

Stepped terraces with sandstone block retaining walls at seating height. Subject to detailed design. Refer hydraulic engineering plans for stormwater design

Gently sloping turf terrace

Dorm junction with feature paving

Sloped batter with indigenous planting and sandstone boulders. Subject to detailed design. Refer hydraulic engineering plans for stormwater design

Loop road (material, grades, batters, drainage, retaining walls, etc refer civil engineering plans)

Pathways provide direct access to dorms and to broader landscape

Lower level terrace with indigenous grasses

Narrow rows of native grasses aligned along the contours

Dorm outdoor gathering areas with fire-pits and characteristic sandstone block seating

Sloped batter with indigenous planting and sandstone boulders

Timber deck outdoor classrooms overlooking Glengarry landscape

CL 4/6

D2

Sandstone bleachers providing extensive outdoor seating and informal meeting area, and connection to broader landscape

Accessible path entry to dorm

Stepped terraces with sandstone block retaining walls at seating height. Subject to detailed design. Refer hydraulic engineering plans for stormwater design

CL 4/6

Timber deck outdoor classrooms overlooking Glengarry landscape

Sloped batter with indigenous planting and sandstone boulders. Subject to detailed design. Refer hydraulic engineering plans for stormwater design

Lower level terrace with indigenous grasses

Disabled carpark with shared zones and connecting min 1:20 grade pathways for all ability and wheelchair access to buildings, subject to engineering design

Bicycle and vehicle access via loop road
