Dear Mr Pinyon

Re DA 13/0307 – Extension of Tarcoola Quarry - Supplementary Report

I refer to the supplementary report received by the Environment Protection Authority (EPA) on 18 November 2013 for the proposed extension of Tarcoola Quarry at Lot 4 DP 740222 2 Gillard Road, East Wagga Wagga.

The EPA has reviewed the additional information contained in the supplementary report and is satisfied that the General Terms of Approval (GTA) provided in response to the original Environmental Impact Statement (EIS) do not require modification. A copy of the GTA dated 29 August 2013 is attached to this response.

In addition, if development consent is to be granted it will be necessary for the applicant to apply for an Environment Protection Licence with the EPA for the land based extraction activity consistent with the development application for the proposal, EIS, supplementary report and our GTA.

If you have any further enquiries about this matter further please contact Chris Burton by telephoning 02 6022 0609.

Yours sincerely

BRIAN WILD
Head Albury Unit
