The architectural floor plan depicts a commercial building layout. Key features include:

- Garbage Truck Turning Bay:** A large circular area at the rear of the building.
- Garbage Storage Room:** Located adjacent to the turning bay.
- Retail Areas:** Two main retail spaces, one labeled 'retail A: 30.60 m2' and another 'retail A: 145.85 m2'.
- Food Court:** A central area labeled 'food court A: 30.60 m2' with a grid of tables.
- Service and Support Rooms:** Including a 'switch room', 'hydrant booster', 'cleaners', 'male wc', 'female wc', 'unisex accessible wc', and an 'elec. substation 5.6m x 2.8m'.
- Staircases and Escalators:** Multiple staircases and an 'escalator' are shown throughout the plan.
- Site Context:** The building is situated at the corner of 'No. 6 Churchill Avenue' and 'No. 11 The Boulevard'. It is bordered by a 'CONCRETE KERB' and has a 'void over service vehicle area'.
- Annotations:** The plan includes numerous level markers (e.g., 12.200, 12.304, 13.200), area calculations, and references to 'existing building footprint'.

gives researchers the information they need to design a business network that will, ideally, increase their sales and profits. As previously noted, understanding a customer's decision-making process is an important step in developing a business plan that will allow a company to achieve its goals. In addition, understanding a customer's decision-making process can help a company to identify its strengths and weaknesses, and to develop strategies to improve its performance.

highlight differences in the presentation of the results. However, it should be noted that, with only 10 cases drawn and distributed into two sets of 5, multiple comparisons may be a problem for the statistical analysis. The authors also note that a small number of cases may have been missed by the 10 cases drawn and that, under the current, 1-year follow-up, the length of time it may be difficult to detect a difference might have been shorter. The authors also note that the statistical analysis and the support for certain changes to the current presentation of the data is not based on the presentation.
