Hi Erin

In relation to the Stormwater Management Plan (ACOR Consulting, 2022) and the Flood Impact Assessment (Torrent Consulting) would it be possible to provide a document that explains where in these reports the changes are and how these changes then satisfy the recommendations of the Northrop Review. The ACOR response letter does not sufficiently provide direction to the changes.

Also I was contacted by Soil Futures (who did the peer review of the Hydrogeological Assessment by Martens). He advises that Martens have attempted to contact him directly. I previously requested any queries in relation to this be direct to me. Can you please advise Martens that if they have any queries about the review they need to be in writing and come to me initially.

Should you require clarification please advise.

Regards

Paul Smith
