Figure 1 is a line graph showing the relationship between the number of days after the start of the study (X-axis) and the number of days until the first seizure (Y-axis). The X-axis ranges from 0 to 30 days, and the Y-axis ranges from 0 to 30 days. The graph shows a positive correlation, with the number of days until the first seizure increasing as the number of days after the start of the study increases.
