Dear Jesse

BONDI SURF BATHERS' LIFE SAVING CLUB CONSERVATION & UPGRADE**ACOUSTIC RESPONSE TO COUNCIL QUERY REGARDING BSBLC OPERATIONS
COMMENCING FROM 4AM**

We understand from you that Council has provided the following comment in relation to the Development Application for the BSBLSC:

"...An updated Acoustic statement is to be provided to address proposed hours to IRB workshop, gym, flexible training/meeting rooms, as well as other uses relating to surf club operations indenting [sic] to commence from 4AM..."

We understand from you that these uses / activities currently take place at the existing club from this time and that no additional or new uses are proposed when compared with the current operations of the club.

Therefore, there will be no change to the pre-existing noise emissions and noise impacts associated with these uses from 4AM.

Notwithstanding the above, the new plan of management for the BSBLSC will include information ensuring that staff and visitors are made aware of the need to manage (avoid) noisy behaviour during noise-sensitive hours - particularly for any activities occurring between the hours of midnight and 7am, and particularly if those activities occur in the external areas of the club.

Yours sincerely

Jason Cameron
