

The vapour generation potential associated with volatile and semi-volatile contaminants (TPH, BTEX, VOCs) is identified as a potential migration pathway, particularly in areas where subsurface fuel/chemical/waste storage infrastructure is or was present, and within areas identified to contain fill materials.

## 5.4 Potential Exposure Pathways

Potential pathways and receptors of environmental impact within the site which will need to be addressed with respect to potential risks to current and/or future site users include:

- Inhalation of potential vapours migrating upwards from fill material of unknown origins or impacted surface soils resulting from historical fuel/chemical leaks/spills; and/or
- Potential inhalation of dusts/fibres from, or dermal and oral contact with, impacted soils as present at shallow depths and/or accessible by future service excavations; and/or
- Potential oral and dermal contact to surface water where present or to shallow groundwater as accessible by potential future service excavations and/or installed services pits; and/or
- Potential contaminant uptake by vegetation within landscaped areas.

## 5.5 Receptors

Potential receptors of environmental impact present within the site which will need to be addressed with respect to the suitability of the site for the proposed use include:

- Future workers of non-paved areas (landscapers, residents, construction works) and residents/occupants whom may potentially be exposed to COPC through direct contact with impacted soils and/or inhalation of dusts / fibres associated with impacted soils; and/or
- Residents / excavation / construction / maintenance and landscaping workers conducting activities at the site, who may potentially be exposed to COPC through direct contact with impacted soils present within excavations and/or inhalation of dusts from unsealed areas / fibres associated with impacted soils;
- Flora species to be established on the vegetated areas of the site;
- The Parramatta River which is located hydro-geologically downgradient of both the Kings Bay Precinct and Burwood Precinct either directly or indirectly via Iron Cove Creek; and/or

- Powells Creek which is located hydro-geologically downgradient of the Homebush/Concord West Precinct.

Where petroleum or other volatile hydrocarbon compound impact is identified, potential inhalation exposure to vapours will need to be considered.

The site is currently primarily covered by concrete and bitumen with limited vegetation generally within the low risk residential areas, presenting low potential ecological receptors, noting that no vegetation stress was observed during site inspection.

## 5.6 Preferential Pathways

For the purpose of this assessment, preferential pathways have been defined as natural and/or man-made pathways that result in the preferential migration of COPC as either solid (fibres, dust, soil, etc) or liquid (surface or groundwater).

Man-made preferential pathways are likely present throughout the site, generally associated with areas of previously disturbed natural ground present beneath the existing ground surface and unconsolidated fill materials. Fill materials and disturbed natural soils are anticipated to have a higher permeability than the underlying natural soils and/or bedrock.

# 6. Qualitative Assessment of Risk

## 6.1 Assessment of Risk

The following section provides an evaluation of the potential for the sites to pose a risk of harm to human health and/or the environment, with respect to land contamination and the project objectives. The qualitative risk assessment provided in **Table 6.1** below has been based on the findings of the PSI and guidance presented in enHealth (2012) *Environmental Health Risk Assessment: Guidelines for assessing human health risks from environmental hazards and AS/NZS ISO 31000: 2018 Risk Management Guidelines* (AS/NZS 31000:2018).

To assess potential risk levels, consideration has also been given to the potential land uses activities which may result in land contamination, as outlined in SEPP (Resilience and Hazards) 2021; and

**Table 6.1** below present a preliminary qualitative assessment of potential contamination risk based on the findings of the PSI using the aforementioned methodology. Preliminary potential contamination risks are shown on **Figures 3A** to **3R**.

To aid in the field inspection, areas were assigned Area names (e.g. 'Residential Area 1 etc.). Some areas however are in fact mixed use and contain both residential and commercial/industrial premises.

Some properties within the site have been subject of previous contamination assessment, some leading to remediation, validation and or issue of a site audit statement certifying the suitability for particular land use scenarios. The risk ranking applied to these properties is based on professional experience and judgement following review of available documentation. Conservatively, these sites are ranked at least 'Moderate to High', regardless of whether the site has been assessed historically as suitable for a particular land use, to ensure appropriate consideration for future more detailed planning proposals.

| Risk Ranking | Risk Details |
|---|---|
| **Low** | Residential and school areas with some minor/shallow fill material and some common hazardous building materials |
| **Low to Moderate** | Commercial premises with minor fill material and some common hazardous building materials and activities with low risk of contamination, and other more sensitive areas such as schools where greater potential risk may be present based on historical records. |
| **Moderate** | Commercial land with potential aboveground storage of hazardous chemicals |
| **Moderate to High** | Mechanical workshops/car yards with the potential for USTs and storage of hazardous substances (e.g. fuels, solvents, degreasers). Where USTs and/or subsurface chemical/waste storage are confirmed, the risk ranking would be High. |
| **High** | Confirmed USTs or other below ground chemical/waste storage present. |

**Table 6.1: Qualitative Risk Assessment**

| Site Area | Sub-Area (AEC) | Risk Level | Basis for Preliminary Risk Level |
|---|---|---|---|
| **Kings Bay Precinct (East)** | | | |
| Residential Area 1 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| Commercial/ Industrial Area 1 | Industrial mechanical workshops/car yard on standard cut/fill | **Moderate to High** | A moderate to high risk ranking has been applied to automotive industrial premises based on potential USTs and the potential storage of hazardous chemicals. Additionally, demolition of residential structures has occurred within the area during the 1950s to 1980s. |
| Historically Reported Area 1 | Commercial on standard cut/fill land | **Moderate to High** | A moderate to high risk ranking has been applied to commercial premises where industrial activities have historically occurred. As noted in **Section 4.4**, the area has historically contained a UST with remediation and validation works since undertaken. Given the limited documentation available to JBS&G it is uncertain if the UST was removed as part of remedial works. The site was noted to be suitable for commercial/industrial use in 2002, and is currently occupied by a Sydney Tools retail building, with limited potential for contamination.<br>It is noted that due to limited documentation it is uncertain whether PFAS was considered in historical assessments given the historic land use associated with automotive maintenance and repairs. |
| Commercial/ Industrial Area 2 | Industrial mechanical workshops/car yard on standard cut/fill | **Moderate to High** | A moderate to high risk ranking has been applied to automotive industrial premises based on potential USTs and the potential storage of hazardous chemicals. Additionally, minor demolition of historic structures has occurred within the area. |
| Residential Area 2 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| Commercial/ Industrial Area 3 | Commercial on standard cut/fill land | **Low to Moderate** | A low to moderate risk ranking has been applied to commercial office buildings, retail, restaurants and associated car parks built on standard cut/fill. |
| | Industrial mechanical workshops/car yard on standard cut/fill | **Moderate to High** | A moderate to high risk ranking has been applied to automotive industrial premises based on potential USTs and the potential storage of hazardous chemicals. Additionally, demolition of historic structures has occurred within the area during the 1950s to 1960s. |
| | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| Commercial/ Industrial Area 4 | Commercial on standard cut/fill land | **Low to Moderate** | A low to moderate risk ranking has been applied to commercial office buildings, retail, restaurants and associated car parks built on standard cut/fill.<br>Some minor demolition has occurred within the area during the 1940s to 1950s. |
| | Industrial mechanical workshops/car | **Moderate to High** | A moderate to high risk ranking has been applied to automotive industrial premises based on potential USTs and the potential storage of hazardous chemicals. Additionally, demolition of |

| Site Area | Sub-Area (AEC) | Risk Level | Basis for Preliminary Risk Level |
|---|---|---|---|
| | yard on standard cut/fill | | historic structures has occurred within the area during the 1940s to 1950s. |
| Commercial/ Industrial Area 5 | Industrial mechanical workshops/car yard on standard cut/fill | **Moderate to High** | A moderate to high risk ranking has been applied to automotive industrial premises based on potential USTs and the potential storage of hazardous chemicals. Additionally, demolition of industrial structures has occurred within the area during the 1970s to 1980s. |
| Historically Reported Area 2 | Land with confirmed USTs and potential for associated contamination | **High** | A high-risk ranking has been applied to areas where it has been confirmed through historical reports that USTs are located on the site and/or there is the potential for the storage of additional hazardous chemicals.<br>As noted in **Section 4.1.2** and **Section 4.1.3** the southwestern portion of the area contains three USTs which are yet to be removed, however have been degassed and decommissioned. These are intended to be removed during planned road widening works utilising the area.<br>The area was signed off under the condition that the CEMP detailing the management and eventual removal of the USTs be followed. Under the CEMP, the USTs and any related soil contamination are to remain in situ and the area unused until road widening works occur, whereby they are to be removed in accordance with the CEMP.<br>Given the limited documentation available to JBS&G regarding prior investigations conducted it is unclear whether PFAS was considered given the area's historical usage as a petrol station. |
| | Land with which historically contained USTs and other associated infrastructure | **Moderate to High** | A moderate to high risk ranking has been applied to the remainder of the area where historical reports have indicated USTs and other industrial infrastructure has historically been present and since been removed. As noted in **Section 4.1.2** the main portion of the area has had all infrastructure associated with historical petrol station removed and has been validated and signed off for commercial/industrial land use in 2021.<br>The area is currently a grassed unoccupied lot and poses little risk of contamination.<br>Given the limited documentation available to JBS&G regarding prior investigations conducted it is unclear whether PFAS was considered given the area's historical usage as a petrol station. |
| **Kings Bay Precinct (West)** | | | |
| Residential Area 1 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| Commercial/ Industrial Area 1 | Industrial mechanical workshops/car yard/car wash on standard cut/fill | **Moderate to High** | A moderate to high risk ranking has been applied to automotive industrial premises based on potential USTs and the potential storage of hazardous chemicals.<br>Given the historic land use of the area as a petrol station, the potential for historic USTs and usage of hazardous chemicals is considered high.<br>Additionally, demolition of structures has occurred within the area during the 1950s and 1960s. |

| Site Area | Sub-Area (AEC) | Risk Level | Basis for Preliminary Risk Level |
|---|---|---|---|
| | Commercial on historically industrial land with standard cut/fill | **Moderate to High** | A moderate to high risk ranking has been applied to commercial premises based on historical industrial land use and potential USTs and potential storage of hazardous chemicals.<br>Given the historic land use of the area as a petrol station, the potential for historic USTs and usage of hazardous chemicals is considered high.<br>Additionally, demolition of structures has occurred within the area during the 1960s and 1970s. |
| | Commercial on standard cut/fill land | **Low to Moderate** | A low to moderate risk ranking has been applied to commercial office buildings, retail, restaurants and associated car parks built on standard cut/fill. |
| **Burwood Precinct (East)** | | | |
| Commercial/ Industrial Area 1 | Commercial on standard cut/fill land with potential onsite storage of hazardous chemicals (Carpet cleaning business) | **Moderate** | A moderate risk ranking has been applied to this commercial area based on current commercial land use and potential storage of hazardous chemicals associated with carpet cleaning. |
| Residential Area 1 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| Residential Area 2 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| Concord Public School | School on standard cut/fill land | **Low to Moderate** | A low to moderate risk ranking has been applied due to known asbestos uncovered during a hazmat of the school properties. |
| Commercial/ Industrial Area 2 | Commercial on standard cut/fill land | **Low to Moderate** | A low to moderate risk ranking has been applied to commercial office buildings, retail, restaurants and associated car parks built on standard cut/fill. |
| Residential Area 3 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| Concord High School | School on standard cut/fill land | **Low to Moderate** | A low to moderate risk ranking has been applied to school properties built on standard cut/fill with no other historical land use.<br>Given the significant demolition works which occurred during the 1960s to 1970s, a low to moderate risk ranking has been applied. Asbestos in ground is known and managed under a specific AMP. |
| Residential Area 4 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| Residential Area 5 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |

| Site Area | Sub-Area (AEC) | Risk Level | Basis for Preliminary Risk Level |
|---|---|---|---|
| | Commercial on standard cut/fill land | **Low to Moderate** | A low to moderate risk ranking has been applied to commercial office buildings, retail, restaurants and associated car parks built on standard cut/fill. |
| Residential Area 6 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| Residential Area 7 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| | Commercial on standard cut/fill land | **Low to Moderate** | A low to moderate risk ranking has been applied to commercial office buildings, retail, restaurants and associated car parks built on standard cut/fill. |
| Residential Area 8 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| Residential Area 9 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| Commercial/ Industrial Area 3 | Industrial/commercial sites on standard cut/fill land with confirmed USTs and potential for hazardous chemical storage/use. | **High** | A high risk ranking has been applied to industrial sites where it has been confirmed through either site inspection or historical reports that USTs are located on the site and/or there is the potential for the storage of additional hazardous chemicals.<br>Given the identification of the area's usage as a BP petrol station and presence of associated bowsers and presumed USTs the risk of contamination is considered high. |
| Residential Area 10 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| **Burwood Precinct (West)** | | | |
| Residential Area 1 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| | High density residential on standard cut/fill land | **Low to Moderate** | A low to moderate risk ranking has been applied to high density residential premises where historic demolition and redevelopment has occurred between the 1950s and 1980s. |
| Commercial/ Industrial Area 1 | Industrial mechanical workshops/car yard/car wash on standard cut/fill | **Moderate to High** | A moderate to high risk ranking has been applied to automotive industrial premises based on potential USTs and the potential storage of hazardous chemicals. Additionally, demolition of residential structures has occurred within the area during the 1950s and 1960s. |
| Residential Area 2 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| Commercial/ Industrial Area 2 | High density residential on | **Low to Moderate** | A low to moderate risk ranking has been applied to high density residential premises where historic demolition and redevelopment has occurred. |

| Site Area | Sub-Area (AEC) | Risk Level | Basis for Preliminary Risk Level |
|---|---|---|---|
| | standard cut/fill land | | |
| | Commercial on standard cut/fill land | **Low to Moderate** | A low to moderate risk ranking has been applied to commercial office buildings, retail, restaurants and associated car parks built on standard cut/fill. |
| | Commercial sites with known use and storage of hazardous chemicals | **Moderate** | A moderate risk ranking has been applied to the dry cleaners due to the use and aboveground storage of hazardous chemicals. |
| Commercial/ Industrial Area 3 | Commercial on standard cut/fill land | **Low to Moderate** | A low to moderate risk ranking has been applied to commercial office buildings, retail, restaurants and associated car parks built on standard cut/fill.<br>Additionally, demolition of residential structures has occurred within the area between the 1960s and 1980s. |
| | Industrial substation on standard cut/fill | **Moderate to High** | A moderate to high risk ranking has been applied to the electrical substation based on potential hazardous materials. Additionally, demolition of residential structures has occurred within the area during the 1960s and 1970s. |
| Historically Reported Area 3 | Land with confirmed USTs and potential for associated contamination | **High** | A high-risk ranking has been applied to areas where it has been confirmed through either site inspection or historical reports that USTs are located on the site and/or there is the potential for the storage of additional hazardous chemicals.<br>As discussed in **Section 4.2.1**, the area is known to contain USTs and a Remedial Action Plan was required to outline remedial approaches to identified contamination to make the site suitable for proposed usages. It is unclear whether the RAP was prepared and is assumed that remediation has not taken place given the site usage at the time of inspection was consistent with that described in historical investigations.<br>It is noted that the probability of PFAS contamination was considered low to medium and sampling required, however no samples were analysed. |
| Residential Area 3 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| Residential Area 4 | Residential on standard cut/fill land | **Low** | A low risk ranking has been applied to residential properties built on standard cut/fill with no other historical land use. |
| Commercial/ Industrial Area 4 | Industrial/commercial sites on standard cut/fill land with confirmed USTs and potential for hazardous chemical storage/use. | **High** | A high risk ranking has been applied to industrial sites where it has been confirmed through either site inspection or historical reports that USTs are located on the site and/or there is the potential for the storage of additional hazardous chemicals.<br>Given the identification of the area usage as a Ampol petrol station and presence of associated bowsers, ASTs and USTs, the risk of contamination is considered high.<br>Additionally, demolition of residential structures has occurred within the area during the 1950s and 1960s. |
| | Industrial mechanical workshops/car | **Moderate to High** | A moderate to high risk ranking has been applied to automotive industrial premises based on potential USTs and the potential storage of hazardous chemicals. Additionally, demolition of |

| Site Area | Sub-Area (AEC) | Risk Level | Basis for Preliminary Risk Level |
|---|---|---|---|
| | yard/car wash on standard cut/fill | | residential structures has occurred within the area during the 1940s and 1950s. |
| Commercial/ Industrial Area 5 | Industrial mechanical workshops/car yard/car wash on standard cut/fill | **Moderate to High** | A moderate to high risk ranking has been applied to automotive industrial premises based on potential USTs and the potential storage of hazardous chemicals. Additionally, demolition of residential structures has occurred within the area during the 1950s to 1960s. |
| Historically Reported Area 4 | Commercial on standard cut/fill land | **Low to Moderate** | A low to moderate risk ranking has been applied to commercial office buildings, retail, restaurants and associated car parks built on standard cut/fill.<br>Additionally, demolition of residential structures has occurred within the area during the 1970s to 1980s.<br>As discussed in **Section 4.2.2** a PSI concluded in 2022 that the area was suitable for its proposed usage as a Reece Plumbing store given the lack of contamination identified.<br>It is noted that despite acknowledging historic usage of the area as a car yard, PFAS was not considered a COPC and not assessed. |
| St Mary's Parish | School on standard cut/fill land | **Low** | A low risk ranking has been applied to school properties built on standard cut/fill with no other historical land use. |
| **Homebush Precinct (East)** | | | |
| Commercial/ Industrial Area 1 | Industrial mechanical workshops/car yard/car wash on standard cut/fill | **Moderate to High** | A moderate to high risk ranking has been applied to automotive industrial premises based on potential USTs and the known storage of hazardous chemicals. Additionally, demolition of historical structures has occurred within the area between the 1940s to 1990s.<br>Given the long-term history associated with automotive, maintenance and sales, and the associated usage and storage of hazardous chemicals, a moderate to high risk ranking has been applied to the area. |
| **Bakehouse Quarter, Homebush Precinct** | | | |
| Commercial/ Industrial Area 1 | Commercial on standard cut/fill land | **Low to Moderate** | A low to moderate risk ranking has been applied to commercial office buildings, retail, restaurants and associated car parks built on standard cut/fill. |
| Residential Area 1 | Residential on historical industrial/commercial land | **Moderate to High** | A moderate to high risk ranking has been applied to residential premises built on historically industrial/commercial land between 1994 and 2004, based on potential for USTs and the potential the historic storage of hazardous chemicals, and no available records to confirm remediation/validation. The risk level may be less where documentation of remediation and validation is made available. |
| Historically Reported Area 5 | Commercial on historical industrial land | **Moderate to High** | A moderate to high risk ranking has been applied to premises built on historical industrial/commercial land based on reported contamination within the area and required remediation.<br>Historic investigations identified contamination within the area and as discussed in **Section 4.3.1** an SAR noted the area could be made suitable given the implementation of the RAP.<br>It is noted that validation documentation along with Site Auditor sign off of remedial works have not been provided. As such it is |

| Site Area | Sub-Area (AEC) | Risk Level | Basis for Preliminary Risk Level |
|---|---|---|---|
| | | | assumed the remedial works have yet to occur given the proposed development works appear to have not occurred. However, under the current area usage as a car park and retail space, the risk of contamination generation is considered low to moderate. |
| Historically Reported Area 6 | Commercial on historical industrial land | **Moderate to High** | A moderate to high risk ranking has been applied to premises based on reported contamination identified onsite. It is noted a RAP has been endorsed by an NSW Site Auditor but it remains unclear as to whether remediation works have occurred.<br>Given the current unoccupied nature of the area it is assumed that remedial works have yet to occur.<br>It is noted that PFAS was not considered a COPC despite the acknowledgement of historical area usage for food manufacturing by historic reports. |
| Commercial/ Industrial Area 2 | Commercial on historical industrial land | **Moderate to High** | A moderate to high risk ranking has been applied to commercial premises built on historically industrial/commercial land based on potential USTs and the potential storage of hazardous chemicals. |
| | Commercial on historical residential land | **Low to Moderate** | A low to moderate risk ranking has been applied to commercial premises where demolition of residential structures has historically occurred within the area. |
| | Industrial substation on standard cut/fill | **Moderate to High** | A moderate to high risk ranking has been applied to the electrical substation based on potential hazardous materials. |
| Commercial/ Industrial Area 3 | Commercial on historical industrial land | **Moderate to High** | A moderate to high risk ranking has been applied to commercial premises built on historically industrial/commercial land based on potential USTs and the potential storage of hazardous chemicals. |
| | Industrial mechanical workshops/car yard/car wash on standard cut/fill | **Moderate to High** | A moderate to high risk ranking has been applied to automotive industrial premises based on potential USTs and the known storage of hazardous chemicals. Additionally, demolition of historical structures has occurred within the area during the 1960s and 1970s. |
| | Commercial on historical residential land | **Low to Moderate** | A low to moderate risk ranking has been applied to commercial premises where demolition of residential structures has historically occurred within the area. |
| | Commercial on standard cut/fill land | **Low to Moderate** | A low to moderate risk ranking has been applied to commercial office buildings, retail, restaurants and associated car parks built on standard cut/fill. |

Whilst the desktop review and subsequent qualitative risk assessment identified the potential for contamination to be present at and underlying various Precinct Areas, it is considered such potential contamination that would preclude rezoning of the site.

Identified potential contamination is considered representative of common contaminants and contaminating land use activities which can be readily addressed during future DA stages (i.e. including completion of project-specific preliminary and detailed site investigations consistent with relevant Council Development Control Plans (DCPs) and SEPP (Resilience and Hazards) 2021 requirements) for redevelopment within the site.

# 7. Conclusions and Recommendations

## 7.1 Conclusions

Based on the information provided in this report, the scope of the investigation, and in accordance with the limitations in **Section 8**, the following conclusions are made:

- An assessment of the site history has identified that the primary land uses across the three Precincts appeared to have been industrial/commercial, residential and educational land uses. Notably properties along Parramatta Road in all three precincts have served for a variety of industrial/commercial activities, including as mechanics workshops and car yards and service stations. Additionally, a significant portion of the Bakehouse Quarter within the Homebush Precinct has historically served as the Arnott's Biscuits Factory;
- The site is located within an area of 'no known occurrence' of acid sulfate soil materials, with the exception of a minor portion of the east Burwood Precinct, underlying a small portion of Concord High School. A further assessment of this area would be required to confirm the acid sulfate soils risk;
- Based on an assessment of the history, environmental setting and a detailed site inspection, there is considered to be a low potential for widespread or gross contamination across the majority of the site, although there are portions where the risk of contamination has been assessed as moderate to high. There is a greater potential for contamination associated with previous onsite storage and use of fuels and/or chemicals within industrial/commercial businesses, particularly relating to former or existing underground petroleum storage systems (UPSS) and potential hazardous building materials at properties that have not been recently redeveloped.
- Identified potential contamination issues relate to common potentially contaminating land use activities which can be readily dealt with during the development application (DA) stage (i.e. including completion of preliminary and detailed site investigations consistent with relevant development control plans (DCPs) and *State Environmental Planning Policy (Resilience and Hazards) 2021* remediation of land requirements) for redevelopment and assessment for site suitability; and
- In the absence of gross or widespread contamination, the requirements of the DUAP/EPA (1998) *Managing Land Contamination: Planning Guidelines* for rezoning are considered to have been satisfied, namely that the rezoning can proceed, "provided that measures are in place to the ensure that the potential for contamination and the suitability of the land for any proposed use are assessed once detailed proposals are made".

## 7.2 Recommendations

It is recommended that project-specific preliminary and/or detailed site investigations be undertaken upon submission of DA for redevelopment of any land within the Precinct areas with a low to moderate or higher preliminary contamination risk ranking, to assess the suitability of that land for the use(s) proposed and whether any contamination of the land requires remediation to make the land suitable.

It is also recommended that Hazardous Building Material Surveys (HBMS) be undertaken prior to any demolition and redevelopment works on individual land parcels where there is the potential for hazardous materials to be present, irrespective of the preliminary risk ranking herein.

# 8. Limitations

This report has been prepared for use by the client who has commissioned the works in accordance with the project brief only, and has been based in part on information obtained from the client and other parties.

The advice herein relates only to this project and all results conclusions and recommendations made should be reviewed by a competent person with experience in environmental investigations, before being used for any other purpose.

JBS&G accepts no liability for use or interpretation by any person or body other than the client who commissioned the works. This report should not be reproduced without prior approval by the client, or amended in any way without prior approval by JBS&G, and should not be relied upon by other parties, who should make their own enquiries.

Sampling and chemical analysis of environmental media is based on appropriate guidance documents made and approved by the relevant regulatory authorities. Conclusions arising from the review and assessment of environmental data are based on the sampling and analysis considered appropriate based on the regulatory requirements.

Limited sampling and laboratory analyses were undertaken as part of the investigations undertaken, as described herein. Ground conditions between sampling locations and media may vary, and this should be considered when extrapolating between sampling points. Chemical analytes are based on the information detailed in the site history. Further chemicals or categories of chemicals may exist at the site, which were not identified in the site history and which may not be expected at the site.

Changes to the subsurface conditions may occur subsequent to the investigations described herein, through natural processes or through the intentional or accidental addition of contaminants. The conclusions and recommendations reached in this report are based on the information obtained at the time of the investigations.

This report does not provide a complete assessment of the environmental status of the site, and it is limited to the scope defined herein. Should information become available regarding conditions at the site including previously unknown sources of contamination, JBS&G reserves the right to review the report in the context of the additional information.

**Address: Kings Bay Precinct (East), Five Dock, NSW 2046**

Disclaimer:
The purpose of this report is to provide an overview of some of the site history, environmental risk and planning information available, affecting an individual address or geographical area in which the property is located. It is not a substitute for an on-site inspection or review of other available reports and records. It is not intended to be, and should not be taken to be, a rating or assessment of the desirability or market value of the property or its features.
You should obtain independent advice before you make any decision based on the information within the report.
The detailed terms applicable to use of this report are set out at the end of this report.

# Dataset Listing

Datasets contained within this report, detailing their source and data currency:

| Dataset Name | Custodian | Supply Date | Currency Date | Update Frequency | Dataset Buffer (m) | No. Features On-site | No. Features within 100m | No. Features within Buffer |

## List of NSW contaminated sites notified to EPA

Records from the NSW EPA Contaminated Land list within the dataset buffer:

| Map Id | Site | Address | Suburb | Activity | Management Class | Status | Location Confidence | Dist | Direction |
|---|---|---|---|---|---|---|---|---|---|
| 207 | Burwood STA Depot | Cnr Shaftesbury and Parramatta Roads | Burwood | Other Industry | Contamination formerly regulated under the CLM Act | Current EPA List | Premise Match | 153m | West |

The values within the EPA site management class in the table above, are given more detailed explanations in the table below:

| EPA site management class | Explanation |
|---|---|
| Contamination being managed via the planning process (EP&A Act) | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation. The contamination of this site is managed by the consent authority under the Environmental Planning and Assessment Act 1979 (EP&A Act) planning approval process, with EPA involvement as necessary to ensure significant contamination is adequately addressed. The consent authority is typically a local council or the Department of Planning and Environment. |
| Contamination currently regulated under CLM Act | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation under the Contaminated Land Management Act 1997 (CLM Act). Management of the contamination is regulated by the EPA under the CLM Act. Regulatory notices are available on the EPA's Contaminated Land Public Record of Notices. |
| Contamination currently regulated under POEO Act | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation. Management of the contamination is regulated under the Protection of the Environment Operations Act 1997 (POEO Act). The EPA's regulatory actions under the POEO Act are available on the POEO public register. |
| Contamination formerly regulated under the CLM Act | The EPA has determined that the contamination is no longer significant enough to warrant regulation under the Contaminated Land Management Act 1997 (CLM Act). The contamination was addressed under the CLM Act. |
| Contamination formerly regulated under the POEO Act | The EPA has determined that the contamination is no longer significant enough to warrant regulation. The contamination was addressed under the Protection of the Environment Operations Act 1997 (POEO Act). |
| Contamination was addressed via the planning process (EP&A Act) | The EPA has determined that the contamination is no longer significant enough to warrant regulation. The contamination was addressed by the appropriate consent authority via the planning process under the Environmental Planning and Assessment Act 1979 (EP&A Act). |
| Ongoing maintenance required to manage residual contamination (CLM Act) | The EPA has determined that ongoing maintenance, under the Contaminated Land Management Act 1997 (CLM Act), is required to manage the residual contamination. Regulatory notices under the CLM Act are available on the EPA's Contaminated Land Public Record of Notices. |
| Regulation being finalised | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation under the Contaminated Land Management Act 1997. A regulatory approach is being finalised. |
| Regulation under the CLM Act not required | The EPA has completed an assessment of the contamination and decided that regulation under the Contaminated Land Management Act 1997 is not required. |
| Under assessment | The contamination is being assessed by the EPA to determine whether regulation is required. The EPA may require further information to complete the assessment. For example, the completion of management actions regulated under the planning process or Protection of the Environment Operations Act 1997. Alternatively, the EPA may require information via a notice issued under s77 of the Contaminated Land Management Act 1997 or issue a Preliminary Investigation Order. |

# Dry Cleaners, Motor Garages & Service Stations 1948-1993 Road or Area Matches

Dry Cleaners, Motor Garages & Service Stations from UBD Business Directories, mapped to a road or an area, within the dataset buffer. Records are mapped to the road when a building number is not supplied, cannot be found, or the road has been renumbered since the directory was published.

Note: The Universal Business Directories were published between 1948 and 1993. Dry Cleaners, Motor Garages & Service Stations have been extracted from all of these directories except the following years 1951, 1955, 1957, 1960, 1963, 1973, 1974, 1977, 1987.

## Geological Units

What are the Geological Units within the dataset buffer?

| Unit Code | Unit Name | Description | Unit Stratigraphy | Age | Dominant Lithology | Distance |
|---|---|---|---|---|---|---|
| Twia | Ashfield Shale | Black to light grey shale and laminite. | /Wianamatta Group//Ashfield Shale// | Middle Triassic (base) to Middle Triassic (top) | Shale | 0m |
| Q_av | Alluvial valley deposits | Silt, clay, (fluvially deposited) lithic to quartz-lithic sand, gravel. | /Alluvium//Alluvial valley deposits// | Quaternary (base) to Now (top) | Clastic sediment | 0m |
| QH_hr | Anthropogenic deposits - reclaimed estuarine areas | Natural surface elevation raised by placement of fill over former estuarine swamps and subaqueous estuarine margins (supratidal to subtidal zone); estuarine banks and islands formed from dredge spoil. | /Anthropogenic deposits//Anthropogenic deposits - reclaimed estuarine areas// | Holocene (base) to Now (top) | Anthropogenic material | 73m |
| Q_h | Anthropogenic deposits | Anthropocene deposits varying from large man-made clasts (concrete blocks to building demolition rubble) to quarried natural boulders, with interstitial sand-sized to clay matrix. | /Anthropogenic deposits//// | Quaternary (base) to Now (top) | Anthropogenic material | 275m |
| QH_ebw | Estuarine basin and bay (subaqueous) | Clay, silt, shell, very fine- to fine-grained lithic-quartz (± carbonate) sand (fluvially- and/or marine-deposited). | /Estuarine deposits//Estuarine basin and bay/Estuarine basin and bay (subaqueous)/ | Holocene (base) to Now (top) | Clastic sediment | 622m |
| Tuth | Hawkesbury Sandstone | Medium- to coarse-grained quartz sandstone with minor shale and laminite lenses. | /Ungrouped Triassic units//Hawkesbury Sandstone// | Anisian (base) to Anisian (top) | Sandstone | 834m |

## Linear Geological Structures

What are the Dyke, Sill, Fracture, Lineament and Vein trendlines within the dataset buffer?

| Map ID | Feature Description | Map Sheet Name | Distance |
|---|---|---|---|
| 225308 | Dyke or vein | Sydney 1:100,000 Geological Sheet | 783m |

What are the Faults, Shear zones or Schist zones, Intrusive boundaries & Marker beds within the dataset buffer?

| Map ID | Boundary Type | Description | Map Sheet Name | Distance |
|---|---|---|---|---|
| No Features | | | | |

# Soils

**Kings Bay Precinct (East), Five Dock, NSW 2046**

## Atlas of Australian Soils

Soil mapping units and Australian Soil Classification orders within the dataset buffer:

| Map Unit Code | Soil Order | Map Unit Description | Distance | Direction |
|---|---|---|---|---|
| Pb12 | Kurosol | Gently rolling to rounded hilly country with some steep slopes and broad valleys: chief soils are hard acidic red soils (Dr2.21) with hard neutral and acidic yellow mottled soils (Dy3.42 and Dy3.41) on lower slopes and in valleys. Associated are small areas of various soils including (Gn3.54) on some ridges, (Dr3.31) on some slopes; (Dr2.23) in saddles and some mid-slope positions, and some low- lying swampy areas of (Uf6) soils and (Uc1.2) soils with peaty surfaces. Small areas of other soils such as (Db1.2) are likely throughout. | 0m | On-site |

# Acid Sulfate Soils

**Kings Bay Precinct (East), Five Dock, NSW 2046**

## Environmental Planning Instrument - Acid Sulfate Soils

What is the on-site Acid Sulfate Soil Plan Class that presents the largest environmental risk?

| Soil Class | Description | EPI Name |
|---|---|---|
| 5 | Works within 500 metres of adjacent Class 1, 2, 3, or 4 land that is below 5 metres AHD and by which the watertable is likely to be lowered below 1 metre AHD on adjacent Class 1, 2, 3 or 4 land, present an environmental risk | Canada Bay Local Environmental Plan 2013 |
| 5 | Works within 500 metres of adjacent Class 1, 2, 3, or 4 land that is below 5 metres AHD and by which the watertable is likely to be lowered below 1 metre AHD on adjacent Class 1, 2, 3 or 4 land, present an environmental risk | Burwood Local Environmental Plan 2012 |

If the on-site Soil Class is 5, what other soil classes exist within 500m?

| Soil Class | Description | EPI Name | Distance | Direction |
|---|---|---|---|---|
| 2 | Works below natural ground surface present an environmental risk; Works by which the watertable is likely to be lowered present an environmental risk | Canada Bay Local Environmental Plan 2013 | 6m | North |

# Location Confidences

Where Lotsearch has had to georeference features from supplied addresses, a location confidence has been assigned to the data record. This indicates a confidence to the positional accuracy of the feature. Where applicable, a code is given under the field heading “LC” or “LocConf”. These codes lookup to the following location confidences:

| LC Code | Location Confidence |
|---|---|
| Premise Match | Georeferenced to the site location / premise or part of site |
| Area Match | Georeferenced to an approximate or general area |
| Road Match | Georeferenced to a road or rail corridor |
| Road Intersection | Georeferenced to a road intersection |
| Buffered Point | A point feature buffered to x metres |
| Adjacent Match | Land adjacent to a georeferenced feature |
| Network of Features | Georeferenced to a network of features |
| Suburb Match | Georeferenced to a suburb boundary |
| As Supplied | Spatial data supplied by provider |

**USE OF REPORT - APPLICABLE TERMS**

**The following terms apply to any person (End User) who is given the Report by the person who purchased the Report from Lotsearch Pty Ltd (ABN: 89 600 168 018) (Lotsearch) or who otherwise has access to the Report (Terms). The contract terms that apply between Lotsearch and the purchaser of the Report are specified in the order form pursuant to which the Report was ordered and the terms set out below are of no effect as between Lotsearch and the purchaser of the Report.**

1. End User acknowledges and agrees that:
   (a) the Report is compiled from or using content (**Third Party Content**) which is comprised of:
      (i) content provided to Lotsearch by third party content suppliers with whom Lotsearch has contractual arrangements or content which is freely available or methodologies licensed to Lotsearch by third parties with whom Lotsearch has contractual arrangements (**Third Party Content Suppliers**); and
      (ii) content which is derived from content described in paragraph (i);
   (b) Neither Lotsearch nor Third Party Content Suppliers takes any responsibility for or give any warranty in relation to the accuracy or completeness of any Third Party Content included in the Report including any contaminated land assessment or other assessment included as part of a Report;
   (c) the Third Party Content Suppliers do not constitute an exhaustive set of all repositories or sources of information available in relation to the property which is the subject of the Report (**Property**) and accordingly neither Lotsearch nor Third Party Content Suppliers gives any warranty in relation to the accuracy or completeness of the Third Party Content incorporated into the report including any contaminated land assessment or other assessment included as part of a Report;
   (d) Reports are generated at a point in time (as specified by the date/time stamp appearing on the Report) and accordingly the Report is based on the information available at that point in time and Lotsearch is not obliged to undertake any additional reporting to take into consideration any information that may become available between the point in time specified by the date/time stamp and the date on which the Report was provided by Lotsearch to the purchaser of the Report;
   (e) Reports must be used or reproduced in their entirety and End User must not reproduce or make available to other persons only parts of the Report;
   (f) Lotsearch has not undertaken any physical inspection of the property;
   (g) neither Lotsearch nor Third Party Content Suppliers warrants that all land uses or features whether past or current are identified in the Report;
   (h) the Report does not include any information relating to the actual state or condition of the Property;
   (i) the Report should not be used or taken to indicate or exclude actual fitness or unfitness of Land or Property for any particular purpose
   (j) the Report should not be relied upon for determining saleability or value or making any other decisions in relation to the Property and in particular should not be taken to be a rating or assessment of the desirability or market value of the property or its features; and
   (k) the End User should undertake its own inspections of the Land or Property to satisfy itself that there are no defects or failures
2. The End User may not make the Report or any copies or extracts of the report or any part of it available to any other person. If End User wishes to provide the Report to any other person or make extracts or copies of the Report, it must contact the purchaser of the Report before doing so to ensure the proposed use is consistent with the contract terms between Lotsearch and the purchaser.
3. Neither Lotsearch (nor any of its officers, employees or agents) nor any of its Third Party Content Suppliers will have any liability to End User or any person to whom End User provides the Report and End User must not represent that Lotsearch or any of its Third Party Content Suppliers accepts liability to any such person or make any other representation to any such person on behalf of Lotsearch or any Third Party Content Supplier.
4. The End User hereby to the maximum extent permitted by law:
   (a) acknowledges that the Lotsearch (nor any of its officers, employees or agents), nor any of its Third Party Content Supplier have any liability to it under or in connection with the

Report or these Terms;

(b) waives any right it may have to claim against Third Party Content Supplier in connection with the Report, or the negotiation of, entry into, performance of, or termination of these Terms; and

(c) releases each Third Party Content Supplier from any claim it may have otherwise had in connection with the Report, or the negotiation of, entry into, performance of, or termination of these Terms.

5. The End User acknowledges that any Third Party Supplier shall be entitled to plead the benefits conferred on it under clause 4, despite not being a party to these terms.
6. End User must not remove any copyright notices, trade marks, digital rights management information, other embedded information, disclaimers or limitations from the Report or authorise any person to do so.
7. End User acknowledges and agrees that Lotsearch and Third Party Content Suppliers retain ownership of all copyright, patent, design right (registered or unregistered), trade marks (registered or unregistered), database right or other data right, moral right or know how or any other intellectual property right in any Report or any other item, information or data included in or provided as part of a Report.
8. To the extent permitted by law and subject to paragraph 9, all implied terms, representations and warranties whether statutory or otherwise relating to the subject matter of these Terms other than as expressly set out in these Terms are excluded.
9. Subject to paragraph 6, Lotsearch excludes liability to End User for loss or damage of any kind, however caused, due to Lotsearch's negligence, breach of contract, breach of any law, in equity, under indemnities or otherwise, arising out of all acts, omissions and events whenever occurring.
10. Lotsearch acknowledges that if, under applicable State, Territory or Commonwealth law, End User is a consumer certain rights may be conferred on End User which cannot be excluded, restricted or modified. If so, and if that law applies to Lotsearch, then, Lotsearch's liability is limited to the greater of an amount equal to the cost of resupplying the Report and the maximum extent permitted under applicable laws.
11. Subject to paragraph 9, neither Lotsearch nor the End User is liable to the other for:
    (a) any indirect, incidental, consequential, special or exemplary damages arising out of or in relation to the Report or these Terms; or
    (b) any loss of profit, loss of revenue, loss of interest, loss of data, loss of goodwill or loss of business opportunities, business interruption arising directly or indirectly out of or in relation to the Report or these Terms,

    irrespective of how that liability arises including in contract or tort, liability under indemnity or for any other common law, equitable or statutory cause of action or otherwise.
12. These Terms are subject to New South Wales law.

## LOTSEARCH ENVIRO LITE

**Date: 16 Mar 2023 17:59:31**

**Reference: LS041537 EL**

**Address: Kings Bay Precinct (East), Five Dock, NSW 2046**

Disclaimer:
The purpose of this report is to provide an overview of some of the site history, environmental risk and planning information available, affecting an individual address or geographical area in which the property is located. It is not a substitute for an on-site inspection or review of other available reports and records. It is not intended to be, and should not be taken to be, a rating or assessment of the desirability or market value of the property or its features.
You should obtain independent advice before you make any decision based on the information within the report.
The detailed terms applicable to use of this report are set out at the end of this report.

## List of NSW contaminated sites notified to EPA

Records from the NSW EPA Contaminated Land list within the dataset buffer:

| Map Id | Site | Address | Suburb | Activity | Management Class | Status | Location Confidence | Dist | Direction |
|---|---|---|---|---|---|---|---|---|---|
| 13406 | BP Ashfield | 584 Parramatta Road | Croydon | Service Station | Regulation under CLM Act not required | Current EPA List | Premise Match | 0m | South East |
| 470 | Caltex Five Dock Service Station | 47 Ramsay Road, corner Fairlight Street | Five Dock | Service Station | Regulation under CLM Act not required | Current EPA List | Premise Match | 414m | North East |
| 469 | 7-Eleven Five Dock Service Station | 231-235 Great North Road | Five Dock | Service Station | Regulation under CLM Act not required | Current EPA List | Premise Match | 731m | North East |

The values within the EPA site management class in the table above, are given more detailed explanations in the table below:

| EPA site management class | Explanation |
|---|---|
| Contamination being managed via the planning process (EP&A Act) | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation. The contamination of this site is managed by the consent authority under the Environmental Planning and Assessment Act 1979 (EP&A Act) planning approval process, with EPA involvement as necessary to ensure significant contamination is adequately addressed. The consent authority is typically a local council or the Department of Planning and Environment. |
| Contamination currently regulated under CLM Act | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation under the Contaminated Land Management Act 1997 (CLM Act). Management of the contamination is regulated by the EPA under the CLM Act. Regulatory notices are available on the EPA's Contaminated Land Public Record of Notices. |
| Contamination currently regulated under POEO Act | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation. Management of the contamination is regulated under the Protection of the Environment Operations Act 1997 (POEO Act). The EPA's regulatory actions under the POEO Act are available on the POEO public register. |
| Contamination formerly regulated under the CLM Act | The EPA has determined that the contamination is no longer significant enough to warrant regulation under the Contaminated Land Management Act 1997 (CLM Act). The contamination was addressed under the CLM Act. |
| Contamination formerly regulated under the POEO Act | The EPA has determined that the contamination is no longer significant enough to warrant regulation. The contamination was addressed under the Protection of the Environment Operations Act 1997 (POEO Act). |
| Contamination was addressed via the planning process (EP&A Act) | The EPA has determined that the contamination is no longer significant enough to warrant regulation. The contamination was addressed by the appropriate consent authority via the planning process under the Environmental Planning and Assessment Act 1979 (EP&A Act). |
| Ongoing maintenance required to manage residual contamination (CLM Act) | The EPA has determined that ongoing maintenance, under the Contaminated Land Management Act 1997 (CLM Act), is required to manage the residual contamination. Regulatory notices under the CLM Act are available on the EPA's Contaminated Land Public Record of Notices. |
| Regulation being finalised | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation under the Contaminated Land Management Act 1997. A regulatory approach is being finalised. |
| Regulation under the CLM Act not required | The EPA has completed an assessment of the contamination and decided that regulation under the Contaminated Land Management Act 1997 is not required. |
| Under assessment | The contamination is being assessed by the EPA to determine whether regulation is required. The EPA may require further information to complete the assessment. For example, the completion of management actions regulated under the planning process or Protection of the Environment Operations Act 1997. Alternatively, the EPA may require information via a notice issued under s77 of the Contaminated Land Management Act 1997 or issue a Preliminary Investigation Order. |

# Business Directory Records 1950-1991
# Road or Area Matches

Universal Business Directory records from years 1991, 1986, 1982, 1978, 1975, 1970, 1965, 1961 & 1950, mapped to a road or an area, within the dataset buffer. Records are mapped to the road when a building number is not supplied, cannot be found, or the road has been renumbered since the directory was published:

# Dry Cleaners, Motor Garages & Service Stations 1948-1993 Road or Area Matches

Dry Cleaners, Motor Garages & Service Stations from UBD Business Directories, mapped to a road or an area, within the dataset buffer. Records are mapped to the road when a building number is not supplied, cannot be found, or the road has been renumbered since the directory was published.

Note: The Universal Business Directories were published between 1948 and 1993. Dry Cleaners, Motor Garages & Service Stations have been extracted from all of these directories except the following years 1951, 1955, 1957, 1960, 1963, 1973, 1974, 1977, 1987.

# Topographic Features

**Kings Bay Precinct (East), Five Dock, NSW 2046**

## Tanks (Areas)

What are the Tank Areas located within the dataset buffer?
Note. The large majority of tank features provided by LPI are derived from aerial imagery & are therefore primarily above ground tanks.

| Map Id | Tank Type | Status | Name | Feature Currency | Distance | Direction |
|---|---|---|---|---|---|---|
| N/A | No records in buffer | | | | | |

## Tanks (Points)

What are the Tank Points located within the dataset buffer?
Note. The large majority of tank features provided by LPI are derived from aerial imagery & are therefore primarily above ground tanks.

| Map Id | Tank Type | Status | Name | Feature Currency | Distance | Direction |
|---|---|---|---|---|---|---|
| N/A | No records in buffer | | | | | |

## Major Easements

What Major Easements exist within the dataset buffer?
Note. Easements provided by LPI are not at the detail of local governments. They are limited to major easements such as Right of Carriageway, Electrical Lines (66kVa etc.), Easement to drain water & Significant subterranean pipelines (gas, water etc.).

| Map Id | Easement Class | Easement Type | Easement Width | Distance | Direction |
|---|---|---|---|---|---|
| 120108480 | Primary | Undefined | | 91m | North |
| 120110335 | Primary | Undefined | | 427m | South East |
| 120112533 | Primary | Undefined | | 665m | North |
| 120121812 | Primary | Undefined | | 700m | North West |
| 120112493 | Primary | Undefined | | 845m | North West |
| 120115682 | Primary | Undefined | | 912m | South East |
| 173691013 | Primary | Right of way | 6m & var | 955m | South East |

# Geological Units

What are the Geological Units within the dataset buffer?

| Unit Code | Unit Name | Description | Unit Stratigraphy | Age | Dominant Lithology | Distance |
|---|---|---|---|---|---|---|
| Twia | Ashfield Shale | Black to light grey shale and laminite. | /Wianamatta Group//Ashfield Shale// | Middle Triassic (base) to Middle Triassic (top) | Shale | 0m |
| Q_av | Alluvial valley deposits | Silt, clay, (fluvially deposited) lithic to quartz-lithic sand, gravel. | /Alluvium//Alluvial valley deposits// | Quaternary (base) to Now (top) | Clastic sediment | 0m |
| Tuth | Hawkesbury Sandstone | Medium- to coarse-grained quartz sandstone with minor shale and laminite lenses. | /Ungrouped Triassic units//Hawkesbury Sandstone// | Anisian (base) to Anisian (top) | Sandstone | 0m |
| Q_h | Anthropogenic deposits | Anthropocene deposits varying from large man-made clasts (concrete blocks to building demolition rubble) to quarried natural boulders, with interstitial sand-sized to clay matrix. | /Anthropogenic deposits//// | Quaternary (base) to Now (top) | Anthropogenic material | 398m |
| QH_hr | Anthropogenic deposits - reclaimed estuarine areas | Natural surface elevation raised by placement of fill over former estuarine swamps and subaqueous estuarine margins (supratidal to subtidal zone); estuarine banks and islands formed from dredge spoil. | /Anthropogenic deposits//Anthropogenic deposits - reclaimed estuarine areas// | Holocene (base) to Now (top) | Anthropogenic material | 494m |
| QH_ebw | Estuarine basin and bay (subaqueous) | Clay, silt, shell, very fine- to fine-grained lithic-quartz (± carbonate) sand (fluvially- and/or marine-deposited). | /Estuarine deposits//Estuarine basin and bay/Estuarine basin and bay (subaqueous)/ | Holocene (base) to Now (top) | Clastic sediment | 670m |
| MZui__v | Ungrouped Mesozoic igneous units - breccia | Volcanic breccia, varying amounts of sedimentary breccia, and basalt. | /Ungrouped Mesozoic igneous units//Ungrouped Mesozoic igneous units - breccia// | Jurassic (base) to Cretaceous (top) | Undifferentiated breccia | 925m |

# Linear Geological Structures

What are the Dyke, Sill, Fracture, Lineament and Vein trendlines within the dataset buffer?

| Map ID | Feature Description | Map Sheet Name | Distance |
|---|---|---|---|
| 225308 | Dyke or vein | Sydney 1:100,000 Geological Sheet | 406m |
| 225374 | Dyke or vein | Sydney 1:100,000 Geological Sheet | 576m |

What are the Faults, Shear zones or Schist zones, Intrusive boundaries & Marker beds within the dataset buffer?

| Map ID | Boundary Type | Description | Map Sheet Name | Distance |
|---|---|---|---|---|
| No Features | | | | |

# Soils

**Kings Bay Precinct (East), Five Dock, NSW 2046**

## Atlas of Australian Soils

Soil mapping units and Australian Soil Classification orders within the dataset buffer:

| Map Unit Code | Soil Order | Map Unit Description | Distance | Direction |
|---|---|---|---|---|
| Pb12 | Kurosol | Gently rolling to rounded hilly country with some steep slopes and broad valleys: chief soils are hard acidic red soils (Dr2.21) with hard neutral and acidic yellow mottled soils (Dy3.42 and Dy3.41) on lower slopes and in valleys. Associated are small areas of various soils including (Gn3.54) on some ridges, (Dr3.31) on some slopes; (Dr2.23) in saddles and some mid-slope positions, and some low- lying swampy areas of (Uf6) soils and (Uc1.2) soils with peaty surfaces. Small areas of other soils such as (Db1.2) are likely throughout. | 0m | On-site |
| Tb35 | Sodosol | Dissected plateau remnants--flat to undulating ridge tops with moderate to steep side slopes: chief soils are hard acidic yellow and yellow mottled soils (Dy3.41), (Dy2.21), and (Dy2.41) and hard acidic red soils (Dr2.21); many shallow profiles occur and profile thickness varies considerably over short distances. Associated are: (Gn3.54), (Gn3.14), and possibly other (Gn3) soils; (Db1.2) soils on some ridges; (Dy5.81) soils in areas transitional to unit Mb2; soils common to unit Mb2; and eroded lateritic remnants. Small areas of other soils are likely. Flat ferruginous shale or sandstone fragments are common on and/or in and/or below the soils of this unit. | 821m | North East |

# Acid Sulfate Soils

**Kings Bay Precinct (East), Five Dock, NSW 2046**

## Environmental Planning Instrument - Acid Sulfate Soils

What is the on-site Acid Sulfate Soil Plan Class that presents the largest environmental risk?

| Soil Class | Description | EPI Name |
|---|---|---|
| 5 | Works within 500 metres of adjacent Class 1, 2, 3, or 4 land that is below 5 metres AHD and by which the watertable is likely to be lowered below 1 metre AHD on adjacent Class 1, 2, 3 or 4 land, present an environmental risk | Canada Bay Local Environmental Plan 2013 |
| 5 | Works within 500 metres of adjacent Class 1, 2, 3, or 4 land that is below 5 metres AHD and by which the watertable is likely to be lowered below 1 metre AHD on adjacent Class 1, 2, 3 or 4 land, present an environmental risk | Inner West Local Environmental Plan 2022 |

If the on-site Soil Class is 5, what other soil classes exist within 500m?

| Soil Class | Description | EPI Name | Distance | Direction |
|---|---|---|---|---|
| 2 | Works below natural ground surface present an environmental risk; Works by which the watertable is likely to be lowered present an environmental risk | Inner West Local Environmental Plan 2022 | 31m | East |
| 2 | Works below natural ground surface present an environmental risk; Works by which the watertable is likely to be lowered present an environmental risk | Canada Bay Local Environmental Plan 2013 | 39m | East |

# Location Confidences

Where Lotsearch has had to georeference features from supplied addresses, a location confidence has been assigned to the data record. This indicates a confidence to the positional accuracy of the feature. Where applicable, a code is given under the field heading “LC” or “LocConf”. These codes lookup to the following location confidences:

| LC Code | Location Confidence |
|---|---|
| Premise Match | Georeferenced to the site location / premise or part of site |
| Area Match | Georeferenced to an approximate or general area |
| Road Match | Georeferenced to a road or rail corridor |
| Road Intersection | Georeferenced to a road intersection |
| Buffered Point | A point feature buffered to x metres |
| Adjacent Match | Land adjacent to a georeferenced feature |
| Network of Features | Georeferenced to a network of features |
| Suburb Match | Georeferenced to a suburb boundary |
| As Supplied | Spatial data supplied by provider |

**USE OF REPORT - APPLICABLE TERMS**

**The following terms apply to any person (End User) who is given the Report by the person who purchased the Report from Lotsearch Pty Ltd (ABN: 89 600 168 018) (Lotsearch) or who otherwise has access to the Report (Terms). The contract terms that apply between Lotsearch and the purchaser of the Report are specified in the order form pursuant to which the Report was ordered and the terms set out below are of no effect as between Lotsearch and the purchaser of the Report.**

1. End User acknowledges and agrees that:
   (a) the Report is compiled from or using content (**Third Party Content**) which is comprised of:
      (i) content provided to Lotsearch by third party content suppliers with whom Lotsearch has contractual arrangements or content which is freely available or methodologies licensed to Lotsearch by third parties with whom Lotsearch has contractual arrangements (**Third Party Content Suppliers**); and
      (ii) content which is derived from content described in paragraph (i);
   (b) Neither Lotsearch nor Third Party Content Suppliers takes any responsibility for or give any warranty in relation to the accuracy or completeness of any Third Party Content included in the Report including any contaminated land assessment or other assessment included as part of a Report;
   (c) the Third Party Content Suppliers do not constitute an exhaustive set of all repositories or sources of information available in relation to the property which is the subject of the Report (**Property**) and accordingly neither Lotsearch nor Third Party Content Suppliers gives any warranty in relation to the accuracy or completeness of the Third Party Content incorporated into the report including any contaminated land assessment or other assessment included as part of a Report;
   (d) Reports are generated at a point in time (as specified by the date/time stamp appearing on the Report) and accordingly the Report is based on the information available at that point in time and Lotsearch is not obliged to undertake any additional reporting to take into consideration any information that may become available between the point in time specified by the date/time stamp and the date on which the Report was provided by Lotsearch to the purchaser of the Report;
   (e) Reports must be used or reproduced in their entirety and End User must not reproduce or make available to other persons only parts of the Report;
   (f) Lotsearch has not undertaken any physical inspection of the property;
   (g) neither Lotsearch nor Third Party Content Suppliers warrants that all land uses or features whether past or current are identified in the Report;
   (h) the Report does not include any information relating to the actual state or condition of the Property;
   (i) the Report should not be used or taken to indicate or exclude actual fitness or unfitness of Land or Property for any particular purpose
   (j) the Report should not be relied upon for determining saleability or value or making any other decisions in relation to the Property and in particular should not be taken to be a rating or assessment of the desirability or market value of the property or its features; and
   (k) the End User should undertake its own inspections of the Land or Property to satisfy itself that there are no defects or failures
2. The End User may not make the Report or any copies or extracts of the report or any part of it available to any other person. If End User wishes to provide the Report to any other person or make extracts or copies of the Report, it must contact the purchaser of the Report before doing so to ensure the proposed use is consistent with the contract terms between Lotsearch and the purchaser.
3. Neither Lotsearch (nor any of its officers, employees or agents) nor any of its Third Party Content Suppliers will have any liability to End User or any person to whom End User provides the Report and End User must not represent that Lotsearch or any of its Third Party Content Suppliers accepts liability to any such person or make any other representation to any such person on behalf of Lotsearch or any Third Party Content Supplier.
4. The End User hereby to the maximum extent permitted by law:
   (a) acknowledges that the Lotsearch (nor any of its officers, employees or agents), nor any of its Third Party Content Supplier have any liability to it under or in connection with the

Report or these Terms;

(b) waives any right it may have to claim against Third Party Content Supplier in connection with the Report, or the negotiation of, entry into, performance of, or termination of these Terms; and

(c) releases each Third Party Content Supplier from any claim it may have otherwise had in connection with the Report, or the negotiation of, entry into, performance of, or termination of these Terms.

5. The End User acknowledges that any Third Party Supplier shall be entitled to plead the benefits conferred on it under clause 4, despite not being a party to these terms.
6. End User must not remove any copyright notices, trade marks, digital rights management information, other embedded information, disclaimers or limitations from the Report or authorise any person to do so.
7. End User acknowledges and agrees that Lotsearch and Third Party Content Suppliers retain ownership of all copyright, patent, design right (registered or unregistered), trade marks (registered or unregistered), database right or other data right, moral right or know how or any other intellectual property right in any Report or any other item, information or data included in or provided as part of a Report.
8. To the extent permitted by law and subject to paragraph 9, all implied terms, representations and warranties whether statutory or otherwise relating to the subject matter of these Terms other than as expressly set out in these Terms are excluded.
9. Subject to paragraph 6, Lotsearch excludes liability to End User for loss or damage of any kind, however caused, due to Lotsearch's negligence, breach of contract, breach of any law, in equity, under indemnities or otherwise, arising out of all acts, omissions and events whenever occurring.
10. Lotsearch acknowledges that if, under applicable State, Territory or Commonwealth law, End User is a consumer certain rights may be conferred on End User which cannot be excluded, restricted or modified. If so, and if that law applies to Lotsearch, then, Lotsearch's liability is limited to the greater of an amount equal to the cost of resupplying the Report and the maximum extent permitted under applicable laws.
11. Subject to paragraph 9, neither Lotsearch nor the End User is liable to the other for:
    (a) any indirect, incidental, consequential, special or exemplary damages arising out of or in relation to the Report or these Terms; or
    (b) any loss of profit, loss of revenue, loss of interest, loss of data, loss of goodwill or loss of business opportunities, business interruption arising directly or indirectly out of or in relation to the Report or these Terms,

    irrespective of how that liability arises including in contract or tort, liability under indemnity or for any other common law, equitable or statutory cause of action or otherwise.
12. These Terms are subject to New South Wales law.

## List of NSW contaminated sites notified to EPA

Records from the NSW EPA Contaminated Land list within the dataset buffer:

| Map Id | Site | Address | Suburb | Activity | Management Class | Status | Location Confidence | Dist | Direction |
|---|---|---|---|---|---|---|---|---|---|
| 315 | Caltex Service Station | 89 Parramatta Road | Concord | Service Station | Regulation under CLM Act not required | Current EPA List | Premise Match | 0m | On-site |
| 316 | Former Caltex Service Station | 92a Concord Road | North Strathfield | Service Station | Regulation under CLM Act not required | Current EPA List | Premise Match | 428m | North West |
| 207 | Burwood STA Depot | Cnr Shaftesbury and Parramatta Roads | Burwood | Other Industry | Contamination formerly regulated under the CLM Act | Current EPA List | Premise Match | 545m | East |
| 985 | Budget Service Station | 143 Concord Road | North Strathfield | Service Station | Regulation under CLM Act not required | Current EPA List | Premise Match | 761m | North West |

The values within the EPA site management class in the table above, are given more detailed explanations in the table below:

| EPA site management class | Explanation |
|---|---|
| Contamination being managed via the planning process (EP&A Act) | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation. The contamination of this site is managed by the consent authority under the Environmental Planning and Assessment Act 1979 (EP&A Act) planning approval process, with EPA involvement as necessary to ensure significant contamination is adequately addressed. The consent authority is typically a local council or the Department of Planning and Environment. |
| Contamination currently regulated under CLM Act | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation under the Contaminated Land Management Act 1997 (CLM Act). Management of the contamination is regulated by the EPA under the CLM Act. Regulatory notices are available on the EPA's Contaminated Land Public Record of Notices. |
| Contamination currently regulated under POEO Act | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation. Management of the contamination is regulated under the Protection of the Environment Operations Act 1997 (POEO Act). The EPA's regulatory actions under the POEO Act are available on the POEO public register. |
| Contamination formerly regulated under the CLM Act | The EPA has determined that the contamination is no longer significant enough to warrant regulation under the Contaminated Land Management Act 1997 (CLM Act). The contamination was addressed under the CLM Act. |
| Contamination formerly regulated under the POEO Act | The EPA has determined that the contamination is no longer significant enough to warrant regulation. The contamination was addressed under the Protection of the Environment Operations Act 1997 (POEO Act). |
| Contamination was addressed via the planning process (EP&A Act) | The EPA has determined that the contamination is no longer significant enough to warrant regulation. The contamination was addressed by the appropriate consent authority via the planning process under the Environmental Planning and Assessment Act 1979 (EP&A Act). |
| Ongoing maintenance required to manage residual contamination (CLM Act) | The EPA has determined that ongoing maintenance, under the Contaminated Land Management Act 1997 (CLM Act), is required to manage the residual contamination. Regulatory notices under the CLM Act are available on the EPA's Contaminated Land Public Record of Notices. |
| Regulation being finalised | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation under the Contaminated Land Management Act 1997. A regulatory approach is being finalised. |
| Regulation under the CLM Act not required | The EPA has completed an assessment of the contamination and decided that regulation under the Contaminated Land Management Act 1997 is not required. |

| EPA site management class | Explanation |
|---|---|
| Under assessment | The contamination is being assessed by the EPA to determine whether regulation is required. The EPA may require further information to complete the assessment. For example, the completion of management actions regulated under the planning process or Protection of the Environment Operations Act 1997. Alternatively, the EPA may require information via a notice issued under s77 of the Contaminated Land Management Act 1997 or issue a Preliminary Investigation Order. |

# Business Directory Records 1950-1991
# Road or Area Matches

Universal Business Directory records from years 1991, 1986, 1982, 1978, 1975, 1970, 1965, 1961 & 1950, mapped to a road or an area, within the dataset buffer. Records are mapped to the road when a building number is not supplied, cannot be found, or the road has been renumbered since the directory was published:

# Dry Cleaners, Motor Garages & Service Stations 1948-1993 Road or Area Matches

Dry Cleaners, Motor Garages & Service Stations from UBD Business Directories, mapped to a road or an area, within the dataset buffer. Records are mapped to the road when a building number is not supplied, cannot be found, or the road has been renumbered since the directory was published.

Note: The Universal Business Directories were published between 1948 and 1993. Dry Cleaners, Motor Garages & Service Stations have been extracted from all of these directories except the following years 1951, 1955, 1957, 1960, 1963, 1973, 1974, 1977, 1987.

## Atlas of Australian Soils

Soil mapping units and Australian Soil Classification orders within the dataset buffer:

| Map Unit Code | Soil Order | Map Unit Description | Distance | Direction |
|---|---|---|---|---|
| Pb12 | Kurosol | Gently rolling to rounded hilly country with some steep slopes and broad valleys: chief soils are hard acidic red soils (Dr2.21) with hard neutral and acidic yellow mottled soils (Dy3.42 and Dy3.41) on lower slopes and in valleys. Associated are small areas of various soils including (Gn3.54) on some ridges, (Dr3.31) on some slopes; (Dr2.23) in saddles and some mid-slope positions, and some low- lying swampy areas of (Uf6) soils and (Uc1.2) soils with peaty surfaces. Small areas of other soils such as (Db1.2) are likely throughout. | 0m | On-site |

# Acid Sulfate Soils

**Burwood Precinct (West), Concord, NSW 2137**

## Environmental Planning Instrument - Acid Sulfate Soils

What is the on-site Acid Sulfate Soil Plan Class that presents the largest environmental risk?

| Soil Class | Description | EPI Name |
|---|---|---|
| 5 | Works within 500 metres of adjacent Class 1, 2, 3, or 4 land that is below 5 metres AHD and by which the watertable is likely to be lowered below 1 metre AHD on adjacent Class 1, 2, 3 or 4 land, present an environmental risk | Canada Bay Local Environmental Plan 2013 |
| 5 | Works within 500 metres of adjacent Class 1, 2, 3, or 4 land that is below 5 metres AHD and by which the watertable is likely to be lowered below 1 metre AHD on adjacent Class 1, 2, 3 or 4 land, present an environmental risk | Burwood Local Environmental Plan 2012 |

If the on-site Soil Class is 5, what other soil classes exist within 500m?

| Soil Class | Description | EPI Name | Distance | Direction |
|---|---|---|---|---|
| 2 | Works below natural ground surface present an environmental risk; Works by which the watertable is likely to be lowered present an environmental risk | Canada Bay Local Environmental Plan 2013 | 212m | North East |

# Location Confidences

Where Lotsearch has had to georeference features from supplied addresses, a location confidence has been assigned to the data record. This indicates a confidence to the positional accuracy of the feature. Where applicable, a code is given under the field heading “LC” or “LocConf”. These codes lookup to the following location confidences:

| LC Code | Location Confidence |
|---|---|
| Premise Match | Georeferenced to the site location / premise or part of site |
| Area Match | Georeferenced to an approximate or general area |
| Road Match | Georeferenced to a road or rail corridor |
| Road Intersection | Georeferenced to a road intersection |
| Buffered Point | A point feature buffered to x metres |
| Adjacent Match | Land adjacent to a georeferenced feature |
| Network of Features | Georeferenced to a network of features |
| Suburb Match | Georeferenced to a suburb boundary |
| As Supplied | Spatial data supplied by provider |

**USE OF REPORT - APPLICABLE TERMS**

**The following terms apply to any person (End User) who is given the Report by the person who purchased the Report from Lotsearch Pty Ltd (ABN: 89 600 168 018) (Lotsearch) or who otherwise has access to the Report (Terms). The contract terms that apply between Lotsearch and the purchaser of the Report are specified in the order form pursuant to which the Report was ordered and the terms set out below are of no effect as between Lotsearch and the purchaser of the Report.**

1. End User acknowledges and agrees that:
   (a) the Report is compiled from or using content (**Third Party Content**) which is comprised of:
      (i) content provided to Lotsearch by third party content suppliers with whom Lotsearch has contractual arrangements or content which is freely available or methodologies licensed to Lotsearch by third parties with whom Lotsearch has contractual arrangements (**Third Party Content Suppliers**); and
      (ii) content which is derived from content described in paragraph (i);
   (b) Neither Lotsearch nor Third Party Content Suppliers takes any responsibility for or give any warranty in relation to the accuracy or completeness of any Third Party Content included in the Report including any contaminated land assessment or other assessment included as part of a Report;
   (c) the Third Party Content Suppliers do not constitute an exhaustive set of all repositories or sources of information available in relation to the property which is the subject of the Report (**Property**) and accordingly neither Lotsearch nor Third Party Content Suppliers gives any warranty in relation to the accuracy or completeness of the Third Party Content incorporated into the report including any contaminated land assessment or other assessment included as part of a Report;
   (d) Reports are generated at a point in time (as specified by the date/time stamp appearing on the Report) and accordingly the Report is based on the information available at that point in time and Lotsearch is not obliged to undertake any additional reporting to take into consideration any information that may become available between the point in time specified by the date/time stamp and the date on which the Report was provided by Lotsearch to the purchaser of the Report;
   (e) Reports must be used or reproduced in their entirety and End User must not reproduce or make available to other persons only parts of the Report;
   (f) Lotsearch has not undertaken any physical inspection of the property;
   (g) neither Lotsearch nor Third Party Content Suppliers warrants that all land uses or features whether past or current are identified in the Report;
   (h) the Report does not include any information relating to the actual state or condition of the Property;
   (i) the Report should not be used or taken to indicate or exclude actual fitness or unfitness of Land or Property for any particular purpose
   (j) the Report should not be relied upon for determining saleability or value or making any other decisions in relation to the Property and in particular should not be taken to be a rating or assessment of the desirability or market value of the property or its features; and
   (k) the End User should undertake its own inspections of the Land or Property to satisfy itself that there are no defects or failures
2. The End User may not make the Report or any copies or extracts of the report or any part of it available to any other person. If End User wishes to provide the Report to any other person or make extracts or copies of the Report, it must contact the purchaser of the Report before doing so to ensure the proposed use is consistent with the contract terms between Lotsearch and the purchaser.
3. Neither Lotsearch (nor any of its officers, employees or agents) nor any of its Third Party Content Suppliers will have any liability to End User or any person to whom End User provides the Report and End User must not represent that Lotsearch or any of its Third Party Content Suppliers accepts liability to any such person or make any other representation to any such person on behalf of Lotsearch or any Third Party Content Supplier.
4. The End User hereby to the maximum extent permitted by law:
   (a) acknowledges that the Lotsearch (nor any of its officers, employees or agents), nor any of its Third Party Content Supplier have any liability to it under or in connection with the

Report or these Terms;

(b) waives any right it may have to claim against Third Party Content Supplier in connection with the Report, or the negotiation of, entry into, performance of, or termination of these Terms; and

(c) releases each Third Party Content Supplier from any claim it may have otherwise had in connection with the Report, or the negotiation of, entry into, performance of, or termination of these Terms.

5. The End User acknowledges that any Third Party Supplier shall be entitled to plead the benefits conferred on it under clause 4, despite not being a party to these terms.
6. End User must not remove any copyright notices, trade marks, digital rights management information, other embedded information, disclaimers or limitations from the Report or authorise any person to do so.
7. End User acknowledges and agrees that Lotsearch and Third Party Content Suppliers retain ownership of all copyright, patent, design right (registered or unregistered), trade marks (registered or unregistered), database right or other data right, moral right or know how or any other intellectual property right in any Report or any other item, information or data included in or provided as part of a Report.
8. To the extent permitted by law and subject to paragraph 9, all implied terms, representations and warranties whether statutory or otherwise relating to the subject matter of these Terms other than as expressly set out in these Terms are excluded.
9. Subject to paragraph 6, Lotsearch excludes liability to End User for loss or damage of any kind, however caused, due to Lotsearch's negligence, breach of contract, breach of any law, in equity, under indemnities or otherwise, arising out of all acts, omissions and events whenever occurring.
10. Lotsearch acknowledges that if, under applicable State, Territory or Commonwealth law, End User is a consumer certain rights may be conferred on End User which cannot be excluded, restricted or modified. If so, and if that law applies to Lotsearch, then, Lotsearch's liability is limited to the greater of an amount equal to the cost of resupplying the Report and the maximum extent permitted under applicable laws.
11. Subject to paragraph 9, neither Lotsearch nor the End User is liable to the other for:
    (a) any indirect, incidental, consequential, special or exemplary damages arising out of or in relation to the Report or these Terms; or
    (b) any loss of profit, loss of revenue, loss of interest, loss of data, loss of goodwill or loss of business opportunities, business interruption arising directly or indirectly out of or in relation to the Report or these Terms,

    irrespective of how that liability arises including in contract or tort, liability under indemnity or for any other common law, equitable or statutory cause of action or otherwise.
12. These Terms are subject to New South Wales law.

## List of NSW contaminated sites notified to EPA

Records from the NSW EPA Contaminated Land list within the dataset buffer:

| Map Id | Site | Address | Suburb | Activity | Management Class | Status | Location Confidence | Dist | Direction |
|---|---|---|---|---|---|---|---|---|---|
| 207 | Burwood STA Depot | Cnr Shaftesbury and Parramatta Roads | Burwood | Other Industry | Contamination formerly regulated under the CLM Act | Current EPA List | Premise Match | 154m | South East |
| 315 | Caltex Service Station | 89 Parramatta Road | Concord | Service Station | Regulation under CLM Act not required | Current EPA List | Premise Match | 322m | South West |
| 316 | Former Caltex Service Station | 92a Concord Road | North Strathfield | Service Station | Regulation under CLM Act not required | Current EPA List | Premise Match | 981m | West |

The values within the EPA site management class in the table above, are given more detailed explanations in the table below:

| EPA site management class | Explanation |
|---|---|
| Contamination being managed via the planning process (EP&A Act) | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation. The contamination of this site is managed by the consent authority under the Environmental Planning and Assessment Act 1979 (EP&A Act) planning approval process, with EPA involvement as necessary to ensure significant contamination is adequately addressed. The consent authority is typically a local council or the Department of Planning and Environment. |
| Contamination currently regulated under CLM Act | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation under the Contaminated Land Management Act 1997 (CLM Act). Management of the contamination is regulated by the EPA under the CLM Act. Regulatory notices are available on the EPA's Contaminated Land Public Record of Notices. |
| Contamination currently regulated under POEO Act | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation. Management of the contamination is regulated under the Protection of the Environment Operations Act 1997 (POEO Act). The EPA's regulatory actions under the POEO Act are available on the POEO public register. |
| Contamination formerly regulated under the CLM Act | The EPA has determined that the contamination is no longer significant enough to warrant regulation under the Contaminated Land Management Act 1997 (CLM Act). The contamination was addressed under the CLM Act. |
| Contamination formerly regulated under the POEO Act | The EPA has determined that the contamination is no longer significant enough to warrant regulation. The contamination was addressed under the Protection of the Environment Operations Act 1997 (POEO Act). |
| Contamination was addressed via the planning process (EP&A Act) | The EPA has determined that the contamination is no longer significant enough to warrant regulation. The contamination was addressed by the appropriate consent authority via the planning process under the Environmental Planning and Assessment Act 1979 (EP&A Act). |
| Ongoing maintenance required to manage residual contamination (CLM Act) | The EPA has determined that ongoing maintenance, under the Contaminated Land Management Act 1997 (CLM Act), is required to manage the residual contamination. Regulatory notices under the CLM Act are available on the EPA's Contaminated Land Public Record of Notices. |
| Regulation being finalised | The EPA has completed an assessment of the contamination and decided that the contamination is significant enough to warrant regulation under the Contaminated Land Management Act 1997. A regulatory approach is being finalised. |
| Regulation under the CLM Act not required | The EPA has completed an assessment of the contamination and decided that regulation under the Contaminated Land Management Act 1997 is not required. |
| Under assessment | The contamination is being assessed by the EPA to determine whether regulation is required. The EPA may require further information to complete the assessment. For example, the completion of management actions regulated under the planning process or Protection of the Environment Operations Act 1997. Alternatively, the EPA may require information via a notice issued under s77 of the Contaminated Land Management Act 1997 or issue a Preliminary Investigation Order. |
