Property: 510 Beach Rd, Berry

To Whom it may Concern

On the 13th of January 2019 a site visit was conducted at 510 Beach Rd, Berry to assess the damage that had occurred to one Scar Tree.

Observations

As shown in (figure 1) the scar tree has caught on fire and had extensive damage. The entry point shown in (Figure 2) and the debris surrounding the scar tree (Figure 3) is most certainly a lightning strike.

Figure 1

Figure 1: Burn damage

Figure 2

Figure 2: Lightning strike entry point

Figure 3

Figure 3: Debris from lightning strike.

Conclusions

The damage that has occurred to the Scar Tree has further compromised its stability, the recommendations outlined in the Tree Risk Assessment prepared by Tree Management Strategies dated the 18-10-18 still remain valid.
