## Floor Plans

Figure 1 is a line graph showing the variation of the ratio of the maximum to the minimum value of the normalized velocity profile,  $V_{\max}/V_{\min}$ , as a function of the normalized axial distance,  $z/L$ . The x-axis ranges from 0 to 1.0 with major ticks at 0, 0.2, 0.4, 0.6, 0.8, and 1.0. The y-axis ranges from 0 to 1.0 with major ticks at 0, 0.2, 0.4, 0.6, 0.8, and 1.0. A solid line represents the theoretical results, and a dashed line represents the experimental results. Both curves start at (0, 1.0), decrease to a minimum of approximately 0.4 at  $z/L \approx 0.2$ , and then increase to a maximum of approximately 0.8 at  $z/L \approx 0.4$ . The theoretical curve (solid line) is slightly higher than the experimental curve (dashed line) for  $z/L > 0.2$ .
