

Boundaries have been compiled from plans sourced from Land and Property Information (LPI) that were available at the time of survey. The boundary overlay is approximate only.

A full boundary survey should be undertaken if boundary dimensions and areas are critical.

| ⊙ | STORMWATER GULLY PIT |
| ⊙ | INSPECTION OPENING |
| ⊙ | MANHOLE |
| ⊙ | PUMP STATION |
| ⊙ | INACCESSIBLE PIT |

NOTES

This plan shows the approximate location of main underground services within the site. Public Works Advisory does not guarantee that all underground services have been located.

Some surface evidence may not have been identified at the time of the survey due to site impediments.

The services have been identified from surface evidence, plans and pipe and cable location device where appropriate. Location of underground services as shown are indicative only and do not represent the number, size or depth of cables, pipes or conduits.

Services between surface evidence (such as manholes) have been assumed to be straight unless plans or a pipe and cable location device indicate otherwise.

Where the location of a service could not be confirmed due to a lack of surface evidence, the service has been plotted from plans and notated accordingly. SASIS does not guarantee the accuracy, correctness and completeness of these plans.

Prior to and during any demolition, excavation or construction the contractor or designer must obtain a current search from 'Dial Before You Dig'.

This statement is an integral part of this plan. Reproduction of this plan or any part of it without this statement being included in full will render the information invalid and not suitable for use.

SERVICE DETAILS

A) visual evidence is shown to survey accuracy

B) inverts & diameters are shown where reasonable access was obtained

C) direction of services shown have been derived from visual evidence and when in agreement with Service Authority W&S drawings

D) direction of services NOT SHOWN is due to an uncertainty when comparing visual location with service diagrams

E) service details should be confirmed with the relevant Service Authorities during design and prior to construction
