

CONDITIONS OF CONSENT

General Conditions

1) **~DAGCA01 - Approved Plans and Supporting Documents**

The development shall be carried out substantially in accordance with the approved stamped and signed plans and/or documentation listed below **except where modified by any following condition**. Where the plans relate to alteration or additions only those works shown in colour or highlighted are approved.

<i>Reference</i>	<i>Document</i>	<i>Prepared By</i>	<i>Date/s</i>
DA0000(C), 0101(B), 0102(C), 0103(B), 0201(B), 0202(B), 0203(A), 1001(C), 1201(C), 1202(C), 1203(C), 1204(C), 1213(C), 3001(C), 3002(C) and 3003(C)	Architectural plans	DWP	13/05/2019

***Note 1:** Modifications to the approved plans will require the lodgement and consideration by Council of a modification pursuant to Section 4.55 of the Environmental Planning and Assessment Act.*

***Note 2:** A warning to all Accredited Certifiers. You should always insist on sighting the original Council stamped approved plans/documentation and not rely solely upon the plan reference numbers in this condition. Should the applicant not be able to provide you with original copies, Council will provide you with access to its files so you that may review our original copies of approved documentation.*

***Note 3:** The approved plans and supporting documentation may be subject to conditions imposed under section 4.17 of the Act modifying or amending the development (refer to conditions of consent which must be satisfied prior to the issue of any Construction Certificate).*

(Reason: To confirm and clarify the terms of consent)

2) ~DAGCA03 - Construction within Boundary

All approved construction including but not limited to footings, walls, roof barges and guttering are to be constructed wholly within the boundaries of the premises.

(Reason: To ensure compliance with approved plans)

3) ~DAGCB04 - Food Premises - General

The construction and operation of the food premises shall comply with all applicable legislation/regulation and standards, including:

- The Food Act 2003
- Food Regulation 2015
- Food Standards Australia and New Zealand - Food Standards Code
- The cooking appliances require an approved air handling system designed in accordance with AS1668.1-1998 and AS1668.2-1991 or alternative solution satisfying the performance objectives of the Building Code of Australia. No approval is granted for the burning of wood fired fuel.
- The construction, fitout and finishes of the food premises must comply with Standard 3.2.3 of the Australian and New Zealand Food Standards Code under the *Food Act 2003* and AS 4674 - Design, Construction and Fitout of Food Premises where:
 - (a) The floor of the food premises must be finished in an approved non-absorbent material, evenly laid, graded and drained to a trapped floor waste.
 - (b) The floor must be coved at the intersection with the walls.
 - (c) The walls of the food preparation area must be of solid construction and finished with glazed ceramic tiles or other rigid, smooth-faced impervious material.
 - (d) Ceilings within the food preparation and storage areas must be free of gaps and open joints and must be finished with an impervious sealed material. Suspended ceiling panels are not permitted in food preparation areas, food storage areas or areas where open food is displayed or served.
 - (e) Hand wash basin/s, with hot and cold running water mixed through a common spout, liquid hand wash soap and hand drying facilities must be provided in all

food preparation bar areas, and toilets used by food handlers and must be no further than 5m travel distance from a place where a food handler is handling food. All taps to hand wash basins must be hands free. (For example: sensor taps, knee operated taps or foot pedal taps). Liquid soap and paper towel dispensers or other hand drying facilities must be located next to and in close proximity the hand wash basin.

- (f) A single bowl sink and a dishwasher must be provided in the food preparation or designated area, (of a capacity to handle the food preparation equipment) in addition to the hand basin.
- (g) A separate and dedicated food preparation sink is to be provided within the food premises (where foods are prepared by immersion in water.)
- (h) A cleaners sink for the purpose of cleaning floor mops and other cleaning equipment must be provided within the premises separate from the food preparation and storage area.
- (i) The appliances used to store potentially hazardous food must have a capacity to keep food hotter than 60oC or colder than 5oC and be provided with a thermometer, accurate to 1oC and which can be easily read without opening the appliance.
- (j) All self service unpackaged ready to eat food must be provided and maintained with protective barriers and have separate serving utensils, in accordance with Standard 3.2.2 of the *Food Standards Code* under the *Food Act 2003*.
- (k) Clothing lockers and change rooms for male and female staff must be provided in the premises in a separate location to the food handling and storage areas.
- (l) To ensure the adequate storage and collection of waste, all garbage and recyclable materials emanating from the premises must be stored in a designated waste storage area. The waste storage area must be designed and constructed in accordance with AS 4674 - Design, Construction and Fitout of Food Premises, and must be:
 - i. Provided with a hose tap connected to the water supply;
 - ii. Paved with impervious floor materials;
 - iii. Coved at the intersection of the floor and walls;
 - iv. Graded and drained to a waste disposal system in accordance with the relevant regulatory authority (Sydney Water);
 - v. Adequately ventilated (mechanically if necessary) so that odour emissions do not cause offensive odour as defined by the Protection of the Environment Operations Act 1997;

Detailed plans and specifications for the construction of the waste storage area are to be submitted to the Certifying Authority with the Construction Certificate.

- (m) Cool room(s), refrigerated chambers and strong-rooms are to be constructed in accordance with G 1.2 of the Building Code of Australia.
- (n) The floor of the coolroom must be graded to the door and a floor trapped waste outlet must be located outside the coolroom as near as possible to the door opening.
 - i. All proposed shelving in the coolroom must be free-standing, constructed of galvanised steel angle section or other approved material with the lowest shelf at least 150mm clear of the floor.
 - ii. The floor of the coolroom must be constructed of impermeable concrete or

coated, topped or otherwise finished with an impervious material to a smooth even surface and coved at the intersections with the walls to a minimum radius of 25mm.

- iii. Adjacent floors, walls, ceilings and other surfaces are able to be easily and effectively sanitised
- (o) An approved audible alarm device must be located outside the coolroom(s) but controllable only from within the coolroom(s) and be able to achieve a sound pressure level outside the chamber or coolroom(s) of 90 d B (A) when measured 3 metres from the sounding device.
- (p) All service pipes, electrical conduits, refrigeration condensate pipes and the like must be chased into walls and floors or at least 25mm off the wall.
- (q) All openings in walls, floors and ceilings, through which service pipes pass, must be vermin proof.
- (r) Where fittings are butt joined together they must be sealed to eliminate any cavities or crevices. Alternatively, a clear space of at least 75mm is to be provided between fittings.
- (s) The following requirements apply to clearances and supports of equipment:
 - i. All stoves, refrigerators, cupboards and similar fittings must have metal legs made of non-corrosive metal or moulded plastic at a minimum height of 150mm above the floor. If placed flush on solid plinths the solid plinth is to be a minimum of 75 mm high.
 - ii. All shelving must be fixed 25mm clear of the walls on solid metal brackets.

(Reason: Compliance legislation and standards)

4) ~DAGCB07 - Lighting

Any lighting on the site shall be designed so as not to cause a nuisance to other residences in the area or to motorists on nearby roads and to ensure no adverse impact on the amenity of the surrounding area by light overspill. All lighting shall comply with relevant standards in this regard.

(Reason: Protect amenity of surrounding area)

5) ~DAGCB10 - Site Management

The following procedures apply:

- (a) Implement the site management plan and measures, and provide for erosion and sediment control according to the SSROC "Do It Right On Site" publication;
- (b) Prevent sediment and/or building materials being carried or washed onto the footway, gutter, road, or into Council's stormwater drainage system;
- (c) Ensure soil/excavated material is not transported on wheels or tracks of vehicles or plant and deposited on surrounding roadways;
- (d) Ensure safe access to and from the site including the road reserve and footpath area, crossings by heavy equipment, plant and materials delivery, or static loads from cranes, concrete pumps and the like;
- (e) Ensure safe loading and unloading of excavation machines, building materials, formwork and the erection of the structures within the site;
- (f) Ensure storage on site of all excavated material, construction materials and waste containers during the construction period (except where otherwise approved); and

- (g) Ensure support of any excavation beside any adjoining property or the road reserve is designed by a Chartered Civil Engineer.

(Reason: Environmental protection)

6) ~DAGCC04 - Ventilation

To ensure that adequate provision is made for ventilation of the premises, mechanical and/or natural ventilation systems shall be designed, constructed and installed in accordance with the provisions of:

- The Building Code of Australia; and
- Protection of the Environment Operations Act 1997; and
- Any proposed mechanical ventilation system shall comply with the Australian Standard AS 1668-1991 (parts 1 & 2). Prior to installation, the design is to be certified by a person competent to do so. At completion of the installation of the system and prior to the issue of the occupation certificate, the work shall be certified by a person competent to do so. The certification shall include:-
 - i. Date of inspection, Inspection, testing and commissioning details
 - ii. The name and address of the individual who carried out the test and
 - iii. A statement that the service has been designed, installed and is capable of operating to above the standard

Ventilation above cooking equipment

Mechanical ventilation must be provided above cooking equipment and is to be designed and installed in accordance with relevant Australian Standards 'The use of ventilation and air conditioning in buildings - Ventilation design for indoor air contaminant control'.

(Reason: Compliance with relevant standards)

7) ~DAGCD01 - Approved Stormwater Drainage Design

The stormwater drainage system for the proposed development shall be constructed in accordance with the following approved plans and documentation, endorsed with Council's Stamp, and Council's "Appendix 2 - Engineering Specifications of the Canada Bay Development Control Plan", except where amended by other conditions of consent:

Stormwater and civil works

<i>Reference</i>	<i>Prepared By</i>	<i>Dated</i>
S18_056 (Sheets C001, C002, C003, C004, C005, C010, C015, C016, C017, C018, C019, C020, C021, C027, C028, C029, C030, C031, C032, C033, C035, C034, C035, C040, C041, C042 and C043) Revision G	CrackerJack Consulting Engineers	15.10.2019

Driveway longitudinal sections

Reference Prepared By	Dated	
S18_056 (Sheets C050, C051, C052, C053, C055, C053, C057, C058, C059, C060, C061 and C062) Revision A/B	CrackerJack Consulting Engineers	15.10.2019

Important Note:

- The approved Stormwater Drainage Plan as identified above is for Concept Only. The designer is responsible for providing sufficient information and/or updates to the Stormwater Drainage Plan suitable for Construction Certificate approval.
- Should any changes be required to the approved stormwater drainage plan as referred to above, the amended design shall achieve equivalent performance standards in accordance with Council's "Appendix 2 - Engineering Specifications of the Canada Bay Development Control Plan".
- Construction Certificate Approval does not include approval for works external to the property. Where the proposed design extends beyond the property boundary, separate approval under Section 138 of the Roads Act 1993, must be obtained from Council prior to the commencement of works. The applicant is advised to contact Council for clarification of proposed works for which approval under Section 138 applies.

(Reason: Stormwater management)

8) Flooding

The proposed development should not increase peak levels outside the site boundary in the 1% AEP event. Flow should enter and pond within the playing field, as currently occurs. No design reconfigurations which would prevent this from occurring are permitted.

(Reason: Stormwater management)

Conditions which must be satisfied prior to the commencement of demolition of any building or structure

9) ~DAPDB01 - Construction Certificate - Prior to the Commencement of any Demolition Works

Where demolition is associated with the erection of a new structure, or an altered portion of or an extension to an existing building, the demolition of any part of a building is "commencement of building work" pursuant of section 6.6 of the Act. In such circumstance all conditions of this consent must be satisfied prior to any demolition work. This includes, but is not limited to, the **issue of a Construction Certificate, appointment of a PCA and Notice of Commencement under the Act.**

(Reason; Statutory Requirement)

10) ~DAPDB02 - Demolition

Demolition - General

- a. That two (2) working days (i.e. Monday to Friday exclusive of public holidays) prior to the commencement of any demolition work, notice in writing is to be given to the Council. Such written notice is to include:
 - The date when demolition will commence,
 - Details of the name, address and business hours contact telephone number of the demolisher, contractor or developer.
 - The licence number of the demolisher, and relevant WorkCover licenses, (see minimum licensing requirements in (d) below, and
 - Copies of the demolisher's current public liability/risk insurance policy indicating a minimum cover of \$10,000,000.00.
- b. Demolition of buildings and structures must comply with all current and relevant Australian Standards.
- c. Demolition works are restricted as follows:
 - Monday to Saturday inclusive - 7:00am - 5:00pm
 - Sundays and Public Holidays - No work
- d. At least two (2) working days (i.e. Monday to Friday exclusive of public holidays), the developer or demolition contractor must notify adjoining residents prior to demolition commencing advising the following:
 - The date when demolition will commence;
 - Details of the name, address and business hours contact telephone number of the demolisher, contractor or developer;
 - The telephone number of WorkCover's Hotline 13 10 50.

All demolition and construction vehicles are to be contained wholly within the site and vehicles must enter the site before stopping. A construction zone will not be permitted on Parramatta Road or Gipps Street.

Demolition Involving the Removal of Asbestos

General Information

Homes built or renovated prior to 1987 are likely to contain asbestos. Asbestos is most commonly found within eaves, internal and external wall cladding, ceilings and walls (particularly within wet areas such as bathrooms and laundries), and fences. Unless properly handled, asbestos disturbed or removed during renovations can cause the development of asbestos related diseases, such as asbestosis, lung cancer and mesothelioma.

To ensure work does not cause undue risk please see the following site for further information: www.asbestosawareness.com.au

Asbestos to be removed by licensed asbestos removalist

All works removing asbestos containing materials must be carried out by a suitably

licensed asbestos removalist duly licensed with Workcover NSW, holding either a Friable (Class A) or a Non- Friable (Class B) Asbestos Removal License which ever applies AND a current WorkCover Demolition License where works involve demolition.

NOTE:

- Removal of asbestos by a person who does not hold a Class A or Class B asbestos removal license is permitted if the asbestos being removed is 10m² or less of non-friable asbestos (approximately the size of a small bathroom).
Friable asbestos materials must only be removed by a person who holds a current Class A asbestos license.
- To find a licensed asbestos removalist please see www.workcover.nsw.gov.au

Compliance with applicable Legislation, Policies and Codes of Practice

Asbestos removal works are to be undertaken in accordance with the following:

- NSW Work Health and Safety Act and Regulation 2011;
- Safe Work Australia Code of Practice for the Management and Control of Asbestos in the Workplace [NOHSC:2018(2005)]
- NSW Government WorkCover Code of Practice - How to Safely Remove Asbestos;
- NSW Government WorkCover Code of Practice - How to Manage and Control Asbestos in the Workplace; and

Clearance certificate

Following completion of asbestos removal works undertaken by a licensed asbestos removalist re-occupation of a workplace must not occur until an independent and suitably licensed asbestos removalist undertakes a clearance inspection and issues a clearance certificate.

Notification of asbestos removal works

At least two (2) working days (i.e. Monday to Friday exclusive of public holidays), the developer or demolition contractor must notify adjoining residents prior to the commencement of asbestos removal works. Notification is to include, at a minimum:

- The date and time when asbestos removal works will commence;
- The name, address and business hours contact telephone number of the demolisher, contractor and/or developer;
- The full name and license number of the asbestos removalist/s; and
- The telephone number of WorkCover's Hotline 13 10 50

Warning signs must be placed so they inform all people nearby that asbestos removal work is taking place in the area. Signs should be placed at all of the main entry points to the asbestos removal work area where asbestos is present. These signs should be weatherproof, constructed of light-weight material and adequately secured so they remain in prominent locations. The signs should be in accordance with AS 1319-1994 Safety signs for the occupational environment for size, illumination, location and maintenance.

Barricades

Appropriate barricades must be installed as appropriate to prevent public access and prevent the escape of asbestos fibres. Barricades must be installed prior to the commencement of asbestos removal works and remain in place until works are completed.

(Reason: To ensure compliance with the relevant legislation and to ensure public and work safety)

11) ~DAPDB03 - Site Safety Fencing - Demolition only

Erect site fencing to a minimum height of 1.8m complying with WorkCover Guidelines, to exclude public access to the site throughout the demolition. The fencing **must be erected before the commencement of any demolition work** and maintained.

The site shall be maintained in a clean and orderly condition during demolition works.

Hoardings

If applicable, a separate Hoarding Application for the erection of an A class (fence type) or B class (overhead type) hoarding along the street frontage(s) complying with WorkCover requirements must be obtained including:

- payment to Council of a footpath occupancy fee based on the area of footpath to be occupied and Council's Schedule of Fees and Charges before the commencement of work; and
- provision of a Public Risk Insurance Policy with a minimum cover of \$10 million in relation to the occupation of and works within Council's road reserve, for the full duration of the proposed works, must be obtained with a copy provided to Council.

(Reasons: Statutory Requirement and health and safety)

12) ~DAPDB04 - Tree Preservation - during demolition

All street trees and trees on private property that are protected under Canada Bay Council's controls, shall be retained and protected during demolition works except where Council's prior written consent has been obtained.

(Reason: Tree Preservation and Protection)

13) ~DAPDB05 - Erosion and Sediment Control during Demolition

Erosion and sedimentation controls shall be in place **prior to the commencement of demolition works** and shall be maintained throughout the demolition of the building and any regrading of the ground levels, approved removal of vegetation etc. The controls shall be installed in accordance with the details approved by Council and/or as directed by Council officers. These requirements shall be in accordance with Managing Urban Stormwater - soils and Construction produced by Landcom (Blue Book). A copy

of the Erosion and Sediment Control Plan must be kept on site during the demolition works and made available to Council officers on request.

(Reason: Environmental protection)

14) Heritage

The heritage gates (Item no.308 - St Luke's park, gateway/entrance - gates and trees only) should be reconstructed (including infill decorative panels) to be similar in appearance and arrangement as the original gates and in a similar location as the original gates and in a similar location and arrangement to the original gates near the street corner. The gates should function as a pedestrian entry.

Any public artwork should not detract from the visual prominence or visual setting of the gates.

The following monitoring works are required to be carried out throughout construction:

- Archaeological monitoring of ground disturbance works associated with the northern carpark;
- Archaeological monitoring of any ground disturbances to occur across the garden beds along Loftus Street to the west of the project area; and
- Archaeological testing under the current location of the western grandstand.

(Reason: Heritage Conservation)

Conditions which must be satisfied prior to the issue of a Construction Certificate

15) ~DACCA01 - Access for People with Disabilities

Access for people with disabilities must be provided in accordance with the requirements of the Building Code of Australia, relevant Australian Standards and with regard to the *Disability Discrimination Act 1992*. **Prior to the issue of a Construction Certificate**, the plans shall demonstrate compliance. **Note: Disability (Access to Premises - Buildings) Standards 2010** - As of 1 May 2011, if access is provided to the extent covered by this Standard, then such access cannot be viewed as unlawful under the Disability Discrimination Act 1992.

(Reason: To inform of relevant access requirements for persons with a disability)

16) ~DACCB02 - Damage Deposit for Council Infrastructure

A Damage Deposit (calculated in accordance with Council's adopted Fees and Charges) of **\$50,000** shall be paid to Council **prior to the issue of the Construction Certificate**.

This Damage Deposit shall be refunded upon completion of all works, at the Occupation or Final Certificate stage.

Any costs associated with works necessary to be carried out to rectify any damages caused by the development, shall be deducted from the Damage Deposit.

Note: Full panel concrete footpath replacement in areas where connection to all

services are required. This includes driveways and road concrete panels. This will stop differential settlement and maintain the integrity of council infrastructure and asset.

(Reason: Protection of Council infrastructure)

17) ~DACCB03 - Long Service Levy Payments

The payment of a long service levy as required under part 5 of the *Building and Construction Industry Long Service Payments Act 1986*, in respect to this building work, and in this regard, proof that the levy has been paid, is to be submitted to Council **prior to the issue of a Construction Certificate**. Council acts as an agent for the Long Services Payment Corporation and the levy may be paid at Council's Office.

(Reason: Statutory requirement)

18) ~DACCE01 - Amendments to Approved Plans

The following amendments shall be made to the approved plans prior to the issue of a Construction Certificate:-

Stormwater Management

- Stormwater Drainage Concept Plan (SDCP) shall include the basement drainage plan, roof drainage plan, details of rainwater re-use systems and the point of discharge etc.
- Diversion of public drainage system around core elements of building A is generally supported. However, proposed drainage line between JB43 & JB44 shall be relocated under the kerb & gutter in Loftus street to ease maintenance difficulties. Standard kerb inlet pits with a minimum of 1.8m lintel shall be constructed along the kerb line replacing junction or on-grade pits.
- When choosing WSUD measures, the consultant shall consider construction and maintenance difficulties in mind. Installation of Sandfilter will involve an extensive excavation upto 3.0m in depth and removal of large quantity of soil from the site. As the site is likely to contain contaminated subgrade/uncontrolled fill, excavation and removal of soil may become an expensive exercise. Therefore, the consultant shall consider alternative WSUD measures such as vegetated swales, raingarden, bio retention basins etc. The measures may include capturing the roof area of Building B to a rainwater re-use system.
- It is noted that the sand filter will be located under the overflow carpark and 225 diameter slotted pipes are located close to the surface (about 400mm deep). Vehicle loading may cause damage to inlet pipes and therefore, inlet slotted pipes shall have a minimum cover of 600mm.
- An overflow pipe with a capacity to discharge 1 in 20 year designed flow shall be introduced from Gross Pollutant Trap (GPT) and connected to 600mm RCP outlet to the canal to allow a bypass in case of any blockage in the sand filters
- Subsurface or seepage water is to be collected in the basement via agglines and directed to underground drainage system. Subsurface water will not be permitted to pump out to either directly or indirectly to the kerb & gutter. If Basement is to be

confined with mechanical pump out system, a holding tank shall be provided in the basement and it shall be adequately sized in accordance with Council's "Engineering Specification". In case of a power failure, the holding tank shall have a capacity to store the runoff from weather exposed areas for a period of 5 hours (plus any seepage for a period of 24 hours) during a 1 in 100 year storm event.

- Grated drains are to be located at the property boundary/bottom of ramp to collect runoff from weather exposed areas. Grated drains shall be adequately sized to collect the runoff from the weather exposed areas of the driveway. It shall have a minimum internal width of 200mm and a depth of 150mm and is to be connected to internal drainage system.

Civil works in Road reserve

- Civil works plan shall clearly define all external works proposed in the road reserve. Proposed works including construction of stormwater drainage, kerb & gutter, footpath, installation of utility services etc. shall be in accordance with Council's "Engineering Specifications". The external works will require Section 138 approval from Council. A separate set of civil plans shall be submitted to Council and an approval shall be obtained prior to CC.
- Council's standard drawings are to be adopted and detailed for all public domain items (internal & external works).
 - All external footpaths are to be of plain concrete and all internal footpath are to be either pavers or concrete or bitumen. Gravel path is not recommended.
 - Block/Brick pavers are to be placed on 30mm thick 4:1 mortar bed on a 110mm 32MPa concrete base with SL72 reinforcing mesh.
 - Proposed drop kerb shall be replaced with standard layback with 600mm wings. Minimum width of clear width for driveway shall be 3.50m excluding wings. Heavy duty driveways shall have a minimum of SL82 mesh. Minimum cover over reinforcement shall be 40mm.
- As noted in the Traffic team's memo, proposed shared path along the canal shall be maintained to 4.0m throughout the site. Sydney water maintenance bay is to be separated from shared path or conflict is to be managed by sign posting & line marking. Proposed Civil works are to be kept clear of all Sydney water GPT structures.
- Pedestrian shared paths, Entry plaza, carpark entries, footpaths etc. shall be adequately lit to comply with relevant Australian standards. Lighting assessment is to be carried out in these areas of concern and cabling for street lights & pedestrian lights are to be in underground format.
- Proposed works may require relocation sewer manhole as building B is to be located on the sewer main. Sydney water is to be consulted to determine the requirements in building over the sewer main.

Note: This involves a change to the Development Application plans as submitted to and approved by Council. Any changes in this regard shall be reflected as amended plans to be submitted to the Accredited Certifier **prior to the issue of a Construction Certificate** for the proposed development.

(Reason: To confirm and clarify the terms of Council's approval)

19) ~DACCE02 - Construction Management Plan

Prior to the issue of a Construction Certificate, submit to the Accredited Certifier a Construction Management Plan that clearly sets out the following:

- (a) What actions and works that are proposed to ensure safe access to and from the site, and what protection will be provided to the road and footpath area from building activities, crossings by heavy equipment, plant and materials delivery, or static loads from cranes, concrete pumps and the like.
- (b) The proposed method of loading and unloading excavation machines, building materials, formwork, and the erection of any part of the structure within the site.
- (c) The proposed areas within the site to be used for a builder's site office and amenities, the storage of excavated material, construction materials and waste containers during the construction period.
- (d) How it is proposed to ensure that soil/excavated material is not transported on wheels or tracks of vehicles or plant and deposited on surrounding roadways.
- (e) The proposed method of support to any excavation adjacent to adjoining properties, or the road reserve - the proposed method of support is to be designed by a Chartered Civil Engineer.
- (f) A Soil and Water Management Plan detailing all sedimentation controls.

(Reason: Safety, amenity and protection of public infrastructure and the environment)

20) ~DACCE02A - Construction Traffic Management Plan (CTMP)

Prior to the issue of a Construction Certificate, the applicant shall submit and have approved by Council's Engineers, a detailed Construction Traffic Management Plan (CTMP). The plan shall demonstrate how construction and delivery vehicles will access the development site during the demolition, excavation and construction phase of the development. The plan shall be certified by a suitably qualified and experienced traffic consultant and all traffic associated with the subject development shall comply with the terms of the approved Construction Traffic Management Plan.

The following matters (at a minimum) must be addressed in the CTMP:

- (a) A detailed description and route map of the proposed truck/construction vehicle access routes.
- (b) The locations of any proposed Construction Works Zones along the site frontage.
- (c) Provide a construction schedule.
- (d) Tradesperson parking (parking shall be provided on-site where possible).
- (e) Provide relevant Traffic Control Plans (must be certified by a suitably qualified RMS ticket holder).
- (f) Provide relevant Pedestrian Management Plans.
- (g) A site plan which indicates site entrances and exits, turning areas within the site for construction and spoil removal vehicles allowing a forward ingress and egress for all construction vehicles on the site (superimposed truck swept path diagrams). Site entrances and exits shall be controlled by a certified traffic controller.

(Reason: Traffic safety and amenity during construction phase)

21) ~DACCE02B - WestConnex Monitoring

The WestConnex project has identified a section of the land which will require non-exclusive access for construction of an air quality monitoring station on the subject site. The WestConnex project team shall be consulted with regard to the location of the monitoring station and any requirements through dakelly@transurban.com prior to the issue of a Construction Certificate.

(Reason: Traffic safety and amenity during construction phase)

22) DACCE03 - Road Occupancy License

A Road Occupancy Licence (ROL) should be obtained from Transport Management Centre for any works that may impact on traffic flows on Parramatta Road and Gipps Street during construction activities. A ROL can be obtained through <https://myrta.com/oplinc2/pages/security/oplincLogin.jsf>.

All buildings and structures, together with any improvements integral to the future use of the site shall be wholly within the freehold property (unlimited in height or depth), along the Parramatta Road and Gipps Street boundary.

(Reason: Compliance)

23) ~DACCE04 - Obtaining a Construction Certificate for Building Work

This Development Consent does not constitute approval to carry out construction work. Construction work may only commence **upon the issue of a Construction Certificate, appointment of a Principal Certifying Authority (PCA), and lodgement of Notice of Commencement.**

Please note that if demolition works forms part of the extent of works approved in the same application, then demolition must not commence **prior to the issue of a Construction Certificate.**

(Reason: Information)

24) ~DACCE05 - Waste Water Control

The applicant shall contact Sydney Water, to determine the requirements for the disposal of wastewater and liquid trade waste (including grease traps or grease arrestors). The applicant must provide a copy of the Authority to connect to the sewer system **prior to the issue of a Construction Certificate.**

There is to be no discharge of wastewater to the stormwater system.

(Reason: Information)

25) ~DACCG02 - Bicycle Parking

Thirty Four (34) bicycle parking spaces shall be provided in the basement of Building A. Further, in accordance with Council's DCP - *General Controls*, for the café 1 bicycle parking space shall be provided per 25m² public area. This bicycle parking is to be conveniently located in close proximity to the café. To accommodate the requirements of Building B, 1 bicycle storage space shall be provided per 4 employees and 1 bicycle parking space per 200m² GFA.

All bicycle parking/storage is to be designed in accordance with AS2890.3. Plans shall demonstrate compliance with this requirement prior to issue of a construction certificate.

(Reason: Convenience)

26) ~DACCG10 - Speed Hump and Stop Sign on Exit

The applicant shall install a stop sign and a speed hump at the exit from the site. The stop sign must be accompanied by the associated line marking and the speed hump shall be set back by 1.5 metres from the boundary alignment. The devices shall be designed and constructed in accordance with the provision of all relevant Australian Standards. The building plans shall indicate compliance with this requirement **prior to the issue of a construction certificate.**

(Reason: Traffic safety and management)

27) ~DACCG15 - No Parking Signage

'No Parking' signage is to be erected in the turning manoeuvre area adjoining the loading dock to assist in ensuring the manoeuvring area remains clear. The signage is to be installed in accordance with relevant standards.

(Reason: Compliance)

28) ~DACCG16 - Shared Pathway adjacent to Eastern Boundary of Site

The shared pathway along the eastern edge of the subject site is required to be suitable for through cyclist use as part of a bicycle route. The currently indicated short sections at the ends where it links to Parramatta Road and Gipps Street are inappropriate noting narrow widths between 2 and 3m and gravel finish.

The shared path shall be designed in accordance with relevant standards and shall achieve a continuous 4m width and be constructed from concrete between Gipps Street and Parramatta Road. This may include an overlap with the service bay provided for occasional use by Sydney Water service vehicles noting required pedestrian/cyclist management is for their implementation.

The service bay shall be signposted as 'No Entry, Sydney Water Vehicles Excepted'. Consideration should also be given to visually differentiating and/or physically

separating it from the remainder of the carpark e.g. removable bollards, concrete finish, etc. Plans shall demonstrate compliance with this requirement prior to the issue of a construction certificate.

(Reason: Compliance)

29) ~DACCI01 - Pre-Commencement Damage Report

Prior to the issue of the Construction Certificate, the Pre-Commencement Damage Report Form shall be completed and submitted to Council. This Damage Report Form is for the evaluation of the existing condition of the road reserve, and shall be filled out and signed by the Applicant and submitted to Council. This form is generally for “minor works” (as defined in the Driveways and Ancillary Works Application Form). For “major works”, a Dilapidation Report will be required.

This Form is used to assist Council in determining the refund of any damage deposits and any likely repairs necessary upon the completion of the development.

When lodging the Damage Report Form, fees are payable in accordance with Council’s fees and charges schedule, which will go towards administration and inspection costs.

The cost of repairing any damage to Council property (including the footpath, verge, street trees, kerb, gutter, road pavement or the like) during and/or immediately after construction must be paid to Council or shall be deducted from the damage deposit bond. Repair of damaged Council property by the Applicant or his agent is not permitted unless approved by Council.

For roadways requiring asphaltic concrete works or adjustment works, these shall be done to a minimum width as specified by Council. Minimum dimensions are given in Council’s Specification for Driveway Construction or Specification for Restoration Works.

(Reason: Maintain public assets)

30) ~DACCI03 - Protection of Public Places

The adjoining or adjacent public area is not to be obstructed by any materials, vehicles, refuse skips and the like, under any circumstances unless approved in writing by Council.

If the work involved in the demolition or construction of a building is likely to cause pedestrian or vehicular traffic in a public place to be obstructed or rendered inconvenient, or building involves the closure of a public place, a barrier, fence or hoarding shall be erected **prior to the commencement of any work** subject to approval of a Traffic Management Plan.

An application to occupy public space is to be submitted to Council for approval prior to commencement of works.

Where a hoarding is required, an application for hoarding is also to be submitted to and approved by Council prior to commencement of any work. Hoardings shall be erected to comply with the requirements of WorkCover, the Principal Certifying Authority and with relevant Australian Standards.

(Reason: Safety)

31) ~DACCI05 - Vehicular Crossings

Vehicular Crossings Full-width, heavy-duty concrete vehicular crossing(s) shall be installed across the footpath at the entrance(s) and/or exit(s) to the site, subject to separate Council approval. In this regard the Applicant must obtain a copy of Council's "Appendix 2 - Engineering Specifications of the Canada Bay Development Control Plan" and lodge an application for vehicular crossing(s) (available from Council's Customer Services Centre or can be downloaded from Council's website), and pay the appropriate fees and charges prior to the lodgement of the Construction Certificate.

The driveway in Loftus Street to the basement carpark shall have a minimum crest of 150 mm higher than the 1%AEP stormwater overland top water level measured at the vehicular crossing location. This is to reduce the probability of stormwater overland flow entering the building/basement. The driveway to the basement carpark shall also achieve a maximum grade of 5% for at least the first 6m inside the site as required by AS/NZS2890.1:2004.

The design and construction of the vehicular crossing on Gipps Street shall be in accordance with Roads and Maritime requirements. Details of these requirements shall be obtained by email at development.sydney@rms.nsw.gov.au.

Detailed design plans shall be submitted to Roads and Maritime for approval prior to the issue of a Construction Certificate and commencement of any road works.

A plan checking fee (amount to be advised) and lodgement of a performance bond may be required from the applicant prior to the release of the approved road design plans by Roads and Maritime.

(Reason: To ensure appropriate access to the site can be achieved)

32) Car Parking

The layout of the proposed car parking areas associated with the subject development (including, driveways, grades, turn paths, sight distance requirements in relation to landscaping and/or fencing, aisle widths, aisle lengths, and parking bay dimensions) shall be in accordance with AS 2890.1-2004, AS2890.6-2009 and AS 2890.2-2018. Parking Restrictions may be required to maintain the required sight distances at the

driveway.

(Reason: To ensure appropriate access to the site can be achieved)

33) ~DACCJ02 - Redundant Vehicular Crossings and Ancillary Works

Where new pavement, repair or reinstatement of footpath or other ancillary works such as kerb and gutter and stormwater pit construction is proposed, the Applicant shall complete a Section 138 Civil Works in the Public Domain Area Application for major works, or for minor works (as defined in the Driveways & Ancillary Works Application) adjacent to the site, an application for "Driveway & Ancillary Works" and submit the application to Council for approval **prior to the issue of a Construction Certificate**. Both forms are available from Council's Customer Services Centre or can be downloaded from Council's website.

All disused or redundant vehicle crossings and laybacks shall be removed and reinstated with concrete kerb and gutter or to the existing edging profile as specified by Council and the footpath area is to be restored to the satisfaction of Council's Utilities & Development Engineer, **prior to the issue of the Occupation Certificate**.

(Reason: Public infrastructure maintenance)

34) ~DACCJ03 - Separate Approval for Works in the Public Road (External Works) - Section 138 Roads Act

Pursuant to Section 138 of the Roads Act 1993 and **prior to the issue of a Construction Certificate**, the applicant must submit detailed plans to and obtain a written approval from the Appropriate Road Authority (usually Council for Local and Regional Roads and both Council and Roads & Maritime Services (RMS) for Arterial Roads), for any works in the road reserve.

Additionally, where the work involves closure of a carriageway on a State Road, Regional Road, or it is such that it may impact the traffic flow on a State Road or Regional Road, or is within close proximity of a Traffic Facility (eg Traffic Lights) then a Road Occupancy License (ROL) must be obtained from the Planned Incidents Unit of the Traffic Management Centre of the RMS. The application should be lodged at least 10 days prior to the planned commencement date.

(Reason: Protection of Public Assets and information)

35) ~DACCK01 - Application for a Construction Certificate

The applicant must apply to Council or an Accredited Certifier for a Construction Certificate to carry out the relevant building works that are approved by this consent. The details to be included in the application for a Construction Certificate are:

- (a) Architectural plans and specifications complying with the Building Code of Australia (BCA), relevant Australian Standards, and the development consent and conditions.
- (b) If Council issues the Construction Certificate, engineering details must be submitted for approval for all structural elements, including but not limited to, piers, footings, reinforced concrete slab, first floor joist layout, roof trusses, steel beams and the like. The details must be prepared by a practising consulting structural engineer. Also a certificate from the engineer must be included certifying that the design fully complies with appropriate SAA Codes and Standards and the Building Code of Australia requirements.
Note: The engineer/s undertaking certification must be listed on the National Professional Engineers Register under the appropriate category.
- (c) Geotechnical report for the site, prepared by a qualified geotechnical engineer detailing the foundation conditions of the site and solutions for consideration by a structural Engineer.
- (d) Essential services plan outlining the existing and proposed fire safety measures.
- (e) Disabled access provisions to common and public areas in accordance with AS1428.
- (f) If an alternative solution to the “deemed to satisfy” provisions of BCA is proposed, the following details must be lodged:
 - Performance requirements that the alternative solution intends to meet.
 - Assessment methods used to determine compliance with the performance requirements, including if and how each performance objective impacts on other requirements of the BCA; and
 - A statement about the person who prepared the alternate solution, indicating qualifications, experience, insurance details, and membership of an approved accreditation body**Note:** The performance-based application may be required to be reviewed by a suitably qualified independent body at the applicant's expense. Any fees relating to any review are required to be paid **prior to the issue of the Construction Certificate**.

(Reason: Statutory requirement)

36) ~DACCL04 - Erosion and sedimentation controls

Erosion and sedimentation controls must be provided to ensure:

- (a) Compliance with the approved Soil and Water Management Plan
- (b) Removal or disturbance of vegetation and top soil is confined to within 3m of the approved building area (no trees to be removed without approval)
- (c) All uncontaminated run-off is diverted around cleared or disturbed areas
- (d) Silt fences or other devices are installed to prevent sediment and other debris escaping from the cleared or disturbed areas into drainage systems or waterways
- (e) All erosion and sediment controls are fully maintained for the duration of demolition/ development works

- (f) Controls are put into place to prevent tracking of sediment by vehicles onto adjoining roadways
- (g) All disturbed areas are rendered erosion-resistant by turfing, mulching, paving or similar
- (h) All water pumped or otherwise removed from excavations or basement areas is filtered to achieve suspended solids/non filterable residue levels complying with the *Australian Water Quality guidelines for Fresh and Marine Waters*
- (i) Pumped or overland flows of water are discharged so as not to cause, permit or allow erosion before the commencement of work (and until issue of the occupation certificate).

Details of the proposed soil erosion and sedimentation controls to be implemented on site must be submitted **with the Construction Certificate Application**. Under no circumstances may any works commence prior to these details being approved by the Accredited Certifier and the controls being in place on the site

(Reason: Environmental protection)

37) ~DACCL05 - Grated Drain to Garage

A grated trench drain shall be provided across the (garage entrance/driveway/street boundary). Unless otherwise designed by a Qualified Civil Engineer, the dimensions of the trench grate shall not be less than 200mm wide by 150mm deep at the shallow end, and have a “bottom” slope of 2 %. This trench drain shall be connected to an approved drainage system. The grated drain calculation shall be in accordance with AS/NZS3500.

The above information must be indicated on all relevant drawings **to be submitted with the Construction Certificate**.

(Reason: Environmental protection)

38) ~DACCL06 - Rainwater Harvesting

A rainwater harvesting system shall be provided in accordance with either the BASIX minimum requirements, any relevant Council Rainwater Re-use Policy and/or “Appendix 2 - Engineering Specifications of the Canada Bay Development Control Plan”, whichever is applicable. A detailed stormwater plan showing the proposed re-use system shall be submitted and approved by Council or an Accredited Certifier **prior to the issue of the Construction Certificate**.

(Reason: Compliance and Amenity)

39) ~DACCL07 - Silt Arrestors and Gross Pollutant Traps

Silt and gross pollutant traps shall be fitted in all stormwater pits, designed in accordance with Council’s “Appendix 2 - Engineering Specifications of the Canada Bay Development Control Plan” and to the satisfaction of Council or an Accredited

Certifier. Details are to be submitted with the design **prior to the issue of the Construction Certificate**.

(Reason: Environmental Protection)

40) ~DACCM06 - Acid Sulfate Soils - Detailed Assessment

A detailed management plan in accordance with the ASSMAC assessment guideline and the following items must be address as part of the management plan the following:

1. A description of the acid sulfate soils mitigation strategies incorporating a schedule of construction and operational phases to minimise impacts from:
 - a) the disturbance (including excavation or changes in surface or subsurface water systems)
 - b) any excavated soils (including storage, treatment or use)
 - c) any acid leachate produced (including storage, treatment, discharge or use)
2. Monitoring program for soils and the surface and subsurface water quality outlining:
 - a) what parameters will be monitored
 - b) monitoring locations
 - c) monitoring frequency
 - d) analyses to be conducted
 - e) laboratory conducting analyses
 - f) procedures to be undertaken if monitoring indicates that thresholds are being exceeded
 - g) reporting procedures to relevant authorities and the community (if appropriate).
3. A description of the contingency procedures to be implemented at the site to deal with unexpected events or in the event of failure of management procedures including a Remedial Action and Restoration Action Plan related to:
 - a) any failure to implement any proposed acid sulfate soil management strategies
 - b) any mitigation strategies being ineffective so that the project fails to meets agreed standards or performance levels.

(Reason: Compliance and Environmental Protection)

41) ~DACCN02 - Electricity Substation

Any required electricity substation must be located within the boundaries of the site. Documentary evidence of compliance, including correspondence from the energy authority is to be provided to the Accredited Certifier **prior to the issue of a Construction Certificate** detailing the energy authority's requirements.

Note: Where an electricity substation is required but no provision has been made to place it within the approved building or its site and no details are provided on the approved development consent plans, a section 96 application is required to be submitted to Council for approval of an appropriate location for the required electricity substation.

(Reason: Access to utility)

Conditions which must be satisfied prior to the commencement of any development work

42) ~DAPCB01 - Appointment of Principal Certifying Authority

No work shall commence in connection with this Development Consent until:

- (a) A construction certificate for the building work has been issued by:
 - (i) the consent authority; or
 - (ii) an accredited certifier; and
- (b) the person having the benefit of the development consent has:
 - (i) appointed a principal certifying authority for the building work, and
 - (ii) notified the principal certifying authority that the person will carry out the building work as an owner-builder, if that is the case, and
- (b1) the principal certifying authority has, no later than 2 days before the building work commences:
 - (i) notified the Council of his or her appointment, and
 - (ii) notified the person having the benefit of the development consent of any critical stage inspections and other inspections that are to be carried out in respect of the building work, and
- (b2) the person having the benefit of the development consent, if not carrying out the work as an owner-builder, has:
 - (i) appointed a principal contractor for the building work who must be the holder of a contractor licence if any residential building work is involved, and
 - (ii) notified the principal certifying authority of such appointment, and
 - (iii) unless that person is the principal contractor, notified the principal contractor of any critical stage inspections and other inspections that are to be carried out in respect of the building work, and
- (c) the person having the benefit of the development consent has given at least 2 days notice to the Council of the person's intention to commence the erection of the building.

Note: If the principal certifying authority is the Council, the nomination will be subject to the payment of a fee for the service to cover the cost of undertaking all necessary inspections and the issue of the appropriate certificates.

Under the Environment Planning and Assessment (Quality of Construction) Act, 2003, a sign must be erected in a prominent position on the work site showing the name,

address and telephone number of the principal certifying authority; the name of the principal contractor (if any) for the building work and a telephone number at which that person may be contacted outside working hours. That sign must also state that unauthorised entry is prohibited. The sign must not be removed until all work has been completed.

(Reason: Statutory requirements)

43) ~DAPCB02 - Construction Certificate

No work shall commence until you:

- (a) Obtain a Construction Certificate from either the City of Canada Bay Council or an Accredited Certifier - a fee applies for this service; and
- (b) Lodge with the City of Canada Bay Council any Construction Certificate obtained from an Accredited Certifier (together with associated plans and documents) - a fee applies for this service

(Reason: Statutory Requirement)

44) ~DAPCB05 - Notice of commencement

No work shall commence until you submit a notice of commencement (form will be attached with issue of a Construction Certificate or available from our website) giving Council:

- (a) Not less than two (2) days' notice of the date on which it is proposed to commence work associated with this Development Consent;
- (b) Details of the appointment of a Principal Certifying Authority (either Canada Bay Council or another Accredited Certifier)
- (c) Details of the name, address and licence details of the Builder.

(Reason: Statutory Requirement)

45) ~DAPCB06 - Site Safety Fencing

Erect site fencing to a minimum height of 1.8m complying with WorkCover Guidelines, to exclude public access to the site throughout the construction works. The fencing **must be erected before the commencement of any work and maintained.**

The site shall be secured in accordance with Clause 146 of the Environmental Planning and Assessment Regulation 2000. The site shall be maintained in a clean and orderly condition during demolition and construction works.

Hoardings

If applicable, a separate Hoarding Application for the erection of an A class (fence type) or B class (overhead type) hoarding along the street frontage(s) complying with WorkCover requirements must be obtained including:

- payment to Council of a footpath occupancy fee based on the area of footpath to be occupied and Council's Schedule of Fees and Charges before the commencement of work; and

- provision of a Public Risk Insurance Policy with a minimum cover of \$10 million in relation to the occupation of and works within Council's road reserve, for the full duration of the proposed works, must be obtained with a copy provided to Council.

(Reasons: Statutory Requirement and health and safety)

46) ~DAPCB07 - Principal Certifying Authority (PCA) Sign

Prior to commencement of any work, signage must be erected in a prominent position on the work site identifying:

- The Principal Certifying Authority (PCA) by showing the name, address and telephone number of the PCA;
- The Principal Contractor by showing the Principal Contractor's name, address and telephone number (outside of work hours) for that person.
- The sign must state that unauthorised entry to the work site is prohibited.

Any such sign is to be maintained while the work is being carried out, but must be removed when the work has been completed.

This clause does not apply to building work, subdivision work or demolition work that is carried out inside an existing building that does not affect the external walls of the building.

(Reason: Statutory Requirement)

47) ~DAPCB10 - Notice of Requirements from Sydney Water

A Section 73 Compliance Certificate under the Sydney Water Act 1994 must be obtained. Application must be made through Sydney Water or an authorised Water Servicing Coordinator (WSC). An assessment will be made to determine the availability of water and sewer services, which may require extension, adjustment or connection to Sydney Water mains. Please refer to Sydney Water's website at www.sydneywater.com.au/section_73 or call 1300 082 746 to learn more about applying through an authorised WSC or Sydney Water.

Following application, Sydney Water will assess the development and if required will issue a "Notice of Requirements" letter detailing all requirements that must be met. Please apply early as building of water and services can be time consuming and may impact on other parts of your development such as building, driveway or landscape design.

The Notice of Requirements must be submitted to the Accredited Certifier **before the commencement of works**. A Section 73 Compliance Certificate must be obtained before the issue of an Occupation Certificate.

(Reason: To comply with statutory requirements)

48) ~DAPCC01 - Erosion & Sediment Control:

Erosion and sedimentation controls shall be in place **prior to the commencement of site works**; and maintained throughout construction activities until the site is landscaped and/or suitably revegetated. The controls shall be in accordance with the details approved by Council and/or as directed by Council Officers. These requirements shall be in accordance with Managing Urban Stormwater - Soils and Construction produced by Landcom (Blue Book).

A copy of the Erosion and Sediment Control Plan must be kept on site at all times during construction and made available to Council officers on request.

Erosion and sediment control measures as detailed in the submitted Erosion and Sediment Control Plan must be installed and operating **prior to and during all construction works**.

(Reason: Environmental protection)

49) ~DAPCC02 - Soil & Water Management during Construction

Landcom's "Managing Urban Stormwater - Soil and Conservation" August 1998 outlines the general requirements for the preparation of a soil and water management plan. All works shall be conducted in accordance with a soil and water management plan that has been submitted and approved by the Accredited Certifier **prior to the commencement of works**. A copy of the plan shall be kept on-site and made available to Council's Officers on request. All erosion and sediment control measures must be maintained in a functional condition throughout the duration of the works.

(Reason: Environmental protection)

Conditions which must be satisfied during any development work

50) ~DADWA01 - Burning and Burying of Waste

No materials or rubbish resulting from the land clearing, demolition and building works must be burnt or buried on the site.

(Reason: Health and amenity)

51) ~DADWA02 - Construction Hours

No construction or any other work related activities shall be carried out on the site outside the hours of 7.00 am to 5.00 pm Mondays to Saturdays. No work to occur on Sundays and public holidays.

Where the development involves the use of jackhammers/ rock breakers and the like or other heavy machinery, such equipment may only be used between the hours of 7.00 am - 5.00 pm Monday to Friday only.

(Reason: Safety and amenity)

52) ~DADWA03 - Disruption of Traffic

During any construction works on the public road that is associated with this approval, the Applicant must provide appropriate signage and traffic control facilities as per the requirements of AS 1742.3 and the RTA "Traffic Control at Works Sites" manual.

(Reason: Safety and information)

53) ~DADWA04 - Dust Control

The following measures must be implemented (in part or in total) as directed by the City of Canada Bay Council to control the emission of dust:

- (a) Dust screens must be erected around the perimeter of the site and be kept in good repair for the duration of the work.
- (b) All dusty surfaces must be wet down and any dust created must be suppressed by means of a fine water spray. Water used for dust suppression must not be contaminated or allowed to enter the stormwater system.
- (c) All stockpiles of materials that are likely to generate dust must be kept damp or covered.
- (d) All stockpiles of soil or other materials shall be placed away from drainage lines, gutters or stormwater pits or inlets.
- (e) All stockpiles of soil or other materials likely to generate dust or odours shall be covered.
- (f) All stockpiles of contaminated soil shall be stored in a secure area and be covered if remaining more than 24 hours or as directed by the City of Canada Bay Council.

(Reason: Environmental amenity)

54) ~DADWA05 - Excavation - Water

All excavations must be kept free from the accumulation of water.

(Reason: Health and safety)

55) ~DADWB02 - Acid Sulphate Soils

Any excavation works carried out on site should be closely monitored to ensure no signs of Potential Acid Sulphate Soil (PASS) or Actual Acid Sulphate Soil (AASS) are observed. Indicators may include grey to greenish blue clays, unusual gold-yellow mottling or 'rotten egg' odours. If any of these indicators are observed, excavation of the site is to be stopped immediately, Council is to be notified and a suitably qualified environmental scientist should be contracted to further assess the site.

(Reason: Environmental protection)

56) ~DADWB03 - Construction Management Plan

All development activities and traffic movements must be carried out in accordance with the approved Construction Management Plan.

All controls in the Plan must be maintained at all times. A copy of the Plan must be kept on site at all times and made available to the Accredited Certifier and Council on request.

(Reason: Compliance with condition of consent)

57) ~DADWB04 - Damage to Adjoining Properties

All precautions must be taken to prevent any damage likely to be sustained to adjoining properties. Adjoining owner property rights must be observed at all times. Where damage occurs to adjoining property all necessary repair or suitable agreement for necessary repairs are to be undertaken by the applicant in consultation with, and with the consent of, the affected property owner.

(Reason: Structural safety)

58) ~DADWB05 - Stamped Plans

Stamped plans, specifications, documentation and the consent shall be available on site at all times during construction.

(Reason: To ensure compliance with approved plans)

59) ~DADWF01 - Noise - Construction

All works carried out on site during construction/ demolition/ excavation/ earthworks shall comply with the NSW Protection of the Environment Operations Act 1997, the Department of Environment and Climate Changes' Interim construction noise guideline' and AS 2436-2010 - 'Guide to noise and vibration control on construction, demolition and maintenance sites' for the control of construction noise which specifies that:

- Construction period of 4 weeks and under - The L90 level measured over a period of not less than 15 minutes when the construction site is operating must not exceed the background level by more than 20 dB(A) at the boundary.
- Construction period greater than 4 weeks but not exceeding 26 weeks - The L90 level measured over a period of not less than 15 minutes when the construction site is operating must not exceed the background level by more than 10 dB(A) at the boundary.
- Construction period exceeding 26 weeks - The L90 level measured over a period of not less than 15 minutes when the construction site is operating must not exceed the background level by more than 5 dB(A) at the boundary.

Should complaints of a noise nuisance be substantiated, Council may require the acoustic treatment of the premises to ensure compliance with the NSW Department of Environment and Climate Changes 'Interim construction noise guideline' and AS 2436-2010 - 'Guide to noise and vibration control on construction, demolition and maintenance sites' for the control of construction noise. A further acoustic assessment

& report will be required to be provided to Council assessing the premises in working order.

(Reason: Noise Attenuation)

60) ~DADWF02 - Noise - Plant

All works carried out on site during construction/demolition/excavation or earthworks shall comply with the NSW Protection of the Environment Operations Act 1997. Approved and effective silencing measures shall be provided and maintained on all power-operated plant used on site if required.

(Reason: Safety and Amenity)

61) ~DADWF03 - Noise & Vibration

The construction of the development and preparation of the site, including operation of vehicles, must be conducted so as to avoid unreasonable noise or vibration and cause no interference to adjoining or nearby occupations. Special precautions must be taken to avoid nuisance in neighbouring residential areas, particularly from machinery, vehicles, warning sirens, public address systems and the like.

In the event of a noise or vibration problem arising, the person in charge of the premises must, when instructed by City of Canada Bay Council or the Accredited Certifier, cease work and carry out an acoustical survey and/or investigation by an appropriate acoustical engineer or consultant and submit the results to Council. The person in charge of the site must implement any or all of the recommendations of the consultant and any additional requirements of Council. Any requirements of Council in this regard must be complied with immediately.

(Reason: Noise attenuation)

62) ~DADWG01 - Obstruction of Road or Footpath

The use of the road or footpath for the storage of any building materials, waste materials, temporary toilets, waste bins or any other matter is not permitted unless approved in accordance with Council's Waste Skip Bin Policy. A Penalty Infringement Notice may be issued for any offence.

(Reason: Protection of infrastructure, safety & information)

63) ~DADWG02 - Protection of Public Places

If the work involved in the demolition or construction of a building is likely to cause pedestrian or vehicular traffic in a public place to be obstructed or rendered inconvenient, or building involves the closure of a public place, a hoarding or fence shall be erected. Hoardings shall be erected to comply with the requirements of WorkCover and the Principal Certifying Authority.

(Reason: Safety)

64) ~DADWH01 - Compliance with Building Code of Australia

All building work must be carried out in accordance with the provisions of the Building Code of Australia. Note: Applicants who have lodged an objection and who have been granted exemption under clause 187(6) & 188(4) of the *Environmental Planning and Assessment Regulation 2000*, must comply with the Building Code of Australia in all other respects.

(Reason: Prescribed statutory control)

65) ~DADWH02 - Critical Stage Inspections - General

Critical stage inspections must be called for by the Principal Contractor or Owner Builder as required by the Principal Certifying Authority (PCA), any PCA Service Agreement, the Act and the Regulation.

Work must not proceed beyond each critical stage until the PCA is satisfied that work is proceeding in accordance with this consent, the Construction Certificate(s) and the Act. 'Critical Stage Inspections' means the inspections prescribed by the Regulations for the purposes of section 6.5 of the Act or as required by the PCA and any PCA Service Agreement.

Note 1: The PCA may require additional inspections beyond mandatory critical stage inspections in order that the PCA be satisfied that work is proceeding in accordance with this consent.

Note 2: The PCA may, in addition to inspections, require the submission of Compliance Certificates, survey reports or evidence of suitability in accordance with Part A2.2 of the BCA in relation to any matter relevant to the development.

(Reason: Statutory requirement)

66) ~DADWH06 - Inspection Records & Compliance Certificates

The PCA or accredited certifier undertaking each of the inspections must make a **record of each inspection** in accordance with Clause 162B of the Environmental Planning and Assessment Regulations 2000 and, if the person is not the PCA, forward a copy to the PCA.

A copy of any **compliance certificates** issued in respect of the building work and any documents referred to in the certificate must be provided to Council within two (2) days of the certificate being issued.

A compliance certificate must be issued where:

- (a) Either:
 - (i) Council is appointed the PCA; or

- (ii) Council is the PCA but agrees to an accredited certifier undertaking certain inspection/s, and
- (b) The PCA or accredited certifier is of the opinion that the stage of work he or she has inspected is satisfactory.

(Reason: Statutory Requirement)

67) ~DADWI01 - Progress Survey - Major Development

In order to ensure compliance with approved plans, a Survey Certificate, prepared to Australian Height Datum, shall be prepared by a Registered Surveyor showing the following:

- (a) At the completion of excavation, prior to the placement of any footings, showing the completed level of the excavation and its relationship to the boundaries;
- (b) Prior to placement of concrete, the ground floor level, showing the level of the form work and its relationship to boundaries including relevant footpath and roadway levels;
- (c) Prior to placement of concrete at each second floor level showing the principal level of the formwork and the intended relationship of the completed works to the boundary;
- (d) Prior to roofing, or completion of the highest point of the building, showing the anticipated level of the completed work and the relationship to the boundary; and
- (e) At completion, works showing the relationship of the building to the boundary.

Progress certificates in response to points (a) through to (e) shall be produced to the Council or the Principal Certifying Authority at the time of carrying out relevant progress inspections. Under no circumstances will work be allowed to proceed should such survey information be unavailable or reveals discrepancies between the approved plans and the proposed works.

(Reason: To ensure compliance with approved plans)

Conditions which must be satisfied prior to the issue of any Occupation Certificate relating to the use of the building or part

68) ~DAOCA01 - Food Premises - Final Inspection

Prior to the issue of an Occupation Certificate, a City of Canada Bay Pre Occupation Food Premises Inspection report is to be obtained from Council confirming satisfactory compliance with applicable food legislation.

(Reason: To ensure compliance of the food premises with the Food Act 2003, Food Regulations 2015, Food Standards Australian and New Zealand - Food Standards Code and Australian Standard 4674-2004 Design, construction and fit-out of food premises)

69) ~DAOCA02 - Food Shop Registration Requirements

Prior to the issue of any Occupation certificate a Business Registration Form must be completed and submitted to Council. This form is available online at

www.canadabay.nsw.gov.au. In the instance details on the original registration form change, Council is to be notified of the change within seven (7) days of the change occurring.

(Reason: Registration and notification to relevant authorities)

70) ~DAOCB01 - Certification of Engineering Works

Prior to occupation, the following documents must be submitted to the Principal Certifying Authority.

- a) A Certificate from a Professional Civil Engineer whose qualifications are recognised by, and who is a current member of, Engineers Australia, and
- b) “Works - As - Executed” drawings of the engineering works prepared by a Registered Surveyor or equivalent.

The abovementioned Certificate is to certify that:

- (i) the stormwater drainage system and/or
- (ii) the car parking arrangement and area including circulating ramps, and/or
- (iii) any related footpath works, and/or
- (iv) the basement mechanical pump and well system, and/or
- (v) the proposed driveway and layback, and/or
- (vi) other civil works have been constructed in accordance with the Council approved plans and details and satisfies the design intent and complies with the appropriate SAA Codes, relevant Standards and Council’s Policies and Specifications.

Two (2) copies of the above documents are to be provided to Council **prior to the issue of any Occupation Certificate**.

(Reason: Asset management)

71) ~DAOCC01 - Civil Works on the Footway

The Applicant is required to carry out the following works:

- Reconstruct sections of cracked or defective footpath along the full frontage of the site, and/or
- Reconstruct existing public drainage pit/pipe system, and/or
- Construct a new vehicular crossing, and/or
- Remove any redundant vehicular crossings and replace with kerb and gutter to match the adjoining.

The above works must be completed to the written satisfaction of Council **prior to issue of any Occupation Certificate**.

Note: The above works will require the submission of the relevant application for the works to be undertaken.

Where the Applicant nominates Council to undertake the civil and stormwater works, they must contact Council's Manager Construction, City Services in order to obtain an estimated cost for construction and contract to undertake the works.

(Reason: To preserve Council's assets and amenity)

72) ~DAOCC02 - Construction of Concrete Footpath

A concrete footpath shall be constructed to replace cracked or damaged sections along the full street frontage of the property.

The above works must be constructed **prior to the release of any Occupation Certificate.**

Note: The above works will require the submission of the relevant application for the works to be undertaken.

Where the applicant would like Council to undertake the civil and stormwater works, they should contact Council's Manager Construction, City Services to obtain an estimated cost of construction and contract to undertake the works.

(Reason: To preserve Council's assets and amenity)

73) ~DAOCD01 - Occupation Certificate (section 6.9 of the Act)

A person must not commence occupation or use (*or change of use where an existing building*) of the whole or any part of a new building (within the meaning of section 6.10 of the *Act*) unless an Interim Occupation Certificate or Final Occupation Certificate has been issued in relation to the building or part.

The Principal Certifying Authority is required to be satisfied, amongst other things, that:

- All required inspections (including each applicable mandatory critical stage inspection) have been carried out; and
- Any preconditions to the issue of the certificate required by a development consent have been met.

Note: New building includes an altered portion of, or an extension to, an existing building.

(Reason: Statutory requirement)

Conditions which must be satisfied prior to the issue of a Final Occupation Certificate

74) ~DAFOA02 - Certificate of Test of Mechanical Ventilation

On the satisfactory completion of work and **prior to the issue of an Occupation Certificate**, a Certificate of Test of Mechanical Ventilation shall be supplied to the Principal Certifying Authority from an approved mechanical ventilation engineer.

(Reason: To ensure compliance with approved plans)

Conditions which must be satisfied during the ongoing use of the development

75) ~DAOUA01 - Amplified Music (No speakers or music outside)

Music and other amplified sound played on the premises shall not give rise to offensive noise as defined under the provisions of the *Protection of the Environment Operations Act 1997*. The sound level output shall not exceed 5 dB(A) above the ambient background level at the boundary of the premises.

Speakers must not be installed and music must not be played in any of the outdoor areas associated with the premises including the public domain. Speakers located within the premises must not be placed so as to direct the playing of music towards the outdoor areas associated with the premises.

(Reason: Environmental amenity)

76) ~DAOUA06 - Deliveries

No deliveries are to occur before 7.00am or after 8.00pm weekdays and before 9.00am or after 5.00pm weekends and public holidays, to prevent noise disruption to the surrounding area.

(Reason: To control noise impacts)

77) ~DAOUA07 - Flashing Lights

No flashing, moving or intermittent lighting, visible from any public place may be installed on the premises or external sign associated with the development.

(Reason: Environmental protection)

78) ~DAOUA13 - Lighting Nuisance

The use of floodlighting or the like, to advertise or attract attention or for the convenience of patrons must be controlled so as not to cause any distraction or disturbance to nearby or adjacent residents, pedestrians or motorists. The use of flashing lights is strictly prohibited.

(Reason: Environmental amenity)

79) ~DAOUC06 - Noise, Air or Water Pollution - Protection of the Environment Operations Act 1997

The activities carried out on site shall not constitute a nuisance in relation to noise, air or water pollution as specified under the Protection of the Environment Operations Act 1997.

(Reason: Environmental protection)

80) ~DAOUC16 - Noise Complaints - General

The development must not cause offensive noise as defined by the *Protection of the Environment Operation Act 1997 (NSW)*. Following occupation, should complaints of a noise nuisance be received and substantiated by an authorised officer, an acoustic assessment shall be conducted by a qualified acoustic consultant and the resulting report shall be provided to Council for assessment. Should the recommendations in the report be accepted, the owner/occupier shall then implement all recommendations contained in the assessment report within a timeframe agreed to by Council.

(Reason: Noise Control and Amenity)

81) ~DAOUC20 - Waste Management

All waste generated on site is to be stored in the designated waste storage area in 1100L bins. All bins on site are required to be serviced by rear loading waste collection vehicles.

The site manager shall select a private/commercial waste service provider to provide all required waste services for the entire site and all its intended uses including event bins.

(Reason: Waste Management Control)

82) ~DAOUC21B - Minimal Cooking - No Mechanical Ventilation

Minimal cooking is permitted on the premises. The combined total power output of all appliances used in the preparation of food is limited to gas and electrical cooking appliances - 8 Kw and 29 megajoules/hour respectively

(Reason: To regulate the use of the premises)

83) ~DAOUC21D - Method of Cooking

The cooking of food at the premises by barbecue or charcoal methods is not permitted. This approval does not permit the installation of barbecue or charcoal cooking appliances.

(Reason: To regulate the use of the premises)

84) ~DAOUE02 - Bottle, Can or Garbage Disposal

No bottle, can or garbage disposal shall take place between the hours of 8.00pm and 7.00am daily.

(Reason: Disturbance and public interest)

Advisory Notes

a) **~DAANN01 - Dial Before You Dig**

Underground assets may exist in the area that is subject to your application. In the interests of health and safety and in order to protect damage to third party assets please contact Dial Before You Dig at www.1100.com.au or telephone 1100 before excavating or erecting structures. (This is the law in NSW). If alterations are required to the configuration, size, form or design of the development upon contacting the Dial Before You Dig service, an amendment to the development consent (or a new development application) may be necessary. Individuals owe asset owners a duty of care that must be observed when working in the vicinity of plant or assets. It is the individual's responsibility to anticipate and request the nominal location of plant or assets on the relevant property via contacting the Dial Before You Dig service in advance of any construction or planning activities.

Telecommunications Act 1997 (Commonwealth)

Telstra (and its authorised contractors) are the only companies that are permitted to conduct works on Telstra's mobile network and assets. Any person interfering with a facility or installation owned by Telstra is committing an offence under the Criminal Code Act 1995 (Cth) and is liable for prosecution. Furthermore, damage to Telstra's infrastructure may result in interruption to the provision of essential services and significant costs. If you are aware of any works or proposed works which may affect or impact on Telstra's assets in any way, you are required to contact: Telstra's Network Integrity Team on Phone Number 1800 810 443.

b) **~DAANN02 - Dividing Fences**

The erection of dividing fences under this consent does not affect the provisions of the *Dividing Fences Act 1991*. Under this Act, all relevant parties must be in agreement prior to the erection of any approved dividing fence/s under this consent.

Council has no regulatory authority in this area and does not adjudicate civil disputes relating to the provision of or payment for the erection of dividing fences.

If there is a neighbour dispute about the boundary fence and you are seeking mediation, you may contact the Community Justice Centre or if legal advice or action is required, you may contact the Chamber Magistrate.

c) **~DAANN03 - Footway Lease - Business Use of Footpath**

The operator of an approved business must apply to Council to lease Council's property (i.e. footways, plazas, or portions of public ways) should it be required for use in conjunction with the approved business.

The use of any footpath area for the purposes of additional dining to the approved business requires separate Council approval by application under section 125-127 & 137-139 of the *Roads Act, 1993* prior to the commencement of any such use.

A leasing fee will apply to the use of Council's property. The lease must be executed upon commencement of the operation of the refreshment room and is required to be renewed annually.

d) ~DAANN04 - Lapsing of Consent

In accordance with Section 4.53 of the Environmental Planning and Assessment Act 1979 (as amended), this Development Consent lapses five (5) years after the date from which it operates unless building, engineering or construction work has physically commenced. **A Construction Certificate must be obtained and the works commenced in accordance with the approved plans and specifications within five (5) years from the date of this Development Consent.**

e) ~DAANN06 - Process for Modification

The plans and/or conditions of this Consent are binding and may only be modified upon written request to Council under Section 4.55 of the Environmental Planning and Assessment Act, 1979 (as amended). The request shall be accompanied by the appropriate fee and application form. You are not to commence any action, works, contractual negotiations, or the like, on the requested modification unless and until the written authorisation of Council is received by way of an amended consent.

f) ~DAANN07 - Review of Determination

In accordance with the provisions of Section 8.2 of the Environmental Planning and Assessment Act 1979 (as amended) the applicant can request Council to review this determination. The request must be made to and Council must determine that request within a period of 6 months from the date of determination shown on this notice. A fee, as prescribed under Council's current Management Plan - Fees and Charges, is payable for such a review.

g) ~DAANN08 - Right of Appeal

Section 8.7 and 8.10 of the Environmental Planning and Assessment Act 1979 (as amended), gives the applicant the right to appeal to the Land and Environment Court within six (6) months after the date on which you receive this notice. Section 97 does not apply to the determination of a development application for State significant development or local designated development that has been the subject of a Commission of Inquiry.

h) ~DAANN09 - Signage Approval

A **separate development application** for any proposed signs which are either externally fitted or applied must be submitted for the approval of Council, prior to the erection or display of any such signs. This does not apply to signs which are classified as being 'Exempt Development'.

i) **~DAANN10 - Skips on Council Footpath**

The applicant must apply to Council's Customer Services Centre and pay the respective minimum ten (10) day application fees and deposit, should a mini-skip type or larger builder's waste container be required to be left on Council's footpath, nature strip or roadway for the removal of any builder's waste etc. These fees must be paid prior to the container's placement. In the event of the container being removed within the ten day period, and the Council being notified, a pro-rata refund will be made. If the container is to remain at the site for longer than ten days, a further fee must be paid before the ten day period expires. No consultation is necessary if placing the container within the property to which this application is related. However, caution should be exercised in placing the bin to ensure no damage occurs to Council property.

j) **~DAANN11 - WorkCover Requirements**

The Work Health and Safety Act 2011 and subordinate regulations, codes of practice and guidelines control and regulate the development industry.

Further information can be obtained from WorkCover NSW's website at <http://www.workcover.nsw.gov.au/newlegislation2012/your-industry/construction/Pages/default.aspx> or through their head office: WorkCover NSW, 92-100 Donnison Street, GOSFORD 2250 Postal address: WorkCover NSW, Locked Bag 2906, LISAROW 2252, Phone (02) 4321 5000, Fax (02) 4325 4145.
