## Schedule of Basix Commitments

### (1) COMMITMENTS FOR UNIT BUILDING (5 - 7 Parkes Street, Parramatta)

#### (i) DWELLINGS

##### WATER

(b) The applicant must plant indigenous or low water use species of vegetation throughout the area of land specified for the dwelling in the "Indigenous species" column of the table below, as private landscaping for that dwelling.

(This area of indigenous vegetation is to be contained within the "Area of garden and lawn" for the dwelling specified in the "Description of project" table).

(e) The applicant must not install a private swimming pool or spa for the dwelling, with a volume exceeding that specified for it in the table below.

(g) The pool or spa must be located as specified in the table.

(h) The applicant must install, for the dwelling, each alternative water supply system, with the specified size, listed for that dwelling in the table below. Each system must be configured to collect run-off from the areas specified (excluding any area which supplies any other alternative water supply system), and to divert overflow as specified. Each system must be connected as specified.

##### ENERGY

(b) The applicant must install each hot water system specified for the dwelling in the table below, so that the dwelling's hot water is supplied by that system. If the table specifies a central hot water system for the dwelling, then the applicant must connect that central system to the dwelling, so that the dwelling's hot water is supplied by that central system.

(f) This commitment applies to each room or area of the dwelling which is referred to in a heading to the "Natural lighting" column of the table below (but only to the extent specified for that room or area). The applicant must ensure such room or area is fitted with a window and/or skylight.

##### THERMAL COMFORT

(g) Where there is an in-slab heating or cooling system, the applicant must:

- Install insulation with an R-value of not less than 1.0 around the vertical edges of the perimeter of the slab; or
- On a suspended floor, install insulation with an R-value of not less than 1.0 underneath the slab and around the vertical edges of the perimeter of the slab.

(h) The applicant must construct the floors and walls of the development in accordance with the specifications listed in the table below.

### (B) COMMON AREAS AND CENTRAL SYSTEM/FACILITIES

##### WATER

(b) The applicant must install (or ensure that the development is serviced by) the alternative water supply system(s) specified in the "Central Systems" column of the table below. In each case, the system must be sized, be configured, and be connected, as specified in the table.

(c) A swimming pool or spa listed in the table must not have a volume (in kLs) greater than that specified for the pool or spa in the table.

##### ENERGY

(c) The applicant must install the systems and fixtures specified in the "Central Systems" column of the table below. In each case, the system or fixture must be of the type, and meet the specifications, listed in the table.

### (4) COMMITMENTS FOR COMMON AREAS AND CENTRAL SYSTEMS/FACILITIES FOR THE DEVELOPMENT (NON-BUILDING SPECIFIC)

##### WATER

(b) The applicant must install (or ensure that the development is serviced by) the alternative water supply system(s) specified in the "Central Systems" column of the table below. In each case, the system must be sized, be configured, and be connected, as specified in the table.

(c) A swimming pool or spa listed in the table must not have a volume (in kLs) greater than that specified for the pool or spa in the table.

##### ENERGY

(c) The applicant must install the systems and fixtures specified in the "Central Systems" column of the table below. In each case, the system or fixture must be of the type, and meet the specifications, listed in the table.

## ABSA Specification

Assessor # 60822

Certificate # 35014152

Issued: 03-Aug-11

### Thermal Performance Specifications

These are the Specifications upon which the Certified Assessment is based. If details included in these Specifications vary from other drawings or written specifications, these Specifications shall take precedence. If only one specification option is detailed for a building element, that specification must apply to all instances of that element for the project. If alternate specifications are detailed for a building element, the location and extent of alternate specifications must be detailed below and/or clearly indicated on referenced documents.

Windows	Product ID	Glass	Frame	U value	SHGC	Area M <sup>2</sup>	Detail
