### ENTRY LANDSCAPE

The two vehicular entrances to the Animal Rehoming Facility are highlighted through the placement of feature trees. These trees are also located at the community pedestrian entrance and provide wayfinding cues.

#### ROBUST MATERIALS

The pavement at the entrances is durable and long lasting concrete. Organic bark mulch is used in the garden beds surrounding the carpark.

We acknowledge the Yugara people of Mt Coot-tha, the Minjungbal people, the Widjabul people and The Turrbal people as the Traditional Owners of the lands on which we work and create. We also acknowledge the traditional custodians throughout Aboriginal and Torres Strait Islander lands. We recognise their ongoing connection to country, land and waters that were never ceded and pay our

respects to Elders, past, present and future.
