AUBURN COUNCIL

To the Ordinary Meeting of Council

Director's Report Planning and Environment Department

13 Carter Street, LIDCOMBE

INFORMATION REPORT FOR JRPP - DA-64/2010

SUMMARY

Applicant:	Energy Australia
Owner:	Energy Australia
Application Number:	DA-64/2010
Description of Land:	Lots 20, 21 and 22 DP 225350, 13 Carter Street, LIDCOMBE
Proposed Development:	Alterations and additions to existing industrial building and use as a cable drum warehouse with ancillary workshops and offices by Energy Australia (Crown DA)
Site Area:	12,540sqm
Zoning:	4 (e) Homebush Bay Enterprise
Disclosure of political donations and gifts:	Nil disclosure
Issues:	Use of 23 metre long service vehicles and the impact upon the local traffic network.

Recommendation

- 1. That Council receive and note the information report for DA-64/2010 regarding the proposed alterations and additions to the existing industrial building and it's use as a cable drum warehouse with ancillary workshops and offices by Energy Australia (Crown DA) on land at 13 Carter Street, Lidcombe.
- 2. That Council instructs the General Manager to prepare a letter to the Joint Regional Planning Panel Sydney West advising that they support the refusal of the proposed development specifically the requirement to use an oversized service vehicle on a regular basis that is likely to have a detrimental impact upon the surrounding local traffic network and other businesses.

Site and Locality Description

The subject site is identified as Lots 20, 21 and 22 of DP 225350 and is known as No.13 Carter Street, Lidcombe (formerly Homebush Bay). It is located on the north-eastern corner of the intersection between Carter Street and Uhrig Road in the locality known as the Carter Street Precinct. The site is rectangular in shape and has dimensions of 134.11 metres to 137.18 metres (width) by 88.39 metres to 91.44 metres (depth), providing a total site area of approximately 12,540sqm. Currently occupying the site is a large, aging industrial building which includes ancillary office areas and has been vacant for a number of years. The building has a total floor space of 6,696sqm, including approximately 5,713sqm warehouse area and 945sqm of ground and first-floor ancillary office areas.

Surrounding development consists of a mixture of industrial and commercial developments of varying scale, form, age and style. Adjoining the site to the north and east (7 Carter Street) are 2 large, traditional, red-brick industrial buildings, both of which are currently vacant.

Development consent for the construction of 2 commercial buildings (orientated to Uhrig Road and the north of the site) on this site was issued by Council under DA-259/2007, DA-262/2007 and DA-278/2007. To the south (across Carter Street), the locality predominantly consists of large, traditional industrial buildings used for a range of industrial purposes. While to the west there is a mixture of modern industrial and commercial developments including large warehouse buildings and multi-storey office accommodation. In the wider locality, the precinct is bounded by the parklands and sporting facilities of Sydney Olympic Park to the north, east and west and by the M4 Motorway to the south.

Description of Proposed Development

Council is in receipt of a development application for alterations and additions to the existing building and use and fit-out for warehousing of cable drums with associated workshops and administrative offices.

The refurbishment of the building is to specifically include:

- Demolition of the existing two-storey office area and stairwell to the southern elevation of the building (facing Carter Street);
- Construction of a new two-storey office area and stairwell, mostly within the existing footprint (the access stairwell will be extended slightly);
- Raising the ceiling height of the northern part of the warehouse area (by approximately 5.3 metres to a total height of approximately 13.5 metres) to accommodate an automated cable drum storage system;
- Refurbishment of the existing warehouse amenities area in the south-eastern corner of the building (internal);
- Fit-out of the building with specialised storage system for the cable drums, general racking and office areas.

Ancillary site works include excavation of existing bank areas along the northern and eastern boundaries for to provide oil and gas storage areas, widening of existing driveways to Carter Street and Uhrig Road, new concrete slabs for parking and manoeuvring areas (replacing existing bitumen) and upgrades of the existing landscaped areas and stormwater drainage system. Several existing trees are also to be removed to accommodate the proposed works.

The proposed use of the site is to be by Energy Australia and shall specifically consist of:

- Warehousing of large cable drums, including an automated mass storage system to the northern section of the warehouse (requiring the roof to be raised);
- General warehouse storage with a mixture of high and low bay storage racking;
- Workshops for the maintenance and repair of components;
- Two levels of office for the administrational management of the facility;
- Approximately 100 site-based staff;
- Operational hours of 7.00am until 6.00pm, Monday to Friday, with "limited" weekend hours (no further information provided);
- Delivery of the cable drums by an oversized, custom-built service vehicle of dimensions of 23 metres (length) by up to 4.35 metres (loaded width), at a frequency of 3 times daily generally, but up to 10 times daily at peak periods. Approximately 74 vehicular movements per day are also to be made by a range of other, smaller service vehicles (for example vans, utilities and medium and heavy rigid vehicles).

Business identification signage proposed includes:

- An illuminated main pylon sign with dimensions of 3 metres (height) by 1 metre (width), located on the eastern side of the domestic vehicle entry to the site on Carter Street and containing the words "Energy Australia" and the site address;
- A non-illuminated secondary pylon sign with dimensions of 1.5 metres (height) by 0.75 metres (width), located on the western side of the domestic vehicle entry to the site on Carter Street and containing the words "Energy Australia" and departmental directions information;
- Two non-illuminated secondary pylon signs with dimensions of 1.5 metres (height) by 0.75 metres (width), located on the eastern side of the service vehicle entry to the site on Carter Street and the southern side of the service vehicle entry on Uhrig Road, containing the words "Energy Australia" and "In";
- Two wall-mounted signs of unspecified dimensions and illumination, to be located on the southern elevation of the office building (facing Carter Street) and the eastern elevation of the warehouse building and containing the words "Energy Australia" and departmental directions.

If the application is recommended for approval, a suitable condition will be included in any consent to regulate size, illumination and content of the proposed business and building identification signage.

Consultations

Prior to the lodgement of the subject development application, a pre-lodgement application (PL-23/2009) and meeting were conducted for the proposed development. As part of the pre-lodgement application, Council advised that to enable a full and thorough assessment, specific information was required on the following matters:

- State Environmental Planning Policy No.33 Hazardous and Offensive Development;
- State Environmental Planning Policy No.55 Remediation of Lands;
- State Environmental Planning Policy No.64 Advertising and Signage;
- Vehicular movements and service requirements in relation to State Environmental Planning Policy (Infrastructure) 2007;
- Detailed operational information and assessment of permissibility under the Auburn Local Environmental Plan 2000 and Draft Auburn Local Environmental Plan 2009;
- The provisions of the Carter Street Precinct DCP, including a workplace travel plan, building height, ecologically sustainable development and the Parking and Loading DCP;
- Access for persons of limited mobility;
- Stormwater Drainage;
- A response to Council's Auburn Development Contributions Plan 2007;
- An arborist report to assess the status of the high number of trees proposed to be removed.

A full development application (DA-64/2010) for the proposal was lodged with Council on 19 February 2010. A detailed assessment of the submitted information identified that a number of the above issues remained outstanding and that some additional issues were raised. Council advised the applicant of the matters requiring attention in a letter dated 20 April 2010. Further comments from internal Council departments and the Roads and Traffic Authority of NSW were forwarded to the applicant via e-mail on 7 May 2010.

A formal response to the issues raised from Consultants on behalf of the applicant was received 14 May 2010. The submission failed to suitably address Council's concerns in relation to the use of specialised, oversized vehicles. Following further advice from Council on this matter, detailed information regarding the vehicular movements was received 2 July 2010.

Referrals

Internal Referrals

Development Engineer

The development application was referred to Council's Development Engineer for comment in relation to stormwater, traffic and parking. While a number of minor issues were able to be resolved with the applicant, the major issue of the use of oversized vehicles to make deliveries to the site was not suitably resolved.

Council's Engineering Department has on a number of occasions requested that the applicant, through the designated consultants, provide detailed information regarding the use of a special, customised truck to deliver the cable drums. Final information was received 2 July 2010. The truck is to have dimensions of 23 metres (length) by 4.35 metres (width when loaded) and will require occupation of the majority of the carriageway. Swept path analysis provided also suggests that to make the turn into and out of the site, parking restrictions would need to be deployed in the immediate surrounding area to prevent any obstructed use of the whole carriageway. Details provided by the applicant suggest these vehicles are to be used on a frequent basis and shall generally attend the site 3 times daily over a 10 day period every quarter but could increase to 10 times daily during peak periods. The use of such trucks will also hinder the proposed future upgrade of the Carter Street/Uhrig Road intersection, including the implementation of a centre median (Carter Street Precinct DCP requirements) and is likely to have an adverse impact upon pedestrian safety given the width of driveway proposed and required to allow the truck to make the turn into and out of the site.

Based on this information Council's Engineering Department are not satisfied that, given the size and frequency of use of such trucks, a considerable detrimental impact upon the surrounding traffic network and other local business will not eventuate as a result of the proposed development. It has been advised that the proposal should not be supported based on this issue.

Environmental Health Officer

The development application was referred to Council's Environmental Health Officer for comment. No objections have been raised to the proposed development subject to the imposition of some specific conditions in any development consent for the proposal.

Fire Safety Officer

The development application was referred to Council's Fire Safety Officer for comment. No objections have been raised to the proposed development subject to the imposition of some specific conditions in any development consent for the proposal.

External Referrals

Roads and Traffic Authority of NSW

Given the specific traffic requirements of the proposed development (including the use of a customised, oversized vehicle), a referral was sent to the Roads and Traffic Authority of NSW. A written response was received by Council on 11 May 2010 which stated:

"The RTA has reviewed the development application and the following comments are provided to Council for it's consideration in the determination of the development application:

- 1. The swept path analysis of 23.0 metre articulated vehicles submitted with the application is not acceptable as the swept path analysis shows that 23.0 metre articulated vehicles track over the wrong side of Carter Street. In this regard, Council shall ensure that the swept path of 23.0 metre articulated vehicles entering and exiting the subject site, as well as manoeuvrability through the site, can be undertaken in accordance with AUSTROADS [sic].
- 2. Off street parking areas associated with the subject development (including, driveways, grades, turn paths, sight distance requirements, aisle widths, aisle lengths, and parking bay dimensions) should be in accordance with AS2890.1 2004 and AS2890.2 2002 for service areas.
- 3. All vehicles are to enter and leave the site in a forward direction.
- 4. All loading and unloading shall occur on site.
- 5. All works/regulatory signposting associated with the proposed development are to be at no cost to the RTA.

In accordance with Clause 104(4) of State Environmental Planning Policy (Infrastructure) 2007, it is essential that a copy of Council's determination on the proposal (conditions of consent if approved) is forwarded to the RTA at the same time it is sent to the developer."

Council's Engineering Department is in agreement with RTA in regards to the use of the customised oversized service vehicles. Information submitted since the referral to the RTA has failed to demonstrate that there will be no detrimental impact upon the surrounding local traffic network (as discussed in detail under the Internal Referrals Section above). Taking the advice of the RTA into account, Council's Engineering Department have stated that the proposal cannot be supported for this reason.

Sydney Olympic Park Authority

As the subject site is located with the area identified as the Sydney Olympic Park Development Area under the Sydney Olympic Park Act 2001, Council referred the application to Sydney Olympic Park Authority for consideration. A response was received in writing on 1 April 2010 advising the proposal will have no significant impact on the Olympic Park precinct.

The provisions of any Environmental Planning Instruments (E P & A Act s79C (1)(a)(i))

State Environmental Planning Policies

The proposed development is affected by the following State Environmental Planning Policies:

State Environmental Planning Policy No.33 – Hazardous and Offensive Development

For SEPP 33 to apply to a development proposal, the proposal must be classified as either a 'potentially hazardous industry' (including hazardous storage establishments) or a 'potentially offensive industry' (including offensive storage establishments). Clause 3 of the SEPP identifies these classifications as:

"potentially hazardous industry means a development for the purposes of any industry which, if the development were to operate without employing any measures (including, for example, isolation from existing or likely future development on other land) to reduce or minimise its impact in the locality or on the existing or likely future development on other land, would pose a significant risk in relation to the locality:

(a) to human health, life or property, or

(b) to the biophysical environment,

and includes a hazardous industry and a hazardous storage establishment.

potentially offensive industry means a development for the purposes of an industry which, if the development were to operate without employing any measures (including, for example, isolation from existing or likely future development on other land) to reduce or minimise its impact in the locality or on the existing or likely future development on other land, would emit a polluting discharge (including for example, noise) in a manner which would have a significant adverse impact in the locality or on the existing or likely future development on other land, and includes an offensive industry and an offensive storage establishment."

The proposed operation includes the following potentially hazardous elements:

- Nitrogen and helium store nitrogen is used to pressurise gas pressure cables and helium is used to locate leaks on the gas pressure cables. A mixture of full and empty gas cylinders would generally be stored, and replenished on a weekly basis.
- Liquefied Petroleum Gas store, being a central refuelling facility for technicians to re-fill portable gas bottles.
- Oil pressure storage tank for low pressure tanks used on self contained fluid filled (SCFF) cables. The enclosure can contain up to a maximum of 200 litres of T3788 and T3588 cable fluid.
- Flammable gas container store, containing small flammable gas containers used for cable joining.
- Bunded area (north of the building) is for the parking of cable maintenance trucks required for topping up insulating cable fluids in SCFF cables, and containing quantities of cable fluid T3788.
- 56 x 200 litre drum store contains T3788 cable fluid in 200 litre drums, which is injected into SCFF cables and their pressure tanks by the cable maintenance truck. Stock maintained at this level and deliveries are made every 3 months.
- Bunded drum store is for the temporary storage of empty drums and drums of up to 200 litres containing electrical compounds, cable fluids and untreated water from pits. Collected by waste treatment contractor on a monthly basis.
- Cable drum store containing transmission cable drums of varying size (the largest being 4.3 metres high, 3 metres wide and weighing 33 tonnes). Delivery is by the customised 23 metre (length) by 4.35 metre (width) vehicle and as ordered in bulk, could comprise up to 10 deliveries per day.

• Workshops, consisting of service, maintenance and repair of oil pressure tanks, gas cabinets and plant machinery.

The quantities and storage locations of the dangerous materials associated with the proposal was considered by Council's Environmental Health Department and deemed to be below the thresholds identified to trigger the provisions of SEPP 33.

State Environmental Planning Policy No.55 - Remediation of Land

The requirement at Clause 7 of SEPP 55 for Council to be satisfied that the site is suitable or can be made suitable to accommodate the proposed development has been considered in the following table:

Matter for Consideration	Yes/No
Does the application involve re-development of the site or a change of land use?	Yes No
In the development going to be used for a sensitive land use (e.g.: residential, educational, recreational, childcare or hospital)?	Yes 🛛 No
Does information available to you indicate that an activity listed below has ever been approved, or occurred at the site?	
Acid/alkali plant and formulation, agricultural/horticultural activities, airports, asbestos production and disposal, chemicals manufacture and formulation, defence works, drum re-conditioning works, dry cleaning establishments, electrical manufacturing (transformers), electroplating and heat treatment premises, engine works, explosive industry, gas works, iron and steel works, landfill sites, metal treatment, mining and extractive industries, oil production and storage, paint formulation and manufacture, pesticide manufacture and formulation, power stations, railway yards, scrap yards, service stations, sheep and cattle dips, smelting and refining, tanning and associated trades, waste storage and treatment, wood preservation.	Yes 🔀 No
Is the site listed on Council's Contaminated Land database?	🗌 Yes 🔀 No
Is the site subject to EPA clean-up order or other EPA restrictions?	🗌 Yes 🔀 No
Has the site been the subject of known pollution incidents or illegal dumping?	🗌 Yes 🔀 No
Does the site adjoin any contaminated land/previously contaminated land?	Yes 🗌 No
 Details of contamination investigations carried out at the site: Stage 1 and Stage 2 Environmental Assessment reports (Report No.6099, prepared by WSP Environmed July 2007) were submitted with a previous application (DA-244/2007) for the whole of the former Goodm (the precinct bounded by Sydney Olympic Park to the north, Carter Street to the south, Birnie Avenue Uhrig Road to the west). The findings of these reports were: Fill material to a depth of 1.56m and 2.8m was found but groundwater was not encountered. Constnatural soils will be classed as Virgin Excavated Natural Materials (VENM); The only asbestos found on-site was from isolated fibres from a stockpile; Concentrations of heavy metals, TPH, PAHs, SVOCs, PCBs and cyanide in soil samples generally mand commercial/industrial land use criteria; Excessive amounts of TPH and benzo(a)pyrene were located in two isolated locations; Several samples exceed the adopted levels for nickel and zinc, however the bio-available concentration adopted guidelines; Volatile contaminants were not identified although the delineated TPH hotspot requires remediation. The conclusion of the reports was that: 	an land holding to the east and sidered that the meet residential ons were below
 <i>"provided that a remediation action plan and associated validation report are prepared to address the points, it is considered that the site is suitable for the proposed commercial redevelopment"</i> A further investigation (Report No.1-07-110 and dated December 2007) by WSP Environmental was reiterated the need for an RAP to be prepared for the site. A Remediation Action Plan (Report No.1-07-134 and dated 17/12/2007), also prepared by WSP Environmental was submitted and approved by Council under DA-244/2007. The RAP is consistent with EPA Guidelines and will render the site suitable for the intended commercial use. Should the application be recommender relevant conditions will be included in any consent to ensure compliance with the Remediation Action Action Action conclusions for the site. Has the appropriate level of investigation been carried out in respect of contamination matters for 	submitted and ronmental, was l if implemented ed for approval, on Plan and for
Council to be satisfied that the site is suitable to accommodate the proposed development or can be made suitable to accommodate the proposed development?	Yes 🗌 No

State Environmental Planning Policy No.64 – Advertising and Signage

As identified above, the proposed development includes the erection of several signs associated with the proposed use. Thus, the relevant objectives and requirements of SEPP 64 have been considered in the following assessment table:

Requirement	Yes	No	N/A	Comment
Part 1 – Preliminary				
Clause 3(1)(a)(i) Aims, objectives Signage is compatible with the desired amenity and visual character of an area.	\boxtimes			The Carter Street locality does not have a consistent theme for business and building identification signage. The proposed signage is considered to be modest, and thus compatible with the desired amenity and character of the area.
Clause 3(1)(a)(ii), Aims, objectives Signage provides effective communication in suitable locations.	\boxtimes			The proposed signage provides effective business identification and directional information for vehicles and pedestrians.
Clause 3(1)(a)(iii), Aims objectives Signage is high quality design and finish.	\boxtimes			Signage materials and finishes are not specified. If the proposal is recommended for approval, a relevant condition can be included in any consent, requiring use of high-quality, durable materials be used for all signage.
Part 2 – Signage Generally				
Clause 8 Granting of consent to signage A consent authority must not grant consent to an application to display signage unless: (a) That signage is consistent with the objectives of the Policy at clause 3(1)(a); (b) That the signage satisfies the assessment criteria specified in Schedule 1.	\mathbb{X}			Refer to detailed comments herein.
Clause 4 Definitions				 The proposed signage is consistent with the definitions of business and building identification signage in accordance with Clause 4 of the SEPP, being: "Building identification sign means a sign that identifies or names a building, and that may include the name of a business or building, the street number of a building, the nature of the business and a logo or other symbol that identifies the business, but that does not include general advertising of products, goods or services. Business identification sign means a sign: (a) That indicates: (i) The name of the person, and (ii) The business carried on by the person, at the premises or place at which the sign is displayed, and (b) That may include the address of the premises or place and a logo or other symbol that identifies the business carried on by the person, at the premises or place and a logo or other symbol that identifies the business, but that does not include the premises or place and a logo or other symbol that identifies the business, but that does not include any advertising relating to a person who does not carry on business at the premises or place."
Schedule 1 – Assessment Criteria				
<u>Character of the area</u> Is the proposal compatible with the existing or desired future character of the area or locality in which it is proposed to be located? Is the proposal consistent with a particular theme for outdoor advertising in the area or locality?	\mathbb{X}			The Carter Street locality features infrequent pylon and building elevation signage. The proposal is consistent with these conditions. The future character is determined by the signage requirements of the Carter Street DCP. Refer to the assessment below for further details on consistency with the future signage intentions.
Special areas Does the proposal detract from the amenity or visual quality of any environmentally sensitive areas, heritage areas, natural or other conservation areas, open space areas, waterways, rural landscapes or residential areas? Views and vistas		\boxtimes		There are no environmentally sensitive, heritage, conservation areas or the like affected by the proposed signage.
Does the proposal obscure or compromise		\square		
important views?		\square		The proposed signage is generally low-scale or
Does the proposal dominate the skyline and reduce the quality of vistas? Does the proposal respect the viewing rights of other advertisers?		\boxtimes		affixed to building elevations and therefore will not obscure views or other advertisers.

Streetscape, setting or landscape Is the scale, proportion and form of the proposal appropriate for the streetscape, setting or landscape? Does the proposal contribute to the visual interest of the streetscape, setting or landscape? Does the proposal reduce clutter by rationalising and simplifying existing advertising? Does the proposal screen unsightliness? Does the proposal protrude above buildings,			The scale and form of the proposed signage is suitable within the context. The signage is not required to reduce existing signage or screen unsightliness.
Is the scale, proportion and form of the proposal appropriate for the streetscape, setting or landscape? Does the proposal contribute to the visual interest of the streetscape, setting or landscape? Summary of non-compliances and/or variations to State Environmental Planning Policy No.64

There are no non-compliances and/or variations to State Environmental Planning Policy No.64.

State Environmental Planning Policy (Infrastructure) 2007

The proposed development, being warehousing with ancillary workshops and office, is not specifically identified under Part 3 – Development Controls, or Schedule 3 – Traffic Generating Development, of the SEPP. Thus, no specific provisions of the SEPP apply to the proposal.

Despite this, the proposal was referred to the RTA due to the use of a customised, 23 metre long service vehicle. The advice received from the RTA is detailed under the External Referrals Section of this report (above).

Regional Environmental Plans

The proposed development is affected by the following Regional Environmental Plans:

Sydney Regional Environmental Plan (Sydney Harbour Catchment) 2005

The site is located within the Sydney Harbour Catchment area and thus SREP (Sydney Harbour Catchment) 2005 is applicable to the development application. The proposed development raises no issues as it is generally consistent with the relevant objectives and requirements of the Plan.

Local Environmental Plans

Auburn Local Environmental Plan 2000

The relevant objectives and provisions of Auburn LEP 2000 have been considered in the following assessment table:

zone.
(f) To maintain acceptable traffic operating
performance (traffic flow and level of service) in
the surrounding area.
(g) To maximise opportunities to increase
walking, cycling and public transport use, to
reduce vehicle kilometres travelled, to minimise
the percentage of journeys to work made in cars
by drivers and to encourage a variety of transport
options.
(h) To allow tertiary educational establishments
to operate within the zone to promote working relationships with surrounding developments.
(i) To allow a limited range of shops, and
business, professional and personal services
aimed primarily at meeting local needs.
The proposed use predominantly consists of the
Clause 21A(3) – 4(e) Permissible Development
Child care centres, community facilities, - - associated equipment. There is also a
educational establishments, high technology "workshop" element for the casual repair and
industries, hotels, light industries, recreation maintenance of equipment, which is ancillary to
areas, recreation facilities, refreshment rooms, the main use but could also be classified as a
site identification signs, service support light industry. Office areas are also proposed to
industries, showrooms, training facilities, utility provide for the administration of the site. While
<i>undertakings, warehouses, subdivision.</i> offices are prohibited under this clause, they are
permissible under Clause 25D. Refer to the

Clause 22 General Restrictions in Industrial Zones The development is compatible with the existing and likely future character and amenity of nearby properties in terms of:				Scale, Bulk, Height, Siting and Landscaping The proposed development consists of reconstructing the office area largely within the existing footprint of the existing building and the raising of the roof of the northern part of the warehouse area to accommodate the automated
(a) Scale, bulk, height, siting and landscaping;(b) Its operation;	\boxtimes			cable drum facility. The warehouse roof shall be raised to a height of 15 metres, which is consistent with the Carter Street DCP height requirements for this site (refer to detailed
(c) Traffic generation and car parking;		\square		assessment below). Otherwise, the existing building is not to be enlarged. Upgrade of the
(d) Noise, dust, light and odour nuisance;	\boxtimes			existing landscaped areas will provide better natural screening of the site.
(e) Privacy;				Its Operation The proposed use is warehousing/distribution with ancillary light industry and offices. Refer to
(f) Stormwater drainage;	\square			Clause 20(3) and 25D above for further discussion on permissibility.
(g) Hours of operation;	\square			Traffic Generation and Car Parking
(h) Overshadowing.				Refer to non-compliance discussion below. Noise, dust, light and odour nuisance The proposed development will not generate any major ongoing noise, dust, light or odour emissions. Relevant conditions regarding the control of any emissions from construction works and ongoing operations shall be included in any consent, should the application be recommended for approval. Privacy The proposed development raises no issues in regards to privacy as the subject site does not adjoin any residential properties. Stormwater Drainage Council's Development Engineer raises no objection to the proposed upgrade of the existing stormwater drainage system, subject to the inclusion of relevant conditions in any consent. Hours of operation The proposed hours of operation are between 7.00am and 6.00pm, Monday to Friday. These hours are consistent with other operations and the general industrial/commercial nature of the locality. The applicant also stated " <i>limited operation over weekends</i> " shall take place. Council cannot approve such as no further detail was provided. Overshadowing
				The proposed alterations and additions to the warehouse roof and office areas of the existing building do not raise any issues in regards to overshadowing as additional shadows will fall within the subject site and no residential properties adjoin.

Requirement	Yes	No	N/A	Comments
Clause 55 Foreshore building line Does the site adjoin Parramatta River, Duck River or Haslams Creek? Is the site affected by a foreshore building line? If 'yes':		\boxtimes		The subject site does not adjoin any river system.
(4) Does the proposed development comprise a building, car parking area or vehicle manoeuvring area between the foreshore building line?			\square	
(5) Does the proposed development comprise marinas, wharves, jetties, haul-out structures, boat ramps, works associated with park and playground equipment, bicycle tracks and footpaths?			\boxtimes	
Clause 56 Landfill Does the proposed development involve the placing of landfill? If 'yes':		\boxtimes		The proposed development does not require any filling of land.
 (a) is the land fill required for the reasonable economic use of the land on which it takes place or for the provision of utility services? (b) Will there be no adverse impact on: (i) A water body, (ii) Private or public property, (iii) Groundwater quality and resources, (iv) Stormwater drainage, (v) Flooding. 				
Clause 59 Services (a) Is a water supply and facilities for sewage disposal and drainage available to the site? (b) Have arrangements been made or required been made satisfactory to Council and/or Sydney Water for the provision of that supply and those facilities?	\boxtimes			Existing services are available to the site and relevant conditions will be imposed on any development consent to ensure compliance, should the application be supported.
Clause 60 Suspension of covenants, agreements and instruments <i>Is the site affected by any covenants,</i> <i>agreements or similar interests?</i> <i>If yes, are the covenants, agreements or similar</i> <i>interests consistent with the provisions of the</i> <i>LEP?</i>		\bowtie		The subject site is burdened by a stormwater drainage easement along the eastern boundary. The proposed development will not affect the easement as no works are to be conducted within.

Summary of non-compliances and/or variations with Auburn Local Environmental Plan 2000

The proposed development is considered to be inconsistent with Clause 21A (1)(f) of the Auburn Local Environmental Plan 2000, which states:

"(f) To maintain acceptable traffic operating performance (traffic flow and level of service) in the surrounding area."

Further to this, Clause 22 (c) requires proposed developments to be compatible with the existing and likely future character and amenity of nearby properties in terms of traffic generation and parking. As detailed in the Internal and External Referrals Sections above, advice from both Council's Engineering Department and the NSW Roads and Traffic Authority is that the proposed use and frequency of oversized vehicles for deliveries to the site will have unacceptable impacts upon the surrounding local traffic network. Added to this, the Traffic Impact Assessment (prepared by Traffix and dated February 2010) also details that approximately 74 other daily vehicular movements, by smaller service vehicles such as vans, utilities, medium and heavy rigid vehicles, are associated with proposed use. Thus it is recommended that for this reason, the proposal not be supported.

The provisions of any Draft Environmental Planning Instruments (E P & A Act s79C (1)(a)(ii))

Draft Auburn Local Environmental Plan (Amendment No.22)

The Draft Auburn LEP (Amendment No.22) was exhibited by Council from 22 July 2009 until 21 August 2009 and seeks to encourage large scale retail premises and office premises on a specified

section of Parramatta Road. The Draft Auburn LEP also aims to reclassify and rezone land owned by Council to enable its disposal.

The subject site is not identified as being located within the proposed retail precinct under Draft ALEP No.22. Thus, the provisions and requirements of the Draft LEP raise no concerns as to the proposed development.

Draft Auburn Local Environmental Plan 2009

Council at the extraordinary meeting of 12 May 2010 resolved to adopt the Draft Auburn LEP 2009. The Draft LEP seeks to update Council's Local Planning Instrument and ensure consistency with the NSW Department of Planning Standard Instrument.

Under the Draft LEP, the whole of the subject site will be rezoned B7 – Business Park. In the proposed B7 zone, "Light Industries", "Warehouse or Distribution Centres", "Office Premises" and "Business Identification Signage" are to be permissible, with the consent of Council.

Draft LEP 2009 will also introduce development controls for minimum lot sizes and maximum floor space ratio within specific zones. For the B6 zone, the minimum lot size is to be 2,000sqm and a maximum floor space ratio of 1:1 will apply. As no changes to the existing site or built form are proposed, the application is considered to be consistent with these draft requirements.

The provisions of any Development Control Plans (E P & A Act s79C (1)(a)(iii))

General Requirements DCP

The relevant objectives and requirements of the General Requirements DCP have been considered in the assessment of the development application. The application is considered to be generally consistent with the objectives and relevant requirements of the DCP.

Carter Street Precinct DCP

The relevant objectives and requirements of the Carter Street Precinct DCP have been considered in the following assessment table:

Requirement	Yes	No	N/A	Comment
Part 2 Precinct Objectives				
Urban Form and Design				
• Promote flexible development patterns and building forms.	\boxtimes			The proposed development is considered to be consistent with the Urban Form and Design
• Ensure that new development is of the highest quality and complements the high public profile of	\boxtimes			Objectives as while the majority of the existing building is to be retained as is, upgrades to the
the precinct given the local, national and international significance of the Sydney Olympic				office area and landscaped areas of the site will greatly improve its appearance and impact within
park and world class sporting facilities generally.	\boxtimes			the Carter Street streetscape.
• Respect and respond to view corridors across the Carter Street Precinct to Sydney Olympic				No views of Sydney Olympic Park are affected
Park.Ensure that existing vegetation within the	\boxtimes			and the majority of significant vegetation (the site contains a number of large, established trees) is to be retained.
Carter Street precinct is retained where appropriate and supplemented by additional				to be retained.
landscaping as part of any future development.Recognise the special character of the Carter				
Street Precinct and the visual and functional	\bowtie			
relationships with Sydney Olympic Park.				
• Ensure that the scale, height, design and materials of construction, and the nature of future			_	
development, contribute positively to the visual	\square			
quality of the area and the activity and vitality of				
the public domain.				

Requirement	Yes	No	N/A	Comment
Economic Development				
• Encourage the gradual transformation of older	\square			The proposed development will modernise an
industrial properties for high quality buildings and				existing industrial building. The new office area to
the reuse of others for a diverse range of higher				the Carter Street elevation shall add a
order uses.				contemporary facade to an otherwise traditional-
• Facilitate the development of technology based	\square			styled building to be more in keeping with recent
industries and campus style business				approvals in the locality. The office is area is
accommodation, which take advantage of				substantial and will provide for a business population as envisaged.
infrastructure investment in the Sydney Olympic Park and contribute to the economic and				population as envisaged.
employment growth of the area.				
Integrated Transport				The proposed development is to have a total of
• Encourage a pattern of development intensity				100 site-based staff, while only 67 car parking
that supports public transport.	\square			spaces are to be provided. The subject site is
• Implement mechanisms to manage travel				also suitably positioned to encourage the use of
demand to and from the precinct.	\square			public transport (such as bus routes in Carter
• Encourage walking, cycling and public				Street and Uhrig Road and the Sydney Olympic
transport use and moderating car use to ensure	\square			Park railway station). The application also states
that development is sustainable and responds to				that a Workplace Travel Plan would be prepared
the traffic constraints in the wider area.				and adopted upon occupation of the premises.
• Ensure that future development is compatible				Were the application to be recommended for
with the existing and planned carrying capacity of		\square		approval, this requirement would be included as
the surrounding road network.		<u> </u>		a condition of any consent.
				Refer to non-compliance discussion below.
Activity and Amenity				-
• Promote greater amenity for occupants and			\square	The proposed use does not consist of any retail
visitors that supports convenience shops,				elements.
services and cafes.				
• Ensure that a more active and pedestrian-	\square			Were the application recommended for approval,
orientated public domain is achieved.				relevant conditions would be included in any
• Ensure that new development is compatible with the facilities within Homebush Bay, and the	\boxtimes			consent for the upgrade of the surrounding public
future use of Sydney Olympic Park.				domain.
 Enable future development to benefit from the 				
improved amenity of the precinct given the	\square			
provision of sporting and other recreational				
facilities, long term investments in essential				
infrastructure, open space, landscaping,				
environmental improvements and pedestrian				
facilities.				
Part 4 Development Framework	-	-	-	
4.1 Design Principles				As the proposal involves the refurbishment and
1. Promote public transport orientated	\square			use of an existing building, little opportunity exists
development;				for development of new pedestrian networks.
2. Establish convenient and viable amenities;			\square	Upgrades proposed to elevations and
3. Establish a permeable movement network;				landscaping and to public domain (to be
4. Establish an inviting public domain;				conditioned, were the proposal recommended for
5. Develop a memorable urban environment;			\bowtie	approval) would have a positive impact on the
6. Adaptable, sustainable and high quality development.			\bowtie	surrounding urban environment.
				As the proposal involves the refurbishment and
4.2 Development Framework Plan			\square	use of an existing building, little opportunity exists
(Refer map in the DCP – page 14)			\square	to incorporate major development elements of
				the Development Framework Plan.

Requirement	Yes	No	N/A	Comment
4.3 Public Domain Improvement Plan				
4.3.1 Landscape Character				Were the application recommended for approval,
The different character of each street type will be				relevant conditions would be included in any
reinforced through the landscaping:				consent for the upgrade of the surrounding public
<u>Edwin Flack Ave:</u> Lemon Scented Gums;			\mathbb{X}	domain.
<u>Hill Rd and Birnie Ave:</u> All street tree planting			\square	This could include landscaping and street tree
implemented should respect the existing tree				planting within the Carter Street and Uhrig Road
species and planting strategies of the precinct and Sydney Olympic Park and should occur in				frontages.
consultation with SOPA/Council;				in on ragoon
• <u>Carter Street:</u> Jacarandas;	\bowtie			
<u>Uhrig Rd:</u> Callery Pears in a central median;	\boxtimes			
• <u>New Park</u> : Bosque of Peppercorn trees or		\square	\square	
similar.				
All landscaping of streets with an interface to	\boxtimes			
Sydney Olympic Park should complement the				
existing landscaping and be consistent with				
SOPA's Urban Elements Design Manual.				
<u>4.3 Public Domain Improvement Plan</u> 4.3.2 Public Domain Improvement				
Required improvements:				Were the application recommended for approval,
• New footpaths on both sides of all roads	\boxtimes			relevant conditions would be included in any
throughout the precinct;	\square			consent for the upgrade of the surrounding public
• Kerb extensions that will not interfere with	\boxtimes			domain.
coach operations, to facilitate pedestrian crossing	\square			
movements and provide for tree planting;				This could include new footpaths, landscaping
• Flexibility in design to accommodate peak	\boxtimes			and street furniture within the Carter Street and
vehicle and pedestrian flow;	\square			Uhrig Road frontages.
• A central median in Uhrig Rd to facilitate				Refer to non-compliance discussion below.
pedestrian crossings and provide for tree		Å		Refer to non-compliance discussion below.
planting;	\bowtie			
 Pedestrian scale lighting; New seats, bins and bike racks at key 	\boxtimes			
locations:				
• The creation of an urban park at the heart of		\square	\boxtimes	
the precinct with seating and possibly a central				
water feature.				
Part 5 Land Use and Transport Integration				
5.1 Land Uses and Activities				
Objectives				The subject site has a frequency to Ultrin Dead
a) Integrate land use with public transport	\boxtimes			The subject site has a frontage to Uhrig Road
including the location of more intensive business activity and development to within reasonable				and is within walking distance to local public transport links.
walking distance of Sydney Olympic park Railway				
Station and any proposed bus routes.				
b) Limit more intensive land uses to within a	\square			
reasonable distance from Edwin Flack Ave and	\boxtimes			
Uhrig Rd.				
c) Focus a range of local retailing and services				No retail element is proposed at this stage but
and a central park at the junction of Carter St and			\square	may be implemented (subject to further approval
Uhrig to maximise the convenience and viability				from Council) in the future.
of local shops and facilities. d) Concentrate street based activity along Uhrig				The majority of the existing Uhrig Road elevation
Rd as a means of providing an active public			\bowtie	is to be retained "as is", with little by the way of
domain and thereby creating an area with				an active frontage.
transport nodal and environment suited to				
pedestrians and public transport users.				
5.1.1 In addition to the range of land uses				
permitted within the zone, other conforming land	\boxtimes			Refer to Clause 25D of the Auburn LEP 2000
uses identified in the LEP may be undertaken		<u> </u>		assessment above. The proposed development
generally within 200 metres of Uhrig Rd, the				is permissible and the location of the subject site
coach parking area adjoining old Hill Link and				dictates that other land-uses, such as commercial

streetscape or adjacent land uses.				
6.1.5 Minimum setbacks on corner blocks are to	\boxtimes			As existing. The new office area is proposed to
enable sufficient traffic sight lines in accordance				be constructed within the existing footprint.
with Australian Standards.		1		

Requirement	Yes	No	N/A	Comment
6.1.6 Buildings on wide shallow sites on Hill Rd may adopt a form where parking and servicing is provided from a central courtyard provided the buildings address min 60% of street frontage as well as providing active uses to street.			\boxtimes	This provision does not apply to the subject site which is located on the corner of the intersection between Carter Street and Uhrig Road.
6.2 Building Form and Height				
Objectives a) Ensure that floor space and building mass is distributed within sites such that the scale of the new buildings reinforces streetscapes by defining corners, edges, activity nodes and gateways	\square			The proposed development is considered to be consistent with the Building Form and Height objectives as it is largely to retain the existing building form "as is" and where changes are
within the Precinct. b) Respect the visual primacy of the Sydney Olympic Park facilities in the locality and provide an appropriate setting for the Park's stadia and in particular, the view lines and corridors between the Sydney Olympic Park facilities and M4	\boxtimes			proposed, increased building height is to comply with requirements and impacts negligible.
motorway. c) Ensure that the scale of new development is consistent with the Development Framework Plan.	\boxtimes			
 6.2.1 Development should: Be compatible with the scale, bulk and height of the potential development of surrounding sites as established in the Development Framework 	\boxtimes			The overall built form of the existing building is not to be significantly altered. The general scale, bulk and form are to be retained "as is". This includes the new office area of the building,
 Plan. Make a positive contribution to the skyline of Homebush Bay and to the streetscape as viewed from all street frontages and from other public leasting 	\boxtimes			proposed to be built within the footprint of the existing office area. The exception to this is the northern section of the warehouse, the roof of which is to be raised to 13.5 metres (from 9.8 metres) to accommodate the installation of an
 locations. Respect and respond to view lines to and from the Sydney Olympic park facilities form surrounding vantage points as shown on the Visual Structure Map. 	\boxtimes			automated gantry and crane system for the storage and movement of cable drums. The increase is considered to have a negligible impact upon skyline and existing views.
6.2.2 The general height of buildings within the	\boxtimes			The existing building and the proposed raised
Carter St Precinct is 17 metres, however: • Building fronting Edwin Flack Ave may be up to a height of 25 metres subject to the preservation of significant view lines to the Sydney Olympic Park facilities but must be a minimum height of			\boxtimes	roof of the northern section of the warehouse comply with the 17 metre height limit. The proposed raised section is to be increased in height from 9.8 metres (existing) to 13.5 metres.
 13 metres. Buildings within 25 metres of the gateways to the precinct may be of a height up to 33 metres (as shown on Height and Setback map on page 22 of DCP). 			\boxtimes	The site does not front Edwin Flack Avenue and is not located in a gateway/landmark position as identified by Figure 7 – Development Framework Plan.
 6.2.3 Any variation to height must demonstrate that the proposed building: Will respect and respond to the significance view lines to and from the Sydney Olympic Park facilities from identified variation points about an and set of the set of the			\boxtimes	The proposal does not require a variation to the 17 metre height limit.
 facilities from identified vantage points shown on the Visual Structure Map. Will make a positive contribution to the skyline of Homebush Bay and to the streetscape, as visued from all street frontages and from other 			\boxtimes	
viewed from all street frontages and from other prominent public locations.Is otherwise compatible with vision objectives and design principles within the DCP.			\boxtimes	
6.2.4 Roof mounted plant rooms, lift over-runs, air conditioning services and other equipment must be effectively screened from view using roof structures and architectural elements designed as an integral part of the building.			\boxtimes	No such rooftop plant facilities are proposed.
6.2.5 Building alongside entrances to the Precinct from Sydney Olympic Park should be articulated from surrounding buildings by their roof form and generally distinctive, incorporating high quality architectural design.			\boxtimes	The development site is not positioned in a precinct gateway location.

Requirement	Yes	No	N/A	Comment
6.2.6 The design of new buildings must take into account views enjoyed from the M4 motorways, the Sydney Olympic Park facilities and the Millennium Markers, the visual primacy of the Sydney Olympic Park facilities and the quality of views enjoyed from surrounding vantage points.				The proposed raising of the northern section of the warehouse will comply with building height requirements and not affect existing views from the M4 Motorway to Sydney Olympic Park.
6.2.7 Buildings located on the axis of a street should be designed to terminate the vista along that street.			\boxtimes	The overall existing built form is not to be significantly changed.
6.2.8 Buildings located at street intersections are required to establish a built form that emphasises and encloses that junction whilst maintaining the amenity of the public domain.	\boxtimes			The overall existing built form is not to be changed. The new office elevation (with minor wrap around corner element) will provide some limited emphasis of the eastern side of the Carter Street/Uhrig Road intersection.
 6.2.9 Buildings along Hill Road should respect its gateway status and are required to: Incorporate innovative building design, complementing the visual significance of these sites in relation to Sydney Olympic park facilities; 			\boxtimes	The site is not located on Hill Road.
Maintain or create views to the Millennium Markers if feasible;			\boxtimes	
• Maintain views extending westward from the site towards the Newington Village and parklands.			\boxtimes	
6.2.10 Applications for major development applications (as determined by Council) will be referred to the Design Review Panel for consideration.			\boxtimes	Council does not currently employed a formal design review panel.
 <u>6.3 Car Parking Location and Design</u> Objectives (a) Ensure that surface car parking on sites does not dominate the streetscape and views from the public domain. (b) Encourage the integration of on-site parking and related structures with the landscaping of the 			\boxtimes	The Car Parking Location and Design objectives are not relevant to the proposed development as existing site conditions are to be maintained. A large area of car parking to the front of the building facing carter Street is to be retained in arefurbished layout.
site and the design of buildings.			\square	
6.3.1 No car parking shall be located within setbacks from the street frontage however a maximum of 20% of the setback area may be used for parking on Carter Street.			\boxtimes	The majority of on-site parking is located forward of the building to the Carter Street frontage. This is an existing condition.
6.3.2 A minimum width of 2.5 metres of landscaping is to be provided surrounding car parking and outdoor storage areas.			\boxtimes	Existing areas of soft landscaping surrounding the existing car parking areas are proposed to be
Large car parking areas are to be broken up using landscape zones.			\boxtimes	retained and refurbished with new plantings.
Car parking is to be located so as to integrate with the landscaping and provide a harmonious design for the site.			\boxtimes	

Requirement	Yes	No	N/A	Comment
6.4 Design for ESD

showing the pathway design and street planting.				

Requirement	Yes	No	N/A	Comment
6.6.5 If coach parking areas on Edwin Flack Ave. are to be remain in the current location they are to be bounded on all sides with a public street incorporating a roadway and footpath on the opposite side, subject to topographic constraints.				The development site does not adjoin existing bus parking areas and the proposed development does not affect any such areas.
Development is to front these new streets and meet the requirements for building setbacks and external finishes.			\boxtimes	
6.6.6 Private and public landscaped areas along street frontages shall be as specified in Council's landscape requirements.	\boxtimes			If the proposal was recommended for approval, relevant conditions would be included in any consent requiring landscaping to be provided in accordance with Council requirements.
6.6.7 A public space shall be provided at the western side of Uhrig Rd at the intersection of Carter St to provide a physical and visual focus for the precinct.			\boxtimes	The subject site is located on the eastern side of the Carter Street/Uhrig Road intersection.
6.6.8 Consideration to be given to locating shops, including cafes and the like as well as a bus stop, public telephone, post box and the like, surrounding or associated with this public space to create a community identity. Outdoor eating and seating extending into the landscaped area should be encouraged.				Such facilities are not proposed under this application.
6.6.9 A precinct entry and gateway response is required at Hill Rd and Birnie Ave between Carter St and Parramatta Rd in association with SOPA/Council.			\boxtimes	The site is not located in a precinct gateway location and no such treatment is proposed.
6.7 Landscape Design Objectives (a) Enhance the appearance of the Carter St Precinct through the use of landscaping consistent with the variety of built forms that will	\boxtimes			Landscaping is limited to the setbacks of the building and vehicular manoeuvring areas along the northern, eastern, southern and western
exist and the setback objectives. (b) Ensure that landscaping is considered as an integral part of the overall design strategy for future development in the Precinct.	\boxtimes			boundaries. While some landscaping is to be removed to facilitate the proposed development, some trees and areas of soil, the majority of the landscaped areas shall be retained. An upgrade
(c) Provide streetscapes that are conducive to walking to provide for casual street surveillance from adjoining buildings. To provide opportunities for open space, landscaping and outdoor recreation areas, accommodating the needs of all site users and relating to the function of the development.	\boxtimes			of the plantings within these areas is proposed, which will improve the appearance of the site.
(d) Integrate a mix of soft and hard landscaping techniques depending upon the alternate uses and functions of particular sites.	\bowtie			
(e) Ensure adequate landscaping as a potential means of screening visually obtrusive industrial land uses or elements.	\square			
(f) Encourage the retention of existing vegetation in the Carter St Precinct.(g) Ensure that the land abutting Haslams Creek	\boxtimes			
is landscaped in a manner that is consistent with the improvements being undertaken along the creek line by the OCA.				
(h) Enhance the appearance and alternate use of any bus coaching areas.			\square	
6.7.1 DAs are to include a Site Analysis which identifies any significant vegetation, specimens of indigenous trees and other vegetation communities, both on the development site and on adjacent land. All existing vegetation should be retained	\boxtimes			A landscape plan identifying existing and proposed vegetation is provided. Where possible, existing significant trees will be retained. Removal of some existing trees is necessary and an arborist report in support of the removals is provided with the application.
 wherever possible. 6.7.2 Where new buildings are proposed, a landscape plan prepared by a qualified person is to be submitted with the DA. 				Landscape plans prepared by Eco Design accompany the application.

Requirement	Yes	No	N/A	Comment
6.7.3 Landscaping associated with the development must accord with the Public Domain Improvement Plan and appropriate works in the public domain will be required to be undertaken	\boxtimes			The upgrade and refurbishment of the existing landscaping is considered acceptable. Relevant public domain conditions can be included in any
adjoining the subject property. All landscaping in or abutting the public domain is to avoid foliage between 0.4 and 1.8 metres above ground level.	\square			consent, should the application be recommended for approval.
6.7.4 An area is to be provided for outdoor staff recreation areas being appropriate to the needs of the particular premises and incorporating adjacent open space or natural areas.			\boxtimes	No staff recreational area currently exists and there is limited opportunity to provide such. Sufficient internal staff amenities are provided within the building.
6.7.5 Fencing is to be integrated as part of the landscaping scheme so as to ensure the minimisation of visual impacts associated with the site security measures.			\boxtimes	No fencing is proposed under this application.
Front fencing to be no greater than 0.4 metres above finished ground level of the street.			\boxtimes	
6.7.6 The design of landscape areas on the boundaries adjoining the Sydney Olympic Park facilities shall be integrated with the building design to provide a high quality presentation to the Olympic site.			\boxtimes	The subject site does not share a common boundary with Sydney Olympic Park.
All landscaping of streets with an interface to Sydney Olympic Park should complement existing landscaping and be consistent with the AVEDM.			\boxtimes	
6.7.7 If any Sydney Olympic Park coach parking is relocated within the precinct, it is to be landscaped with advanced deciduous canopy trees at spacing that will ensure the establishment of a linked canopy around the perimeter of the parking area and the maximum			\boxtimes	No bus parking is to be relocated within the precinct as a result of this application.
possible canopy within the parking area. Pedestrian circulation and waiting areas are to be provided with high quality paving and shelter structures.			\boxtimes	
6.7.8 The future development of sites along Hill Rd is to incorporate the remediation and landscaping of any land that abuts Haslams Creek. Applications are to liaise with Council/OCA to determine their specific landscaping requirements to be addressed in the DA.				The site does not adjoin Hill Road.
6.8 Advertising Signs and Structures Objective (a) Provide a coordinated signage language throughout the public and private domain, which is distinctive, memorable and aesthetically pleasing.	\boxtimes			The proposed signage is provided in a coordinated manner and is of suitable quality and is thus considered to be consistent with this Objective.
6.8.1 Advertising signs are to be limited to identifying the user/tenant of the building by their name, logo or trademark. No illustrative advertising of products or services is permitted.	\boxtimes			Signage is limited to identifying the proposed tenant of the building (Energy Australia) by name and logo. No illustrative advertising is proposed.
6.8.2 Signs are to be clear, concise and static. Flashing or moving displays are not permitted.	\boxtimes			If the proposal was recommended for approval, relevant conditions could be included in any consent in regards to such signage content.
6.8.3 Illumination of signs shall not cause nuisance or annoyance to pedestrians, vehicles or adjoining residential properties.	\boxtimes			If the proposal was recommended for approval, relevant conditions could be included in any consent in regards to illumination.
6.8.4 Signs must be placed so that they do not obscure vehicular sight lines and vehicular control signs.	\boxtimes			Proposed signage is largely low-level or affixed to building elevations and thus will not affect sight lines.
6.8.5 Non illuminated signs are to use reflective material for typography and directional arrows.	\boxtimes			If the proposal was recommended for approval, relevant conditions could be included in any consent in regards to reflective materials.

Requirement	Yes	No	N/A	Comment
6.8.6 Signs are permitted on the street elevation only and should be integral with the building or within the landscape zone not higher than 2.4 metres above ground. These signs shall not have a sign face area greater than 4 metres.		\boxtimes		Refer to non-compliance discussion below.
6.8.7 Signs should not be placed above the roofline or parapet, whichever is the lower of the building.	\square			No signage is proposed to be located above the parapet of the building.
6.8.8 Signs shall be used to identify major allotments and the main tenants within them. The basic form is designed to complement the form adopted for signs within the Public Domain.	\boxtimes			The proposed signage will identify the sole occupant (Energy Australia) of the building.
6.8.9 Building or occupant identification signage attached to buildings should be well designed and located so as to complement the architecture and structure of the host building.	\boxtimes			The proposed building elevation signs are to be suitably located, designed and will complement existing building features.
Such signs should not obstruct architectural features, be applied with a minimum projection from the building, not protrude above the skyline	\square			
and convey the message clearly. Position and design of signage should be considered at the DA stage.	\square			
6.8.10 Generally one identification sign is to be provided. More than one may be used where a site has more than one vehicle entry, on different sides of the building or where the nature of the site and adjacent roads require more than one sign for adequate identification.	\boxtimes			Multiple signs are proposed, mainly located near vehicular access points and entries to the building.
6.8.11 All new signage or identification on buildings or land fronting Edwin Flack Ave should be consistent with the Sydney Olympic Park Guidelines for Outdoor Advertising, Identification, Event and Promotional Signage.			\boxtimes	The subject site does not have a frontage to Edwin Flack Avenue.

Summary of non-compliances/variations to Carter Street Precinct Development Control Plan

Part of the Integrated Transport Objectives under Part 2 (c) of the DCP is to ensure development is compatible with the existing and planned carrying capacity of the surrounding road network. Given both the size and frequency of the service vehicles proposed to be used in association with the proposed development, this cannot be said to be the case in this instance.

Clause 4.3.2 of the DCP states that a central median to facilitate pedestrian crossings and provide for tree planting, is to be provided as part of the public domain improvements within Uhrig Rd. Council's Engineering Department has also indicated that this is part of a future works plan for the locality. However, the information provided with the development application identifies that the custom 23 metre long vehicle associated with the proposed use would be required to cross into the oncoming lane of traffic to make the exiting turn from the site into Uhrig Road. Effectively, the approval of the proposal and the use of such trucks would limit the future development of the intersection, or conversely the future creation of a central median in accordance with the DCP and a Council works plan would inhibit the use of such a truck and render the operation inoperative as the custom vehicle is specifically required to transport the main article (cable drums) to be warehoused at the site.

Clause 6.8.6 requires signage within landscaped areas to be a maximum of 2.4 metres in height. As detailed above, a 3 metre high pylon sign is proposed within the landscaped area adjoining Carter Street to the main frontage of the building. Were the application to be recommended for approval, a condition would be included in any consent requiring the said sign to be no higher than 2.4 metres as measured from the adjoining natural ground level. The 2 other signs proposed for landscaped setbacks to the Carter Street and Uhrig Road frontages are to be 1.5 metres high and thus comply with the requirement.

Industrial Areas DCP

As the subject site is zoned 4(e) Homebush Bay Enterprise, the provisions of Council's Industrial Areas DCP apply. However, as a precinct specific DCP has been adopted, it is to take precedent over the generic industrial plan. Therefore, a detailed assessment of this plan s not considered necessary.

Parking and Loading DCP

The relevant requirements and objectives of the Parking and Loading DCP have been considered in the following assessment table:

Requirement	Yes	No	N/A	Comments		
 Off Street Parking Requirements Objectives To ensure that an acceptable level of parking is provided on site to minimise the unreasonable overflow of parking onto surrounding streets. To provide for the reasonable parking needs of business and industry to support their viability, but discourage unnecessary or excessive parking. 	\boxtimes			The proposed development is considered to be consistent with the Off Street Parkir Requirements Objectives as a suitable amount off street parking is proposed to accommoda the proposed development.		
D1.1 All new development to provide off-street parking in accordance with Table H-1.				Based on the 4,988sqm of warehouse (1 spaces at DCP rate of 1 space per 300sq GFA), 320sqm of factory (workshops – 4 space at DCP rate of 1.3 spaces per 100sqm GFA) ar 1,805sqm of office space (45 spaces at DCP ra of 1 space per 40sqm GFA), the total parkir requirement of the proposal is 66 spaces. A tot of 67 car parking spaces are proposed. Note: th additional loading area to the east of the buildir is not included in calculations as it is not ful enclosed (open wire mesh instead of walls to th northern and southern elevations).		
D1.2 Any over provision of parking (including associated enclosed aisles and enclosed access areas) is not accepted and included in FSR calculation.			\square	No major over provision of parking is provided.		
 D1.3 That in circumstances where a land use is not defined by this plan, the application shall be accompanied by a detailed parking and assessment prepared by a suitably qualified professional which includes: A detailed parking survey of similar establishments located in areas that demonstrate similar traffic and parking demand characteristics; Other transport facilities included in the development; An assessment as to whether the precinct is experiencing traffic and on-street parking congestion and the implications that development will have on existing situation; An assessment of existing public transport networks that service the site, particularly in the off-peak, night and weekend periods and initiatives to encourage its usage; Possible demand for car parking space from adjoining localities; Occasional need for overflow car parking; Requirements of people with a limited mobility, sensory impairment. 				The proposed uses are suitably defined and identified under Table H-1.		
 2.0 Loading Objectives a. To ensure that all development proposals for industry and business are adequately provided with appropriate loading and unloading facilities. b. To prevent industrial and business development giving rise to adverse impacts associated with truck and service vehicles being parked off-site. 	\boxtimes			The proposed development is considered to be consistent with the Loading objectives as a suitable number of accessible loading areas are proposed to service the use.		

Requirement	Yes	No	N/A	Comments
D2.1 That loading bays for trucks and commercial vehicles shall be provided in accordance with Table H-2.				Based on the 5,308sqm of industrial floor space (warehouse and workshops – at DCP rate of 1 per 800sqm GFA) and the 1,805sqm of commercial floor space (office – at DCP rate of 1 per 4,000sqm GFA), the total loading areas requirement of the proposal is 8 bays. A total of 9 designated loading areas are proposed, with space within the warehouse for more, should operations require.
D2.2 Loading/unloading areas shall be provided in accordance with AS2890.2.				If the proposal was recommended for approval, relevant conditions could be included in any consent requiring all loading areas comply with Australian Standard AS2890.2.
D2.3 Identify likely service vehicle sizes accessing the site and shall provide service vehicle spaces in accordance with Table H-3.				Service vehicles are identified as utilities, vans and medium and heavy rigid vehicles. If the proposal was recommended for approval, relevant conditions could be included in any consent requiring all loading area dimensions to comply with Table H-3 for the respective vehicle. The custom 23 metre service vehicle is not classified however the Traffic Impact Statement identifies that suitable area is provided in the external loading area.
D2.4 The layout of the service area shall be designed to facilitate operations relevant to the development and to this discourage on-street loading and unloading.				The proposed layout of loading areas is suitable and relevant conditions prohibiting loading from non-designated areas such as surrounding streets could be included in any consent, were the application recommended for approval.
D2.5 Service area shall be a physically defined location which is not used for other purposes such as the storage of goods and equipment.				If the proposal was recommended for approval, relevant conditions requiring the physical delineation of loading areas could be included in any consent.
D2.6 Separation of service vehicle and car movements shall be a design objective.			\boxtimes	Given that the proposal is to largely utilise existing conditions of the site in regards to access and parking, total separation of service and private vehicles is not possible.
D2.7 All vehicles are to enter and leave the site in a forward direction.				Swept path analysis of service vehicle movements suggest all vehicles (including the 23 metre long vehicle) can enter and leave in a forward direction. The impact of this on the surrounding traffic network (due to the fact the largest vehicle will have to cross the centre medians of Carter Street and Uhrig Road to enter and leave the site) is considered elsewhere in this report.
D2.8 Internal circulation roadways shall be adequate for the largest vehicle anticipated to use the site.	\square			Swept path analysis of service vehicle movements suggest sufficient internal roadways are provided.
D2.9 In the case of existing buildings being redeveloped, it may not be possible for all the design principles to be met. However, the applicant shall demonstrate every effort has been made to ensure that public safety is not compromised in any way.		\boxtimes		Refer to non-compliance discussion below.

Requirement	Yes	No	N/A	Comments
3.0 Design of Transport and Parking Facilities				
Objectives

areas and access ways.				

Summary of non-compliances and/or variations to Council's Parking and Loading DCP

Clause D2.9 of the DCP states that it may not be possible for all the design principles of vehicular movements associated with a proposal to be met where existing buildings being redeveloped, but where this is the case, the proposal must not compromise public safety. Council's Engineering Department has raised concerns of the impact of excessively widened driveways proposed and required to accommodate the swept path of the custom 23 metre long service vehicle, on pedestrian safety in Carter Street and Uhrig Road.

Clause D3.6 of the DCP requires driveways be located and designed to minimise loss of on street parking. The proposed development requires the 2 main existing driveways to be widened to accommodate the swept path of the custom 23 metre long service vehicle. This will result in the loss of a number of existing on-street parking spaces in a locality which experiences periods of high demand.

Revised Access and Mobility DCP 2005

The relevant objectives and requirements of Council's Revised Access and Mobility DCP 2005 have been considered in the assessment of the development application. Level access to the building from the adjoining forecourt area and accessible parking space (located conveniently to the main pedestrian access) exists and is to be maintained. Suitable accessible facilities such as communal staff areas, workstations and toilets are provided within the building. A Building Code of Australia Compliance Statement, prepared by Trevor R Howse and Associates and dated 15 February 2010, is also provided and details compliance with relevant provisions.

Further to this, if the application was recommended for approval, a condition could be included in any consent to ensure compliance with the relevant Australian Standards and Building Code of Australia in relation to disabled access. As a result, the application is considered to be consistent with the objectives and relevant requirements of the DCP.

Stormwater Drainage DCP

The relevant objectives and requirements of the Stormwater Drainage DCP have been considered in the assessment of the development application. Suitable stormwater plans and specifications have been submitted to accompany the development application and Council's Development Engineer has raised no objection to the proposed stormwater design subject to the inclusion of appropriate conditions being imposed on any development consent. Thus the application is considered to be consistent with the objectives and relevant requirements of the DCP.

Guidelines for Erosions and Sediment Control DCP

The relevant objectives and requirements of Council's Guidelines for Erosion and Sediment Control DCP have been considered in the assessment of the development application. A suitable Erosion and Sediment Control Plan has been submitted to accompany the development application satisfying the DCP requirements. Appropriate conditions will be imposed on any development consent, should the application be recommended for approval. Thus the application is considered to be consistent with the relevant objectives and requirements of the DCP.

Auburn Development Contributions Plan 2007

The proposed development would require the payment of contributions in accordance with Part D: Carter Street Precinct, of Council's Auburn Development Contributions Plan 2007. Contributions are collected for traffic management, open space and public domain improvements in the locality and are calculated based on increases to the total office and warehouse/factory floor space of a site. The proposed development, consisting of an increase of 700sqm of office space and a reduction of 283sqm of warehouse/factory space generates a contribution of \$20,813. This figure is subject to indexation as per the Plan.

If the proposal was recommended for approval, relevant conditions could be imposed on any consent requiring the payment of these contributions prior to the issue of any construction certificate for the development.

Disclosure of Political Donations and Gifts

The NSW Government introduced The Local Government and Planning Legislation Amendment (Political Donations) Act 2008 (NSW). This disclosure requirement is for all members of the public relating to political donations and gifts. The law introduces disclosure requirements for individuals or entities with a relevant financial interest as part of the lodgement of various types of development proposals and requests to initiate environmental planning instruments or development control plans.

The applicant did not result in any disclosure of Political Donations and Gifts.

The provisions of the Regulations (E P & A Act s79C (1)(a)(iv))

The proposed development raises no concerns as to the relevant matters arising from the EP& A Regulations 2000.

The Likely Environmental, Social or Economic Impacts (E P & A Act s79C (1)(b))

It is considered that the proposed development will have no significant adverse environmental, social or economic impacts in the locality.

The suitability of the site for the development (E P & A Act s79C (1)(c))

The subject site and locality are not known to be affected by any natural hazards. The locality is known to be affected by high traffic demands and limited access, as reflected by the local provisions of the Auburn Local Environmental Plan 2000 for maximal car parking and traffic. The proposed development requires the use of a customised service vehicle with dimensions of 23 metres (length) by 4.35 metres (loaded width). Such a vehicle would occupy the majority of the carriageway (lanes in both directions) as well as require large splayed driveways to access the subject site. This together with the required frequency of visits by the custom vehicle is considered by Council and the RTA to result in an unacceptable impact on the existing busy traffic network and be to the detriment of existing operations in the locality.

Accordingly, it is considered that the site is unsuitable to accommodate the proposal. The proposed development has been assessed in regard it its environmental consequences and having regard to this assessment, it is considered that the development is unsuitable in the context of the site and surrounding locality given the existing and future road and traffic network and the types of vehicles to be used.

Submissions made in a	accordance v	with the Act or	Regulation (E P & A A	ct s79C (1)(d))
Advertised (newspaper)		Mail 🗌	Sign 🗌	Not Required 🖂

In accordance with Council's Notification of Development Proposals Development Control Plan, the development application was not required to be publicly exhibited.

The public interest (E P & A Act s79C (1)(e))

The public interest is served by permitting the orderly and economic development of land, in a manner that is sensitive to the surrounding environment and has regard to the reasonable amenity expectations of surrounding land users. In view of the foregoing analysis, it is considered that the proposed development will affect safety of other road users and pedestrians in the locality and thus is not in public interest.

Crown Development (E P & A Act s116)

The development application is lodged as a Crown Development by Energy Australia (Crown Authority). In accordance with Section 89 – *Determination of Crown Development Applications*, of the Environmental Planning and Assessment Act 1979, the application is to be referred to the Joint Regional Planning Panel – Sydney West with the recommendation of refusal for reasons discussed herein.

Should the Panel endorse Council's recommendation, the application shall be referred to the Minister for Planning for final determination.

Conclusion

The development application has been assessed in accordance with the relevant requirements of the Environmental Planning and Assessment Act 1979.

The proposed development and specifically the requirement to use an oversized service vehicle on a regular basis, is likely to have a substantial detrimental impact upon the surrounding local traffic network and other businesses. Further, advice from Council's Engineering Department and the Roads and Traffic Authority of NSW suggest the proposal should not be supported.

For these reasons, it is considered that the proposal is unsatisfactory having regard to the matters of consideration under Section 79C of the Environmental Planning and Assessment Act 1979, and thus the development application is recommended for refusal.
