1.0 SITE UNDERSTANDING

1.1 SITE UNDERSTANDING_CONTEXT

The Site is located at the centre of the St George District, just 15 kilometres south of the Sydney CBD and 5 kilometres south west of Sydney's Kingsford Smith International and Domestic Airports.

The site is located south of Kogarah town centre with frontage onto Rocky Point Road. The urban neighbourhood character of Rocky Point Road and west of Scarborough Park and Leo Smith Reserve, consists of low rise residential and industrial buildings. Importantly St George Hospital and St George TAFE dominate the region, being located on higher ground adjacent to Kogarah town centre.

To the immediate north of the site is an industrial precinct defined by a number of low-rise warehouse buildings. To the east of the site are a sequence of open landscape spaces associated with a chain of wetlands. To the immediate south and west of the site and west of Rocky Point Road, the urban pattern becomes more suburban defined by free standing houses. With Rocky Point Road aligned north south, the pattern of the local streets which make

2.0 DESIGN VISIONING

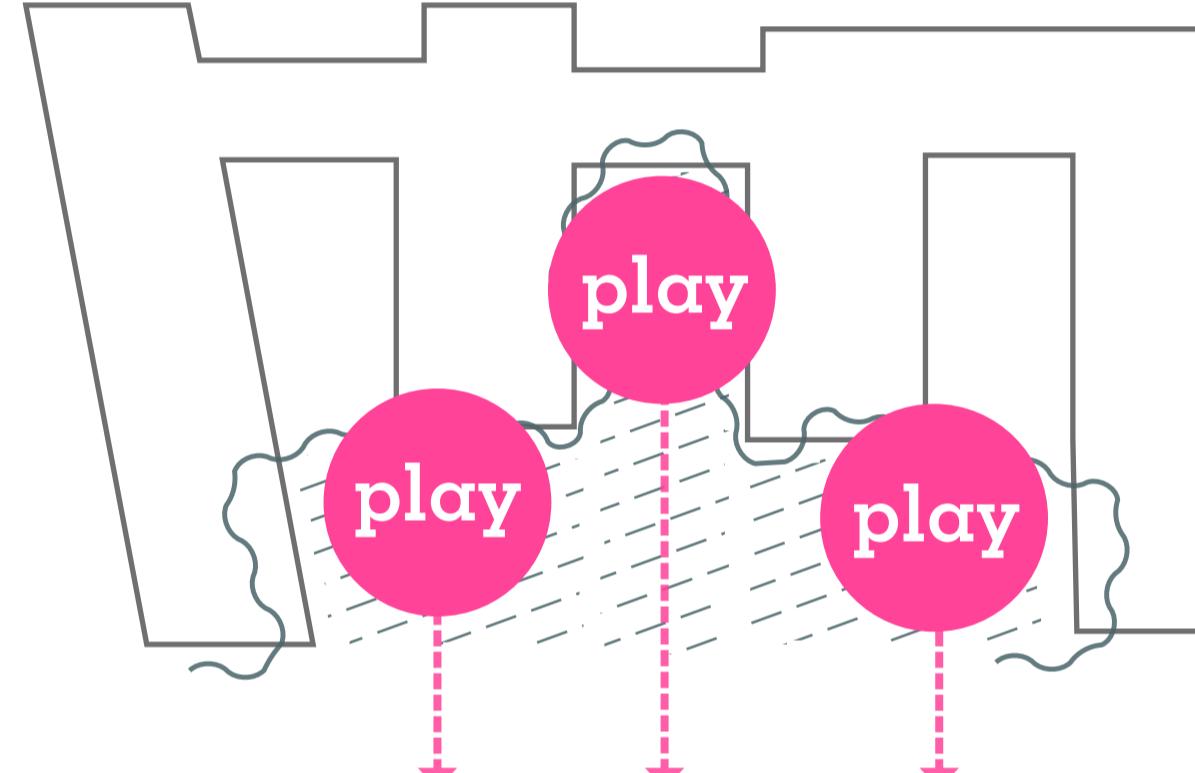

2.1 DESIGN VISIONING _ DESIGN PRINCIPLES

Connecting Amenity

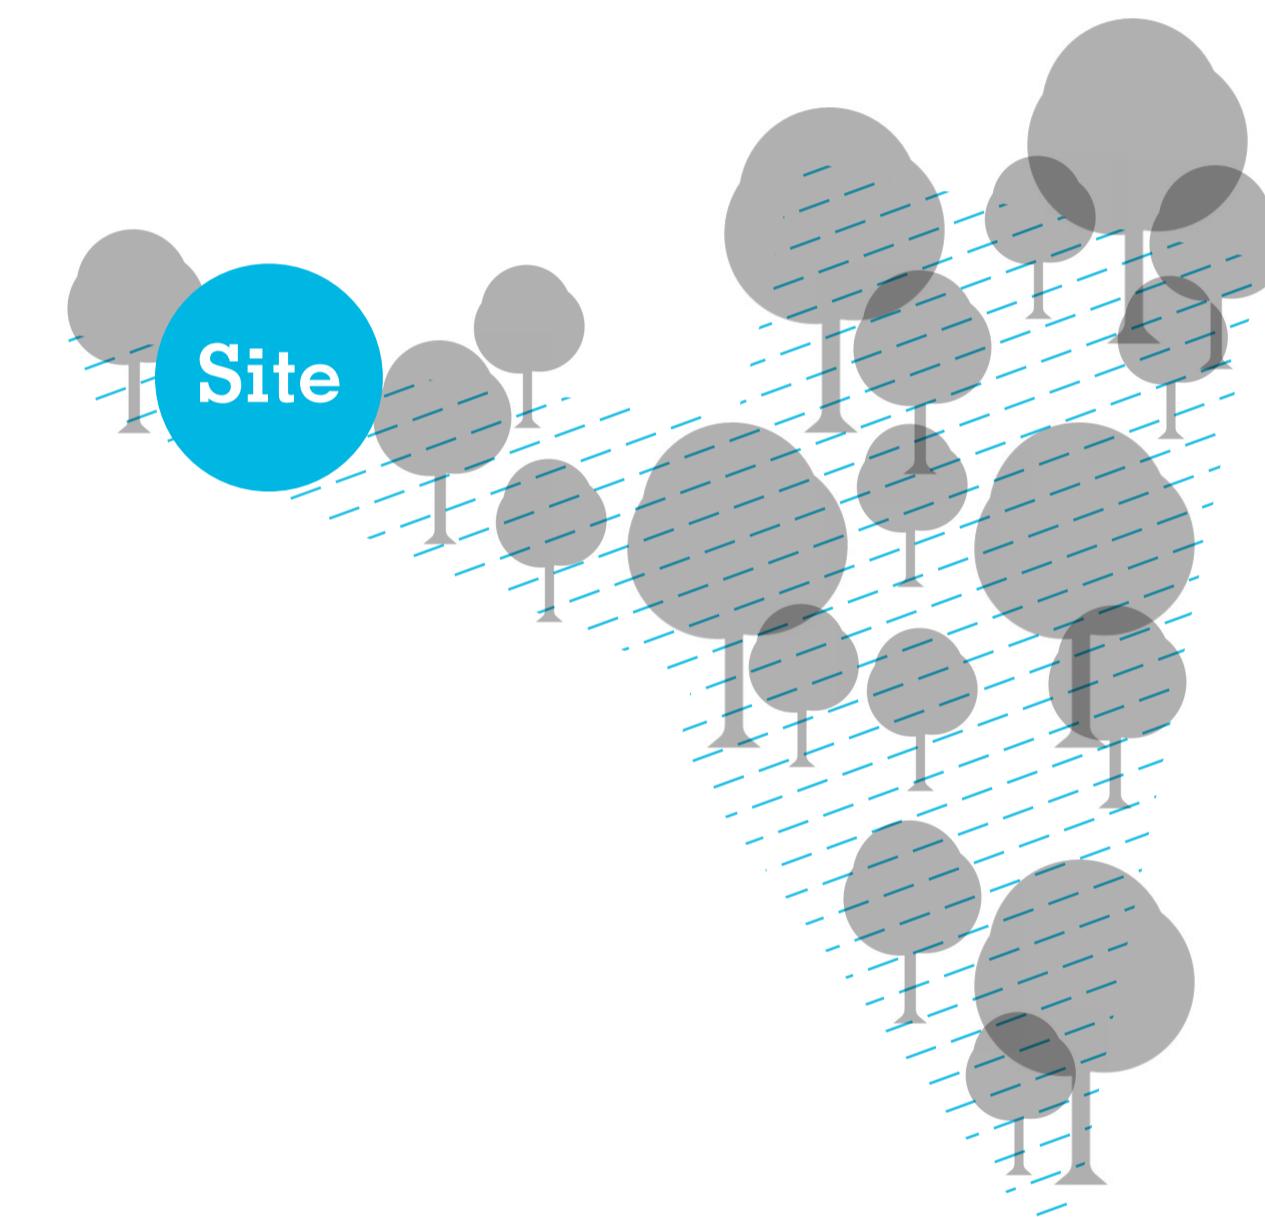

Central to the structure is a focus on creating a healthy living community incorporating all aspects of wellbeing – physical, mental and social. Sitting in the middle of a diverse range of public amenity, the site will play a pivotal role in connecting these recreational spaces together.

A Place for Play

The diverse collection of spaces provided within the public realm places a strong emphasis on the outdoors, recreation and social engagement. Passive and active recreation, playfulness, colour and whimsy will be scattered throughout the public domain.

Reinstate Natural Areas

Drawing upon the existing woodland remnants within the Hawthorne Street Natural Area will contribute to native vegetation corridors improving quality of life as the area becomes increasingly urbanised. bringing this landscape language into the site will improve quality of life.
