Dear Nick,

Your Traffic Engineer needs to verify that a 19 metre truck can turn into the lane, traverse the lane, manoeuvre in and out of the ALDI loading dock and exit out of the laneway. If all those points are satisfied, ALDI will also be satisfied that the laneway functions adequately for truck deliveries.

Regards,
John R Steiner

1 December 2017

Our Ref: CLTR-16020029.04B

ADM Architects
PO Box 3061
WOLLONGONG NSW 2500

ATTENTION: MR ANGELO DI MARTINO

Dear Angelo,

PROJECT: PROPOSED MIXED USE DEVELOPMENT

ADDRESS: CNR AKUNA STREET & SHOALHAVEN STREET, KIAMA NSW 2533

Following your recent meeting the Kiama Council (Council) to discuss issues of concern regarding the submitted development application (Ref: 10.2016.304.1) it was highlighted that the following traffic issues required attention:

- Truck access into the proposed service lane from Shoalhaven Street;
- Truck manoeuvring within the loading bay;
- Truck egress from the service lane to Collins Street; and
- The proposed laneway width between the Child Care Centre and the existing Centrepont development.

TRUCK ACCESS INTO THE PROPOSED SERVICE LANE FROM SHOALHAVEN STREET

The drawing (16020029-C24) submitted by Jones Nicholson for development application approval revealed that a 19m articulated vehicle required the width of Shoalhaven Street to enable access to the service lane for proposed deliveries. Council requires that this manoeuvre into the service lane must be completed by the 19m articulated vehicle without crossing the centreline of Shoalhaven Street.

ADM architects have amended the proposed service lane driveway dimensions to accommodate a 19m articulated vehicle swept path entering the service lane from Shoalhaven Street without crossing the road centreline. Furthermore, a 1.5m island separating the service lane from the exit lane of the car park has been provided to further separate the service lane from the car park exit driveway in keeping with Clause 3.4.3(b) of AS2890.2.

The amended driveway access and new 19m articulated vehicle swept path has been provided to confirm the changes adopted to comply with Council's requirement.

TRUCK MANOEUVERING WITHIN THE LOADING BAY

The drawing (16020029-C24) submitted by Jones Nicholson for development application approval demonstrates that a 19m articulated heavy vehicle can manoeuvre into and out of the proposed ALDI loading bay to facilitate the delivery of goods to the proposed ALDI store.

LANEWAY WIDTH BETWEEN CHILD CARE CENTRE AND CENTREPOINT CAR PARK

NDCO has successfully negotiated with the owner of the Centrepoint development to obtain a 300mm right of way over the south-western portion of the Centrepoint car park which will enable the existing laneway width to be increased from a minimum of 3.05m to 3.35m.

The minimum laneway width of 3.35m can accommodate the movement of a 19m articulated vehicle (2.5m width as per Figure 5.4 of AS2890.2) travelling along a straight section of laneway including the required clearance for low speed manoeuvres (0.3m each side) as required by Clause 5.4 of AS2890.2.

TRUCK EGRESS FROM THE SERVICE LANE TO COLLINS STREET

The drawing (16020029-C25) submitted by Jones Nicholson for development application approval demonstrates that a 19m articulated heavy vehicle can manoeuvre out of the access laneway onto Collins Street and depart the Kiama town centre.

In leaving the development site, traffic controls via 'Give Way' signage and line marking is to be installed as denoted on drawing 16020029-C25 to manage the interaction between vehicles using the Child Care Centre and Centrepoint car parks.

SUMMARY

Based upon the updated architectural drawing set and manoeuvring checks completed by Jones Nicholson, we verify that a 19m articulated heavy vehicle:

- Can enter the proposed development via the truck service driveway from Shoalhaven Street without crossing the centreline of Shoalhaven Street;
- Can manoeuvre into and out of the proposed loading bay to deliver goods to the proposed ALDI store;
- Can traverse the service driveway and laneway intersecting Collins Street via the proposed 3.35m minimum width lane; and
- Can leave the proposed development via the laneway intersecting Collins Street and manoeuvre onto Collins Street to depart the Kiama town centre.

For and on behalf of Jones Nicholson

Dear Darren and Mark,

I refer to the meeting yesterday attended by the Applicant and his consultant team as well as Council staff including Darren with respect to the above application.

One of the issues raised concerns the issue of the egress to Collins Street and the deferred matters raised in Marks referral. One of the matters raised by Mark was:

1(c) confirmation in writing from a chain supermarket provider and a waste contractor that a width of 3.35 metres is a suitable width for articulated delivery vehicle and waste vehicle (respectively) to pass through."

At our meeting yesterday the Applicant forwarded the email string below to me which includes an email from Steiner Richards indicating that ALDI would be satisfied with the driveway if the Applicants Traffic Engineer verified that a 19 metre truck can turn into the lane, traverse the lane, manoeuvre in and out of the ALDI loading dock and exit out of the laneway. Would this email be sufficient to meet Council's above requirement?

In addition to the above, at yesterday's meeting it appeared from Council staff that as Council were the waste contractor, that Council had recently agreed that the service lane would be sufficient (subject to its widening to 3.35 m).

I will require confirmation from Council as to whether the email string below is sufficient to meet item 1(c) above of Council's referral; and whether council as waste contractor accepts the proposed service lane will be adequate for its purposes and therefore also meeting the requirements of item 1(c).

As we will be receiving a modified proposal that will seek to better address issues raised in my assessment report, I will be required to prepare an addendum report that will need to address these outstanding matters include the above matter. I would therefore appreciate Council's direction with respect to the above matters as quickly as possible so that such can be included in my Addendum report.

If you require any clarification in connection with this matter please do not hesitate to contact me.

Regards

Stephen Richardson
