Dear Ms Day

Re: DA/0221/1920 – Re-use and Recycling Infrastructure development – Goulburn Waste Management Centre

I refer to Concurrence and Referral Portal request (CNR-4031) of 4 February 2020 to the Environment Protection Authority (EPA) requesting the EPA's assessment of the Statement of Environmental Effects (SEE) for the Re-Use Goulburn facilities (the proposal), to be constructed at the Goulburn Waste Management Centre. I also refer to your email of 25 March 2020 to the EPA regarding the applicant's advice on the Integrated Development component of the Development Application (DA).

The EPA has reviewed the SEE and is supportive of the proposal. Following the review and on reflection of the nature of the proposal and any potential minor impacts on the conditions of Environment Protection Licence 6780, the EPA will not be making a formal submission on the DA. Instead, the EPA will liaise with the applicant following any approval of the DA, and this liaison *may* involve a variation to the EPL and correspondence on the exhumation of waste, if this action is deemed necessary.

The EPA would appreciate being notified of the outcome of CNR-4031. Should you have any enquiries in relation to this matter please contact Michael Heinze on (02) 6229 7002 or via e-mail at queanbeyan@epa.nsw.gov.au.

Yours sincerely
