Attention: Mr Peter Cahill

Dear Peter

**Bennett's Green
Proposed Development at Pacific Highway, Windale
Development Application DA/251/2013/A**

Dear Peter

We refer to Ausgrid correspondence dated 14/08/2017 to Mr Brian Gibson, Lake Macquire City Council .

We have contacted Mr Wayne Armstrong from Ausgrid and have discussed the proposed development with Ausgrid and advise of our discussions as follows:

- Once the final details of the development plan have been confirmed, we will write to Ausnet to obtain their engagement for the project.
- An authorized Ausgrid third party designer is to undertake the detail design of the electrical infrastructure for the site. This will include transformers, new HV feeders and augmentation of the HV infrastructure.
- Ausgrid confirm that there is no existing infrastructure which is required to be relocated to suit the development.
- Our initial discussions with Ausgrid involve the implementation of three off pad mounted transformers to serve the development. Final locations of the transformers will be determined as the design develops.
- The above approach is in accordance with Ausgrid's methodology to augment their infrastructure to suit this development.

We trust the above is in accordance with your requirements and satisfies the Macquarie City Council immediate concerns.

Yours sincerely

(Hugh Van Essen)
(Director)
