SHADE SCREEN

The purpose of the Shade Screen is to shade the foyer glazing whilst letting natural light into the foyer, producing a building that opens on to the street.

The shade screen is be to made from non-reflectice, open weave fabric and metal, allowing wind to pass through it, with a weighted bottom edge located 3m above ground level preventing vandalism.

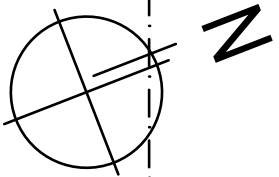

In addition, the shade screen is intended to be unique to the Central Coast Arts and Conference Centre or a major artwork.

EXAMPLES OF TEXTILE SHADE SCREENS:

- energy harvesting textiles:
prototype developed for the VITRA Museum in Germany
- external shade curtain:
Hotel Delano in Miami
- knitted commercial grade shade cloth made of:
clear HDPE (high density polyethylene)
monofilament yarn:
provides up to 100% infrared radiation reduction with
only 25% visible light reduction
- application example HDPE shade cloth:
shade sails in car parks
- example of artists interpretation
- various knitted HDPE shade cloth samples
- external textile skin:
Amenities Building at Sydney Olympic Park by
Durbach Block architects/ Sydney
