

General Terms of Approval

Notice No: 1645283

Attachment A – Specific Conditions for DA2025-0114

Administrative conditions

A1. Information supplied to the EPA

A1.1 Except as expressly provided by these general terms of approval, works and activities must be carried out in accordance with the proposal contained in:

- The development application DA2025-0114 submitted to Tamworth Regional Council on 11 October 2024;
- Any environmental impact statement, '*Strathmore Quarry, Environmental Impact Statement, Oats Block Pty Ltd*', prepared by Quarry Plan NSW Environmental Assessment Services, dated 26 September 2024, relating to the development; and
- All additional documents supplied to the EPA in relation to the development, including:
 - '*Groundwater Impact Assessment, Strathmore Quarry, 222 Burgmanns Lane, Warral NSW, On behalf of: Oats Block Pty Ltd*', prepared by Ground Doctor Pty Ltd, dated 23 August 2024.
 - '*Strathmore Quarry Construction and Operational Noise and Vibration Assessment*', Prepared for Quarry Plan NSW, Prepared by RCA Australia (RCA ref 16843-401.1), dated June 2024
 - '*Strathmore Quarry Project, Air Quality Impact Assessment*', Prepared for Quarry Plan NSW on behalf of Oats Block Pty Ltd, Prepared by Northstar Air Quality Pty Ltd (Report Reference: 24.1012.FR1V1), dated 27 March 2024.

A2. Fit and Proper Person

A2.1 The applicant must, in the opinion of the EPA, be a fit and proper person to hold a licence under the *Protection of the Environment Operations Act 1997*, having regard to the matters in s.83 of that Act.

Discharges to Air Water and Applications to Land

P1. Location of monitoring/discharge points and areas

Water

P1.1 The following points referred to the table are identified as points for the purposes of monitoring and/or the setting of limits for the discharge of pollutants to water from the point.

EPA Identification No.	Type of Monitoring Point	Type of Discharge Point	Location Description
1	Water quality monitoring		Sump within Quarry Pit identified as "Sump" on 'Figure 3.11 - Catchments & major water management system components' within the EIS for the development (DOC24/934229-1).
2	Water quality monitoring		Sediment Dam identified as "Dam A" on 'Figure 3.11 -

General Terms of Approval

Notice No: 1645283

			Catchments & major water management system components' within the EIS for the development (DOC24/934229-1).
3	Discharge water quality monitoring	Wet weather discharge	Sediment Dam identified as "Dam B" on 'Figure 3.11 - Catchments & major water management system components' within the EIS for the development (DOC24/934229-1).

Weather

P1.2 The proponent must install a meteorology station on-site prior to operations commencing at the premises. The meteorology station must be installed at a location that is in accordance with AM-1 (AS/NZS 3580.1.1) per the *Table of AM-coded methods for ambient air monitoring*.

P1.3 The following point(s) in the table are identified in this licence for the purpose of the monitoring of weather parameters at the point.

EPA Identification No.	Type of Monitoring Point	Location Description
W1	Weather Analysis	Meteorology station to be installed on the premises in accordance with condition P1.2 above.

Limit conditions

L1. Pollution of waters

L1.1 Except as may be expressly provided by a licence under the *Protection of the Environment Operations Act 1997* in relation of the development, section 120 of the *Protection of the Environment Operations Act 1997* must be complied with in and in connection with the carrying out of the development.

L2. Concentration limits

L2.1 For each discharge point specified in the Table below, the concentration of a pollutant discharged to water at that point, must not exceed the concentrations limits specified for that pollutant in the Table below.

L2.2 Where a pH quality limit is specified in the Table below, the specified percentage of samples must be within the specified ranges.

L2.3 To avoid any doubt, this condition does not authorise the discharge or emission of any other pollutants to water.

General Terms of Approval

Notice No: 1645283

Point 3

Water

Pollutant	Units of measure	50% concentration limit	90% concentration limit	3DGM concentration limit	100% concentration limit
Oil and Grease	mg/L	-	-	-	10
pH	mg/L	-	-	-	6.5 - 8.5
Total Suspended Solids	mg/L				50

L3. Waste

L3.1 The licensee must not cause, permit or allow any waste generated outside the premises to be received at the premises for storage, treatment, processing, reprocessing or disposal or any waste generated at the premises to be disposed of at the premises, except as expressly permitted by a licence under the *Protection of the Environment Operations Act 1997*.

L3.2 This condition only applies to the storage, treatment, processing, reprocessing or disposal of waste at the premises if it requires an environment protection licence under the *Protection of the Environment Operations Act 1997*.

L4. Noise limits - Construction Phase

L4.1 Construction noise associated with the development must achieve the construction noise management levels detailed in the Interim Construction Noise Guideline (DECC, 2009) as may be updated or replaced from time to time.

L4.2 All feasible and reasonable noise mitigation measures and work practices must be implemented to ensure that construction noise and vibration impacts to surrounding residential receivers are minimised.

L5. Noise limits - Operation Phase

L5.1 Noise generated at the premises must not exceed the noise limits at the times and locations in the table below.

Location	Noise Limits in dB(A)
	Day
	L _{Aeq} (15 minute)
Any non-project associated residential receiver	40

L5.2 For the purposes of condition L5.1:

- a) Day means the period from 7am to 6pm Monday to Saturday and the period from 8am to 6pm Sunday and public holidays.

L5.3 The noise limits set out in condition L5.1 apply under the following meteorological conditions:

Assessment Period	Meteorological Conditions
Day	Stability Categories A, B, C and D with wind speeds up to and including 0.5m/s at 10m above ground level

General Terms of Approval

Notice No: 1645283

- a) For those meteorological conditions not referred to in condition L5.3(a), the noise limits that apply are the noise limits in condition L5.1 plus 5dB.

L5.4 For the purposes of condition L5.3:

- a) The meteorological conditions are to be determined from meteorological data obtained from the meteorology station to be installed on the premises in accordance with condition P1.2.

L5.5 To assess compliance:

- a) with the $L_{Aeq}(15 \text{ minutes})$ noise limits in condition L5.1 and L5.3, the noise measurement equipment must be located:
 - (i) approximately on the property boundary, where any residence is situated 30 metres or less from the property boundary closest to premises; or where applicable,
 - (ii) in an area within 30 metres of a residence façade, but not closer than 3 metres where any residence on the property is situated more than 30 metres from the property boundary closest to the premises; or, where applicable,
 - (iii) in an area within 50 metres of the boundary of a National Park or Nature Reserve,
 - (iv) at any other location identified in condition L5.1
- b) with the $L_{Aeq}(15 \text{ minutes})$ noise limits in condition L5.1 and L5.3, the noise measurement equipment must be located:
 - (i) at the reasonably most affected point at a location where there is no residence at the location; or,
 - (ii) at the reasonably most affected point within an area at a location prescribed by condition L5.5 (a).

L5.6 A non-compliance of conditions L5.1 and L5.3 will still occur where noise generated from the premises is measured in excess of the noise limit at a point other than the reasonably most affected point at the locations referred to in condition L5.5 (a) or L5.5 (b).

NOTE to L5.5 and L5.6: The reasonably most affected point is a point at a location or within an area at a location experiencing or expected to experience the highest sound pressure level from the premises.

L5.7 For the purpose of determining the noise generated from the premises, the modifying factor corrections in Table C1 in Fact Sheet C of the *Noise Policy for Industry* (NSW EPA, 2017) may be applied, if appropriate, to the noise measurements by the noise monitoring equipment.

L5.8 Noise measurements must not be undertaken where rain or wind speed at microphone level will affect the acquisition of valid measurements.

L5.9 All feasible and reasonable noise mitigation measures must be implemented to minimise operational noise impacts to surrounding residential receivers.

L6. Hours of operation

L6.1 All construction work at the premises must only be conducted between the hours of:

- a) 7:00am to 6:00 pm Monday to Friday;
- b) 8:00am to 1:00pm Saturday;
- c) No construction works are to be undertaken on Sunday or Public Holidays.

L6.2 Activities at the premises, other than construction work, must only be carried on between the hours of:

- a) 7:00am to 6:00 pm Monday to Friday;
- b) 7:00am to 2:00pm Saturday;
- c) No construction works are to be undertaken on Sunday or Public Holidays.

L6.3 This condition does not apply to the delivery of material outside the hours of operation permitted by condition L6.1 or L6.2, if that delivery is required by police or other authorities for safety reasons; and/or the operation or personnel or

General Terms of Approval

Notice No: 1645283

equipment are endangered. In such circumstances, prior notification is provided to the EPA and affected residents as soon as possible, or within a reasonable period in the case of emergency.

L6.4 The hours of operation specified in conditions L6.1 and L6.2 may be varied with written consent if the EPA is satisfied that the amenity of the residents in the locality will not be adversely affected.

L7. Other limit conditions

L7.1 The maximum disturbance area due to the project operations (including extraction, processing, and stockpiles) must not exceed 12 hectares

L7.2 Extraction rates must not exceed 240,000 tonnes in any 12-month period or 1,600 tonnes in any single day at the proposed development.

L7.3 If material extraction should exceed 100,000 tonnes in any 12-month period, a weighbridge must be installed at the proposed development.

L7.4 Processing (including crushing and screening activities) rates must not exceed 240,000 tonnes in any 12-month period, or 2500 tonnes in any single day at the proposed development.

L7.5 Haulage of material off-site must not exceed 240,000 tonnes in any 12-month period or 1600 tonnes in any single day.

L7.6 Haulage of material on-site must not exceed 240,000 tonnes in any 12-month period or 1600 tonnes in any single day.

L7.7 The maximum daily number of truck movements must not exceed 68 vehicle movements (34 in, 34 out) at the proposed development.

Operating conditions

O1. Odour

O1.1 No condition of this licence identified a potentially offensive odour for the purposes of section 129 of the *Protection of the Environment Operations Act 1997*.

Note: Section 129 of the *Protection of the Environment Operations Act 1997*, provides that the licensee must not cause or permit the emission of any offensive odour from the premises but provides a defence if the emission is identified in the relevant environment protection licence as a potentially offensive odour and the odour was emitted in accordance with the conditions of a licence directed at minimising odour.

O2. Air Pollutants

O2.1 All operations and activities occurring at the premises must be carried out in a manner that prevents and minimises the emission of air pollutants from the premises.

O2.2 The premises must be maintained in a manner that prevents and minimises the emission of air pollutants from the premises.

O2.3 All plant and equipment (including loaders, excavators, crushers, screens, drill rig, trucks) must be maintained in accordance with manufacturer requirements to minimise malfunction that could result in increased air quality emissions.

O2.4 No offsite material must be received or processed at the premises.

O2.5 During crushing processes, water sprays must be used at all times to achieve a 77% control efficiency relative to not using water sprays. Misting dust suppression must be always utilised during crushing processes.

General Terms of Approval

Notice No: 1645283

O2.6 During screening processes, water sprays must be used at all times to achieve a 91% control efficiency relative to not using water sprays. Misting dust suppression must be always utilised during screening processes.

O2.7 Water sprays must be used on all conveyer transfer points and be suitable to achieve at least a 50% control efficiency relative to not using water sprays.

O2.8 Trucks entering and leaving the premises must have their loads covered, except during material inspection, unloading and loading. Load sizes must be limited to ensure material is not above the level of truck sidewalls

O2.9 The access road (approximate distance of 2.2km) connecting Gowrie Road to the disturbance area must be gravelled. The gravel road must be maintained throughout the duration of the project to ensure that gravel covers the entire access road. Should visible dust be observed from the access route, a minimum of level 1 watering must be implemented (when the road is in use).

O2.10 A maximum 20km/hr speed limit must be enforced and signposted for the entire premises including the access road connecting Gowrie Road to the disturbance area.

O2.11 As a minimum, level 1 watering (application of 2 litres of water per square metre of road surface, per hour) must be used on any dry/ visibly dusty non-gravelled haul roads (when in use).

O2.12 The proponent must ensure that sufficient water (or an equivalent dust suppressant) is available at all times throughout the project lifetime to adequately control fugitive dust emissions.

O2.13 The proponent must develop and implement an air quality management plan prior to the commencement of project operations. As a minimum, the air quality management plan must include the following parts:

- i. Objectives and targets
- ii. Risk assessment
- iii. Proactive and reactive mitigation measures of all significant, and potentially significant emissions sources
- iv. Key performance indicator(s)
- v. Monitoring method(s)
- vi. Location, frequency and duration of monitoring
- vii. Record keeping
- viii. Response mechanisms and contingency measures
- ix. System and performance review for continuous improvement
- x. Compliance reporting

O3. Stormwater/sediment control - Construction Phase

O3.1 A Soil and Water Management Plan (SWMP) must be prepared and implemented. The plan must describe the measures that will be employed to minimise soil erosion and the discharge of sediment and other pollutants to lands and/or waters during construction activities. The SWMP should be prepared in accordance with the requirements for such plans outlined in *Managing Urban Stormwater: Soils and Construction* (available from the Department of Housing).

O4. Stormwater/sediment control - Operation Phase

O4.1 A Stormwater Management Scheme must be prepared for the development and must be implemented. Implementation of the Scheme must mitigate the impacts of stormwater run-off from and within the premises following the completion of construction activities. The Scheme should be consistent with the Stormwater Management Plan for the catchment. Where a Stormwater Management Plan has not yet been prepared the Scheme should be consistent with the guidance contained in *Managing Urban Stormwater: Council Handbook* (available from the EPA).

General Terms of Approval

Notice No: 1645283

Monitoring and recording conditions

M1. Monitoring records

M1.1 The results of any monitoring required to be conducted by the EPA's general terms of approval, or a licence under the *Protection of the Environment Operations Act 1997*, in relation to the development must be recorded and retained as set out in conditions M1.2 and M1.3.

M1.2 All records required to be kept by the licence must be:

- in a legible form, or in a form that can readily be reduced to a legible form;
- kept for at least 4 years after the monitoring or event to which they relate took place; and
- produced in a legible form to any authorised officer of the EPA who asks to see them.

M1.3 The following records must be kept in respect of any samples required to be collected:

- the date(s) on which the sample was taken;
- the time(s) at which the sample was collected;
- the point at which the sample was taken; and
- the name of the person who collected the sample.

M2. Requirement to monitor concentration of pollutants discharged

Water and/or Land Monitoring Requirements

M2.1 For each monitoring/ discharge point specified below (by a point number), the applicant must monitor (by sampling and obtaining results by analysis) the concentration of each pollutant specified in Column 1. The applicant must use the sampling method, units of measure, and sample at the frequency, specified opposite in the other columns:

Point 3

Water

Pollutant	Units of measure	Frequency	Sampling Method
Oil and Grease	mg/L	Special Frequency 1	Representative sample
pH	mg/L	Special Frequency 1	Representative sample
Total Suspended Solids	mg/L	Special Frequency 1	Representative sample

M2.2 For the purposes of the table above, Special Frequency 1 means as soon as practicable and no more than 12 hours after the commencement of an overflow from the sediment dam to demonstrate compliance with the concentration limits defined at condition L2.3.

Weather Monitoring Requirements

M2.3 For each monitoring point specified in the table below, the proponent must monitor (by sampling and obtaining results by analysis) the parameters specified in Column 1. The proponent must use the sampling method, units of measure, averaging period, and sample at the frequency, specified in columns 2-5.

Point W1

Weather

General Terms of Approval

Notice No: 1645283

1. Parameter	2. Units of Measure	3. Frequency	4. Averaging Period	5. Sampling Method
Air temperature at 2 metres	°C	Continuous	1 hour	AM-4
Air temperature at 10 metres	°C	Continuous	1 hour	AM-4
Wind direction at 10 metres	° (Degrees)	Continuous	15 minute	AM-2 & AM-4
Wind speed at 10 metres	m/s (metres per second)	Continuous	15 minute	AM-2 & AM-4
Sigma theta	° (Degrees)	Continuous	15 minute	AM-2 & AM-4
Rainfall	mm	Continuous	15 minute	AM-4
Relative humidity	%	Continuous	1 hour	AM-4

Note: The weather monitoring instrumentation installed and operated at the site must be have a stall speed or lower limit of measure for measuring wind speed less than 0.2 m/s.

M2.4 The meteorological weather station must be maintained to be capable of continuously monitoring the parameters specified in condition M2.3

M2.5 The proponent must maintain and calibrate the meteorological monitoring station in accordance with the reference test methods and manufacturer's specifications. Records of the calibration and maintenance must be made available to EPA upon request.

M2.6 The proponent must develop and implement a quality assurance/quality control procedure for the data collected from the meteorological monitoring station. Outcomes from the procedure must be made available to EPA upon request

M4. Testing methods - concentration limits

M4.1 Subject to any express provision to the contrary in this licence, monitoring for the concentration of a pollutant discharged to waters or applied to a utilisation area must be done in accordance with the Approved Methods Publication unless another method has been approved by the EPA in writing before any tests are conducted.

M4.2 Monitoring for the concentration of a pollutant emitted to the air required to be conducted by the EPA's general terms of approval, or a licence under the *Protection of the Environment Operations Act 1997*, in relation to the development or in order to comply with a relevant local calculation protocol must be done in accordance with:

- any methodology which is required by or under the POEO Act 1997 to be used for the testing of the concentration of the pollutant; or

General Terms of Approval

Notice No: 1645283

- b) if no such requirement is imposed by or under the POEO Act 1997, any methodology which the general terms of approval or a condition of the licence or the protocol (as the case may be) requires to be used for that testing; or
- c) if no such requirement is imposed by or under the POEO Act 1997 or by the general terms of approval or a condition of the licence or the protocol (as the case may be), any methodology approved in writing by the EPA for the purposes of that testing prior to the testing taking place.

Note: The *Protection of the Environment Operations (Clean Air) Regulation 2010* requires testing for certain purposes to be conducted in accordance with test methods contained in the publication "Approved Methods for the Sampling and Analysis of Air Pollutants in NSW".)

M5. Noise Monitoring

M5.1 Attended noise monitoring must be undertaken in accordance with Condition L4.5 and must:

- a) occur at the closest non-project associated residential receiver location to the premises;
- b) occur bi-annually in a reporting period;
- c) occur during each day period as defined in the *Noise Policy for Industry* for a minimum of 1.5 hours during the day;
- d) occur for two consecutive operating days.

M5.2 Subject to any express provision to the contrary in this licence, measurement and analysis of noise required by this licence must be done in accordance with the *Approved Methods for the Measurement and Analysis of Environmental Noise in NSW*.

Reporting conditions

R1. Annual Return

R1.1 The proponent must provide an annual return to the EPA in relation to the development as required by any licence under the Protection of the Environment Operations Act 1997 in relation to the development. In the return the applicant must report on the annual monitoring undertaken (where the activity results in pollutant discharges), provide a summary of complaints relating to the development, report on compliance with licence conditions and provide a calculation of licence fees (administrative fees and, where relevant, load based fees) that are payable. If load based fees apply to the activity the applicant will be required to submit load-based fee calculation worksheets with the return.

R2. Noise Monitoring Report

R2.1 A noise compliance assessment report must be submitted to the EPA within 30 days of the completion of the bi-annual monitoring. The assessment must be prepared by a competent person and include:

- a) an assessment of compliance with noise limits presented in Condition L5.1 and L5.3; and
- b) an outline of any management actions taken within the monitoring period to address any exceedences of the limits contained in Condition L5.1 and L5.3.

General Conditions

G1. Signage

G1.1 The location of EPA discharge and monitoring points must be clearly marked by signs that indicate the point identification number used in this licence and be located as close as practical to the point.

General Terms of Approval

Notice No: 1645283

Special Conditions

E1. Air Monitoring Program

E1.1 The proponent must implement an air monitoring program for a minimum 12 month period once operations commence at the premises. The air monitoring program;

- a) must be capable of collecting real time PM10 and PM2.5 data at the premises;
- b) data is to be used to help inform dust management practices at the premises; and
- c) data is to be collected and recorded so that it is accessible to an authorised officer of the EPA when requested.

E1.2 The proponent must provide a report of the results of the air monitoring program to the EPA which includes:

- a) a discussion of air quality data and weather data collected at the premises;
- b) an assessment of data compared to relevant air quality guidelines; and
- c) details on how the data collected has been utilised in implementing the Air Quality Management Plan and any management actions taken for periods when elevated results are reported.

General Terms of Approval

Notice No: 1645283

Attachment B – Mandatory Conditions for all EPA licences

Operating conditions

Activities must be carried out in a competent manner

Licensed activities must be carried out in a competent manner.

This includes:

- a. the processing, handling, movement and storage of materials and substances used to carry out the activity; and
- b. the treatment, storage, processing, reprocessing, transport and disposal of waste generated by the activity.

Maintenance of plant and equipment

All plant and equipment installed at the premises or used in connection with the licensed activity:

- a. must be maintained in a proper and efficient condition; and
- b. must be operated in a proper and efficient manner.

Monitoring and recording conditions

Recording of pollution complaints

The licensee must keep a legible record of all complaints made to the licensee or any employee or agent of the licensee in relation to pollution arising from any activity to which this licence applies.

The record must include details of the following:

- the date and time of the complaint;
- the method by which the complaint was made;
- any personal details of the complainant which were provided by the complainant or, if no such details were provided, a note to that effect;
- the nature of the complaint;
- the action taken by the licensee in relation to the complaint, including any follow-up contact with the complainant; and
- if no action was taken by the licensee, the reasons why no action was taken.

The record of a complaint must be kept for at least 4 years after the complaint was made.

The record must be produced to any authorised officer of the EPA who asks to see them.

Telephone complaints line

The licensee must operate during its operating hours a telephone complaints line for the purpose of receiving any complaints from members of the public in relation to activities conducted at the premises or by the vehicle or mobile plant, unless otherwise specified in the licence.

General Terms of Approval

Notice No: 1645283

The licensee must notify the public of the complaints line telephone number and the fact that it is a complaints line so that the impacted community knows how to make a complaint.

This condition does not apply until 3 months after this condition takes effect.

Reporting conditions

Annual Return documents

What documents must an Annual Return contain?

The licensee must complete and supply to the EPA an Annual Return in the approved form comprising:

- a. Statement of Compliance; and
- b. Monitoring and Complaints Summary.

A copy of the form in which the Annual Return must be supplied to the EPA accompanies this licence. Before the end of each reporting period, the EPA will provide to the licensee a copy of the form that must be completed and returned to the EPA.

Period covered by Annual Return

An Annual Return must be prepared in respect of each reporting, except as provided below

Note: The term "reporting period" is defined in the dictionary at the end of this licence. Do not complete the Annual Return until after the end of the reporting period.

Where this licence is transferred from the licensee to a new licensee,

- a. the transferring licensee must prepare an annual return for the period commencing on the first day of the reporting period and ending on the date the application for the transfer of the licence to the new licensee is granted; and
- b. the new licensee must prepare an annual return for the period commencing on the date the application for the transfer of the licence is granted and ending on the last day of the reporting period.

Note: An application to transfer a licence must be made in the approved form for this purpose.

Where this licence is surrendered by the licensee or revoked by the EPA or Minister, the licensee must prepare an annual return in respect of the period commencing on the first day of the reporting period and ending on

- a. in relation to the surrender of a licence - the date when notice in writing of approval of the surrender is given; or
- b. in relation to the revocation of the licence – the date from which notice revoking the licence operates.

Deadline for Annual Return

The Annual Return for the reporting period must be supplied to the EPA by registered post not later than 60 days after the end of each reporting period or in the case of a transferring licence not later than 60 days after the date the transfer was granted (the 'due date').

General Terms of Approval

Notice No: 1645283

Licensee must retain copy of Annual Return

The licensee must retain a copy of the annual return supplied to the EPA for a period of at least 4 years after the annual return was due to be supplied to the EPA.

Certifying of Statement of Compliance and Signing of Monitoring and Complaints Summary

Within the Annual Return, the Statement of Compliance must be certified and the Monitoring and Complaints Summary must be signed by:

- a. the licence holder; or
- b. by a person approved in writing by the EPA to sign on behalf of the licence holder.

A person who has been given written approval to certify a Statement of Compliance under a licence issued under the *Pollution Control Act 1970* is taken to be approved for the purpose of this condition until the date of first review of this licence.

Notification of environmental harm

Note: The licensee or its employees must notify the EPA of incidents causing or threatening material harm to the environment immediately after the person becomes aware of the incident in accordance with the requirements of Part 5.7 of the Act

Notifications must be made by telephoning the EPA's Pollution Line service on 131 555.

The licensee must provide written details of the notification to the EPA within 7 days of the date on which the incident occurred.

Written report

Where an authorised officer of the EPA suspects on reasonable grounds that:

- a. where this licence applies to premises, an event has occurred at the premises; or
- b. where this licence applies to vehicles or mobile plant, an event has occurred in connection with the carrying out of the activities authorised by this licence,

and the event has caused, is causing or is likely to cause material harm to the environment (whether the harm occurs on or off premises to which the licence applies), the authorised officer may request a written report of the event.

The licensee must make all reasonable inquiries in relation to the event and supply the report to the EPA within such time as may be specified in the request.

The request may require a report which includes any or all of the following information:

- a. the cause, time and duration of the event;
- b. the type, volume and concentration of every pollutant discharged as a result of the event;
- c. the name, address and business hours telephone number of employees or agents of the licensee, or a specified class of them, who witnessed the event; and
- d. the name, address and business hours telephone number of every other person (of whom the licensee is aware) who witnessed the event, unless the licensee has been unable to obtain that information after making reasonable effort;

General Terms of Approval

Notice No: 1645283

- e. action taken by the licensee in relation to the event, including any follow-up contact with any complainants;
- f. details of any measure taken or proposed to be taken to prevent or mitigate against a recurrence of such an event;
- g. any other relevant matters.

The EPA may make a written request for further details in relation to any of the above matters if it is not satisfied with the report provided by the licensee. The licensee must provide such further details to the EPA within the time specified in the request.

General conditions

Copy of licence kept at the premises or on the vehicle or mobile plant

A copy of this licence must be kept at the premises or on the vehicle or mobile plant to which the licence applies.

The licence must be produced to any authorised officer of the EPA who asks to see it.

The licence must be available for inspection by any employee or agent of the licensee working at the premises or operating the vehicle or mobile plant.
