Planning Panels Secretariat

Mellissa.Felipe@planning.nsw.gov.au

Further to my original assessment report, I am writing to advise that I intend on providing an update to the Panel regarding proposed Condition 6.

I note that Condition 6 was originally based on significant infrastructure which is obvious and identified in Council's mapping system i.e. the Nestle Purina Factory and APA Group gas pipe.

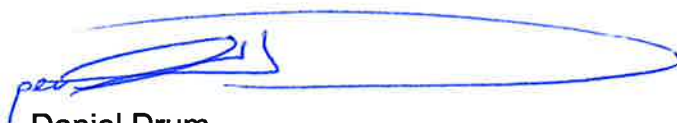

Based on the recommendations of the EPA, it is considered that this condition should also apply to other infrastructure in the immediate area, including infrastructure operated by Cadia Valley Operations (Newcrest), Jemena and Central Tablelands Water.

I intend on confirming the relevant infrastructure prior to the Planning Panel Hearing.

I would appreciate if this matter could be brought to the attention of the Panel members.

If you have any queries please contact Council's Manager Planning, Mr Daniel Drum, on 6368 2104.

Yours faithfully

Daniel Drum
Manager Planning
