Project Summary:

This Access Compliance Report is to accompany a Development Application for the development proposed at 824-834 Forest Road, Peakhurst NSW.

This development proposes a New Building with a total of 72 Residential units. The development is within Georges River Council LGA (formally Hurstville) that requires the provision of 10% Adaptable units and therefore the development proposes 8 Adaptable units. A total of 8 Accessible parking spaces have been provided in the development.

The project also provides 15 Livable units to comply with the SEPP 65 Objective 4Q1, that requires 20% of the units to incorporate the features of the Silver level of the Livable Housing Guidelines.

The development has building classification as detailed below;

- Class 2 (building containing more than 2 SOUs i.e. sole-occupancy units)
- Class 7a (car park)

This Access report is based on the relevant components of;

- Building Code of Australia (BCA) 2016, Volume 1- Performance requirements of DP1, DP2, DP8, DP9, EP3.4, FP2.1 and Parts D2, D3, E3 and F2 (where applicable)
- Disability (Access to Premises-Building) Standards 2010 (henceforth referred to as APS)
- AS1428.1-2009 Part 1: General requirements for access, including any amendments
- AS1428.4.1-2009 Part 4.1: TGSIs (Tactile ground surface indicators), including any amendments
- AS2890.6-2009 Part 6: Off-street parking for people with disabilities.
- AS4299-1995 Adaptable Housing
- AS1735 Lifts types included in the BCA including Part 12: Facilities for persons with disabilities
- State Environmental Planning Policy 65 (SEPP 65), Objective 4Q1, relating to requirements of the provision of Livable Housing Australia's Silver Level Apartments
- Livable Housing Australia's Livable Housing Design Guidelines- Fourth Edition

The assessment of the proposed development has been undertaken to the extent necessary to issue DA (Development application) consent under the Environmental Planning and Assessment Act. The proposal achieves the spatial requirements to provide access for people with a disability and it is assumed that assessment of the detailed requirements such as assessment of internal fit-out, details of stairs, ramps and other features will occur at CC (Construction Certificate) stage.

By compliance with the recommendation in this report, the development complies with the requirements of Access Code of Disability (Access to Premises-Building) Standards 2010, the Disability Access relevant sections of Building Code of Australia 2016, the requirements of SEPP 65 related to Objective 4Q1 - Livable Housing, and the essential criteria of AS4299-Adaptable Housing.

Relevant dates:

Fee proposal, number FP-8247 dated 06-07-2018. Fee proposal was accepted by Client on 10-10-2018.

Assessed Drawings:

The following drawings by Zhinar Architects have been assessed for compliance.

Drawing no	Issue	Date	Details
DA04	Α	30-10-2018	Basement Plan
DA05	Α	30-10-2018	Ground Floor Plan
DA06	Α	30-10-2018	Level 1 Floor Plan
DA07	Α	30-10-2018	Level 2 Floor Plan
DA08	Α	30-10-2018	Level 3 Floor Plan
DA16	Α	30-10-2018	Adaptable Units Floor Plan
DA17	Α	30-10-2018	Silver Level Units

Document Issue:

Issue	Date	Details
Α	23-10-2018	Issued for DA
В	04-12-2018	Issued for DA
С	14-12-2018	Issued for DA
D	16-12-2018	Issued for DA

Limitations and Copyright information:

This report is based on discussions with the project architect and a review of drawings and other relevant documentation provided to us. No site visit was undertaken for the purposes of this project.

This assessment is based on the provided drawings and not based on constructed works, hence the assessment will provide assurance of compliance only if all the recommendations as listed in this report are complied with and constructed in accordance with the requirements of the current BCA, AS1428.1-2009 and other latest, relevant standards and regulations applicable at the time of construction. Assessment is based on classification/use of the building. If the Class of the building changes to any other building Class, this access report will have to be updated accordingly.

Unless stated otherwise, all dimensions mentioned in the report are net (CLEAR) dimensions and are not be reduced by projecting skirting, kerbs, handrails, lights, fire safety equipment, door handles less than 900mm above FFL (finished floor level) or any other fixtures/fit out elements. When we check drawings, we assume that the dimensions noted are CLEAR dimensions and therefore the Architect / Builder is to allow for construction tolerances. Only some numerical requirements from relevant AS (Australian Standards) have been noted in the report and for further details and for construction purposes refer to the latest relevant AS.

This report and all its contents are a copyright of Vista Access Architects Pty Ltd (VAA) and can only be used for the purposes of this particular project. This document may also contain Standards Australia Ltd copyrighted material that is distributed by SAI Global on Standards Australia Ltd.'s behalf. It may be reproduced in accordance with the terms of SAI Global Ltd.'s Licence 1801c001. Standards Australia Ltd.'s material is not for resale, reproduction or distribution in whole or in part without written permission from SAI Global Ltd.

This report is does not assess compliance matters related to WHS, Structural design, Services design, Parts of DDA other than those related to APS or Parts of BCA or Parts of AS other than those directly referenced in this report. VAA gives no warranty or guarantee that this report is correct or complete and will not be liable for any loss arising from the use of this report. We will use our best judgement in regards to the LHA assessments. However, we are not to be held responsible if another licenced LHA assessor comes to a different conclusion about compliance, certification or allocation of a particular Quality mark to us as a number of items are subject to interpretation.

We have no ability to check for slip resistance of surfaces. All wet areas, parking areas, pavement markings shall have the appropriate slip resistance for the location. We also have no ability to check for wall reinforcements once the walls have already been constructed. The builder is to take full responsibility that the requirements listed in this report are met and the construction to be as per requirements of AS1428.1/AS4299/AS2890.6/AS3661/AS4586

Requirement Where accessible pedestrian entry has Multiple doorways: At least 1 to be accessible if 3 provided

- At least 50% to be accessible, if more than 3 provided
- Where doorway has multiple leaves, at least 1 leaf is to have clear opening of 850mm (excluding automatic doors)

Compliance Comments

Capable of compliance.

In common use areas, all single hinged doors and in case of multiple leaf doorways, at least 1 operable leaf is required to provide a clear opening of 850mm with the door circulations spaces as per AS1428.1-2009.

Note that the circulation spaces (other than doorway threshold ramp) to have a maximum floor grade of 1:40. Where there is a level difference at the door threshold, the maximum level difference can be 35mm if provided with a 1:8 doorway threshold ramp. This is achievable and the door selections are to be verified at CC stage of works.

	BCA Part D3.3 Parts of buildings required to be accessible
Requirement	 Every Ramp with grades steeper than 1:20 and less than or equal to 1:14 (excluding fire-isolated ramp) is to be compliant with: AS1428.1-2009 (including but not limited to - maximum grade of 1:14 with appropriate landings at a maximum of 9M of a flight of ramp). 1M clear width to be provided between handrails / kerb / kerbrails. Handrails and kerbs to be provided on both sides with appropriate handrails extensions. Slip resistance of ramp and landings to comply with BCA Table D2.14
Compliance	N/A
Comments	No 1:14 ramps have been identified in the development.
Requirement	 Step ramp if provided is to be compliant with: AS1428.1-2009 including max grade of 1:10, max height of 190mm, max length of 1.9M Slip resistance of ramp and landings to comply with BCA Table D2.14.
Compliance	N/A
Comments	No step ramps have been identified in the development.
Requirement	 Kerb ramp if provided is to be compliant with: AS1428.1-2009 including max grade of 1:8, max height of 190mm, max length of 1.52M Slip resistance of ramp and landings to comply with BCA Table D2.14.
Compliance Comments	N/A No kerb ramps have been identified in the development.

Requirement

Every **Stairway** (excluding fire-isolated stairway) is to be compliant with:

- AS1428.1-2009 (including but not limited to opaque risers, handrails on both sides including appropriate handrail extensions between 1M clear width and compliant nosing strips).
- Slip resistance to comply with BCA Table D2.14 when tested in accordance with AS4586.

Compliance Comments

Capable of compliance.

Where non-fire-isolated stairways have been provided, the features of the stairway will be assessed with the requirements of AS1428.1-2009 at the CC stage of works.

Note: In some cases, the stairway from the basement to the ground floor level is considered to be non-fire-isolated, in which case full compliance will be required as per AS1428.1-2009. Verify with the BCA consultant.

Note: For stairways with 90° to 180° turns at landings, in order for the handrails to comply with the consistent height requirement, the risers have to be offset at the mid-landings so that no vertical sections are created in the handrails. This applies to both non- fire-isolated and fire-isolated stairways.

Requirement

Handrail cross-section – for stairways and ramps to comply with AS1428.1-2009.

Diameter of handrails to be between 30mm-50mm and located not less than 50mm from adjacent walls with no obstructions to top 270° arc.

Compliance Comments

Capable of compliance.

Details to be verified at CC stage of works.

Requirement

Every **Fire-isolated Stairway** is to be compliant with AS1428.1-2009 in the following aspects:

- Handrail on one side (requirement under D2.17) with 1M clear space. Handrail extensions are not required however since the handrails cannot have any vertical sections and since handrail is required to be at a consistent height throughout the stairway including at landings, it may be essential to either provide handrail extensions or offset first riser going up at mid landings to achieve this at 90° to 180° turns.
 Nosing strips 50mm-75mm wide with minimum of 30% luminance contrast and
- Slip resistance to comply with BCA Table D2.14.

Compliance Comments

Capable of compliance.

Detailed features of the fire-isolated stairways will be assessed with the requirements of AS1428.1 at the CC stage of works.

			Slip resistance requirements as per BCA BCA Table D2.14 has the following Slip –resistance requirements when tested in accordance				
	with AS4586:						
	Application Surface conditions						
	Down stooner than 1:14	Dry P4 or R11	Wet				
	Ramp steeper than 1:14 Ramp steeper than 1:20 but not steeper than		P5 or R12 P4 or R11				
	Tread or landing surface	P3 or R10	P4 or R11				
	Nosing or landing edge strip	P3	P4				
Slip resistance requirements as per AS4299 AS4299 has slip resistance requirements based on requirements of AS3661 (Slip resistance of pedestrian surfaces) for the following areas: - Floor surfaces in sanitary facilities including all toilets and bathrooms (essent - Floor surfaces in the kitchens and Laundries (essential feature). - Pathways / walkways within the site, within landscaped areas, balconies and external paved areas (desirable feature for Class A or B developments). - AS3661.1-1993 is an old Australian standard which has been superseded wire AS4586:2013 (Slip resistance classification of new pedestrian surface material guidelines for the selection of slip-resistance of pedestrian surface material guidelines for the selection of slip-resistant pedestrian surfaces Compliance Compliance Compliance Cipable of compliance. For Slip resistance of surfaces the builder is required to provide a Certificate statistic slip resistance of the surfaces comply with the above listed requirements when the							
Requirement Compliance Comments	AS4586. Details to be provided at the CC stage of works. Every Passenger lift is to comply with the requirements of BCA E3.6. This has been assessed further in the report in the Lifts section. Refer to Lifts section.						
Requirement	Passing spaces requirement	in acceptually complyin	a with AC1120 1 at				
	It is a requirement to provide passing spaces in accessways complying with AS1428.1 at maximum 20 M intervals, where a direct line of sight is not available. Space required is 1800x2800mm (in the direction of travel). Chamfer of 400x400mm is permitted at corners.						
Compliance Comments	N/A There are no accessways over 20M lengths in the development where a direct line of sight is not available.						
Requirement	Turning spaces requirement It is a requirement to provide turning spaces i within 2M of the end of accessways where it i every 20M intervals. CLEAR Space required (measured from skirting to skirting).	s not possible to continu	e travelling and at				
Compliance Comments	Complies. Adequate turning spaces have been provided widths being 1540mm clear or alternative or within 2M of the end of the passagewa. A space of 1540mm x 2070mm is also redoors.	ly a space of 1540mm x y.	2070mm provided at

Requirement	Carpet specifications Carpet if used in areas required to be accessithickness not more than 11mm and carpet baneight to a maximum of 15mm.						
	Capable of compliance if carpets are provided	d in the common use are	as.				

BCA Part D3.4 Exemption

Requirement

Access is not required to be provided in the following areas:

- Where access would be inappropriate because of the use of the area
- Where area would pose a health and safety risk
- Any path which exclusively provides access to an exempted area

Compliance Comments

For information only.

Areas such as lift machine rooms, fire services room, commercial kitchens etc. in the development are exempted from providing access under this clause due to WHS concerns.

Where a care taker is provided in the development, the toilet provided exclusively for use by the caretaker can be excluded from providing access based on the provisions in this clause.

BCA Part D3.5 Accessible Carparking

Requirement

Class 2

There are no Accessible carparking requirements for a Class 2 under the BCA. If adaptable housing has been mandated by the Council, then carparking spaces for Adaptable units will be required under the requirements of AS4299- Adaptable housing.

Compliance Comments

Complies.

Georges River Council requires provision of 10% Adaptable units in the development. Development has total number of 72 units. 10% of 72 = 8 required Adaptable units. Therefore, 8 accessible carparking spaces are required for the residential component of the development. 7 x AS2890.6 spaces and 1 x AS4299 spaces has been provided. 8 Accessible / AS4299 compliant car parking spaces have been provided in development. One accessible / AS4299 compliant parking space is required to be allocated to each of the Adaptable units.

Detailed features of the accessible/ adaptable parking spaces are to be verified at CC stage of works.

AS2890.6-2009 requirements for Accessible car parking space

Requirement

- Dedicated space 2.4Mx5.4M, Shared space 2.4Mx5.4M at the same level
- Slip resistant flooring surface with maximum fall 1:40 in any direction or maximum 1:33 if bituminous and outdoors.
- Central Bollard in shared space at 800+/-50mm from entry point.
- Pavement marking in dedicated space by means of access symbol between 800mm-1000mm high placed on a blue rectangle of maximum 1200mm and between 500mm-600mm from its entry point (marking not required where allocated to an Adaptable unit).
- Minimum headroom of 2.2M at entrances and 2.5M is required over shared zones as well as dedicated spaces.
- Non-trafficked area of the shared space to have marking strips at 45°, 150-200mm wide at 200mm-300mm spaces (not required where driveways are used as shared spaces)

Compliance Comments

Capable of compliance.

Details to be verified at the CC stage of works.

Refer to diagrams below for requirements, especially in regards to head height requirements.

Note: The pavement marking shall have the appropriate slip resistance for the location. This requirement is to be added to the project specifications to ensure compliance.

Head heights for both dedicated accessible parking space and the shared zone to be as shown above. No beams, pipes, sprinklers or any other encroachments are persmissible for the entire 5.4M width of the dedicated and shared zone as per Section shown above.

150-200 wide diagonal stripes with spaces 200-300 between stripes at 45+/- 10°

The Accessible parking, shared zones, linemarking and bollards to be as shown above. Access symbol is not to be provided when spaces are allocated to Adaptable units.

	AS4299 requirements
	for a car parking space allocated to an Adaptable unit
Requirement	For essential Class C level compliance:
-	- Carparking space or garage with minimum dimension of 3.8Mx6M
	- Maximum grade of 1:40 in any direction
	For Class A / B level compliance (desirable features):
	- Roof to car parking space is desirable.
	- Internal head height clearance of 2.5M is desirable.
	- Power operated roller door to garages is desirable.
	- Covered access to unit is desirable.
	- Illumination level of min 50 lux is desirable.
Compliance	Complies
Comments	The development requires Adaptable unit to a Class C level.
	Detailed features of the parking spaces allocated to the Adaptable units are to be verified at
	CC stage of works.

	BCA Part D3.6 Signage			
Requirement	Braille and Tactile signage is required to identify Accessible Sanitary facilities			
Compliance	N/A			
Comments	No common use sanitary facilities have been proposed in the development.			
Requirement	Braille and Tactile signage is required to identify Ambulant Sanitary facilities			
Compliance Comments	N/A No common use, ambulant sanitary facilities have been provided in the development.			
Requirement	Braille and Tactile signage is required to identify Hearing Augmentation			
Compliance Comments	N/A Hearing augmentation is not provided since there is no inbuilt amplification system proposed in the development.			
Requirement	Braille and Tactile signage is required to identify a Fire exit door required by E4.5 by stating the 'Exit' and 'Level', followed by either: - The floor level number or - Floor level descriptor or - A combination of both of the above. Sign must be located on the side that faces a person seeking egress The "?" shown in image above is to be replaced with the floor level where the door is located. Image of the running person is optional.			
Compliance Comments	Capable of compliance. All doors nominated as Exit doors require signage as described above. Signage selections generally take place at CC stage of works. Selection of signage as specified above will lead to compliance. Details of selected signage to be verified at CC stage of works.			
Requirement	Signage is required to a non-accessible pedestrian entrance as per AS1428.1-2009 to direct to the nearest accessible pedestrian entry. Arrow direction on this signage is indicative only and the direction of the arrow will be based on the location of the accessible entry.			
Compliance Comments	Capable of compliance. Signage selections generally take place at CC stage of works. Selection of signage as specified above will lead to compliance. Details of selected signage to be verified at CC stage of works.			
Requirement	Signage is required where a bank of sanitary facilities is not provided with an accessible unisex sanitary facility.			
Compliance Comments	N/A			
Requirement	All signage is required to be as per Specification D3.6 Braille and Tactile Signs This includes location of signage, specifications in regards to braille and tactile characters, luminance contrast and lighting.			
Compliance Comments	Capable of compliance. Signage selections generally take place at CC stage of works. Selection of signage as specified above will lead to compliance. Details of selected signage to be verified at CC stage of works.			

Tests are required when approaching:		BCA Part D3.8 Tactile indicators (TGSIs)
- Stainways other than fire-isolated stainways Escalators / passenger conveyor / moving walk Ramp (other than fire-isolated ramps / kerb or step or swimming pool ramps) Under an overhead obstruction of *24M fire obarrier is provided When accessway meets a vehicular way adjacent to a pedestrian entry (if no kerb / kerb ramp provided at the location). 	BCA Part E Lift Installations
	BCA E3.2 Stretcher facility in lifts
Requirement	A Stretcher lift is to be provided if a passenger lift is installed to serve any storey with an effective height of 12M. The space requirement is 600mm wide x 2000mm deep x 1400mm high above the floor level. Confirm this requirement with your BCA consultant.
Compliance Comments	Capable of compliance Details to be verified at CC stage of works.
	DCA F2 6 December lift
Requirement	BCA E3.6 Passenger lift In an accessible building, Every Passenger Lift (excluding electric passenger lift, electrohydraulic passenger lift, inclined lift) must be subject to limitations on use and must
Compliance Comments	comply with Tables E3.6a and E3.6b Capable of compliance. A certificate of compliance from the lift supplier will be required at the CC stage of works stating that the proposed lift complies with the requirements of BCA Part E3- Lift installations.
Requirement	Limitations on use of Stairway platform lifts, Low-rise platform lift, Low-rise, low-speed constant pressure lift and small sized, low-speed automatic lift
Compliance Comments	N/A Not identified in the development.
Requirement	Handrail requirements for passenger lifts. Apart from stairway platform lift and low-rise lifts, a handrail is required as per AS1735.12.
Compliance Comments	Capable of compliance. Details to be verified at CC stage of works.
Requirement	Lift floor dimensions (excluding stairway platform lift) - Lifts traveling 12M or under, floor size, 1100mm wide x 1400mm deep - Lifts travelling more than 12M, floor size 1400mm wide x 1600mm deep
Compliance Comments	Capable of compliance Details to be verified at CC stage of works. Additional lift car size may apply if stretcher lift is required under the BCA.
Requirement	Minimum Door opening size complying with AS1735.12, not less than 900mm clear (excluding stairway platform lift).
Compliance Comments	Capable of compliance Details to be verified at CC stage of works.
Requirement	All lifts with a power operated door are required to have a Passenger protection system complying with AS1735.12.
Compliance Comments	Capable of compliance Details to be verified at CC stage of works.

Requirement	Lift landing doors to be provided at upper landing (excluding stairway platform lift).
Compliance	Capable of compliance
Comments	Details to be verified at CC stage of works.
Requirement	Lift car and landing control buttons to comply with AS1735.12 (excluding stairway
	platform lift and low-rise platform lift).
Compliance	Capable of compliance
Comments	Details to be verified at CC stage of works.
Requirement	Lighting (for all enclosed lift cars) to be provided in accordance with AS1735.12 and
	AS1680. Minimum illuminance of 100 lx is required at the level of the car floor and average
	of 50 lx is required on the control panel surface.
Compliance	Capable of compliance
Comments	Details to be verified at CC stage of works.
Requirement	To all lifts serving more than 2 levels, audible and visual indication to be provided as per
	AS1735.12.
Compliance	Capable of compliance.
Comments	Details to be verified at CC stage of works.
Requirement	Emergency hands free communication (excluding stairway platform lift) – provide a button
	that alerts a call centre and a light that the call has been received.
Compliance	Capable of compliance
Comments	Details to be verified at CC stage of works.

Additional Features required as per AS1428

Refer to AS1428 for full list of requirements.

	The following accessibility requirements apply only to:
	- Common use areas within the residential component (including passageways leading to SOUs)
Requirement	Accessway width requirements All Accessway widths are to be a minimum of 1M clear (measured from skirting to skirting) with vertical clearance of at least 2M
Compliance Comments	Complies. Details to be verified at CC stage of works.
Requirement	 Doorway requirements All common use doorways in the development to be in accordance with AS1428.1 Door thresholds are to be level or they can incorporate a Threshold ramp as per AS1428.1 i.e. max 1:8 grade, max height of 35mm and located within 20mm of door leaf. Distance between successive doorways in airlocks to be 1450mm which is measured when the door is in open position in case of swinging doors.
Compliance Comments	Capable of compliance. Details to be verified at CC stage of works.
Requirement	Door hardware requirements Door hardware including door handles, door closers and the in-use indicators / snibs in accessible and ambulant toilets are required to comply with requirements of AS1428.1.
Compliance Comments	Capable of compliance. Door hardware selections generally take place at CC stage of works. Selection of door hardware as specified above will lead to compliance and these selection details are to be verified at CC stage of works.
Requirement	 Luminance contrast requirements for doorways. All doorways to have a minimum luminance contrast of 30% provided as per AS1428.1 with the minimum width of the luminance contrast to be 50mm.
Compliance Comments	Capable of compliance. Painting schedule is generally developed at the CC stage of works. The painting schedule of walls/doors and door frames are to consider the above requirements when colours are selected. Generally, a light colour door with a dark colour frame will satisfy requirements. Selection details are to be verified at CC stage of works.
Requirement	 Floor or ground surfaces Use slip-resistant surfaces. The texture of the surface is to be traversable by people who use a wheelchair and those with an ambulant or sensory disability. Abutment of surfaces is to have a smooth transition. Construction tolerances to be as per AS1428.1 Grates if used in the accessible path of travel is required to comply with the requirements as per AS1428.1
Compliance Comments	Capable of compliance. Floor surface selections generally take place at CC stage of works. Selection of floor surfaces as specified above will lead to compliance and these selection details are to be verified at CC stage of works.
	 Switches, Controls and Lighting requirements All switches and controls (including controls for intercom facilities and external lift control buttons) on an accessible path of travel, Accessible SOUs and Accessible sanitary facilities to be located as per requirements of AS1428.1
Compliance Comments	Capable of compliance. Lighting fixture selections and locations generally take place at CC stage of works. Selection of lighting fixtures and locating them as specified above will lead to compliance. These selection/location details are to be verified at CC stage of works.

AS4299.1995- Adaptable Housing

Appendix A of AS4299 schedule is a list of features to be incorporated into a housing unit for it to be termed an 'Adaptable House'.

There are 3 Classification levels for Adaptable Housing

Adaptable Class A in which all 119 essential and all desirable features are to be incorporated.

Adaptable Class B in which all essential and 50% of 64 available desirable features are to be incorporated **Adaptable Class C** in which all essential features are to be incorporated.

8 Adaptable units are required by the Council's DCP to a Class C level. The units designated as adaptable are unit numbers **A07**, **A09**, **A12**, **A22**, **B10**, **B20**, **B11** and **B21**.

At DA stage there is insufficient information to certify compliance with the Standard, however, in accordance with the table below, the nominated units can comply with the spatial requirements of AS4299 for Adaptable Housing.

Note: ALL Adaptable units also comply with the Silver level requirements. Refer to Livable Housing section of the report for further details.

ADAPTABLE UNIT / ADAPTABLE UNIT A09

Adaptable units B10 and B20

Adaptable units B11 and B21

By incorporating the essential requirements listed Checklist below in the Specifications, the nominated Adaptable units can achieve full compliance with Adaptable House Class C

AS4299.1995 - Class C - Essential requirements.

 $R \square = Required;$

 $C \square$ =Capable of compliance at **by adding the requirement to the project specifications** or in some cases capable of compliance at post adaptation stage (where noted in comments).

Thick blue line indicates the location of wall reinforcements which are to be provided at pre-2950 2700 adaptation itself. Red dotted line indicates the shower circulation space. Black dotted line indicates the WC pan circulation space. 425 300 .850 clear 425 850 clear min Provision for bathroom area with Circulation spaces of Complies \square $\overline{\mathbf{V}}$ Shower and WC (including fixtures) to comply with A bathroom with minimum space of 2Mx 2.95M or 2.3Mx2.7M or Note that wall reinforcements and waterproofing details 2.4Mx2.45M is achievable. to comply with AS4299 Wall reinforcement details to be verified at the CC stage. 580 - 600 1800 min Wall reinforcement 0 300 1000 1250 min 800 min requirements at Preadaptation 900 Reinforcement 900 250 min 1500 mim 1500 min requirements for the Adaptable unit for WC 600 max 600 max 600 min and shower (in postadaptive position) 200 max showed hatched. 1160 450 800 1100 min Refer to AS4299 for further details. c/l min Laundry Provision for adequate circulation space in front of or $\sqrt{}$ Capable of compliance. \square Details to be verified at the CC stage besides appliances (minimum 1550mm depth) Circulation at doors to comply with AS1428.1 Provision for automatic washing machine Other General requirements All surfaces to be Slip resistant to AS3661 and AS 4586 Capable of compliance. $\sqrt{}$ $\sqrt{}$ All GPOs and Lighting/ lux requirements as per AS4299 Details to be verified at the CC stage All waterproofing as per AS4730 Requirement Where the location of fixtures such as WC pans, wash basins, sinks, laundry fixtures and any other fixtures are to be relocated post-adaptation to comply with AS1428.1, then the service pipes (waste and water supply pipes) have to be laid in the correct AS1428.1 specified position at pre-adaptation itself and the services to be capped off for future use. General It is recommended that where balconies / outdoor areas have been provided to Adaptable units, provide the sliding doors such that the floor tracks are recessed, so recommenda level access can be provided to the balcony / outdoor areas from inside the unit. tions (Advisory only Sliding doors in the living areas leading to outdoor areas are to be such that opening of / not the door is able to provide a clear opening space of 850mm with a latch side space of mandatory) 530mm.

- If the balcony is to be brought up to the same level as the unit at post-adaptation by
 means of decking etc. then ensure that the minimum handrail height requirements
 required under the BCA are complied with, considering the raised height of the balcony.
- Consideration to be given to recess the slab in the wet areas so that there is no level difference once the floor finishes are applied (i.e. flush transition from carpeted area to tiles area).

SEPP 65 - Part 401

Compliance assessment with Objective 4Q1 that requires 20% of the units to incorporate the features of the Livable Housing Guidelines Silver level.

Total number of residential units in the development = 20% of 72 =15 required Livable units. The following 15 units A02, A04, A05, A06, A14, A15, A16, A17, A18, A20, A24, A25, A26, A27 and A28 are capable of providing compliance with the features of Silver level of Livable Housing Guidelines as noted

in the table below.

SILVER LEVEL UNIT A04

1:100 @ A1 sheet 1:200 @ A3 sheet

SILVER LEVEL UNIT A05, A15, A2! A06, A16, A26

SILVER LEVEL UNIT A14 & A24

SILVER LEVEL UNIT A18 & A28

Silver level unit A17 and A27

Silver level unit A20 and A30

Silver level unit A02

By incorporating the requirements of the below Checklist in the Specifications of the project, the nominated Livable units can achieve full compliance with Livable Housing Guidelines- Silver Level

In addition to the Nominated Silver level units, all the Adaptable units are also capable of compliance with Silver level subject to the provisions of the below checklist.

Design Element	Requirements (All dimensions noted are required to be clear of finishes as required under AS1428.1)	Compliance / Comments
1 Dwelling Access	 (a) Provide a safe and continuous 1M clear width pathway from front site boundary to an entry door to the dwelling. (b) Path including any ramps and walkways to have no steps, even firm, slip-resistant surface, max 1:40 crossfall, max slope of 1:14 with landings of 1.2M every 9M and landings every 15M for 1:20 walkways. 1.2M clear width of ramps are required. 	Complies. Verify at CC

	 (c) Pathway may be provided via an associated car parking in which case the car parking space to be 3200 (width) x5400 (length), even, firm and slip resistant, level surface of 1:40 max grade and 1:33 max grade for bitumen 	N/A Access provided from the street.
	 (d) Step ramp may be provided at an entrance doorway. The step ramp to be max 190mm height, max 1:10 grade, max 1900mm length. (e) Level landings of 1200mm are required exclusive of the swing of the 	N/A N/A
	door or gate and to be provided at the head and foot of the ramp. (a) Dwelling Entry should provide an entrance door with	Capable of
2 Dwelling entry	(i) min clear opening width of door to be 820mm (ii) Step free threshold of max 5mm with rounded or bevelled lip (iii) reasonable shelter from the weather	compliance. Verify at CC
	(b) Level landing of 1200x1200mm at step-free entrance door on the arrival / external side of the entrance door.(c) Max permissible threshold is less than 56mm where provided with a 1:8 grade threshold ramp.	Complies Verify at CC N/A
	(d) Entrance to be connected to a pathway (specified under Element 1) Note: The entrance to incorporate waterproofing and termite management requirements as specified in the NCC	Complies
Internal doors and corridors	 (a) Doors to rooms on the entry level used for living, dining, bedroom, bathroom, kitchen, laundry and sanitary compartments to be (i) 820mm clear opening and (ii) provided with a level threshold of max 5mm between abutting surfaces with rounded or bevelled lip 	Capable of compliance. Verify at CC
	(b) Internal corridors and passageways to doorway to be min 1M clear (measured from skirting to skirting)	Capable of compliance. Verify at CC
4 Toilet	 (a) One Toilet to be provided on the ground or entry level that provides, (i) Min 900mm between walls or amenities (ii) Min 1200mm clear space in forward of the WC pan exclusive of door swing. (iii) The toilet pan to be positioned in the corner of a room to enable handrails 	Complies. Verify at CC
5 Shower	(a) One bathroom should feature a slip resistant, hobless shower recess. Shower screens are permitted provided they can be easily removed at a later date.(b) The shower recess should be located in the corner of the room to enable the installation of grabrails at a future date.	Capable of compliance. Verify at CC
	For hobless specification please see Australian Standard AS3740-3.6. Reinforcement guidelines for walls in bathrooms and toilets are found in element 6	
Reinforcement of bathroom & toilet walls	(a) Except for walls constructed of solid masonry or concrete, the walls around the shower, bath (if provided) and toilet should be reinforced to provide a fixing surface for the safe installation of grabrails.	Capable of compliance. Verify at CC
	 (b), (c) and (d) the walls around toilet, bath and shower to be via: (i) Noggins with a thickness of at least 25mm (ii) Sheeting with a thickness of at least 12mm Refer to diagrams provided in the Livable Housing Guideline document. 	Capable of compliance. Verify at CC

Disability Discrimination Act

Advisory Only

The Federal Disability Discrimination Act 1992 (DDA) provides protection for everyone in Australia against discrimination based on disability. Section 32 of the DDA focuses on the provision of equitable and dignified access to services and facilities for people with mobility, sensory and cognitive disabilities.

Disability discrimination happens when people with a disability and their relatives, friends, carers, co-workers or associates are treated less fairly than people without a disability.

Compliance with Access to Premises Standards give certainty to building certifiers, building developers and building managers that, if access to (new parts) of buildings is provided in accordance with these Standards, the provision of that access, to the extent covered by these Standards, will not be unlawful under the DDA. This however applies only to the new building or new parts of an existing building and its affected part. All areas outside the scope of these areas are still subject to the DDA. We cannot guarantee or certify for DDA compliance because DDA compliance can only be assessed by the Courts.

Scope of DDA extends beyond the building fabric and also includes furniture and fittings.

Some recommendations to address common furniture and fittings have been listed below. Non-provision of the below recommendations may not affect compliance under the BCA but may leave the building owner vulnerable to a claim under the DDA.

For new kitchens / BBQ areas in residential common use areas, it is suggested that this kitchen could be made partially accessible by providing a width of 900mm next to the sink as vacant space (without cabinetry under the bench top) and a tap within 300mm from the front of the sink next to the vacant space. The distance in between the benches to be 1550mm. This would allow a person in a wheelchair to independently move within the kitchen and use basic facility, being the sink independently.

Statement of Experience

Farah Madon- Director

ACAA Accredited Access Consultant, Livable Housing & Changing Places Registered Assessor

- Accredited member of Association of Consultants in Access Australia (ACAA) Membership no 281
- Architect, registered with the NSW Architects Registration Board.
 Registration number 6940
- Member of Australian Institute of Architects (RAIA), A+ Practice member, 49397
- Registered Assessor of Livable Housing Australia. License no 10032
- Registered Assessor of Changing Places Australia. Registration no CP006

Farah's Educational Profile and Qualifications include:

- Bachelor of Architecture Degree with Honours (B.Arch.)
- OHS Construction Induction Training Certificate
- Units PRDAC401A/403A/503A & CPP40811 from Certificate IV in Access Consulting
- Unit CPP50711 from the Diploma in Access Consulting
- Successful completion of ACAA's Access Consultant's testing process
- Changing Places Australia Training Course

Farah has 20 years of experience of working in the field of Architecture and Access. Farah specialises in access consultancy services, including design for access, access related advise and auditing services and performance solution assessment for access related issues under the BCA by means of Expert Judgement. Farah has been invited as an expert witness for Access related matters in the Land and Environment Court.

Farah currently participates on the following key committees concerning access for people with disabilities, on an honorary basis:

- Vice President of Association of Consultants in Access Australia
- Convener of the ACAA's Access related Practice and Advisory Notes
- Community Representative Member of the Penrith City Council's Access Committee
- Member of Australian Institute of Architect's (RAIA) National Access Work Group (NAWG)
- Management Committee member of NSW Network of Access Consultants
- Livable Housing Australia's Industry Reference Group (IRG) Member
- Committee member of ME-064 Committee of Standards Australia responsible for the AS4299 and AS1428 suite of standards.

Meet our team

Vanessa Griffin- Access Consultant

ACAA Associate Access Consultant & Livable Housing Assessor

- Associate member of Association of Consultants in Access Australia (ACAA) Membership no 500
- Member of AIBS Australian Institute of Building Surveyors Vanessa's Educational Profile and Qualifications include:
- Diploma of Surveying and Diploma of Health and Building Surveying
- Certificate IV in Access Consulting

Jenny Desai- Access Consultant

ACAA Associate Access Consultant

 Associate member of Association of Consultants in Access Australia (ACAA) Membership no 572

Jenny's Educational Profile and Qualifications include:

- Master of Design (M.Des) from University of Technology, Sydney
- Certificate IV in Access Consulting
