RE: LAHC – Gwynneville Redevelopment Project

Dear Craig,

Thank you for giving the University the opportunity to discuss this project with you. The University of Wollongong has viewed and discussed with the NSW Land and Housing Corporation the rezoning plans for the Gwynneville precinct.

In 2016 The University of Wollongong published its masterplan for the main campus which indicates that the University continues to expand its student numbers. The University recognises the increased need for student accommodation on or close to the Wollongong Campus due to the current and future projected demands.

The rezoning is consistent with one of the universities masterplan strategic objectives to increase the supply of residential housing and student accommodation.

The University of Wollongong supports this site being considered as part of a DOP led rezoning process.

Regards

Kathleen Packer
