Dear Resident,

### **Proposed Solar Installation**

This is an introductory letter to personally advise you that Infinergy Australia is currently in the process of designing a proposed solar installation to be located at 597 Gara Road, Metz.

The development proposed is to be fully contained within the shaded area shown on the enclosed map.

Please note, the scale of this proposal is small (<30 MW), when compared to other solar developments currently being considered in the wider New England region (typically 100-300 MW). It is our opinion that the smaller scale of the proposed development better suits the character of the landscape in which it is to be located.

As a nearby resident, we would like to ensure that you are consulted with first, and remain fully informed as the proposal evolves. As such, we would like to offer you the opportunity to meet with a member of our team to discuss the proposal in more detail. For our first round of consultation, we will be available at the Armidale Bowling Club between 3.00pm and 8.00pm on Wednesday the 22<sup>nd</sup> of May, 2019.

If you would like to make an appointment during this time, please contact me on [REDACTED] or alternatively email us at [info@infinergypacific.com](mailto:info@infinergypacific.com). Note, if you are unable to attend I am happy to organise an alternative time to discuss the proposal.

I look forward to hearing from you.

Yours sincerely,

**Jane Ross**

Development Director

*Note, unfortunately the phone number provided was incorrect. However, as soon as the Proponent realised the error, the number was contacted and the owner kindly agreed to redirect any calls. Note, there was also an email and postal address available.*
