

Line above indicates the parapet line of an 8.5m LEP compliant residential structure. This line indicates the impact of a compliant structure on the views from this Unit.

3.500m

A photograph of a window view from an interior space. The window is divided into several panes. A bright green line is drawn across the upper portion of the window, starting from the left edge and extending towards the right. A white rectangular box is overlaid on the right side of the window, containing green text. The view outside the window shows a blue sky with clouds, a palm tree, and a building with a patterned facade. The green line appears to be a technical annotation, likely representing a height or boundary line as described in the text box.
