LANDSCAPE ANALYSIS SITE BACKGROUND

The CHL site located at Lewisham originally was integrated as a as a larger complex with a surrounding Church precinct, presbytery and school buildings. The site was then converted to a Hospital. The existing Ann Walsh building on site was used as the outpatient building, the remaining existing buildings are located on the adjacent St Vincent de Paul site.

By 1980 the former Novitiate Building was adopted for use as the Lewisham Nursing Home. In 1992 the Lewisham Hostel was constructed at the southern end of the site, further expanding facilities and accommodation.

2012 a new service opened in Northbridge, Sydney

2014 a new retirement community was opened at Croydon

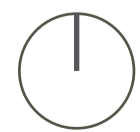

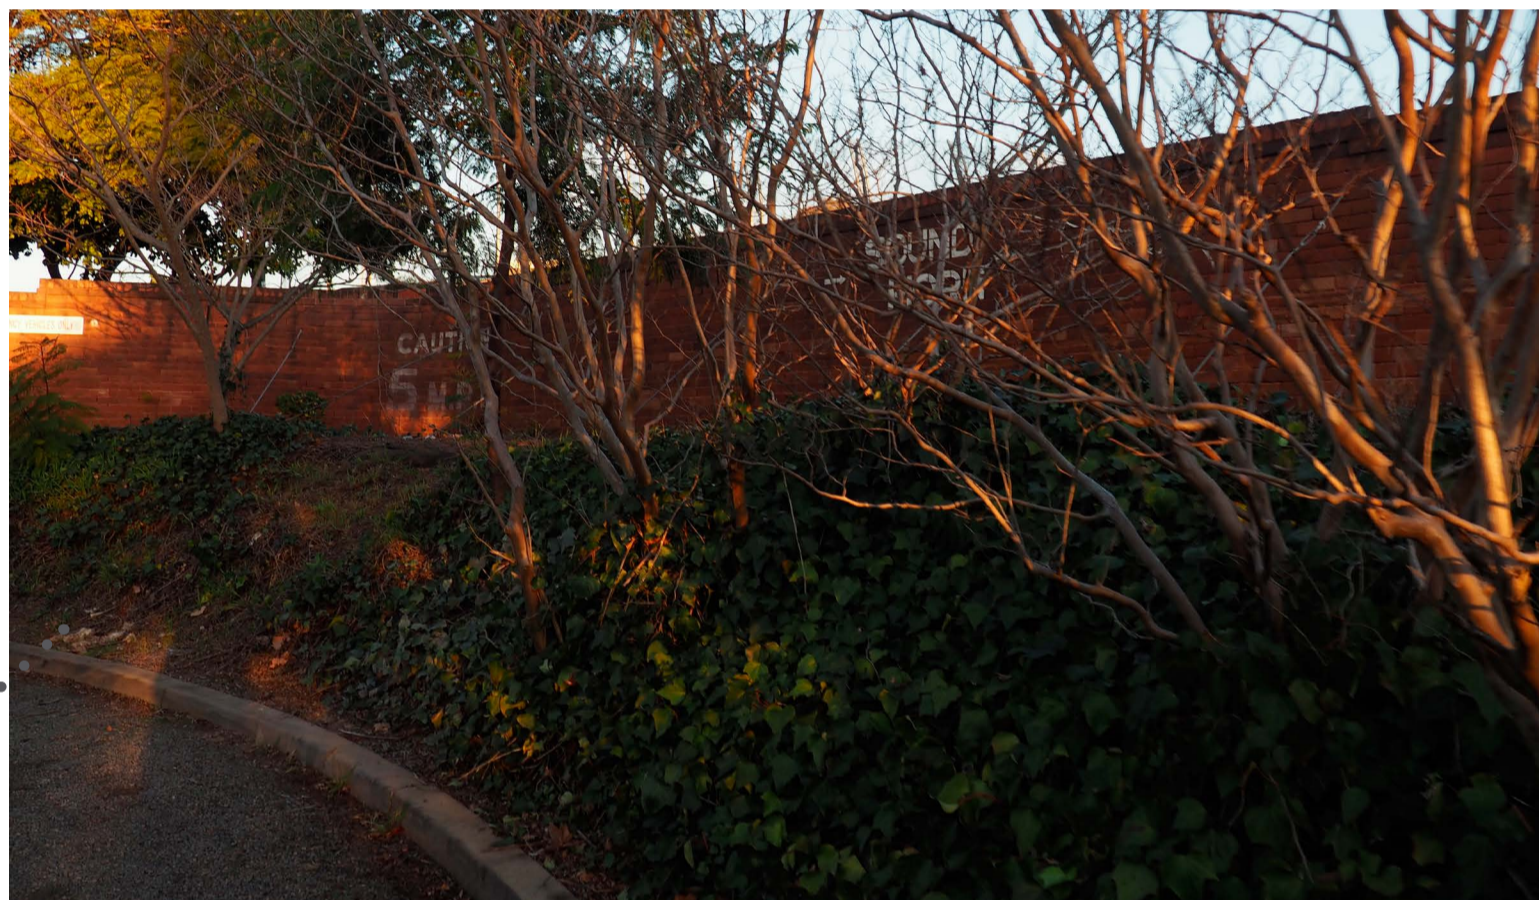

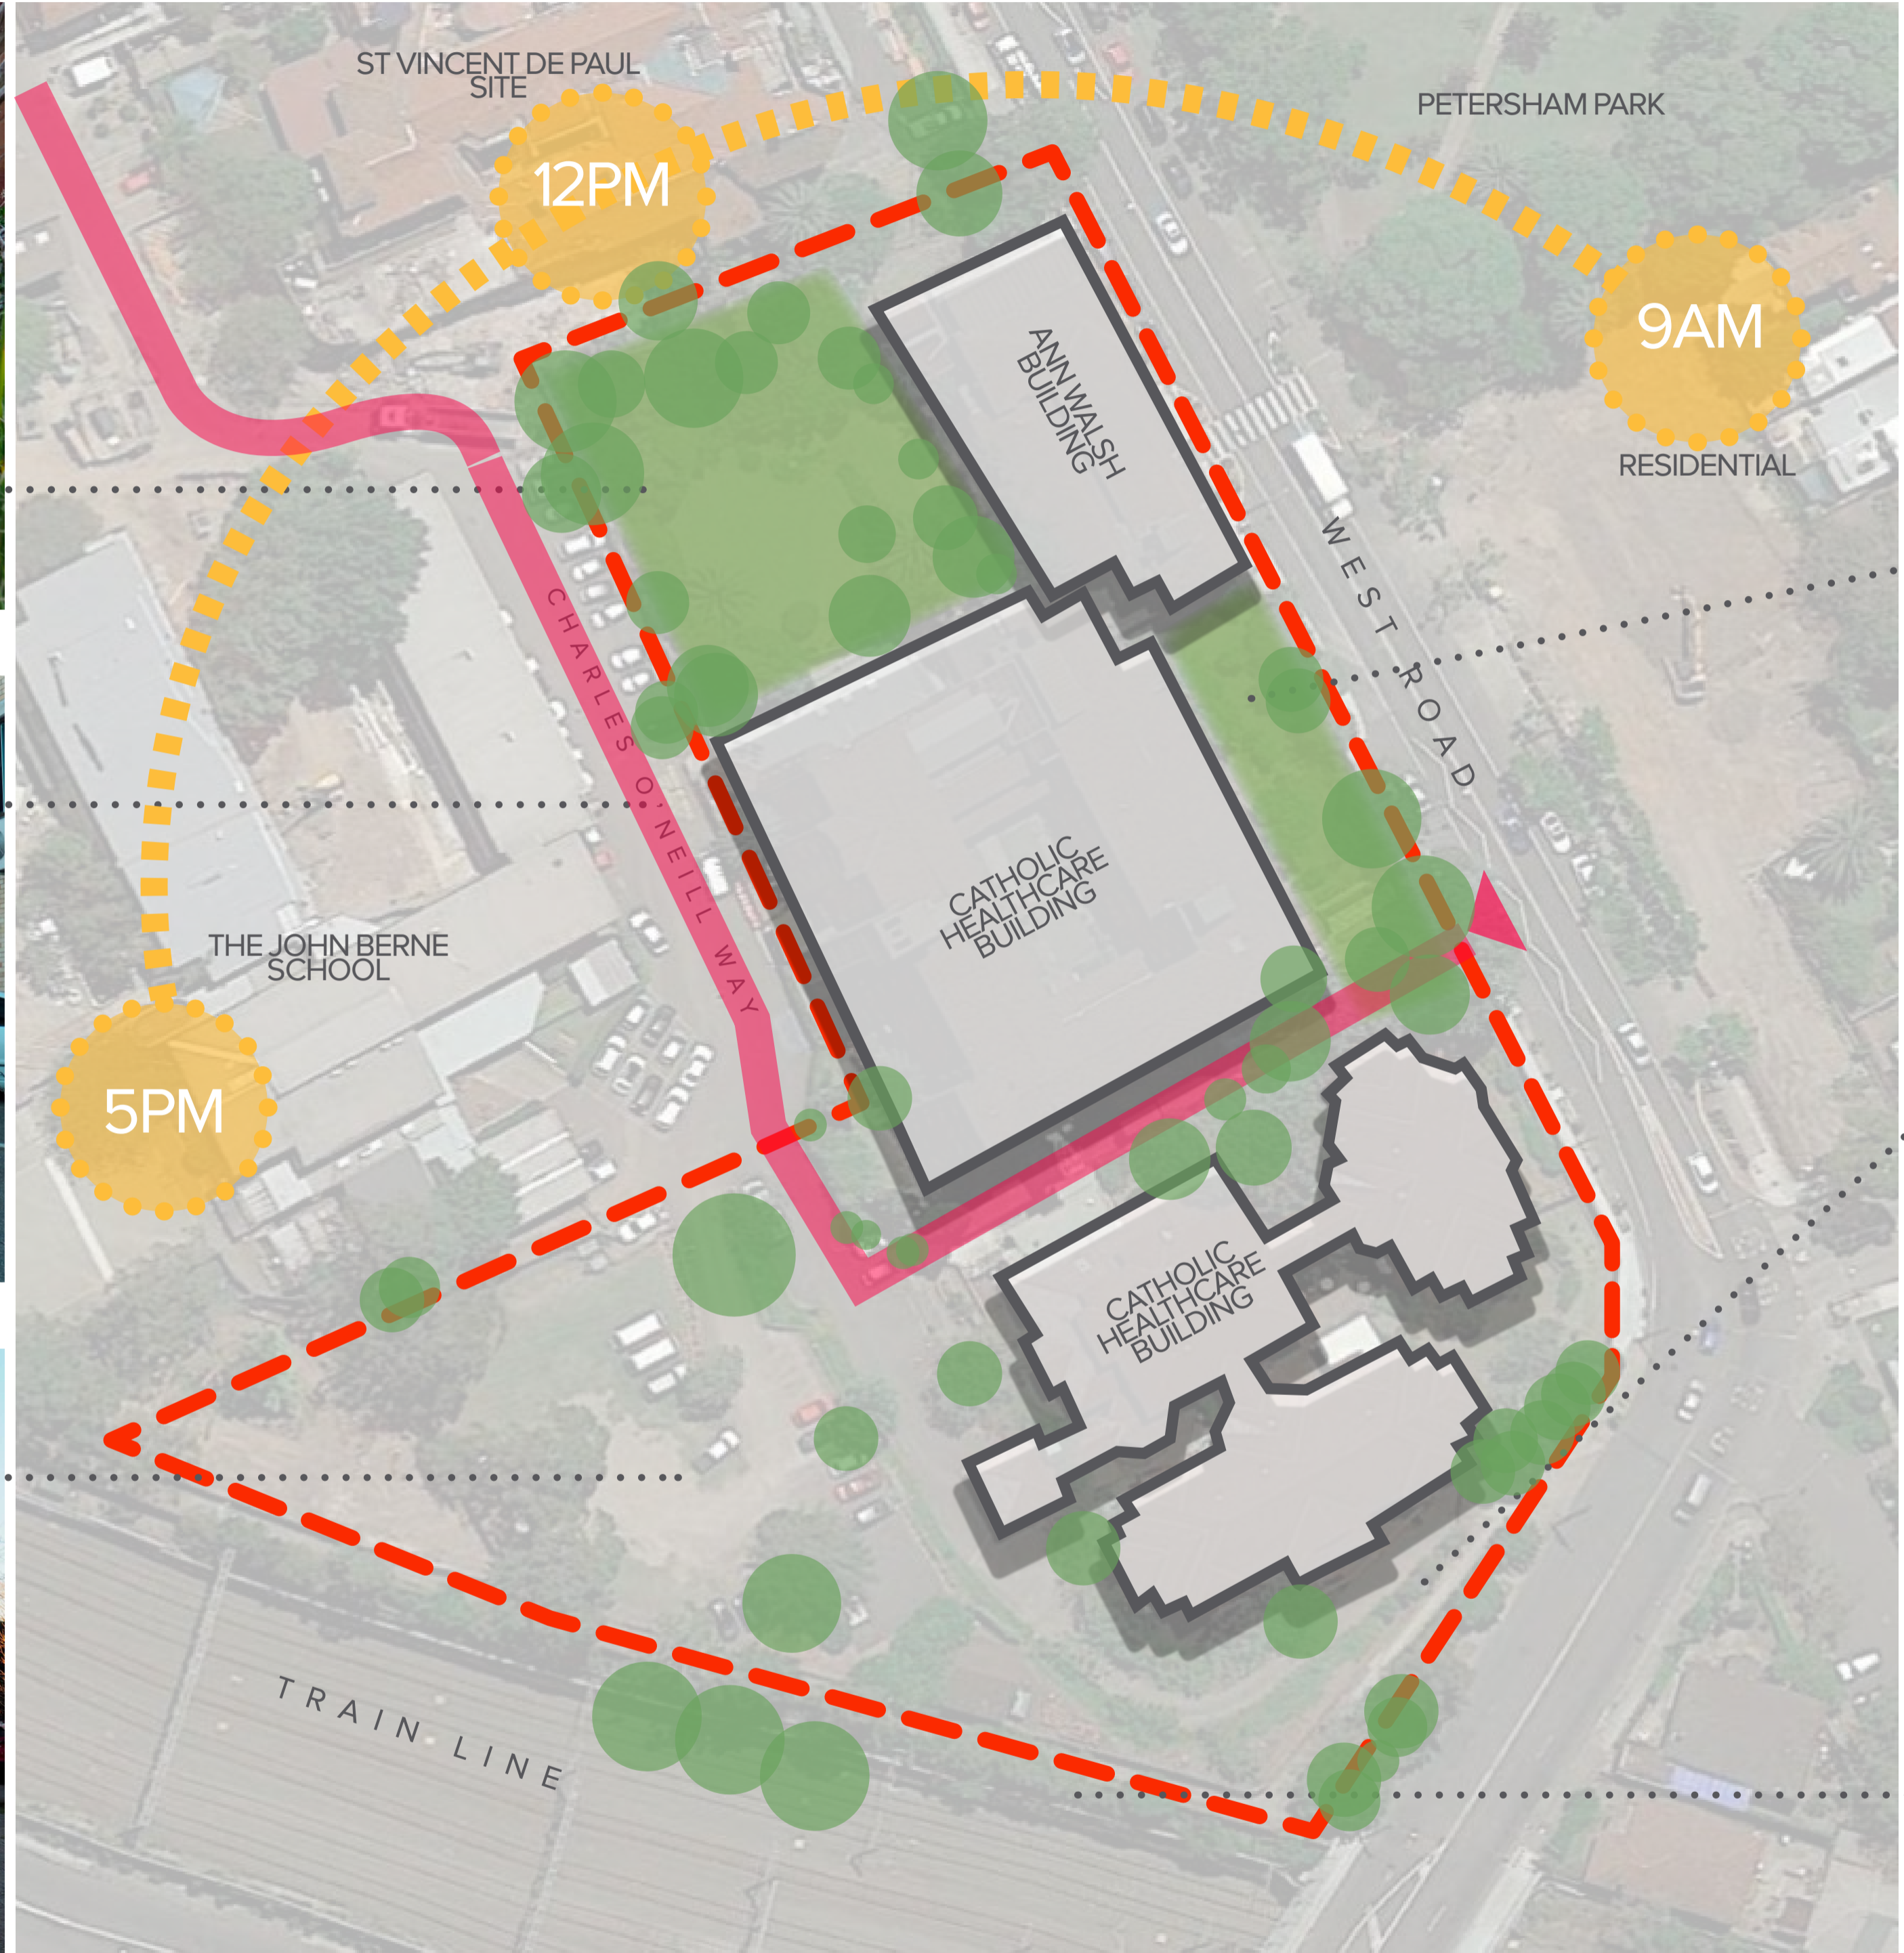

2017 opened a brand new aged care service in Bathurst and are soon to open a new service on the existing McQuoin Park site in Wahroonga

LANDSCAPE VISION ACCESS TO LANDSCAPE

Access to nature and the outdoors has long been considered both therapeutic and is known to have significant health benefits. Time outdoors can improve sleeping patterns, reduce soreness, improve mental health and even increase longevity.

LANDSCAPE DESIGN VS UTILISATION

The physical environment plays a role in promoting physical activity. However in spite of the aforementioned health benefits, outdoor spaces in retirement / care facilities are often reported as underutilised by residents - according to a study undertaken by Texas A&M University which assessed how landscape design influenced outdoor usage at assisted living facilities.*

The findings suggest that the following landscape features had a strong correlation with behavior, in turn increasing outdoor usage:

The features on the right were found to increase outdoor usage by up to 3.5 times while the features on the left had an even stronger impact on outdoor usage.

It is becoming increasingly important to try and find cost-effective ways to promote healthy lifestyles and maintain health among an aging populations. These findings reinforce the fact that landscapes which promote and encourage healthy behaviour are a relatively permanent and long term cost-efficient investment, in comparison to the likes of programmed activities that require ongoing costs and staff support as a continued service.

TURF ALL LANDSCAPE AREAS AS SHOWN ON THE LANDSCAPE DRAWINGS. TURF IS TO HAVE AN EVEN THICKNESS OF NOT LESS THAN 25MM. OBTAIN TURF FROM AN APPROVED GROWER, FURNISH A WARRANTY FROM THE GROWER THAT THE TURF IS FREE FROM WEEDS AND OTHER FOREIGN MATTER. DELIVER TURF TO THE SITE WITHIN 24 HOURS OF BEING CUT, AND LAY IT WITHIN 24 HOURS OF BEING DELIVERED.

TO PREPARE GRADED AREAS TO RECEIVE TURF, EXCAVATE THE AREA AND CULTIVATE SO AS TO ALLOW FOR IMPORTING OF 100MM OF TURF UNDERLAY SOIL. REMOVE ALL STONES OVER 50MM Ø AND REMOVE ALL WEEDS AND FOREIGN MATTER. SPREAD SOIL MIX A.B.S TO A DEPTH OF 100MM AND GRADE TO APPROPRIATE LEVELS TO ACHIEVE GENERAL EVEN GRADES TO DRAINAGE OUTLETS INSTALLED BY OTHERS.

LAY THE TURF ALONG THE LAND CONTOURS WITH STAGGERED, CLOSE BUTTED JOINTS. SO THAT THE FINISHED TURF SURFACE IS FLUSH WITH ADJACENT FINISHED SURFACES OF PAVING AND THE LIKE. AS SOON AS PRACTICABLE AFTER LAYING, ROLL THE TURF WITH A ROLLER WEIGHING NOT MORE THAN 90KG PER METRE OF WIDTH FOR SANDY OR LIGHT SOILS.
