LANDSCAPE GUIDELINES

1. GENERAL 1.1 The Contractor shall familiarise themselves with the site prior to tender.

1.2 The Contractor will be held responsible for any damage to utility services, pipes, building structures, paving surfaces, fencing, footways, kerbs, roads and existing plant material. 1.3 The site is to be left in a clean and tidy condition at the completion of works to the satisfaction of the Superintendent.

- 1.4 No work involving an extra shall be undertaken unless approval is first obtained from the Superintendent. 1.5 No substitute of material shall be made unless approval is given by the Superintendent.
- 1.6 The Contractor shall continuously maintain all areas of the Contract during progress of the works specified. 2. SITE PREPARATION
- 2.1 Prepared sub-grade is to be free of stones larger than 100mm diameter, cement, rubbish and any other foreign matter that could hinder plant growth. 3. MASS PLANTED AREAS
- 3.1 Once clear of weed growth, grass and debris, sub-grade should be cultivated to a minimum depth of 150mm incorporating 'Dynamic Lifter' or equivalent at the manufacturers recommended rates.

3.2 Weeds shall be controlled by a combination of chemical and hand removal techniques. 4. PLANTING

4.1 All plant material is to be hardened off, disease and insect free and true to species, type and variety. Plants are to be well grown but not root bound and shall comply with Natspec - "Guide to Purchasing Landscape Trees".

4.2 All plants are to be removed from their containers prior to planting with as little disturbance to the root system as possible. 4.3 Planting shall not be carried out in dry soil or extreme weather conditions.

4.4 Plants should be planted at the same depth as the plants were in the containers and allow for a shallow saucer of soil to be formed around the plant to aid the penetration of water. 4.5 All plant material should be watered thoroughly immediately after planting.

4.6 The Contractor shall be responsible for the failure of plants during construction, except for acts of vandalism. 4.7 Labels shall be removed entirely from the plants.

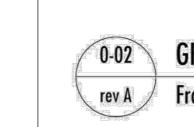

5. STAKING 5.1 Ties should be firmly attached to the stakes, in a way to avoid damage to the stem while allowing a small degree of movement.

6. TURF AREAS 6.1 Turf areas should be cultivated before turfing by ripping or harrowing. 6.2 At the completion of turfing the whole area shall be thoroughly soaked and kept moist till the completion of landscape works.

- 7. MULCH 7.1 Mulch for all general mass planted beds shall be 'Droughtmaster' mulch as supplied by A.N.L. or similar.
- 7.2 Mulch for OSD basin garden beds shall be 20mm Nepean River Gravel or similar laid to a minimum 50mm depth. 8. SOIL MIXES
- 8.1 Soil mix for mass planted areas shall be 3 parts site soil to 1 part 'Organic Garden Mix' as supplied by A.N.L. or equivalent. 8.2 Soil mix for street tree planting shall be 1 part site soil to 1 part 'Organic Garden Mix' as supplied by A.N.L. or equivalent 8.3 Soil mix for planter boxes and planting over slab shall be 'Planter Box Mix' as supplied by A.N.L. or equivalent.
- 9. FEATURE PEBBLES 9.1 Feature pebbles shall be 20mm Nepean River Gravel or similar laid to a minimum 50mm depth.
- 10. DECOMPOSED GRANITE 10.1 Decomposed Granite shall be max.5mm Decomposed Granite Gold as supplied by A.N.L. or similar spread to a depth of 100mm allowing 25% compaction and stabilised with 5% off-white cement

MAINTENANCE GUIDELINES

PRELIMINARY MAINTENANCE

Upon completion of of landscape construction works the site shall be cleaned of all rubbish and debris. All waste material shall be removed from the site in a manner consistent with best practice waste management principles and any approved waste management plan applying to the development. All Landscape works shall be completed in accordance with the approved plans and to a satisfactory standard to the approval of the project Landscape Architect or Principal Certifying Authority (P.C.A.). Any damage to footpaths and street verge areas shall be repaired and shall include the replacement of street trees and restoration of grassed areas as necessary and in accordance with the requirements of the Local Government Council or Authority. Maintenance in the vicinity of building works, structures, carpark areas, signage and services should be carried out without damage occurring or detrimental effect on the landscaping works. Where damage does occur it shall be rectified immediately and to the satisfaction of the P.C.A. ESTABLISHMENT MAINTENANCE

- 1. Maintenance works shall be in addition to the construction contract and shall include responsibility for all landscaped areas within the property and to the street verge unless otherwise specified 2. The Contractor shall commence and fully implement the short term maintenance after Practical Completion has been confirmed by the
- Superintendent. 3. The Contractor shall carry out maintenance works for a minimum period of 52 weeks 4. Maintenance works shall include the following works :
- a. Mow lawns generally each 10 days in summer and each 14 days in winter or as necessary by local and seasonal weather conditions. b. Trim edges on each mowing occasion. Motorised edgers should be used with care and not closer than 100mm to the trunk of any tree. Edges include garden beds, junctions of lawn and pavements, kerbs, poles, pits and spade edges to trees in grassed areas c. Water all planting and lawn areas in order to ensure adequate soil moisture at all times. d. Remove any weed growth from all planting areas. Hand removal should be the primary removal technique to limit the use of chemicals
- and to protect the remaining plant material from accidental exposure to the chemicals. Weed removal from large scale areas and bushland areas should be undertaken in accordance with approved Bush Regeneration and Management techniques and requirements. e. Fertilisers should be applied as necessary with care to avoid run off of excess nutrients to the drainage system.
- f. Spray and control pests and diseases as required. Any chemical applications should be applied in strict accordance with the Manufacturers specification. Where application has been necessary follow up inspections within 7 days should occur to further assess the plant requirements.
- g. Replace plants which fail with plants of similar size and quality as originally planted. The Contractor is not to be held responsible for the theft or vandalism of any plants during the maintenance period but replacement is still required to be undertaken in consultation with the site owner. h. Adjust ties to trees as necessary.
- i. Make good any erosion or soil subsidence which may occur. j. Maintain all mulched areas in a clean and tidy condition to the depth as originally specified. k. Make good any defects or faults arising from defective workmanship.
- I. Advanced trees (45ltr+) and including existing mature trees shall be individually inspected at least once a month in order to determine their health and vigour. Should the trees exhibit any signs of disease, pest infestation or poor growth then a qualified Arborist shall be consulted within 14 days in order to determine the most appropriate course of action. Recommended treatment shall then be commenced within 7 days and shall continue until the problem is eliminated.
- 5. When the maintenance period is completed the Contractor shall notify the Superintendent/owner. The site shall then be inspected and if to the satisfaction of the Superintendent/owner the responsibility will be handed over to the owner for on-going maintenance.
