

ATTACHMENT 1:

RECOMMENDED CONDITIONS OF CONSENT

A. THE DEVELOPMENT

Approved Plans

1. Development the subject of this determination notice must be carried out strictly in accordance with the following plans/reports marked except where modified by the undermentioned conditions:

Plans

Plan Name	Plan Number	Reference/revision	Date	Prepared By
Block N Canteen Sections	DA-N-303	DA-1	17.07.15	Fulton Trotter Architects
Block N Canteen Elevations 2	DA-N-302	DA-1	17.07.15	Fulton Trotter Architects
Block N Canteen Elevations 1	DA-N-301	DA-1	17.07.15	Fulton Trotter Architects

Traffic and Parking Assessment	1139/15	July 2015	Lyle Marshall & Associates Pty Ltd
Acoustic Assessment	20160210.FTP2468.0002	March 2016	Acoustic Studio

General Terms of Approval

2. All the General Terms of Approval issued by NSW Rural Fire Service shall be complied with prior, during, and at the completion of construction, as required in accordance with the General Terms of Approval dated 8 October 2015. A copy of the General Terms of Approval is attached to this decision notice.

B. PRIOR TO ISSUE OF A CONSTRUCTION CERTIFICATE

The following conditions are to be complied with or addressed prior to issue of a Construction Certificate by the Principal Certifying Authority:

Plan of Management

3. Prior to the issue of a Construction Certificate a comprehensive Noise and Traffic Plan of Management is to be submitted to Council's Manager Development Assessment for approval. The Plan of Management is to detail traffic and noise management practices that will be implemented in respect to:
 - a) The after-hours school events and the events that are to take place during school hours as stipulated in the approved traffic report. The Plan of Management is to be consistent with all the recommendations stipulated in the approved acoustic report and traffic impact assessment.

Provision of Services

4. An application to obtain a Section 73 Compliance Certificate under the Sydney Water Act 1994, must be lodged with Sydney Water. To facilitate this, an application must be made through an authorised Water Servicing Coordinator. Please refer to the "building and developing" section of Sydney Water's web site at www.sydneywater.com.au, or telephone 13 20 92.

Following receipt of the application, a 'Notice of Requirements' will detail water and sewer extensions to be built and charges to be paid. Please make early contact with the Coordinator, since building of water/sewer extensions can be time consuming and may impact on other services and building, driveway or landscape design. A copy of the 'Notice of Requirements' must be submitted to the PCA.

Fee Payments

5. Unless otherwise prescribed by this consent, all relevant fees or charges must be paid. Where Council does not collect these payments, copies of receipts must be provided. For the calculation of payments such as Long Service Levy, the payment must be based on the value specified with the Development Application/Construction Certificate.

The following fees are applicable and payable:

- (a) Damage Inspection Fee – relevant where the cost of building work is \$20,000 or more, or a swimming pool is to be excavated by machinery.
- (b) Fee associated with Application for Permit to Carry Out Work Within a Road, Park and Drainage Reserve.
- (c) Long Service Levy – based on 0.35% of the cost of building work where the costing of the CC is \$25,000 or more.

These fees are reviewed annually and will be calculated accordingly.

Site Development Work

- 6. Site development work in the form of excavation, underpinning or shoring works must not take place, until such time as a CC has been issued.
- 7. All aspects of construction shall comply with the applicable Performance Requirements of the National Construction Code. Compliance with the Performance Requirements can only be achieved by:
 - (a) Complying with the Deemed to Satisfy Provisions; or
 - (b) Formulating an Alternative Solution, which complies with the Performance Requirements or is shown to be at least equivalent to the Deemed to Satisfy Provision, or a combination of (a) and (b).

Notification

- 8. The certifying authority must advise Council, in writing of:
 - (a) The name and contractor licence number of the licensee who has contracted to do or intends to do the work, or
 - (b) The name and permit of the owner-builder who intends to do the work.

If these arrangements are changed, or if a contract is entered into for the work to be done by a different licensee, Council must be immediately informed.

Fire Safety Measures

- 9. A schedule specifying all of the essential fire safety services, both existing and proposed, which are required for the building, shall be attached to the CC and submitted to Council, in compliance with the provisions of the EP&A Regulation.
- 10. The schedule must distinguish between the measures that are currently implemented in the building premises; and
 - (a) The measures that are to be proposed to be implemented in the building premises; and
 - (b) The minimum standard of performance for each measure.

Recommendations of Acoustic Report

11. The recommendations provided in the approved acoustic report prepared by Acoustic Studio, dated March 2016, reference 20160210.FTP2468.002 shall be implemented and incorporated into the design and construction of the development and shall be shown on plans accompanying the CC application

S138 Roads Act – Minor Works in the public road

12. Prior to the issue of a Construction Certificate a S138 Roads Act application/s, including payment of fees shall be lodged with Liverpool City Council, as the Roads Authority for any works required in a public road. These works may include but are not limited to the following:

- Vehicular crossings (including kerb reinstatement of redundant vehicular crossings)
- Road opening for utilities and stormwater (including stormwater connection to Council infrastructure)
- Road occupancy or road closures

All works shall be carried out in accordance with the Roads Act approval, the development consent including the stamped approved plans, and Liverpool City Council's specifications.

Note:

1. Approvals may also be required from the Roads and Maritime Service (RMS) for classified roads.

Stormwater Concept Plan

13. A stormwater drainage system shall be provided generally in accordance with the concept plan/s lodged for development approval, prepared by AJ Whipps Consulting Group reference number HDA02/P3, revision P3, dated 23/06/2015

The proposed development and stormwater drainage system shall be designed to ensure that stormwater runoff from upstream properties is conveyed through the site without adverse impact on the development or adjoining properties.

Engineering plans and supporting calculations for the stormwater drainage system are to be prepared by a suitably qualified engineer and shall accompany the application for a Construction Certificate. The plan shall indicate the method of disposal of all stormwater and must include rainwater tanks, existing ground levels, finish surface levels and sizes of all pipes.

Prior to the issue of a Construction Certificate the Certifying Authority shall ensure that the stormwater drainage system has been designed in accordance with Liverpool City Council's Design Guidelines and Construction Specification for Civil Works.

Access, Car Parking and Manoeuvring – General

14. Prior to the issue of a Construction Certificate the Certifying Authority shall ensure that vehicular access, circulation, manoeuvring, pedestrian and parking

areas associated with the subject development are in accordance with AS 2890.1, AS2890.2, AS2890.6 and Liverpool City Council's Development Control Plan.

Design Drawings

15. A detailed design is to be submitted to Council clearly indicating the following;
- An indented parking bay along the frontage of Moondarra Drive and an additional gate;
 - An internal road including vehicular turning manoeuvres and swept paths
 - Traffic circulation, signs and line markings for traffic management of the new road; and
 - Internal street lighting along the new road.

Services

16. Prior to the issue of a Construction Certificate, the Principal Certifying Authority shall be satisfied that telecommunications infrastructure may be installed to service the premises which complies with the following:
- The requirements of the Telecommunications Act 1997:
 - For a fibre ready facility, the NBN Co's standard specifications current at the time of installation; and
 - For a line that is to connect a lot to telecommunications infrastructure external to the premises, the line shall be located underground.

Unless otherwise stipulated by telecommunications legislation at the time of construction, the development must be provided with all necessary pits and pipes, and conduits to accommodate the future connection of optic fibre technology telecommunications.

C. PRIOR TO WORKS COMMENCING

The following conditions are to be complied with or addressed prior to works commencing on the subject site/s:

Construction Certificates

17. Any CC that may be issued in association with this development consent must ensure that any certified plans and designs are generally consistent (in terms of site layout, site levels, building location, size, external configuration and appearance) with the approved Development Application plans.
18. Where this consent requires both engineering and building works to be undertaken, a separate construction certificate shall be issued for each category of works ie., a separate Civil Engineering CC and a separate Building CC.

Notification/Principal Certifying Authority

19. The applicant shall advise Council of the name, address and contact number of the Accredited Certifier, in accordance with Section 81A (4) of the Act.

20. The PCA must advise Council of the intended date to commence work which is the subject of this consent by completing a notice of commencement of building works or subdivision works form, available from Council's Customer Service Centre. A minimum period of two (2) working days notice must be given.
21. Written notice of intention shall be given to the owner of the adjoining allotments of land, outlining the particulars of the proposed work, which involves:
 - (a) Any excavation, below the base of the footings of a building on an adjoining allotment of land.
 - (b) The notice shall be given seven (7) days prior to the commencement of work.
22. In the event the development involves an excavation that extends below the level of the base of the footings of a building on adjoining land, the following is to be undertaken at full cost to the developer:
 - (a) Protect and support the adjoining premises from possible damage from the excavation, and
 - (b) where necessary, underpin the adjoining premises to prevent any such damage.

Facilities

23. Toilet facilities must be available or provided at the work site and must be maintained until the works are completed at a ratio of one toilet plus one additional toilet for every 20 persons employed at the site.

Each toilet must:

- (a) be a standard flushing toilet connected to a public sewer, or
- (b) have an on-site effluent disposal system approved under the *Local Government Act 1993*, or
- (c) be a temporary chemical closet approved under the *Local Government Act 1993*.

Construction Requirements

24. The applicant/ builder shall be responsible to report to the Council any damage to Council's footpath and road carriageway as a consequence of demolition or excavation or building activities or delivery/ departure of materials associated with this site. The damage shall be reported to Council as soon as the damage becomes apparent to the builder/ site manager. Arrangements to the satisfaction of Council are to be made for making safe by temporary repairs to the public way until permanent restoration and repair can be organised with Council.
25. Retaining walls or other approved methods necessary to prevent the movement of excavated or filled ground, together with associated subsoil drainage and surface stormwater drainage measures, shall be designed strictly in accordance with the manufacturers details or by a practising structural engineer. Retaining walls on any boundary are to be of masonry construction.

Demolition

26. Demolition works shall be carried out in accordance with the following:
- (a) Prior to the commencement of any works on the land, a detailed demolition work plan designed in accordance with the Australian Standard AS 2601-2001- The Demolition of Structures, prepared by a suitably qualified person with suitable expertise or experience, shall be submitted to and approved by Council and shall include the identification of any hazardous materials, method of demolition, precautions to be employed to minimise any dust nuisance and the disposal methods for hazardous materials.
 - (b) Prior to commencement of any works on the land, the demolition Contractor(s) licence details must be provided to Council.
 - (c) The handling or removal of any asbestos product from the building/site must be carried out by a NSW Work Cover licensed contractor irrespective of the size or nature of the works. Under no circumstances shall any asbestos on site be handled or removed by a non-licensed person. The licensed contractor shall carry out all works in accordance with NSW Work Cover requirements.

Site Facilities

27. Adequate refuse disposal methods and builders storage facilities shall be installed on the site. Builders' wastes, materials or sheds are not to be placed on any property other than that which this approval relates to.

Site Notice Board

28. A sign must be erected in a prominent position on the premises on which work is to be carried out. The sign is to be maintained during work, and removed at the completion of work. The sign must state:
- (a) The name, address and telephone number of the principal certifying authority for the work; and
 - (b) The name of the principal contractor (if any) for any building work and a telephone number on which that person may be contacted outside working hours; and
 - (c) Unauthorised entry to the premises is prohibited.

Notification of Service Providers

29. The approved development must be approved through the 'Sydney Water Tap in' service to determine whether the development will affect any Sydney Water wastewater and water mains, stormwater drains and/or easements, and if any requirements need to be met. A receipt must be provided to Council.

Please refer to the website www.sydneywater.com.au for more information.

Waste Classification

30. Prior to the exportation of waste (including fill or soil) from the site, the material shall be classified in accordance with the provisions of the POEO Act 1997, POEO Waste Regulation 2014 and NSW EPA 'Waste Classification Guideline' (dated November 2014) The classification of the material is essential to

determine where the waste may be legally taken. The POEO Act provides for the commission of an offence for both the waste owner and transporters if waste is taken to a place that cannot lawfully be used as a waste facility for the particular class of waste. For the transport and disposal of industrial, hazardous or Group A liquid and non-liquid waste advice should be sought from the DECCW (EPA).

31. An Environmental Management Plan (EMP) shall be developed and submitted to the Principal Certifying Authority for approval. The EMP shall provide a comprehensive and complete action and implementation plan to ensure that the anthropological and natural environment is not unacceptably impacted upon by the proposal. The EMP shall include but not be necessarily limited to the following measures:
 - (a) Measures to control noise emissions from the site;
 - (b) Measures to suppress odours and dust emissions;
 - (c) Minimal impact to Water, Air and Land;
 - (d) Waste;
 - (e) Soil and sediment control measures;
 - (f) Measures to identify hazardous and industrial wastes and the procedures for removal and disposal including asbestos;
 - (g) Environmental objectives and control strategies
 - (h) Environmental monitoring and reporting plan; and
 - (i) Community consultation
32. Prior to commencement of works sediment and erosion control measures shall be installed in accordance with the approved Construction Certificate and to ensure compliance with the Protection of the Environment Operations Act 1997 and Landcom's publication "Managing Urban Stormwater – Soils and Construction (2004)" – also known as "The Blue Book".

The erosion and sediment control measures shall remain in place and be maintained until all disturbed areas have been rehabilitated and stabilised.

Dilapidation report

33. Prior to the Commencement of Works a dilapidation report of all infrastructure fronting the development in Carmichael Drive is to be submitted to Liverpool City Council. The report is to include, but not limited to, the road pavement, kerb and gutter, footpath, services and street trees and is to extend 100m either side of the development.

D. DURING CONSTRUCTION

The following conditions are to be complied with or addressed during construction:

Building Work

34. In the case of a class 5, 6, 7, 8 or 9 building, critical stage inspections must be carried out by the appropriate person in accordance with EP&A Regulation, with Compliance Certificates issued for each inspection. The last critical stage inspection must be carried out by the PCA. The following components of construction are relevant:

- (a) after excavation for, and before the placement of, any footings, and
- (b) prior to covering any stormwater drainage connections; and
- (c) after the building work has been completed and prior to any occupation certificate being issued in relation to the building.

Note: These certificates or documentary evidence must be submitted to Council with any OC issued for the development

Hours of Construction Work and Deliveries

35. Construction work/civil work/demolition work, including the delivery of materials, is only permitted on the site between the hours of 7:00am to 6:00pm Monday to Friday and 8:00am to 1:00pm Saturday. No work will be permitted on Sundays or Public Holidays, unless otherwise approved by Council.

Security Fence

36. A temporary security fence to WorkCover Authority requirements is to be provided to the property during the course of construction.

Note. Fencing is not to be located on Council's reserve area.

Demolition Inspections

37. The following inspections are required to be undertaken by Council in relation to approved demolition works:
- (a) Immediately prior to the commencement of the demolition or handling of any building or structure that contains asbestos. The applicant shall also notify the occupants of the adjoining premises and Workcover NSW prior to the commencement of any works.
 - (b) Please note that demolition works are not permitted to commence on site until such time as a satisfactory inspection result is obtained from Council.
 - (c) Immediately following completion of the demolition. Please note that proof of appropriate disposal of demolition materials (including asbestos) may be required at this time in accordance with the approved Waste Management Plan.

To book an inspection with Council, please call 1300 362 170.

Disabled Access

38. Access, parking and facilities for persons with disabilities to be provided in accordance with the provisions of the National Construction Code.

General Site Works

39. Existing hydrological regimes shall be maintained so as not to negatively impact vegetation to be retained on site and downslope/downstream of the site.
40. All dangerous and/ or hazardous material shall be removed by a suitably qualified and experienced contractor licensed by WorkCover NSW. The

removal of such material shall be carried out in accordance with the requirements of WorkCover NSW. The material shall be transported and disposed of at a licensed waste facility to receive the waste in accordance with NSW EPA requirements. Waste receipts and the "WasteLocate" consignment number shall be provided to the certifying authority confirming that the waste is disposed of in a lawful manner. Note; Waste loads can be tracked via <https://wastelocate.epa.nsw.gov.au/> to ensure waste has reached its intended destination. If the waste load is not delivered, please contact the EPA.

Car Parking Areas

41. Car parking spaces and driveways must be constructed of a minimum of two coat finish seal or better. The spaces must be clear of obstructions and columns, permanently line marked and provided with adequate manoeuvring facilities. The design of these spaces must comply with Council's DCP 2008, and Australian Standard 2890.1 Parking Facilities – Off Street Car Parking.

All car parking areas to be appropriately line marked and sign posted in accordance with the approved plans. All customer/visitor/staff parking areas are to be clearly signposted limiting car parking for customers/visitors/staff only. The applicant is to cover the costs of installation and maintenance of the signage.

The on-site parking spaces shown in the approved plans must be identified in accordance with A.S.2890.1 Parking Facilities – Off-Street Car Parking.

Traffic Management

42. All works within the road reserve are to be at the applicant cost and all signage is to be in accordance with the RTA's Traffic Control at Worksites Manual and the RTA's Interim Guide to Signs and Markings.
43. If a works zone is required, an application must be made to Council's Transport Planning section. The application is to indicate the exact location required and the applicable fee is to be included. If parking restrictions are in place, an application to have the restrictions moved, will need to be made.
44. Notice must be given to Council's Transport Planning section of any interruption to pedestrian or vehicular traffic within the road reserve, caused by the construction of this development. A Traffic Control Plan, prepared by an accredited practitioner must be submitted for approval, 48 hours prior to implementation. This includes temporary closures for delivery of materials, concrete pours etc.
45. Applications must be made to Council's Transport Planning section for any road closures. The applicant is to include a Traffic Control Plan, prepared by a suitably qualified person, which is to include the date and times of closures and any other relevant information.

Waste Management Plan

46. The Waste Management Plan submitted to and approved by Council must be adhered to at all times throughout all stages of the development. Supporting documentation (receipts/dockets) of waste/recycling/disposal methods carried

out, is to be kept and must be produced upon the request of Council or any other authorised officer.

Note: Any non-compliance with this requirement will result in penalties being issued.

Vegetation

47. Clearing of bushland in addition to any clearing approved for this development application, whether it be removal of trees, groundcover or understorey, requires development consent.
48. No known environmental or noxious weeds or known invasive plant species shall be included in the landscaping/revegetation.
49. Mulch generated from exotic trees or other weed species cleared shall not be used on site. It shall be removed from the site and disposed of appropriately and in accordance with legislative requirements.
50. Any imported soil and/or mulch shall be free of contaminants, seed and propagules of weeds and undesirable species. Mulch shall not be used on flood liable land.

Landscaping Works

51. Premium quality organic garden soil shall be incorporated into all planting areas in sufficient quantity to achieve optimum plant growing conditions.
52. All garden/planting areas shall be mulched to a depth of not less than 75mm using weed free leaf mulch, wood chip or similar, not pine bark.

Contamination

53. The development, including all civil works and demolition, must comply with the requirements of the Contaminated Land Management Act, 1997, State Environmental Planning Policy No. 55 – Remediation of Land, and Managing Land Contamination – Planning Guidelines (Planning NSW/EPA 1998).
54. All fill introduced to the site must undergo a contaminated site assessment. This assessment may consist of either:
 - (a) a full site history of the source of the fill (if known) examining previous land uses or geotechnical reports associated with the source site to determine potential contamination as per the NSW EPA Waste Classification Guidelines (dated November 2014), or
 - (b) clearly indicate the legal property description of the fill material source site;
 - (c) provide a classification of the fill material to be imported to the site in accordance with the NSW EPA Waste Classification Guidelines (dated November 2014).
 - (d) a chemical analysis of the fill where the site history or a preliminary contamination assessment indicates potential contamination or contamination of fill material; and

- (e) must provide Council with copies of validation certificate verifying the material to be used is free of contaminants and fit for purpose re use in residential, commercial or industrial use.
55. Records of the following must be submitted to the principal certifying authority monthly and at the completion of earth works:
- (a) The course (including the address and owner of the source site), nature and quantity of all incoming loads including the date, the name of the carrier, and the vehicle registration;
 - (b) The results of a preliminary contamination assessment carried out on any fill material used in the development.
 - (c) The results of any chemical testing of fill material.

Site Remediation Works

56. Any new information which comes to light during remediation, demolition or construction works which has the potential to alter previous conclusions about site contamination and remediation must be notified to Council and the accredited certifier immediately after discovery. A Section 96 Application under the EP&A Act shall be made for any proposed works outside the scope of the approved development consent.

Air Quality

57. Dust screens shall be erected and maintained in good repair around the perimeter of the subject land during land clearing, demolition, and construction works.
58. All vehicles involved in the delivery, demolition or construction process departing from the property shall have their loads fully covered before entering the public roadway.
59. Gaseous emissions from the development shall comply with the requirements of the POEO Act and Regulations there under. Processes producing airborne particulate matter shall incorporate a suitable dust collection system.

Erosion Control

60. All disturbed areas shall be progressively stabilised and/or revegetated so that no areas remain exposed to potential erosion damage for a period of greater than 14 days.
61. Sediment and erosion control measures are to be adequately maintained during the works until the establishment of grass.
62. Vehicular access to the site shall be controlled through the installation of wash down bays or shaker ramps to prevent tracking of sediment or dirt onto adjoining roadways. Where any sediment is deposited on adjoining roadways is shall be removed by means other than washing. All material is to be removed as soon as possible and the collected material is to be disposed of in a manner which will prevent its mobilisation.

Water Quality

63. All topsoil, sand, aggregate, spoil or any other material shall be stored clear of any drainage line, easement, water body, stormwater drain, footpath, kerb or road surface and there shall be measures in place in accordance with the approved erosion and sediment control plan.

Pollution Control

64. Building operations such as brick cutting, mixing mortar and the washing of tools, paint brushes, form-work, concrete trucks and the like shall not be performed on the public footway or any other locations which may lead to the discharge of materials into Council's stormwater drainage system.
65. The developer is to maintain all adjoining public roads to the site in a clean and tidy state, free of excavated "spoil" material.

Ventilation

66. The premises shall be ventilated in accordance with the requirements of the BCA (if using deemed to satisfy provisions: AS 1668, Parts 1 & 2)
67. The design, construction, installation and commissioning of the mechanical ventilation systems(s) serving the premises shall be carried out in accordance with Australian Standard 1668 Parts 1 & 2.

The mechanical exhaust discharge point shall be designed and installed by an appropriately qualified person, and shall be positioned to comply with Section 3.7 of Australian Standard 1668 Part 2 – 1991.

Erosion and sediment control

68. Erosion and sediment control measures shall remain in place and be maintained until all disturbed areas have been rehabilitated and stabilised.

Major Filling/ Earthworks

69. All earthworks shall be undertaken in accordance with AS 3798 and Liverpool City Council's Design Guidelines and Construction Specification for Civil Works.

The level of testing shall be determined by the Geotechnical Testing Authority/ Superintendent in consultation with the Principal Certifying Authority.

Food Premises Fit-out

70. The construction, fit-out and finishes of the premises shall comply with AS 4674, The Food Standards Code (Australia) and the Food Act 2003 and Regulations thereunder.

Internal Street Lighting

71. Installation of internal street lighting along the recommended new road completed.

E. PRIOR TO ISSUE OF OCCUPATION CERTIFICATE

The following conditions are to be complied with or addressed prior to issue of either an Interim or Final Occupation Certificate by the Principal Certifying Authority:

Certificates

72. The premises must not be utilised until an OC is issued by the PCA. Copies of all documents relied upon for the issue of the OC must be attached to the OC and registered with Council.
73. A final fire or interim safety certificate is to be attached to any OC, except in the case of a Class 1a or Class 10 building(s). This must include all the “essential fire services” installed in the building.
74. A Section 73 Compliance Certificate under the Sydney Water Act 1994 must be submitted to the PCA.

Landscaping

75. Upon completion of the approved landscape works associated with the development and prior to the issue of any OC, an Implementation Report is to be submitted to the PCA attesting to the satisfactory completion of the landscape works in accordance with the approved landscape plan. The report is to be prepared by a suitably qualified person.

Recommendations of Acoustic Report

76. A Compliance Certificate or other documentation deemed suitable to the PCA is to be submitted to the PCA, detailing compliance with the following:
 - (a) Certification is to be obtained from a qualified acoustic consultant certifying that the building has been constructed to meet the noise criteria in accordance with the approved acoustic report and that all recommendations have been adopted.

Air Conditioners

77. All air handling, evaporative cooling, humidifying, warm water and water cooling systems installed on the premises shall comply with the Public Health Act 2010, Public Health Regulation 2012 and AS/NZS 3666:2011-Air Handling and water systems of building - Microbial Control:
 - (a) All water cooling and warm water systems shall be designed, constructed and installed in accordance with AS 3666.1:1995, the Public Health Act 2010 and Public Health Regulation 2012 before being commissioned.
 - (b) All cooling towers and warm water systems shall be operated and maintained in accordance with AS 3666.2:1995, (or AS 3666.3:2000 subject to prior notification to Council) the Public Health Act 2010, Public Health Regulation 2012.
 - (c) A true copy of the annual certificate as stipulated in Clause 9(2) of the Public Health (Microbial) Regulation 2012 that certifies the effectiveness

of the process of disinfection used for the water cooling system, shall be submitted to Council prior to the period ending 30 June each year.

- (d) The owner or occupier of the building shall be advised of the need to register and provide particulars of any water cooling, and warm-water systems as required under the provisions of the Public Health Act, 2010 and Regulation thereunder. Registration forms are available from Council.

Food Premises

78. Council's Community Standards section shall be notified in writing that the premises will be used for the preparation, manufacture or storage of food for sale. The premises will be registered on Council's database.
79. Certificates of design compliance and system performance for the proposed mechanical ventilation system shall be provided to the PCA, certifying the design, and upon commissioning of the mechanical ventilation system(s), certifying performance. The certificate of performance shall be issued to the certifying authority and be accompanied by details of the test carried out in respect of: -
- (a) Ventilation
 - (b) Acoustics

Liverpool City Council clearance – Roads Act/ Local Government Act

80. Prior to the issue of an Occupation Certificate, the Principal Certifying Authority shall ensure that all works associated with a S138 Roads Act approval or S68 Local Government Act approval have been inspected and signed off by Liverpool City Council.

Dilapidation Report

81. Any rectification works required by Council regarding the condition of Council infrastructure shall be undertaken, at full cost to the developer.

Services

82. Prior to the issue of an Occupation Certificate or Subdivision Certificate, written certification from all relevant service providers that the telecommunications infrastructure is installed in accordance with:
- The requirements of the Telecommunications Act 1997:
 - For a fibre ready facility, the NBN Co's standard specifications current at the time of installation; and
 - For a line that is to connect a lot to telecommunications infrastructure external to the premises, the line shall be located underground.

Unless otherwise stipulated by telecommunications legislation at the time of construction, the development must be provided with all necessary pits and pipes, and conduits to accommodate the future connection of optic fibre technology telecommunications.

Indented Parking Bays

83. The approved indented car parking bays, and internal road link, including signs and line markings and signposting for traffic management of the new road are to be completed.

Parking Restrictions Moondarra Drive

84. No parking is permitted during school hours on the northern side of Moondarra Drive, adjacent to the Western Sydney Parklands site. Relevant plans indicating the location of the signage restricting parking is to be submitted to Council's Traffic and Transport Department for approval.

G. CONDITIONS RELATING TO USE

The following conditions relate to the ongoing use of the premises:

Car Parking/Loading

85. A total of 124 off street car parking spaces must be provided on site inclusive of the additional 8 off street parking spaces generated by this proposal. One of the spaces must be designed and signposted/marked for the specific use of persons with a disability.
86. All parking areas shown on the approved plans must be used solely for this purpose.

Educational Establishments

87. Signage is to be provided and maintained within the drop off/pick up "kiss and drop" zone limiting parking within this area to a maximum of 5 minutes between 7.00 - 9.30am and 2.30 – 6.00pm on school days. The applicant is to cover the costs of installation and maintenance of the signage.
88. All staff car parking areas are to be clearly signposted limiting car parking for staff only. The applicant is to cover the costs of installation and maintenance of the signage.
89. The maximum capacity of the educational establishment is limited to 1150 students.
90. The maximum number of staff members on site at any one time is limited to 103.
91. Deliveries and service vehicles generated by this development are limited to 7.30am to 6.00pm. Deliveries and service vehicles are to be scheduled to access the site outside of peak am and pm pick up and drop off times to minimise conflict between different vehicle modes, pedestrians and conflict over car parking spaces.
92. Supervision of all students shall be undertaken at all times when they are involved in outdoor play/activities as well as the arrival and departure from school to ensure all practical measures are implemented to limit noise to neighbours.

93. A Complaints Handling register is to be prepared for the operation of the school. The Complaints register is to be kept by the schools principal or other suitable staff members and is to include the following:
- (a) Written record of any complaint received;
 - (b) Time and date of complaint received;
 - (c) Nature of complaint;
 - (d) How the school responded to the complaint and any further action required.

A copy of the Complaints Handling register is to be made available at the request of Liverpool City Council.

94. Information packages/letter drops are to be provided to all properties within a 250m radius of the school advising of any event (including both during and after scheduled school hours such as award and presentation nights, end of year celebrations etc) where an increase in the demand for off site car parking is expected.

Noise Management Plan

95. A noise management plan shall be developed and implemented in accordance with the recommendations of the approved acoustic report.

After School Events and Events During School Time

96. Any after school event is to cease no later than 9:30pm. This is to be clearly indicated in the plan of management prepared.
97. Any after-school event or event that is to be undertaken at the educational establishment that does not involve education of the students of the approved curriculum by rostered staff is not to take place more than 30 times within a calendar year.

Hours of Operation

98. Apart from the events stipulated in conditions 95 and 96 the educational establishment is to maintain the hours of operation approved under DA-288/2005 issued for Integrated development- Secondary School comprising of Admin, Chapel, Library, Science, Technology, two Classroom blocks, Multipurpose, Music Buildings, Carparking and associated landscaping, dated 7 March 2005.

Previous Development Consents

99. All the conditions of development consent DA-288/2005 granted for Integrated development- Secondary School comprising of Admin, Chapel, Library, Science, Technology, two Classroom blocks, Multipurpose, Music Buildings, Carparking and associated landscaping, dated 7 March 2005, shall be complied with at all times.

H. ADVISORY

- a) If you are dissatisfied with this notice of determination or the conditions contained within this notice of determination, Section 82A of the Environmental Planning and Assessment Act 1979 gives you the right to request a review of the determination within six months after the date on which the application is taken to have been determined.
- b) If you are dissatisfied with this decision, Section 97AA of the Environmental Planning and Assessment Act 1979 gives you the right to appeal to the Land and Environment Court within six months after the date on which the application is taken to have been determined.
- c) In accordance with Section 95 of the Environmental Planning and Assessment Act 1979, unless otherwise stated by a condition of this consent, this consent will lapse unless the development is commenced within five (5) years of the date of this notice.
- d) In accordance with Section 98 of the Environmental Planning and Assessment Act 1979, an objector who is dissatisfied with the determination of a consent authority to grant consent to a development application for designated development (including designated development that is integrated development), may, within 28 days after the date on which the application is taken to have been determined, appeal to the Land and Environment Court.
- e) These conditions are imposed to control development, having regard to 79C of the Environmental Planning and Assessment Act 1979.
- f) The approval of this application does not imply or infer compliance with the Disability Discrimination Act and that the developer should investigate their liability under the Act.
- g) The requirements of all authorities including the Environmental Protection Authority and the Work Cover Authority shall be met in regards to the operation of the building.
- h) "DIAL BEFORE YOU DIG" DIAL 1100

Underground assets may exist in the area that is subject to your application. In the interest of health and safety and in order to protect damage to third party assets please contact Dial before you dig at www.1100.com.au or telephone 1100 before excavating or erecting structures (This is the law in NSW). If alterations are required to the configuration, size, form or design of the development upon contact the Dial before You Dig service, an amendment to the development consent (or a new development application) may be necessary. Individuals owe asset owners a duty of care that must be observed when working in the vicinity of plant or assets. It is the individual's responsibility to anticipate and request the nominal location of plant or assets on the relevant property via contacting the Dial before you dig service in advance of any construction or planning activities.

- i) TELECOMMUNICATIONS ACT 1997 (COMMONWEALTH)

Telstra (and its authorised contractors) are the only companies that are permitted to conduct works on Telstra's network and assets. Any person interfering with a facility or installation owned by Telstra is committing an offence under the Criminal Code Act 1995 (Cth) and is liable for prosecution.

Furthermore, damage to Telstra's infrastructure may result in interruption to the provision of essential services and significant costs. If you are aware of any works or proposed works which may affect or impact on Telstra's assets in any way, you are required to contact: Telstra's Network Integrity Team on Phone Number 1800 810 443.

- j) You are advised that the placement of a concrete path around your home may render your home vulnerable to termite attack. To minimise the possibility of any damage, ensure that a minimum of 75mm clearance is provided between the base of the weephole and the level of the path.
- k) The obligation to comply with the Category 1 fire safety provisions may require building work to be carried out even though none is proposed or required by other conditions of this consent.
- l) The Liverpool City Council Local Government area soils and ground water may be subject to varying levels of Salinity. Whilst Council may require applicants to obtain Salinity reports relating to some developments, no assessment may be made by Council in that regard. Soil and ground water salinity levels can change over time due to varying factors. It is recommended that all applicants make their own independent inquiries as to appropriate protection against the current and future potential affect of Salinity to ensure the ongoing structural integrity of any work undertaken. Liverpool City Council will not accept any liability for damage occurring to any construction of any type affected by soil and or ground water Salinity.
- m) The cost of any necessary adjustments to utility mains and services shall be borne by the applicant.
- n) Care shall be taken by the applicant and the applicant's agents to prevent any damage to adjoining properties. The applicant or the applicant's agents may be liable to pay compensation to any adjoining owner if, due to construction works, damage is caused to such an adjoining property.

ATTACHMENT (A)

Food Premises – Restaurant/Take-Away/Bakery

1. All walls (including partition walls) within the kitchen, food preparation, storage and display areas shall be of solid construction (eg., bricks, cement or other approved material). These walls are to be finished with glazed tiles, stainless steel or other approved material adhered directly to the wall to a height of 2 metres above floor level.
2. Walls within the kitchen, food preparation, storage and display areas which are not of solid construction (eg., stud walls) shall be finished in tiles or other approved material from the floor level to the underside of the ceiling.
3. The floors within the kitchen, food preparation, storage and display areas shall be constructed of a suitable material which is non-slip, durable, resistant to corrosion, non-toxic, non-absorbent and impervious to moisture. The floor is to be graded and drain to an appropriate floor waste fitted with a basket arrestor.
4. If the floor in the food preparation and storage areas is constructed of tiles, the joints between the tiles shall be of a material that is non-absorbent and impervious to moisture.
5. The intersection of walls with floors and exposed plinths in the kitchen, food preparation, storage and display areas are to be coved to a minimum radius of 25mm.
6. All plinths are to be constructed of a material which is of solid construction and impervious to moisture. The plinths shall be:
 - (a) at least 75mm high;
 - (b) finished level to a smooth even surface;
 - (c) recessed under fittings to provide a toe space of not more than 50mm;
 - (d) rounded at exposed edges; and
 - (e) coved at the intersection of the floor and wall to a minimum radius of 25mm.
7. The ceiling is to be constructed of a material that is rigid, smooth faced and impervious to moisture. The ceiling over the food preparation, storage and display areas shall be painted with a washable paint of a light colour. The surface finish is to be free of open joints, cracks, crevices or openings (drop ceiling panel is not permitted). The intersections of walls and the ceiling are to be tight jointed, sealed and dust-proof.
8. The drop-in panel ceiling in the food preparation and storage areas shall be replaced with an approved rigid, smooth faced and impervious material which is free of open joints, cracks, crevices or openings. The ceiling is to be painted with a light coloured washable paint.

9. All service pipes and electrical conduits shall be either:
 - (a) concealed in floors, walls, ceiling or concrete plinths, or
 - (b) fixed with brackets so as to provide at least
 - i) 25mm clearance between the wall and the pipe/conduit; &
 - ii) 100mm between the floor and the pipe/conduit
 - (c) pipes so installed are not to run underneath fittings.
10. All architraves, skirting boards, picture rails and the like are not permitted within the kitchen, food preparation and storage areas.
11. All openings in the walls, floors and ceilings through which service pipes and electrical conduits pass through are to be designed and constructed so as to prevent the access of vermin.
12. The internal and external surfaces, including exposed edges to all benches, counters and shelving in the food preparation, storage, display and serving areas are to be finished with a rigid, smooth faced and non-absorbent material (eg laminate, stainless steel or other approved material) that is capable of being easily cleaned.
13. All shelving shall be located at least 25mm off the wall or alternatively, the intersection of the shelf and the wall is to be completely sealed. NOTE: The lowest shelf shall be a minimum of at least 150mm above the floor level.
14. The hot water service unit shall be positioned a minimum of 75mm clear of the adjacent wall surface and mounted a minimum of 150mm above the floor level on a stand of non-corrosive metal construction.
15. A free standing, hands free hand wash basin shall be provided in a convenient position within the food preparation and serving areas. The hand wash basin shall be provided with hot and cold water supplied through a single outlet and fitted with an approved mixing device to enable hands to be washed under hot running water at a temperature of at least 40C.
16. Cavities, false bottoms and similar hollow spaces capable of providing access and harbourage of vermin are not permitted to be formed in the construction of the premises or in the installation of fixtures, fittings and equipment.
17. A double bowl sink or two-compartment tub shall be provided with hot and cold water supplied through a single spout in the kitchen/food preparation area. Double bowl sink or tubs shall be supplied with water of at least:
 - (a) 45C in one bowl for washing purposes; and
 - (b) 77C in the other bowl for rinsing purposes, together with a thermometer accurate to 10C.

8 October 2015

Dear Sir/Madam

Integrated Development for 1013//1079422 201 Carmichael Drive West Hoxton NSW 2171

I refer to your letter dated 14 August 2015 seeking general terms of approval for the above Integrated Development in accordance with Section 91 of the 'Environmental Planning and Assessment Act 1979'.

This response is to be deemed a bush fire safety authority as required under section 100B of the 'Rural Fires Act 1997' and is issued subject to the following numbered conditions:

Asset Protection Zones

The intent of measures is to provide sufficient space and maintain reduced fuel loads so as to ensure radiant heat levels of buildings are below critical limits and to prevent direct flame contact with a building. To achieve this, the following conditions shall apply:

1. At the commencement of building works and in perpetuity the entire property shall be managed as an inner protection area (IPA) as outlined within section 4.1.3 and Appendix 5 of 'Planning for Bush Fire Protection 2006' and the NSW Rural Fire Service's document 'Standards for asset protection zones'.

Evacuation and Emergency Management

The intent of measures is to provide suitable emergency and evacuation (and relocation) arrangements for occupants of special fire protection purpose developments. To achieve this, the following conditions shall apply:

2. An updated Emergency /Evacuation Plan is to be prepared consistent with the NSW Rural Fire Service document 'Guidelines for the Preparation of Emergency/Evacuation plan'.

Design and Construction

The intent of measures is that buildings are designed and constructed to withstand the potential impacts of bush fire attack. To achieve this, the following conditions shall apply:

3. New construction shall comply with Sections 3 and 5 (BAL 12.5) Australian Standard AS3959-2009 'Construction of buildings in bush fire-prone areas' and section A3.7 Addendum Appendix 3 of 'Planning for Bush Fire Protection'.

Landscaping

4. Landscaping to the site is to comply with the principles of Appendix 5 of 'Planning for Bush Fire Protection 2006'.

For any queries regarding this correspondence please contact Aaron Howard on 1300 NSW RFS.

Yours sincerely

Jason Maslen

Acting Team Leader Development Assessment and Planning
