

UNIT TYPES

A MIX OF UNIT TYPES SUPPORT A DIVERSE COMMUNITY

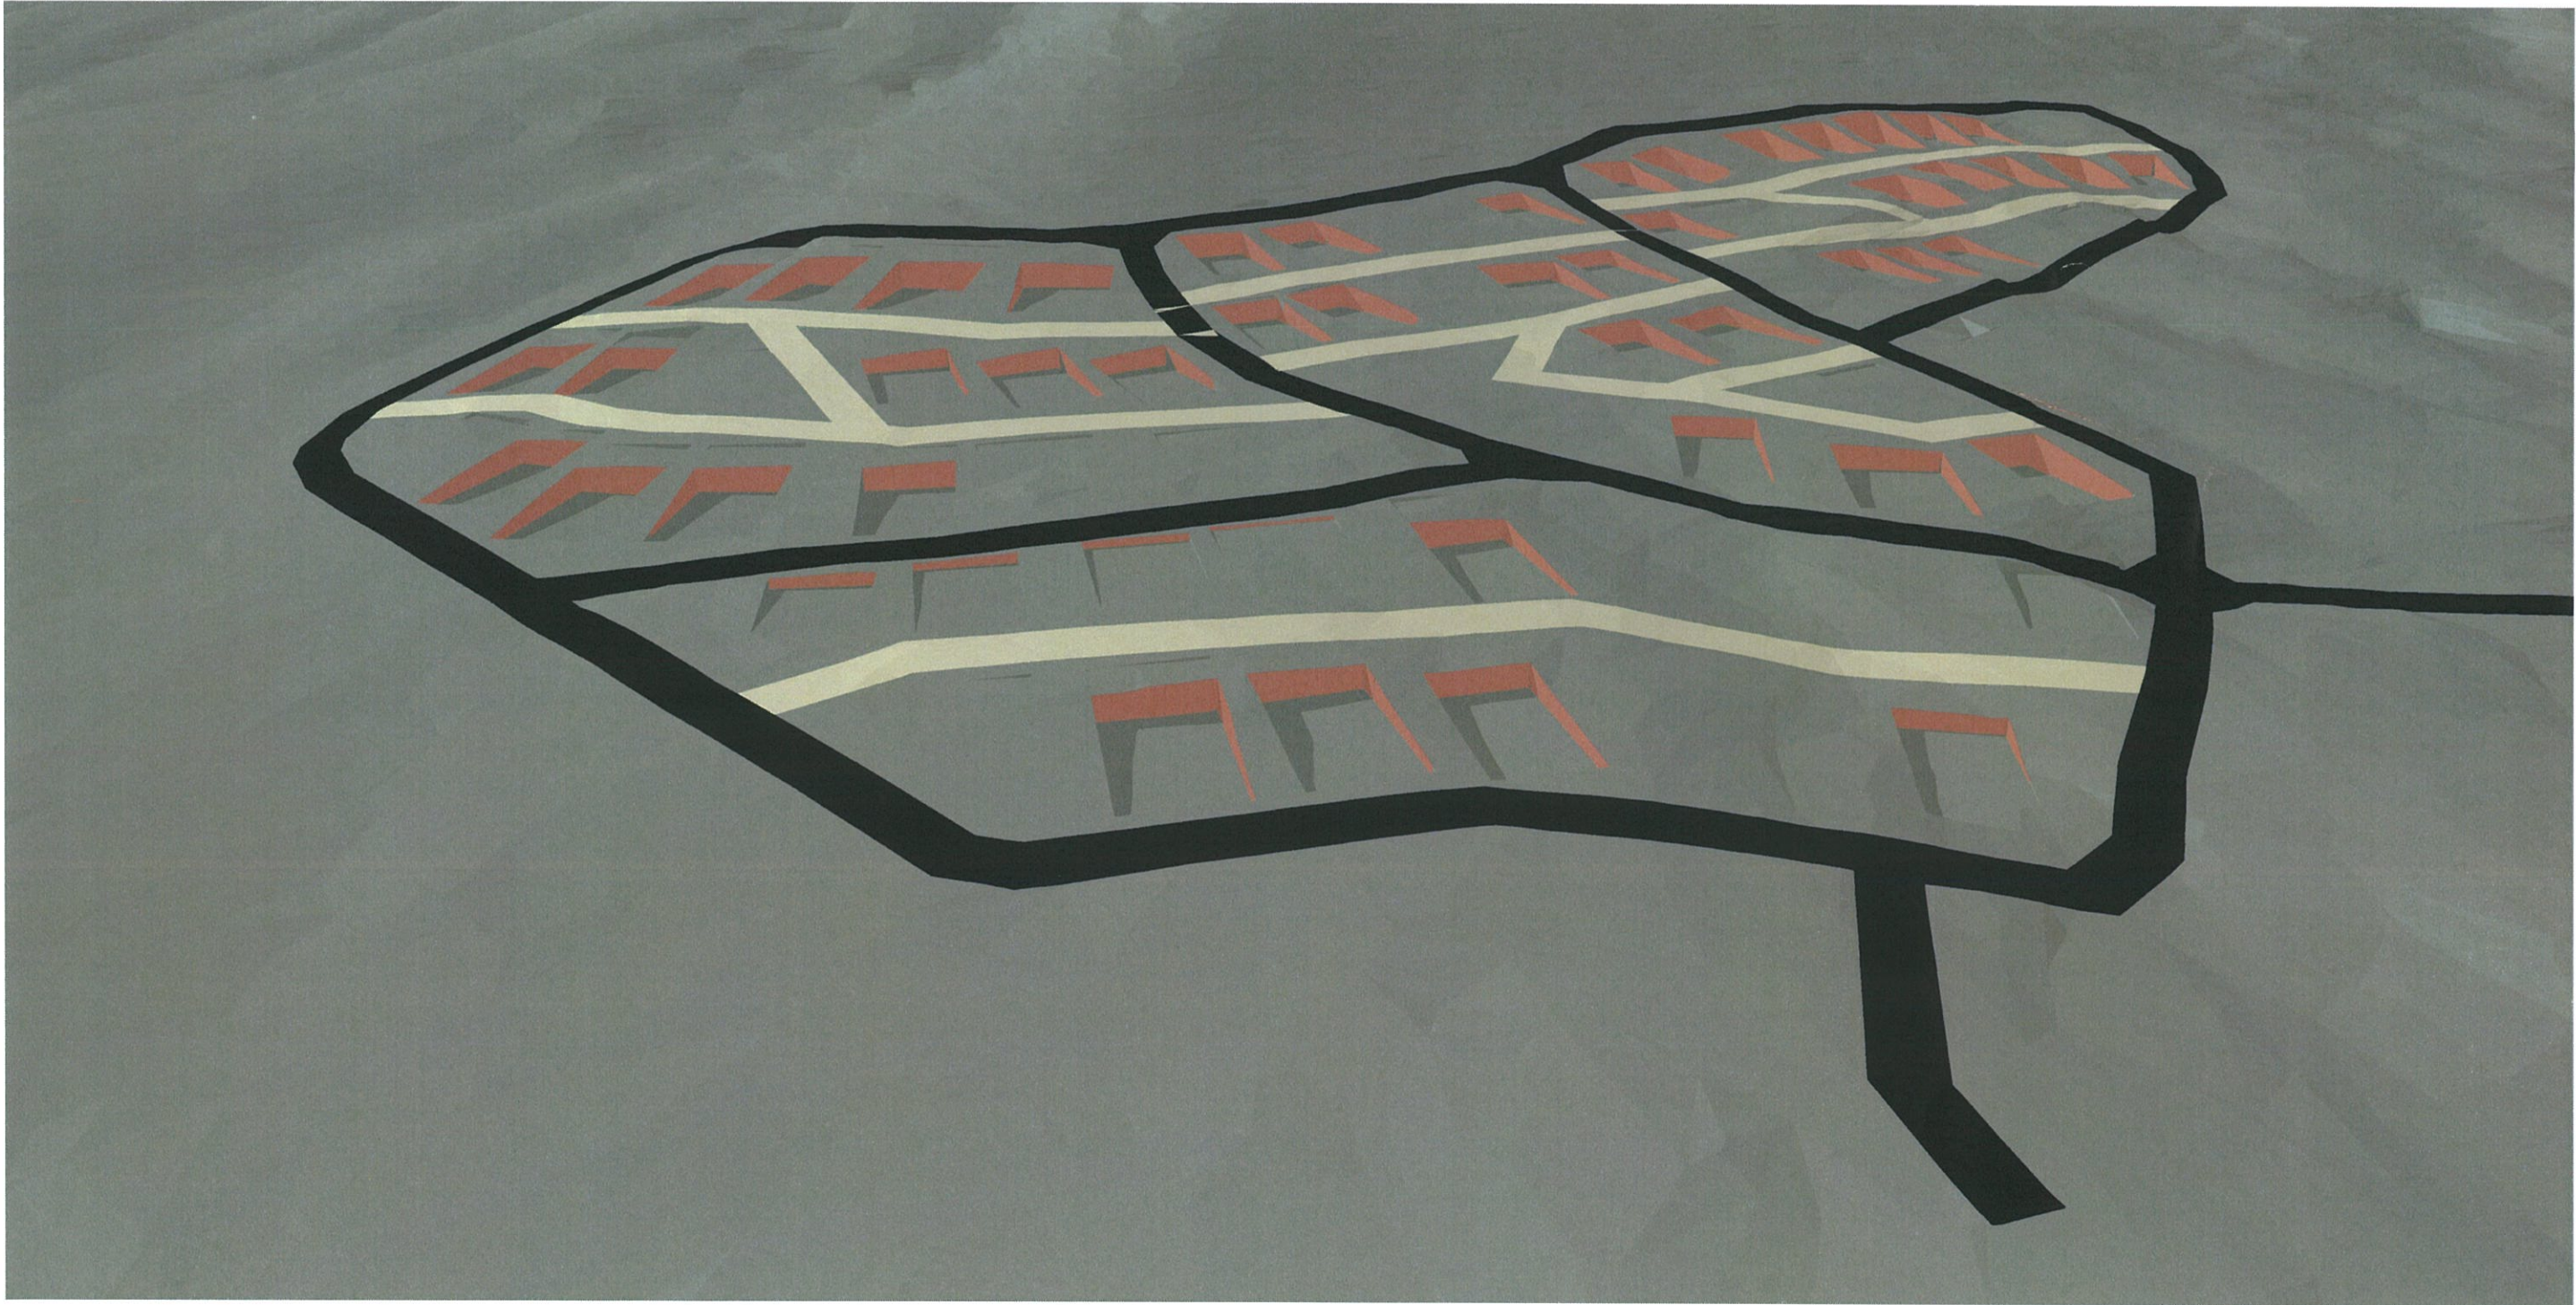

This site plan illustrates a residential development with a focus on pedestrian accessibility and tree retention. The plan features a winding road network with several 'PASSING BAY' locations marked. Pedestrian ramps, indicated by green lines with a maximum slope of 1:14, are shown connecting various parts of the site. Tree retention areas are highlighted in green, showing the planned placement of trees throughout the development. Key infrastructure includes a 'COMMUNITY CENTRE & CHAPEL' (350 m²), a 'SUB-STATION', and a 'BIN STORAGE AREA'. An 'EMERGENCY EXIT' is also marked. The plan includes contour lines to show the site's topography and several north arrows for orientation.
