

Expanded species list for developed design phase refinement and detailing:

CHATSWOOD CHASE - PLANTING SCHEDULE

PROJECT NO.: LS000213
DATE: 21.03.23
ISSUE: FOR INFORMATION

The following species list is an indicative mix intended for Chatswood Chase.
Species selected are a mix of readily available species, those native to the Chatswood region and a mix derived from native species found in Scott's Creek, Kuringai Chase National Park and the Barangaroo Reserve. Key selected exotic species have been included due to there complimentary form or their adaptability to the unique growing conditions of Chatswood Chase (ie. shallow, light weight podium profiles).
The planting schedule and design shall refined and detailed during the developed design phase.
