F. SIGNAGE AND EDUCATION PLAN						
Please provide a description of how the following will b	pe communicated to tenants of the proposed					
development						
1. Information about how to access and use the waste	Waste management guides will be located in					
and rescource recovery service	each unit for occupants to read and follow					
2. Location of the bin room/area, waste and recycling	Waste management guides will be located in					
chutes (if Applicable), and how to use them	each unit for occupants to read and follow					
H. WASTE SYSTEM MANAGEMENT						
1. Outline whether waste management will be the						
responsibility of individual occupiers or an appointed	The individual occupants will be responsible					
building manager or representative of the Owners	for their own waste and the disposal into					
Corporation.	collection bins					
I. SITE ACCESS ARRANGEMENTS						
1. For on-site collections, describe site access						
arrangements and ensure these are aligned with a						
traffic impact assessment for the proposed						
development. The traffic impact assessment should						
consider the surrounding network of roads, junctions,						
intersections and other transport related infrastructure						
where extra traffic (such as waste collection services)						
could pose a problem.	N/A					
J. BIN STORAGE AREAS						
	Bin storage area is located behind a privacy					
1. Describe bin storage areas with regards to amenity	fence to the right hand side of driveway,					
(screening, odour, noise), cleaning accessibility and bin	which is hidden away from all lines of sight.					
manoeuvrability. Outline the location of, and access to,	The area has gates leading into bins. A hose					
bin storage areas. Particularly, outline whether bins are	and external tap will be located on the privacy					
to be stored in individual dwellings or in a communal	fence to bin storage, for the washing of bins,					
area, as well as the capacity and size of bin storage	with the intention of the water to run onto					
areas	the grassed area.					
K. BIN COLLECTION AREA						
1. Describe on-site and on-street bin collection area/s.	Oniste storage areas have concrete paving for					
Document potential encumbrances or hazards and show	5 5					
on marked-up drawing/s and provide detail on how	been establashied for the on-street collection					
these will be mitigated or managed	area					
2. Demonstrate that waste collection areas provide						
adequate space to accommodate the number of bins						
proposed by illustrating the areas on marked-up						
drawing/s.						
L. BIN TRANSFER FROM STORAGE AREA TO COLLECTION						
1. Outline whether the transfer of bins from bin storage	The onsite manager will be the responsible					
area/s to waste collection area/s will be the	person for the transfer of watse bins to and					
responsibility of an appointed manager or individual	from the street for pick up					
2. Describe strategy for transfer of bins from bin storage	There is clear paving from the on-site storage					
area/s to waste collection area/s, including access	area to the kerb side pick up area. The site					
routes for bin transfer and gradients of transfer paths	gradients are no more than 1:14 for Silver					
and show on marked-up drawing/s.	Certification
