**KEY ISSUES DISCUSSED**

Council’s assessment planner provided the Panel with a status update and the following matters were discussed:

***Management of truck movements and volumes of extractive materials***

- Should approval be granted, need to consider options for a condition of consent to monitor and manage the impacts associated with increased trucks movements on haulage routes.
- Potential for audits of the level of dilapidation and proposed rehabilitation methods for transport routes.
- Options for monitoring the volume and rate of extraction.
- The Panel noted that Council did not have in place a relevant Contributions Plan nor has a Planning Agreement been prepared or is intended to be prepared.
- Consequently, the Panel noted it was probably beyond power to require a cents per tonne type condition relating to road related impacts associated with product haulage.

***Outstanding concurrence and referrals***

- NRAR
  - NRAR has provided GTAs which require a controlled activity approval. The applicant is of the opinion that the proposed works do not constitute a controlled activity and do not accept the condition. The matter remains unresolved at this stage.

- The Panel requested DPE liaise with the applicant, Council's assessment planner and NRAR to discuss to determine whether the controlled activity approval was required.
- Referrals to Crown Land, NSW Office of Environment & Heritage, EPA and DPE- Biodiversity and Conservation are awaiting finalisation.
- The Panel requested Councils assessment planner provide PDU via Panel Secretariat with details of referrals awaiting Agency finalisation to enable the timely determination of the matter
