(continued)

Figure 1. A schematic diagram of the experimental design. The subjects were divided into two groups: the control group and the experimental group. The control group received a standard training program, while the experimental group received a modified training program. The results of the training program were compared between the two groups.

This image shows a single page of blank musical manuscript paper. It features ten horizontal staves, each consisting of five lines. The staves are evenly spaced and run across the width of the page. There are no notes, clefs, or other markings on the paper.[illegible][illegible][illegible][illegible][illegible]

Type	Description	Waste management calculations (blocks a + d)	Waste management calculations (blocks b + e)
→	peak of mixed residents	estimated waste (kg) per building $\text{kg} \times \text{number of buildings} = \text{total}$	estimated waste (kg) per building $\text{kg} \times \text{number of buildings} = \text{total}$
→	peak of mixed services occupation	estimated waste (kg) per unit $\text{kg} \times \text{number of units} = \text{total}$	estimated waste (kg) per unit $\text{kg} \times \text{number of units} = \text{total}$
□□□	people (in 600s)	people (in 600s) $\text{people} \times \text{kg per person} = \text{total}$	people (in 600s) $\text{people} \times \text{kg per person} = \text{total}$
□□□	ground waste bin 600L	ground waste bin 600L $\text{ground waste bin} \times \text{number of bins} = \text{total}$	ground waste bin 600L $\text{ground waste bin} \times \text{number of bins} = \text{total}$
□□□	dual garbage chute	dual garbage chute $\text{dual garbage chute} \times \text{number of chutes} = \text{total}$	dual garbage chute $\text{dual garbage chute} \times \text{number of chutes} = \text{total}$

note: Dual chain will be used (recycling and general).
All bins will be lined or linerless 1 (new) black & 1 black d)
then taken up into a garbage lift to be merge and
collected by garbage truck.
