

Council has imposed the following conditions under the relevant planning instruments and policies.

A. THE DEVELOPMENT

Approved Plans

1. Development the subject of this determination notice must be carried out strictly in accordance with the accompanying plans and reports listed below and stamped DA-50/2021, except where modified by the undermentioned conditions or marked in red by Council:

(a) Architectural and Landscape Plans

Recommendations by Endeavour Energy

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

2. All conditions issued by Endeavour Energy, shall be complied with in accordance with their correspondence dated 19 April 2021. A copy of the correspondence is attached to this decision notice (Attachment 3).

Comply with EP&A Act

3. The requirements and provisions of the *Environmental Planning & Assessment Act 1979* and *Environmental Planning & Assessment Regulation 2000*, must be fully complied with at all times.

Failure to comply with these legislative requirements is an offence and may result in the commencement of legal proceedings, issuing of 'on-the-spot' penalty infringements or service of a notice and order by Council.

4. In accordance with section 4.17 (11) of the *Environmental Planning & Assessment Act 1979* and clause 8.8, 8.10 of the *Environmental Planning & Assessment Regulation 2000*, it is a *prescribed condition* that all building work must be carried out in accordance with the applicable Performance Requirements of the National Construction Code. Compliance with the Performance Requirements can only be achieved by:
 - (a) Complying with the Deemed to Satisfy Provisions; or
 - (b) Formulating an Alternative Solution, which complies with the Performance Requirements or is shown to be at least equivalent to the Deemed to Satisfy Provision, or a combination of (a) and (b).

Works at no Cost to Council

5. All roadworks, drainage works and dedications, required to effect the consented development shall be undertaken at no cost to Council.

B. PRIOR TO ISSUE OF A CONSTRUCTION CERTIFICATE

The following conditions are to be complied with or addressed prior to the issue of a Construction Certificate by the Principal Certifying Authority.

Fee Payments

6. Unless otherwise prescribed by this consent, all relevant fees or charges must be paid. Where Council does not collect these payments, copies of receipts must be provided. For the calculation of payments such as Long Service Levy, the payment must be based on the value specified with the Development Application/Construction Certificate.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

The following fees are applicable and payable:

- (a) Damage Inspection Fee – relevant where the cost of building work is \$20,000 or more, or a swimming pool is to be excavated by machinery.
- (b) Fee associated with Application for Permit to Carry Out Work Within a Road, Park and Drainage Reserve.
- (c) Long Service Levy – based on 0.35% of the cost of building work where the costing of the CC is \$25,000 or more.

These fees are reviewed annually and will be calculated accordingly.

Long Service Levy payment is applicable on building work having a value of \$25,000 or more, at the rate of 0.35% of the cost of the works. The required Long Service Levy payment, under the *Building and Construction Industry Long Service Payments Act 1986*, is to be forwarded to the Long Service Levy Corporation or the Council, prior to the issuing of a Construction Certificate, in accordance with Section 109F of the *Environmental Planning & Assessment Act 1979*.

- 7. All fees associated with a road opening permit required for the connection, extension or amplification of any services within Council's road reserve must be paid to Council and receipts provided to the PCA. A separate form must be submitted in conjunction with payment of the fees. The fees include the standard road opening permit fee and any restoration fees that may be required as a result of the works.

Section 7.12 Payment

- 8. As a consequence of this development, Council has identified an increased demand for public amenities and public services. The following payment is imposed in accordance with Liverpool Contributions Plan 2018 – Liverpool City Centre as amended.

The total contribution is **\$106,114.00** and will be adjusted at the time of payment in accordance with the contributions plan.

A breakdown of the contributions payable is provided in the attached payment form.

Construction Certificates

- 9. Any CC that may be issued in association with this development consent must ensure that any certified plans and designs are consistent (in terms of site layout, site levels, building

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

location, size, external configuration and appearance) with the approved Development Application plans.

Building Work

10. Building work shall not commence prior to the issue of a Construction Certificate. Building work as defined under Section 1.4 of the EP&A Act means any physical activity involved in the erection of a building and includes but is not limited to, the placement of any site shed/s or builders facilities, site grading, retaining walls, excavation, cutting trenches, installing formwork and steel reinforcement or, placing of plumbing lines.

Notification

11. The certifying authority must advise Council, in writing of:
 - (a) The name and contractor licence number of the licensee who has contracted to do or intends to do the work, or
 - (b) The name and permit of the owner-builder who intends to do the work.

If these arrangements are changed, or if a contract is entered into for the work to be done by a different licensee, Council must be immediately informed.

Cladding

12. For all buildings of Type A and B construction having finishes or claddings other than concrete or masonry, a fire safety report prepared by an accredited C10 fire engineer, must be submitted to the Principal Certifying Authority (PCA) prior to issue of a construction certificate, demonstrating that the proposed external wall cladding material and system for the building complies with the NCC and relevant Australian Standards. The fire safety report is to include evidence of suitability of all proposed external wall cladding materials as per clause A2.2 of the NCC.

Liverpool CBD – Street Lighting Upgrade

13. The applicant/developer shall upgrade the street lighting system for entire frontage of the development including any side streets. Any street light poles shall be multi-function poles including all necessary accessories. The specification and accessories details are to be obtained from the Infrastructure and Environment Group of Council. The applicant/developer shall engage services of Endeavour Energy accredited ASP Level 3 service provider to prepare electrical design and obtain certification from Endeavour Energy. The electrical design shall include undergrounding of existing aerial power lines

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

and communication cables for entire frontage of the development including frontage to side streets. The approved design shall be submitted to Council for review and approval prior to any construction works

Liverpool CBD – Footpath Paving and Landscaping Works

14. Periphery Type/Core Type paving shall be installed along the entire **Mill Road & Charles Street, Liverpool** frontage/s, as part of this development. Footpath paving and Landscaping works shall be strictly in accordance with the Liverpool CBD Street Tree and Landscape Strategy 2005 and The Liverpool CBD Streetscape and Paving Guidelines 2005 as amended in Implementation Note 12/2015 – Liverpool CBD Paving.

Detailed plans are required to be submitted to and approved by Council showing the proposed tree locations, species and planting sizes, paving location and layout, including references to the relevant details and specifications as contained in the abovementioned documents.

A Section 138 Roads Act Approval for all works within Council's road reserve will be required.

To ensure that the street tree planting size, quantity and quality is maintained throughout the Liverpool CBD, please contact Council's Land Development Section on 1300 36 2170 for further information

Retaining Walls on Boundary

15. All retaining walls shall be of masonry construction and must be wholly within the property boundary, including footings and agricultural drainage lines. Construction of retaining walls or associated drainage works along common boundaries shall not compromise the structural integrity of any existing structures.

Where a retaining wall exceeds 600mm in height, the wall shall be designed by a practicing structural engineer and a construction certificate must be obtained prior to commencement of works on the retaining wall.

Products banned under the Building Products (Safety) Act 2017

16. No building products that are banned, or products that are subject to a ban if used in a particular way under the Building Products (Safety) Act 2017 are to be used in the construction of the development.

Fire Safety Measures

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

17. A schedule specifying all of the essential fire safety services, which are required for the building, shall be attached to the CC and submitted to Council, in compliance with the provisions of the EP&A Regulation.

Accessibility

18. Access must be provided to the building for people with a disability in accordance with the relevant requirements of the Building Code of Australia, Disability (access to Premises – Buildings) Standard 2010 and Australian Standard – AS1428.1 (2009), Design for Access and Mobility – General requirements for new building work, to the satisfaction of the Certifying Authority.

S138 Roads Act – Minor Works in the public road

19. Prior to the issue of a Construction Certificate, a Section 138 Roads Act application/s, including payment of fees, shall be lodged with Liverpool City Council, as the Roads Authority for any works required in a public road. These works may include but are not limited to:
- a. Vehicular crossings (including kerb reinstatement of redundant vehicular crossings),
 - b. Road opening for utilities and stormwater (including stormwater connection to Council infrastructure), or
 - c. Road occupancy or road closures.

All works shall be carried out in accordance with the Roads Act approval, the development consent including the stamped approved plans, and Liverpool City Council's specifications.

Note: Approvals may also be required from the Roads and Maritime Service (RMS) for classified roads.

S138 Roads Act – roadworks requiring approval of civil drawings

20. Prior to the issue of a Construction Certificate for building works the Principal Certifier shall ensure that a S138 Roads Act application, including the payment of application and inspection fees, has been lodged with Liverpool City Council (being the Roads Authority under the Roads Act), for provision of the following:

Demolish all existing driveways and laybacks, including construction of kerb and gutter (site frontage)

Removal of existing and construction of concrete kerb and gutter (Mill Road site frontage).

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

Engineering plans are to be prepared in accordance with the development consent, Liverpool City Council's Design Guidelines and Construction Specification for Civil Works, Austroad Guidelines, best engineering practice. All works shall be undertaken at no cost to Liverpool City Council.

S68 Local Government Act – Stormwater drainage works

21. Prior to the issue of a Construction Certificate the Principal Certifier shall ensure that an application under S68 of the Local Government Act, including the payment of application and inspection fees, has been lodged with, and approved by Liverpool City Council for the required stormwater drainage easement pipe relocation and connection into the public system. An easement to drain water is to be shown along the southern and eastern side of the property boundary with the pipe located in the middle of it. The following is also to be addressed:
 - i. A 150mm minimum high concrete kerb is required along the western property boundary.
 - ii. The Hydrant Booster & M.C.W Meter are to be relocated outside the new drainage easement area.

Engineering plans are to be prepared in accordance with the development consent, Liverpool City Council's Design Guidelines and Construction Specification for Civil Works and best engineering practice. All works shall be undertaken at no cost to Liverpool City Council.

Recommendations of the Acoustical Report

22. The noise control recommendations as stipulated within the approved DA Acoustic Assessment prepared by Acoustic Logic dated 26.11.2020 shall be implemented and incorporated into the design and construction of the development and shall be shown on plans accompanying the CC application.
23. Documentary evidence is to be provided to the satisfaction of PCA to demonstrate that appropriate measures are to be taken to ensure that the following LAeq levels are not exceeded as specified within Clause 2.120 of the SEPP (Transport and Infrastructure) 2021:
 - (a) in any bedroom in the building—35 dB(A) at any time between 10 pm and 7 am,
 - (b) anywhere else in the building (other than a garage, kitchen, bathroom or hallway)—40 dB(A) at any time.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

24. Mechanical plant shall be selected in consultation with a suitably qualified and experienced consultant to ensure compliance with the internal noise levels detailed within the abovementioned Acoustic Assessment.

On-site Detention

25. On-site Stormwater Detention (OSD) shall be provided generally in accordance with the concept plans lodged for development approval, prepared by ACE Civil Stormwater Pty Ltd reference number 200977 and as per the following:

Drawing No.	Title	Issue	Date
000	Cover sheet plan	B	16/12/2021
101	Stormwater Concept Plan Basement Level Sheet 1 of 2	B	16/12/2021
102	Stormwater Concept Plan Basement Level Sheet 2 of 2	B	16/12/2021
103	Stormwater Concept Plan Ground Level	B	16/12/2021
105	On-site Detention Details and Calculations Sheets Sheet 1 of 2	A	9/12/2020

The following is also to be addressed:

- a) The proposed development and stormwater drainage system shall be designed to ensure that stormwater runoff generated within upstream properties (up to 1 in 100yr storm event) is collected within the site at the upside boundary and conveyed through the site without adverse impact on the development (including the proposed OSD) and/or adjoining properties. Particular attention should be given to the western property boundary, with at least the following addressed:
- i. Catchment Plan highlighting full upstream catchment area generating the overland stormwater flows.
 - ii. Full hydraulic analysis for projected flows generated from the upstream catchment for the worst case 100yr event.
 - iii. Full details and calculations of works required to collect and convey overland flows (ie pit, pipe and swale system)

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

- iv. Freeboard of a minimum 300mm to habitable floor levels and 150mm to non-habitable floor levels.
- b) A clear emergency spillway and overland flow path is to be provided from the OSD tank to the street footpath to allow for emergency flows during larger storm events or system failure/blockage. The flow path is also to ensure that stormwater will not enter the Lobby when this occurs.
- c) Engineering plans and supporting calculations for the OSD system are to be prepared by a suitably qualified person and shall accompany the application for a Construction Certificate.
- d) Prior to the issue of a Construction Certificate the Certifying Authority shall ensure that the on-site detention system has been designed in accordance with Liverpool City Council's Design Guidelines and Liverpool City Council's OSD policy and Technical Specification.

Stormwater Discharge – Basement Car parks

- 26. Prior to the issue of a Construction Certificate the Certifying Authority shall ensure that the stormwater drainage system for the basement car park has been designed in accordance with the requirements for pumped systems in AS3500.3:2003 and Council's Stormwater Drainage Design Specifications for pump out systems for basement carparks.

No Loading on Easements

- 27. Prior to the issue of a Construction Certificate the Certifying Authority shall ensure that the foundations of proposed structures adjoining the drainage and/ or services easement have been designed clear of the zone of influence.

Hydrant Booster & M.C.W Meter

- 28. The Hydrant Booster & M.C.W Meter are to be relocated outside the drainage easement boundary that is to benefit Council.

Water Quality

- 29. Prior to the issue of a Construction Certificate, the Certifying Authority shall ensure that details of a stormwater pre-treatment system have been provided on the stormwater plans and that the design meets pollutant retention criteria in accordance Council's Development Control Plan.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

The Construction Certificate must be supported by:

- a) Specification & installation details of the stormwater pre-treatment system
- b) The approval of an operation and maintenance manual/ schedule for the stormwater pre-treatment system

A copy of the approved operation and maintenance manual/ schedule shall be submitted to Liverpool City Council with notification of the Construction Certificate issue.

Access, Car Parking and Manoeuvring – General

- 30. Prior to the issue of a Construction Certificate the Certifying Authority shall ensure that vehicular access, circulation, manoeuvring, pedestrian and parking areas associated with the subject development are in accordance with AS 2890.1, AS2890.2, AS2890.6 and Liverpool City Council's Development Control Plan.

Dilapidation report

- 31. Prior to the Commencement of Works a dilapidation report of all infrastructure fronting the development in **Mill Road & Charles Street, Liverpool** is to be submitted to Liverpool City Council. The report is to include, but not limited to, the road pavement, kerb and gutter, footpath, services and street trees and is to extend **20m** either side of the development.

Dilapidation Report Private Property (Excavations)

- 32. A full dilapidation survey and report on the visible and structural condition of all neighbouring structures within the 'zone of influence' of the required excavations must be submitted to the Certifying Authority for approval prior to the issue of any Construction Certificate. The zone of influence is to be defined as the horizontal distance from the edge of the excavation face to twice the excavation depth.

The dilapidation report and survey is to be prepared by a consulting structural/geotechnical engineer agreed to by both the applicant and the owner of any affected adjoining property.

All costs incurred in achieving compliance with this condition shall be borne by the person entitled to act on this Consent.

In the event that access for undertaking the dilapidation survey is denied by an adjoining owner, the applicant **MUST DEMONSTRATE**, in writing, to the satisfaction of Council that all reasonable steps have been taken to obtain access and advise the affected property

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

owner of the reason for the survey and that these steps have failed. Written concurrence must be obtained from Council in such circumstances.

Note: This documentation is for record keeping purposes only, and may be used by the developer or affected property owner to assist in any action required to resolve any dispute over damage to adjoining properties arising from the works. It is in the applicant's and adjoining owner's interest for it to be as full and detailed as possible.

Provision of Services

33. An application to obtain a Section 73 Compliance Certificate under the Sydney Water Act 1994, must be lodged with Sydney Water. To facilitate this, an application must be made through an authorised Water Servicing Coordinator. Please refer to the "building and developing" section of Sydney Water's web site at www.sydneypwater.com.au, or telephone 13 20 92.

Following receipt of the application, a 'Notice of Requirements' will detail water and sewer extensions to be built and charges to be paid. Please make early contact with the Coordinator, since building of water/sewer extensions can be time consuming and may impact on other services and building, driveway or landscape design. A copy of the 'Notice of Requirements' must be submitted to the PCA.

34. Written clearance from Endeavour Energy, stating that electrical services have been made available to the development or that arrangements have been entered into for the provision of services to the development must be submitted to the PCA.
35. Prior to the issue of a Construction Certificate, the Principal Certifying Authority shall be satisfied that telecommunications infrastructure may be installed to service the premises which complies with the following:
- The requirements of the Telecommunications Act 1997:
 - For a fibre ready facility, the NBN Co's standard specifications current at the time of installation; and
 - For a line that is to connect a lot to telecommunications infrastructure external to the premises, the line shall be located underground.

Unless otherwise stipulated by telecommunications legislation at the time of construction, the development must be provided with all necessary pits and pipes, and conduits to accommodate the future connection of optic fibre technology telecommunications.

36. The applicant is to arrange with the appropriate service provider for any above ground service riser or access point to be constructed clear of any proposed or existing

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

pedestrian footways, and if possible, located in recessed unobtrusive locations. Should any service provider require and/or insist the applicant/developer build a service riser that would create an obstruction and pose a potential safety hazard, then the applicant/developer should refer the request to Council for negotiation directly with the Service Network Authority.

Design Verification Statement

37. In accordance with the EP&A Regulation and State Environmental Planning Policy (SEPP) 65 “Design Quality of Residential Apartment Development”, the subject development must be undertaken or directed by a ‘qualified designer’ (i.e., a registered architect under the Architects Act). In this regard, a design verification statement shall be submitted to the PCA. The PCA shall ensure that the statement prepared by the qualified designer provides the following:

- (a) A valid and current chartered architect’s certificate number (as issued by the Board of Architects of NSW);
- (b) That the qualified designer has designed or directed the design of the subject development; and
- (c) That the plans and specifications lodged with the CC achieve or improve the design quality of the development for which the subject development consent was granted, having regard to the design principles set out in Part 2 of SEPP 65.

Note: The design verification statement must provide an explanation of the design in terms of the design quality principles set out in Part 2 of SEPP 65.

Carparking access arrangement

38. Submit to Council detailed design drawings of the proposed car parking and access arrangements, including driveways, and circulating roadway (including a turning facility at the northern end of the aisle), prepared in accordance with the requirements of Council and Australian Standards. The design plan needs to clearly show the dimensions and be supported by swept path diagrams with clear legends to enable following the tracks made by the tyres, body of the test vehicle and the buffer provided.

Construction Traffic Management Plan

39. A Construction Traffic Management Plan detailing construction vehicle routes, number of trucks, hours of operation, access arrangements and traffic control should be submitted to Council for review. Works within the road reserve shall not commence until the traffic management plan has been approved.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

40. The traffic management plan is to be prepared by an accredited designer and submitted to and stamp approved by Council via a standard Section 138 Roads Act Permit application available at Council's customer service counter. The stamped approved Roads Act Permit is to be obtained by the PCA. A copy of the stamped approved Roads Act Permit and traffic management plan is to be available on the works site for inspection at any time by an authorised Council officer.

Waste Management

41. Prior to the issue of a construction certificate, a revised WMP will note that the waste bins must be presented to the kerbside ready for emptying by agents of the building strata. The waste management operatives of Council's contractor will not enter private land to retrieve waste bins.

C. PRIOR TO THE COMMENCEMENT OF WORKS

The following conditions shall be complied with prior to works commencing:

Commencement of building works

42. Building work shall not commence prior to the issue of a Construction Certificate. Building work as defined under Section 6.1 of the EP&A Act means any physical activity involved in the erection of a building and includes but is not limited to, the placement of any site shed/s or builders facilities, site grading, retaining walls, excavation, cutting trenches, installing formwork and steel reinforcement or, placing of plumbing lines.

Construction Certificates

43. Prior to the commencement of any building works, the following requirements must be complied with:
- a) Construction Certificate must be obtained from the Council or an accredited certifier, in accordance with the provisions of the *Environmental Planning & Assessment Act 1979*.
 - b) Where a Construction Certificate is obtained from an Accredited Certifier, the applicant shall advise Council of the name, address and contact number of the Accredited Certifier, in accordance with Section 6.6 of the Act.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

- c) A copy of the Construction Certificate, the approved development consent plans and consent conditions must be kept on the site at all times and be made available to the Council officers and all building contractors for assessment.
- d) a Principal Certifying Authority (PCA) must be appointed to carry out the necessary building inspections and to issue an occupation certificate; and
- e) The PCA must advise Council of the intended date to commence work which is the subject of this consent by completing a notice of commencement of building works or subdivision works form, available from Council's Customer Service Centre. A minimum period of two (2) working days' notice must be given.

Residential Building Work

- 44. Building work that involves residential building work (within the meaning of the *Home Building Act 1989*) must not be commenced unless the principal certifying authority for the development to which the work relates (not being the council) has given the council written notice of name and licence number of the principal contractor; and the name of the insurer by which the work is insured under Part 6 of that Act.

Craning and Hoardings

- 45. If the work is likely to cause pedestrian or vehicular traffic in a public area to be obstructed or rendered inconvenient; or if craning of materials is to occur across a public area or road reserve area a construction hoarding must be erected to prevent any substance from, or in connection with the construction site, falling onto a public area as follows:

Such hoarding or barrier must be designed and erected in accordance with Council's guidelines on hoarding construction. Relevant application under the Roads Act approval must be completed and fees paid prior to the construction of a hoarding on Council road reserve area.

- 46. Lifting or craning materials over a public footway or roadway is not permitted unless a "B" class construction hoarding has been installed in compliance with Work Cover authority requirements.

Site Notice Board

- 47. A sign must be erected in a prominent position on the premises on which work is to be carried out. The sign is to be maintained during work, and removed at the completion of work. The sign must state:

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

- (a) The name, address and telephone number of the principal certifying authority for the work;
- (b) The name of the principal contractor (if any) for any building work and a telephone number on which that person may be contacted outside working hours; and
- (c) A statement stating that 'unauthorised entry to the work site is prohibited'.

Notification of Service Providers

48. The approved development must be approved through the 'Sydney Water Tap In' service to determine whether the development will affect any Sydney Water wastewater and water mains, stormwater drains and/or easement, and if any requirements need to be met. A receipt must be provided to Council.

Please refer to the website www.sydneywater.com.au for more information.

Waste Classification

49. Prior to the exportation of waste (including fill or soil) from the site, the material shall be classified in accordance with the provisions of the POEO Act and NSW DECCW, (EPA) 'Environmental Guidelines: Assessment, Classification and Management of Non-Liquid Wastes'. The classification of the material is essential to determine where the waste may be legally taken. The POEO Act provides for the commission of an offence for both the waste owner and transporters if waste is taken to a place that cannot lawfully be used as a waste facility for the particular class of waste. For the transport and disposal of industrial, hazardous or Group A liquid and non-liquid waste advice should be sought from the DECCW (EPA).

Traffic Management Plan

50. All works within the road reserve are to be at the applicant cost and all signage is to be in accordance with the RTA's Traffic Control at Worksites Manual and the RTA's Interim Guide to Signs and Markings.
51. If a works zone is required, an application must be made to Council's Transport Planning section. The application is to indicate the exact location required and the applicable fee is to be included. If parking restrictions are in place, an application to have the restrictions moved, will need to be made.
52. Notice must be given to Council's Transport Planning section of any interruption to pedestrian or vehicular traffic within the road reserve, caused by the construction of this development. A Traffic Control Plan, prepared by an accredited practitioner must be

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

submitted for approval, 48 hours prior to implementation. This includes temporary closures for delivery of materials, concrete pours etc.

Traffic Control Plan

53. Prior to commencement of works, a Traffic Control Plan including details for pedestrian management, shall be prepared in accordance with AS1742.3 "Traffic Control Devices for Works on Roads" and the Roads and Traffic Authority's publication "Traffic Control at Worksites" and certified by an appropriately accredited Roads and Traffic Authority Traffic Controller.

Traffic control measures shall be implemented during the construction phase of the development in accordance with the certified plan. A copy of the plan shall be available on site at all times.

Vegetation - Existing Vegetation

54. All existing trees and areas of native vegetation not identified for removal on approved plans of the proposed development shall be protected from damage during site works. This protection shall consist of 1800mm high protective fencing, securely installed beneath the outer canopy of any tree to be retained. Trees may be fenced off in clusters where it is not practical to fence off individual trees. There shall be no storing materials, washing machinery or changes to existing soil levels within the fenced areas.

Fire Safety - Cladding

55. The construction plans must demonstrate that all proposed attachments, cladding material and systems forming part of external walls comply with the National Construction Code and relevant Australian Standards.

Fire Safety Measures

56. A schedule specifying all of the essential fire safety services, which are required for the building, shall be submitted to Liverpool City Council, in compliance with the provisions of the EP&A Regulation.

Accessibility

57. Access must be provided to the building for people with a disability in accordance with the relevant requirements of the National Construction Code, Disability (access to Premises – Buildings) Standard 2010 and Australian Standard – AS1428.1 (2009),

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170

Design for Access and Mobility – General requirements for new building work.

Noise Control

58. The recommendations provided in the Acoustic Assessment (Report Ref. 20201206.1/2611A/R0/MB) prepared by Acoustic Logic dated 26/11/2020 are to be implemented and incorporated into the design and construction of the development and shall be shown on the Construction Plans. The recommendations in Section 6.2 are to be complied with.

Contamination

59. Any new information which comes to light at any stage of the demolition or construction works which has the potential to alter previous conclusions about site contamination must be notified to Liverpool City Council immediately after discovery.

S138 Roads Act – Minor Works in the public road

60. Prior to construction commencement a Section 138 Roads Act application/s, including payment of fees, shall be lodged with Liverpool City Council, as the Roads Authority for any works required in a public road. These works may include but are not limited to:

- a) Vehicular crossings (including kerb reinstatement of redundant vehicular crossings),
- b) Road opening for utilities and stormwater (including stormwater connection to Council infrastructure), or
- c) Road occupancy or road closures.

All works shall be carried out in accordance with the Roads Act approval, the development consent including the stamped approved plans, and Liverpool City Council's specifications.

Note: Approvals may also be required from the Roads and Maritime Service (RMS) for classified roads.

S138 Roads Act – roadworks requiring approval of civil drawings

61. Prior to the commencement of works for building or subdivision works the Certifying Authority shall ensure that a S138 Roads Act application, including the payment of application and inspection fees, has been lodged with Liverpool City Council (being the Roads Authority under the Roads Act), for provision of CBD footpath paving and

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170

drainage work in **Charles Street and Mill Road**.

Engineering plans are to be prepared in accordance with the development consent, Liverpool City Council's Design Guidelines and Construction Specification for Civil Works, Austroad Guidelines and best engineering practice.

Note: Where Liverpool City Council is the Certifying Authority for the development the Roads Act approval for the above works may be issued concurrently with the Construction Certificate.

Liverpool CBD – Communication Conduits

62. The applicant/developer shall supply and install two 50mm white communication conduit with draw wires approximately 300mm behind kerb and gutter connecting multifunction poles. Details can be obtained from Infrastructure and Environment Group of Council. Please contact the Coordinator – Roads and Transport on 1300 36 2170.

Liverpool CBD – Footpath Paving and Landscaping Works

63. Periphery Type/Core Type paving shall be installed along the entire street frontage/s, as part of this development. Footpath paving and Landscaping works shall be strictly in accordance with the Liverpool CBD Street Tree and Landscape Strategy 2005 and The Liverpool CBD Streetscape and Paving Guidelines 2005 as amended in Implementation Note 12/2015 – Liverpool CBD Paving.

Detailed plans are to be developed in consultation with Liverpool City Council showing the proposed tree locations, species and planting sizes, paving location and layout, including references to the relevant details and specifications as contained in the abovementioned documents.

To ensure that the street tree planting size, quantity and quality is maintained throughout the Liverpool CBD, please contact Council's Land Development Section on 1300 36 2170 for further information.

On-Site Detention

64. On-Site Detention shall be provided generally in accordance with the concept plan/s lodged for development approval, prepared by prepared by ACE Civil Stormwater Pty Ltd, reference number 2200977, and as per the following:.

Drawing No.	Title	Issue	Date
-------------	-------	-------	------

103	Stormwater Concept Plan Ground Level	B	16/12/2021
105	On-site Detention Details and Calculations Sheets Sheet 1 of 2	A	9/12/2020

The following is also to be addressed:

- i. The proposed development and stormwater drainage system shall be designed to ensure that stormwater runoff generated within upstream properties (up to 1 in 100yr storm event) is collected within the site at the upside boundary and conveyed through the site without adverse impact on the development (including the proposed OSD) and/or adjoining properties. Particular attention should be given to the western property boundary, with at least the following addressed:
 - a) Catchment Plan highlighting full upstream catchment area generating the overland stormwater flows.
 - b) Full hydraulic analysis for projected flows generated from the upstream catchment for the worst case 100yr event.
 - c) Full details and calculations of works required to collect and convey overland flows (ie pit, pipe and swale system)
 - d) Freeboard of a minimum 300mm to habitable floor levels and 150mm to non-habitable floor levels.
- ii. A clear emergency spillway and overland flow path is to be provided from the OSD tank to the street footpath to allow for emergency flows during larger storm events or system failure/blockage. The flow path is also to ensure that stormwater will not enter the Lobby when this occurs.
- iii. Engineering plans and supporting calculations for the OSD system are to be prepared by a suitably qualified person and shall accompany the application for a Construction Certificate.
- iv. Prior to the issue of a Construction Certificate the Certifying Authority shall ensure that the on-site detention system has been designed in accordance with Liverpool City Council's Design Guidelines and Liverpool City Council's OSD policy and Technical Specification.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170

Stormwater Discharge – Basement Car parks

65. The Construction Plans, for the relevant construction stage, shall demonstrate that the stormwater drainage system for the basement car park has been designed in accordance with the requirements for pumped systems in AS3500.3:2003 and Council's Stormwater Drainage Design Specifications for pump out systems for basement carparks.

Access, Car Parking and Manoeuvring – General

66. Detailed design plan for the access driveway and car park including swept path analysis, gradient, line markings and sign posting in accordance with the DCP and AS2890 shall be submitted to Traffic and Transport Section prior to construction commencement, for the relevant construction stage.
67. A Construction Traffic Management Plan (CTMP) detailing construction vehicle routes, number of trucks, hours of operation, access arrangements and traffic control should be submitted to Council's Traffic and Transport Section for approval prior to construction commencement, for the relevant construction stage.
68. The CTMP is to outline the need for a Road Occupancy Permit issued by Council or Road Occupancy Permit issued by the Transport Management Centre.
69. Works within the road reserve shall not commence until the construction traffic management plan has been submitted to Council.
70. Public lighting design brief in accordance with Council's and Endeavour Energy specifications along all the roads fronting the development site is to be submitted to Council Traffic and Transport Section for review

Dilapidation report

71. Prior to the Commencement of Works a dilapidation report of all infrastructure fronting the development in **Charles Street and Mill Road** is to be submitted to Liverpool City Council. The report is to include, but not limited to, the road pavement, kerb and gutter, footpath, services and street trees and is to extend **10m** either side of the development.

Dilapidation Report Private Property (Excavations)

72. A full dilapidation survey and report on the visible and structural condition of all neighbouring structures within the 'zone of influence' of the required excavations must be submitted to Council prior to the commencement of works. The zone of influence is to be defined as the horizontal distance from the edge of the excavation face to twice the

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

excavation depth.

The dilapidation report and survey is to be prepared by a consulting structural/geotechnical engineer agreed to by both the applicant and the owner of any affected adjoining property.

All costs incurred in achieving compliance with this condition shall be borne by the person entitled to act on this Consent.

In the event that access for undertaking the dilapidation survey is denied by an adjoining owner, the applicant **MUST DEMONSTRATE**, in writing, to Council that all reasonable steps have been taken to obtain access and advise the affected property owner of the reason for the survey and that these steps have failed. Written concurrence must be obtained from Council in such circumstances.

Note: This documentation is for record keeping purposes only, and may be used by the developer or affected property owner to assist in any action required to resolve any dispute over damage to adjoining properties arising from the works. It is in the applicant's and adjoining owner's interest for it to be as full and detailed as possible.

Workplace Health and Safety Plan and Hazardous Materials Surveys

73. A Workplace Health and Safety Plan (WHSP) to document the procedures to be followed to manage the risks posed to the health of the workforce shall be prepared, as well as a Hazardous Materials Survey to identify suspected hazardous waste within the buildings. The survey and plan are to be submitted for approval by Council and implemented accordingly.

Provision of Services

74. An application to obtain a Section 73 Compliance Certificate under the Sydney Water Act 1994, must be lodged with Sydney Water. To facilitate this, an application must be made through an authorised Water Servicing Coordinator. Please refer to the "building and developing" section of Sydney Water's web site at www.sydneypwater.com.au, or telephone 13 20 92.

Following receipt of the application, a 'Notice of Requirements' will detail water and sewer extensions to be built and charges to be paid. Please make early contact with the Coordinator, since building of water/sewer extensions can be time consuming and may impact on other services and building, driveway or landscape design. A copy of the 'Notice of Requirements' must be submitted to Council.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871

Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

75. Written clearance from Endeavour Energy, stating that electrical services have been made available to the development or that arrangements have been entered into for the provision of services to the development must be submitted to Council.
76. Prior commencement of construction, for the relevant construction stage, Council shall ensure that telecommunications infrastructure can be installed to service the premises which complies with the following:
- The requirements of the Telecommunications Act 1997:
 - For a fibre ready facility, the NBN Co's standard specifications current at the time of installation; and
 - For a line that is to connect a lot to telecommunications infrastructure external to the premises, the line shall be located underground.

Unless otherwise stipulated by telecommunications legislation at the time of construction, the development must be provided with all necessary pits and pipes, and conduits to accommodate the future connection of optic fibre technology telecommunications.

77. The applicant is to arrange with the appropriate service provider for any above ground service riser or access point to be constructed clear of any proposed or existing pedestrian footways, and if possible, located in recessed unobtrusive locations. Should any service provider require and/or insist the applicant/developer build a service riser that would create an obstruction and pose a potential safety hazard, then the applicant/developer should refer the request to Council for negotiation directly with the Service Network Authority.

Garbage Services

78. Collection of waste and recycling must be provided and integrated with the design of high density residential development (RFBs and MUDs). This must comply with the specifications detailed in the Fact Sheet: Waste Management Services for Residential Flat Buildings and Multi Dwelling Housing.

Waste Storage Area

79. Any bin bays must be:
- a) Provided with mechanical ventilation,
 - b) Provided with a hose cock for hosing the garbage bin bay and a sewerage drainage point in or adjacent to the bin storage area. The drainage point should have a fine

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

grade drain cover sufficient to prevent coarse pollutants from entering the sewer. If the hose cock is located inside the bin storage bay, it is not to protrude into the space indicated for the placement of bins,

- c) Provided with sufficient light to permit usage at night,
- d) Allocated with sufficient space within the bin bay to allow for access to all required bins by residents and waste collectors, as well as manoeuvring of bins within the bay and for the removal and return of bins by the waste collector,
- e) Bin bay signs are available from Council, and
- f) Provided with signage to be prominently displayed in each bin bay, or waste service room, as appropriate indicating that:
 - i. Garbage is to be placed wholly within the garbage bins provided,
 - ii. Only recyclable materials accepted by Council are to be placed within the recycling bins,
 - iii. The area is to be kept tidy,
 - iv. A phone number to be displayed for arranging disposal of bulky items; and
 - v. 50% of all messages are to be displayed using graphic illustrative content.

Waste Management Plan

- 80. Prior to the works commencing, the Waste Management Plan is to be amended and approved by Liverpool Council to note that whichever housing provider appointed to manage the completed development, the responsibility will be upon that housing provider to ensure that the residents of every residential unit are provided with clearly identified and differentiated waste and recycling containers, to be placed in the kitchen of that unit. The housing provider managing the development must ensure that the residents use these bins in accordance with correct waste practice, and that the recycling containers provided are used only for loose, unbagged recyclable items.

Substation

- 81. The Pad-mount Electrical Substation location and any associated fire separation walls must comply with Endeavour Energy Substation Design Instruction Document No SDI 104 (Current Version)

CPTED

- 82. The following Crime Prevention through Environmental Design (CPTED) principles are to be incorporated into the building:
 - a) CCTV for the ground level, entry/exit points, car parks, lifts and the exterior of the building,

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

- b) Lighting is required to be designed in accordance with the Australian and New Zealand Lighting Standard AS 1158. A lighting maintenance policy should be established. Security lighting should be installed in and around the building, and such shall not impact on any adjoining premises. The lighting should be vandal resistant, especially external lighting,
- c) Glazed tiling, patterned, porous and non solid surfaces to reduce the reward for graffiti offenders,
- d) Any external approved palisade or pool style fencing shall be black in colour, unless otherwise noted on the approved plans/details, and
- e) Access to the basement parking levels relating to the residential component of the building shall be controlled via a security controlled device.

Where necessary, plans shall be amended to reflect incorporation of the principles and/or details of such to be submitted to Council.

Hoarding

- 83. If the work is likely to cause pedestrian or vehicular traffic in a public area to be obstructed or rendered inconvenient; or if craning of materials is to occur across a public or road reserve area, a separate Road Occupancy Certificate and/or Hoarding approval must be obtained from Liverpool City Council prior to undertaking the works.

Craning

- 84. Lifting or craning materials over a public footway or roadway is not permitted unless a "B" class construction hoarding has been installed in compliance with Work Cover authority requirements.

Site Facilities

- 85. Toilet facilities must be available or provided at the work site and must be maintained until the works are completed at a ratio of one toilet plus one additional toilet for every 20 persons employed at the site. Each toilet must:
 - (a) be a standard flushing toilet connected to a public sewer, or
 - (b) have an on-site effluent disposal system approved under the Local Government Act 1993, or
 - (c) be a temporary chemical closet approved under the Local Government Act 1993.

Refuse Disposal

- 86. Adequate refuse disposal methods and builders storage facilities shall be installed on

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

the site. Builders' wastes, materials or sheds are not to be placed on any property other than that which this approval relates to.

Construction Requirements

87. Structural supporting elements or bracing of the building must be designed and certified by a qualified chartered structural engineer having regards to supporting ground conditions.

Waste Classification and Disposal of Contaminated Soil and Material

88. All soils and material(s), liquid and solid, to be removed from the site must be analysed and classified by an appropriately qualified and certified consultant, in accordance with the Protection of the Environment Operations (Waste) Regulation 2014 and related guidelines, in particular the NSW EPA Waste Classification Guidelines, prior to off-site disposal.

All Waste material(s) must be disposed of at an appropriately licensed waste facility for the specific waste. Receipts for the disposal of the waste must be submitted to Council within 30 days of the waste being disposed of.

All waste must be transported by a contractor licenced to transport the specific waste, and in vehicles capable of carting the waste without spillage, and meeting relevant requirements and standards. All loads must be covered prior to vehicles leaving the site.

Sediment and Erosion Control Measures

89. Prior to commencement of works sediment and erosion control measures shall be installed in accordance with the approved Construction Plans, for the relevant construction stage, and to ensure compliance with the Protection of the Environment Operations Act 1997 and Landcom's publication "Managing Urban Stormwater – Soils and Construction (2004)" – also known as "The Blue Book".

Environmental Management

90. Adequate soil and sediment control measures shall be installed and maintained. Furthermore, suitable site practices shall be adopted to ensure that only clean and unpolluted waters are permitted to enter Council's stormwater drainage system during construction/demolition.

Measures must include, as a minimum:

- (a) Siltation fencing;

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170

Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

- (b) Protection of the public stormwater system; and
- (c) Site entry construction to prevent vehicles that enter and leave the site from tracking loose material onto the adjoining public place.

Dial before you dig

91. Underground assets may exist in the area that is subject to your application. In the interest of health and safety and in order to protect damage to third party assets please contact Dial before you dig at www.1100.com.au or telephone 1100 before excavating or erecting structures (This is the law in NSW). If alterations are required to the configuration, size, form or design of the development upon contact the Dial before You Dig service, an amendment to the development consent (or a new development application) may be necessary. Individuals owe asset owners a duty of care that must be observed when working in the vicinity of plant or assets. It is the individual's responsibility to anticipate and request the nominal location of plant or assets on the relevant property via contacting the Dial before you dig service in advance of any construction or planning activities.

D. DURING CONSTRUCTION

The following conditions are to be complied with or addressed during construction:

Building Inspections

92. The building works must be inspected by the Principal Certifying Authority, in accordance with section 6.5 of the Environmental Planning & Assessment Act 1979 and clause 61 of the Environmental Planning & Assessment Regulation 2021, to monitor compliance with the relevant standards of construction, Council's development consent and the construction certificate.
93. The Principal Certifying Authority must specify the relevant stages of construction to be inspected and a satisfactory inspection must be carried out, to the satisfaction of the Principal Certifying Authority, prior to proceeding to the subsequent stages of construction or finalisation of the works.

Identification Survey Report

94. The building and external walls are not to proceed past ground floor/reinforcing steel level until such time as the PCA has been supplied with an identification survey report prepared by a registered surveyor certifying that the floor levels and external wall locations to be constructed, comply with the approved plans, finished floor levels and setbacks to

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

boundary/boundaries. The slab shall not be poured, nor works continue, until the PCA has advised the builder/developer that the floor level and external wall setback details shown on the submitted survey are satisfactory.

In the event that Council is not the PCA, a copy of the survey shall be provided to Council within three (3) working days.

95. On placement of the concrete, works again shall not continue until the PCA has issued a certificate stating that the condition of the approval has been complied with and that the slab has been poured at the approved levels.

Drainage Connection

96. Prior to the connection of private drainage to Council's drainage system, an inspection is to be carried out by Liverpool City Council's Development Engineering Unit. A fee will be charged in accordance with Council's adopted Fees and Charges, and is to be paid prior to the inspection.

Excavation

97. In the In the event the development involves an excavation that extends below the level of the base of the footings of a building, structure or work (including any structure or work within a road or rail corridor) on adjoining land, the person having the benefit of the development consent must, at the person's own expense:
- (a) Protect and support the building, structure or work from possible damage from the excavation, and
 - (b) where necessary, underpin the building, structure or work to prevent any such damage.
 - (c) a and b above does not apply if the person having the benefit of the development consent owns the adjoining land or the owner of the adjoining land has given consent in writing to that condition not applying.
 - (d) Retaining walls or other approved methods necessary to prevent the movement of excavated or filled ground, together with associated subsoil drainage and surface stormwater drainage measures, shall be designed strictly in accordance with the manufacturers details or by a practising structural engineer.

Security Fence

98. A temporary security fence to WorkCover Authority requirements is to be provided to the property during the course of construction. Note. Fencing is not to be located on Council's reserve area.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

Hours of Construction Work

99. Construction work/civil work/demolition work, including the delivery of materials, is only permitted on the site between the hours of 7:00am to 6:00pm Monday to Friday and 8:00am to 1:00pm on Saturday. No work will be permitted on Sundays or Public Holidays, unless otherwise approved by Council

Construction Noise and Vibration

100. Noise and vibration associated with excavation, demolition and construction activities shall comply with the management levels detailed within the 'Interim Construction Noise Guideline' published by the Department of Environment and Climate Change NSW (DECC 2009/265) dated July 2009 and acceptable vibration values prescribed within the Environmental Noise Management Assessing Vibration: A Technical Guideline (Department of Environment and Conservation, 2006).

All feasible and reasonable noise and vibration mitigation measures shall be implemented and any activities which may exceed the construction noise management levels and vibration criteria shall be identified and managed in accordance with the approved Construction Noise, Vibration Assessment and Management Plan.

Car Parking Areas

101. Car parking spaces and driveways must be constructed of a minimum of two coat finish seal or better. The spaces must be clear of obstructions and columns, permanently line marked and provided with adequate manoeuvring facilities. The design of these spaces must comply with the LDCP 2008, and Australian Standard 2890.1 Parking Facilities – Off Street Car Parking.
102. All car parking areas to be appropriately line marked and sign posted in accordance with the approved plans. All customer/visitor/staff parking areas are to be clearly signposted limiting car parking for customers/visitors/staff only. The applicant is to cover the costs of installation and maintenance of the signage.
103. The on-site parking spaces shown in the approved plans must be identified in accordance with A.S.2890.1 Parking Facilities – Off-Street Car Parking.

Traffic Management

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

104. All works within the road reserve are to be at the applicant cost and all signage is to be in accordance with the RTA's Traffic Control at Worksites Manual and the RTA's Interim Guide to Signs and Markings.
105. If a works zone is required, an application must be made to Council's Transport Planning section. The application is to indicate the exact location required and the applicable fee is to be included. If parking restrictions are in place, an application to have the restrictions moved, will need to be made.
106. Notice must be given to Council's Transport Planning section of any interruption to pedestrian or vehicular traffic within the road reserve, caused by the construction of this development. A Traffic Control Plan, prepared by an accredited practitioner must be submitted for approval, 48 hours prior to implementation. This includes temporary closures for delivery of materials, concrete pours etc.
107. Applications must be made to Council's Transport Planning section for any road closures. The applicant is to include a Traffic Control Plan, prepared by a suitably qualified person, which is to include the date and times of closures and any other relevant information.

General Site Works

108. Building operations such as brick cutting, mixing mortar and the washing of tools, paint brushes, form-work, concrete trucks and the like shall not be performed on the public footway or any other locations which may lead to the discharge of materials into Council's stormwater drainage system.
109. Dust screens shall be erected and maintained in good repair around the perimeter of the subject land during land clearing, demolition, and construction works.
110. Erosion and sediment control measures shall remain in place and be maintained until all disturbed areas have been rehabilitated and stabilised.
111. All topsoil, sand, aggregate, spoil or any other material shall be stored clear of any drainage line, easement, water body, stormwater drain, footpath, kerb or road surface and there shall be measures in place in accordance with the approved erosion and sediment control plan.
112. Where operations involve excavation, filling or grading of land, or removal of vegetation, including ground cover, dust is to be suppressed by regular watering until such time as the soil is stabilised to prevent airborne dust transport. Where wind velocity exceeds five knots the PCA may direct that such work is not to proceed.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170

Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

113. All vehicles involved in the delivery, demolition or construction process departing from the property shall have their loads fully covered before entering the public roadway.
114. The developer is to maintain all adjoining public roads to the site in a clean and tidy state, free of excavated “spoil” material.
115. All earthworks shall be undertaken in accordance with AS 3798 and Liverpool City Council’s Design Guidelines and Construction Specification for Civil Works.
116. All dangerous and/or hazardous material shall be removed by a suitably qualified and experienced contractor, licensed by WorkCover NSW. The removal of such material shall be carried out in accordance with the requirements of WorkCover NSW. The material shall be transported and disposed of in accordance with DECCW (EPA) requirements.

Major Filling/ Earthworks

117. All earthworks shall be undertaken in accordance with AS 3798 and Liverpool City Council’s Design Guidelines and Construction Specification for Civil Works.
118. The level of testing shall be determined by the Geotechnical Testing Authority/ Superintendent in consultation with the Principal Certifying Authority.

External

119. Switchboards for utilities shall not be attached to the elevations of the development that are visible from the street.
120. Any external lighting is to incorporate full cut-off shielding and is to be mounted so as to not cause any glare or spill over light nuisance within the development, neighbouring properties or road users.

Contamination

121. The development, including all civil works and demolition, must comply with the requirements of the Contaminated Land Management Act, 1997, State Environmental Planning Policy No. 55 – Remediation of Land, and Managing Land Contamination – Planning Guidelines (Planning NSW/EPA 1998).
122. All fill introduced to the site must undergo a contaminated site assessment. This assessment may consist of either:
 - (a) a full site history of the source of the fill (if known) examining previous land uses or geotechnical reports associated with the source site to determine potential

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871

Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

- contamination as per the NSW DECCW 'Waste Classification Guidelines' April 2008; or
- (b) clearly indicate the legal property description of the fill material source site;
 - (c) provide a classification of the fill material to be imported to the site in accordance with the 'NSW DECCW 'Waste Classification Guidelines' April 2008.
 - (d) a chemical analysis of the fill where the site history or a preliminary contamination assessment indicates potential contamination or contamination of fill material; and
 - (e) must provide Council with copies of validation certificate verifying the material to be used is free of contaminants and fit for purpose re use in residential, commercial or industrial use.
123. Records of the following must be submitted to the principal certifying authority monthly and at the completion of earth works:
- (a) The course (including the address and owner of the source site), nature and quantity of all incoming loads including the date, the name of the carrier, and the vehicle registration;
 - (b) The results of a preliminary contamination assessment carried out on any fill material used in the development.
 - (c) The results of any chemical testing of fill material.
124. Any new information which comes to light during demolition or construction works which has the potential to alter previous conclusions about site contamination must be notified to Council and the accredited certifier immediately after discovery. A Section 4.55 Application under the EP&A Act shall be made for any proposed works outside the scope of the approved development consent.

Site Remediation Works

125. Any new information which comes to light during remediation, demolition or construction works which has the potential to alter previous conclusions about site contamination and remediation must be notified to Council and the accredited certifier immediately after discovery. A Section 4.55 Application under the EP&A Act shall be made for any proposed works outside the scope of the approved development consent.

Crime Prevention Through Environmental Design

126. The following Crime Prevention Through Environmental Design principles are to be incorporated into the building.
- (a) CCTV for the ground level, entry/exit points, car parks, lifts and the exterior of the building shall be implemented;

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

- (b) 'Way finding' signage should be utilised at all major interchanges such as lifts and stair wells;
- (c) Lighting is required to be designed in accordance with the Australian and New Zealand Lighting Standard AS 1158. A lighting maintenance policy should be established. Security lighting should be installed in and around the building, and such shall not impact on any adjoining premises. The lighting should be vandal resistant, especially external lighting; and

Waste Management Plan

127. The Waste Management Plan submitted to and approved by Council must be adhered to at all times throughout all stages of the development. Supporting documentation (receipts/dockets) of waste/recycling/disposal methods carried out, is to be kept and must be produced upon the request of Council or any other authorised officer.

Note: Any non-compliance with this requirement will result in penalties being issued.

128. All lightweight or granular demolition, excavation or construction waste, e.g. wrapping, packaging materials, bags, insulation, sand, soil etc., must be kept fully enclosed at all times to prevent it from becoming displaced by the wind in strong wind conditions or from washing into sewers, storm drains or creeks, or onto adjacent properties or public land during wet weather.
129. All demolition, excavation and construction wastes must be separated as they are generated, and kept in separate spoil piles, bays, builder's skips and/or site bins. No wastes other than those noted on the approved waste management plan as being re-used on site, are to be left on site after the completion of the works.

E. PRIOR TO ISSUE OF OCCUPATION CERTIFICATE

The following conditions must be complied with before the issue of an Occupation Certificate

130. The premises must not be utilised until an Occupation Certificate is issued by the Principal Certifying PCA. Copies of all documents relied upon for the issue of the OC must be attached to the OC and registered with Council.
131. A single and complete *Fire Safety Certificate*, certifying the installation and operation of all of the fire safety measures within the building must be submitted to Council with the *Occupation Certificate*.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

132. Details of *critical stage* inspections carried out by the principal certifying authority together with any other certification relied upon must be provided to Council with the occupation certificate.

Section 138/ Section 68 Approval

133. Prior to the issue of an Occupation Certificate, the Principal Certifying Authority shall ensure that all works associated with a S138 Roads Act approval or S68 Local Government Act approval have been inspected and signed off by Liverpool City Council.

Cladding

134. Prior to issuing an occupation certificate the principal certifier must be satisfied that suitable evidence has been provided to demonstrate that the external wall cladding material and system is consistent with the consent documentation, NCC and relevant Australian Standards.

Affordable Rental Housing

135. Prior to the issue of the Final OC, a restriction shall be registered, before the date of the issue of the Final OC, against the title of the property on which development is to be carried out, in accordance with section 88E of the [Conveyancing Act 1919](#), that will ensure that:

- (a) For 10 years from the date of the issue of an OC:
 - i. The development is used for the purposes of affordable housing; and
 - ii. The development shall be managed by a registered not-for-profit community housing provider.

Accessibility

136. Access must be provided to the building for people with a disability in accordance with the relevant requirements of the Building Code of Australia, Disability (access to Premises – Buildings) Standard 2010 and Australian Standard – AS1428.1 (2009), Design for Access and Mobility – General requirements for new building work, to the satisfaction of the Certifying Authority

Turning Facility

137. Provide a turning facility (including a mechanical turntable) within the northern end of the parking aisle so that drivers will not have to reverse the full length of the isle (about 20m).

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871

Landscaping

138. Upon completion of the approved landscape works associated with the development and prior to the issue of any OC, an Implementation Report is to be submitted to the PCA attesting to the satisfactory completion of the landscape works in accordance with the approved landscape plan. The report is to be prepared by a suitably qualified person.

Works as Executed

139. Prior to the issue of an Occupation Certificate, works-as-executed drawings and compliance documentation shall be submitted to the Principal Certifying Authority in accordance with Liverpool City Council's Design Guidelines and Construction Specification for Civil Works.

An original set of works-as-executed drawings and copies of compliance documentation shall also be submitted to Liverpool City Council with notification of the issue of the Occupation Certificate where Council is not the Principal Certifying Authority.

Section 73 Sydney Water

140. A Section 73 Compliance Certificate under the Sydney Water Act 1994 must be obtained for submission to the PCA prior to issue of Occupation Certificate.

Stormwater Compliance

141. Prior to the issue of an Occupation Certificate, the Principal Certifying Authority shall ensure that the:
- a) On-site detention system/s,
 - b) Stormwater pre-treatment system/s,
 - c) Overland flowpath works,
 - d) Basement Carpark pump-out system:
 - i. Have been satisfactorily completed in accordance with the approved Construction Certificate and the requirements of this consent,
 - ii. Have met the design intent with regard to any construction variations to the approved design, and
 - iii. Any remedial works required to been undertaken have been satisfactorily completed.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

Details of the approved and constructed system/s shall be provided as part of the Works-As-Executed drawings.

Restriction as to User and Positive Covenant

142. Prior to the issue of an Occupation Certificate a restriction as to user and positive covenant relating to the following shall be registered on the title of the property:

- (a) On-site detention system/s,
- (b) Stormwater pre-treatment system/s,
- (c) Overland flowpath works,
- (d) Basement Carpark pump-out system:

The restriction as to user and positive covenant shall be in Liverpool City Council's standard wording as detailed in Liverpool City Council's Design and Construction Guidelines and Construction Specification for Civil Works.

Compliance with the Recommendations of the Acoustical Report

143. A compliance certificate from a qualified acoustic consultant is to be submitted to the PCA, certifying that the development has been constructed to meet the noise criteria in accordance with the approved Acoustical Report and that all recommendations have been adopted.
144. A compliance certificate or other documentation deemed suitable to the PCA is to be provided to the satisfaction of PCA demonstrating that the development has been constructed to ensure that the LAeq levels as specified within Clause 102(3) of the State Environmental Planning Policy (Infrastructure) 2007 are not exceeded.

Design Verification Statement

145. In accordance with the Environmental Planning and Assessment Regulation 2000 and State Environmental Planning Policy (SEPP) 65 "Design Quality of Residential Apartment Development", the subject development must be undertaken or directed by a 'qualified designer' (i.e., a registered architect under the Architects Act). In this regard, a design verification statement shall be submitted to the PCA assessing the development, upon completion of all works subject of this consent and its accompanying CC. The PCA shall ensure that the statement prepared by the qualified designer provides the following:
- (a) A valid and current chartered architect's certificate number (as issued by the Board of Architects of NSW);

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

- (b) That the completed development achieves the design quality of the development as shown in the plans and specifications submitted and approved with the CC, having regard to the design principles set out in Part 2 of SEPP 65.

Traffic

146. Signage must be placed at the driveway entrance advising that parking is for 'resident vehicles only'.
147. Adaptable unit car bay shared zones should remain as common strata and are kept clear at all times and are associated with the adaptable unit car bays at all times.
148. The approach to the accessible car bay should not have vertical clearance of less than 2.2m and height clearance of 2.5m at adaptable unit car bays compliant with AS2890.6.

BASIX

149. Supporting documentation issued by a suitable qualified person who has installed or carried out the works associated with the BASIX commitments shall be submitted to Council.

Redundant Laybacks

150. Redundant laybacks shall be removed and replaced with kerb and gutter as required to Council specifications.

Rectification of Damage

151. Prior to the issue of an OC any damage to Council infrastructure not identified in the dilapidation report, as a result of the development shall be rectified at no cost to Liverpool City Council.

Any rectification works within **Mill Road & Charles Street**, Liverpool will require a Roads Act application. The application is to be submitted and approved by Liverpool City Council prior to such works commencing.

Landscaping

152. Upon completion of the approved landscape works associated with the development and prior to the issue of any OC, an Implementation Report is to be submitted to the PCA attesting to the satisfactory completion of the landscape works in accordance with the approved landscape plan. The report is to be prepared by a suitably qualified person.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

Waste Transport and Disposal Dockets

153. Prior to issue of an Occupation Certificate, both the PCA and Council are to be provided with records of all waste transport and disposal dockets, demonstrating that waste materials from the project, have been disposed of at the waste facilities nominated in the approved waste management plan.

Garbage Services

154. Prior to the issue of an Occupation Certificate, if onsite waste and recycling collection is required the following restriction as to user must be registered on the title of the property:
- The owner/applicant of any property requiring on site collection of waste and recycling is to enter into a legally binding indemnity with Council to control the access and operation of the waste and recycling service. This shall be inclusive on successive owners in perpetuity. All costs involved are to be borne by the applicant.
 - A 'restriction as to user' is to be placed on the title of the property at the applicant's expense, which may not be altered or removed without Council's consent, stating:

'The removal and disposal of all green (garden) waste from the property and the lawful disposal of same, is to be carried out by private waste contractors engaged by the strata proprietors. Liverpool Council does not supply green bins or green waste services to this property.'
155. All waste management facilities, equipment (including the chutes, chute doors, diverter machinery, but excluding the waste bins), waste room features and permanent fixed signage will be installed and operational prior to the issue of an Occupation Certificate.
156. The developer/owner of the site is to contact Liverpool Council - Waste Management Section to determine the required number of waste and recycle bins for the residential component of the development as well as servicing requirements. These waste and recycle bins are to be kept at all times within the residential waste storage rooms except before and after collection days. Waste and Recycle bins are to be returned to the storage rooms within 24 hours of collection.

Washing on Balconies

157. Prior to the issue of an OC, the following restriction as to user must be registered on the title of the property:

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

The hanging of washing, including any clothing, towels, bedding or other article of a similar type of any balcony is not to be visible from any street

The restriction as to user may not be extinguished or altered except with the consent of Liverpool City Council.

Service Providers

158. The following documentation is to be provided prior to the release of the Occupation Certificate.
- a) A Section 73 Compliance Certificate under the Sydney Water Act 1994 is to be submitted to the PCA.
 - b) Notification of arrangement for the development from Endeavour Energy shall be submitted to Council.
 - c) Written certification from the relevant service providers that the telecommunications infrastructure is installed in accordance with:
 - i. The requirements of the Telecommunications Act 1997;
 - ii. For a fibre ready facility, the NBN Co's standard specifications current at the time of installation; and
 - iii. For a line that is to connect a lot to telecommunications infrastructure external to the premises, the line shall be located underground.

Unless otherwise stipulated by telecommunications legislation at the time of construction, the development must be provided with all necessary pits and pipes, and conduits to accommodate the future connections of optic fibre technology telecommunications.

Footpaths

159. Construction of 1.5m wide by 100mm thick (with one layer of SL72 reinforcing mesh) concrete path paving on one side of all residential access roads and both sides of all collector and distributor roads. Path paving will not be required in minor cul-de-sac with less than fifteen lots.

Dilapidation Report

160. Any rectification works required by Council regarding the condition of Council infrastructure shall be undertaken, at full cost to the developer.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

Dilapidation Report Private Property (Excavations)

161. A full dilapidation survey and report on the visible and structural condition of all neighbouring structures within the 'zone of influence' of the required excavations must be submitted to the Certifying Authority for approval prior to the issue of any Construction Certificate. The zone of influence is to be defined as the horizontal distance from the edge of the excavation face to twice the excavation depth.

The dilapidation report and survey is to be prepared by a consulting structural/geotechnical engineer agreed to by both the applicant and the owner of any affected adjoining property.

All costs incurred in achieving compliance with this condition shall be borne by the person entitled to act on this Consent.

In the event that access for undertaking the dilapidation survey is denied by an adjoining owner, the applicant **MUST DEMONSTRATE**, in writing, to the satisfaction of Council that all reasonable steps have been taken to obtain access and advise the affected property owner of the reason for the survey and that these steps have failed. Written concurrence must be obtained from Council in such circumstances.

Note: This documentation is for record keeping purposes only, and may be used by the developer or affected property owner to assist in any action required to resolve any dispute over damage to adjoining properties arising from the works. It is in the applicant's and adjoining owner's interest for it to be as full and detailed as possible.

Splay

162. Prior to the issue of an Occupation Certificate a 6m x 6m splay corner at the intersection of **Mill Road and Charles Street** is to be dedicated as road to Liverpool City Council on a plan of subdivision registered with the owner. The dedication of road and subsequent registration shall be at no cost to Council.

Easement for Drainage of Water

163. An Easement for Drainage of Water is to be created in favour of Liverpool City Council over the relocated drainage easement pipe (shown as 450 dia.) and burdening the affected lot. The Easement width is to be minimum 1.83m wide and is not to be extinguished or altered except with the consent of Liverpool City Council. Documents relative to the creation of the easement to be lodged with the Land Registry Service NSW, and registration to be effected prior to the issue of any Occupation Certificate. All costs

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871

associated with piping, relocation and creation of easements are to be borne by the applicant and a copy of the registered documents are to be provided to Council.

Pump-out System

164. A certificate of compliance for the pump out drainage system of the basement level shall be issued to the Principal Certifier by the pump installers stating that the pump out system has been installed to operate in accordance with the Council requirements and the approved drawings.
165. Data on the new public assets shall be submitted to Council. Contact Council for submission requirements.

F. GENERAL CONDITIONS

The following general conditions shall be complied with at all times:

Affordable Rental Housing

166. The development is to be used for the purposes of affordable housing for 10 years from the date of issue of the OC and shall be managed by a registered not-for-profit community housing provider.

Note: Affordable Housing is defined as *housing for very low income households, low income households or moderate income households, being such households as are prescribed by the regulations or as are provided for in an environmental planning instrument. A household is taken to be a very low income household, low income household or moderate income household if the household:*

- (a) *Has a gross income that is less than 120 per cent of the median household income for the time being for the Sydney Statistical Division (according to the Australian Bureau of Statistics) and pays no more than 30 per cent of that gross income in rent, or*
- (b) *Is eligible to occupy rental accommodation under the National Rental Affordability Scheme and pays no more rent than that which would be charged if the household were to occupy rental accommodation under that scheme.*

Rooftop Communal Open Space

167. All occupants of both residential flat buildings shall have access to the rooftop communal open space area.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871

Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

Parking Requirements

168. Parking spaces shall be allocated as follows:
- (a) 11 car parking spaces for residents (including 2 accessible spaces) are to be provided.
 - (b) Parking spaces must not be allocated, sold or leased to an owner, occupier or any other person or entity. In any strata subdivision, visitor parking spaces must be retained within the common property.
169. All vehicles are to enter and exit the site in a forward direction
170. All parking areas shown on the approved plans must be used solely for this purpose.
171. The operator of the development must not permit the reversing of vehicles onto or away from the road reserve. All vehicles must be driven forward onto and away from the development and adequate space must be provided and maintained on the land to permit all vehicles to turn in accordance with AS 2890.1 Parking Facilities – Off Street Car Parking.
172. All line marking and sign posting is to be maintained in good condition at all times, to the satisfaction of Council.

Landscaping

173. Landscaping shall be maintained in accordance with the approved plan, in a healthy state and in perpetuity by the existing or future owners and occupiers of the development. If any of the vegetation comprising the landscaping dies or is removed, it is to be replaced with vegetation of the same species, and similar maturity as the vegetation which has died or was removed.

Noise and Environmental Emissions

174. The use of the dwellings including music, mechanical plant and equipment and the like shall not give rise to the emission of "offensive noise" as defined under the Protection of the Environment Act 1997.
175. The use of the site shall not give rise to the emission into the surrounding environment of gases, vapours, dusts, odours or other impurities which are a nuisance, injurious or prejudicial to health.

Waste Management

176. After the issue of an Occupation Certificate but at least 7 days prior to residents moving in, the Waste section of Council must be contacted to arrange delivery of the waste bins and confirm the bin service days. Please ring Council on 1300 36 2170 for this purpose. These waste and recycling bins are to be kept within the waste storage rooms, being presented for collection no earlier than the afternoon before collection and returned as soon as possible afterwards, and no later than 24 hours after collection.
177. All waste products associated with the use of the residential flat building are to be placed in containers and stored within the building. Residents must ensure that all materials placed in the yellow-lid recycling bins are acceptable for recycling through that means, and all materials must be loose, unbagged and easily separable.
178. Waste bins must be stored in designated garbage/ trade refuse areas, which must be kept tidy at all times. Bins must not be stored or allowed to overflow in parking or landscaping areas, must not obstruct the exit of the building, and must not leave the site onto neighbouring public or private properties.
179. Sufficient space shall be provided within each dwelling for the storage of a minimum of one day's waste and recycling.
180. A separate storage area is to be allocated for the holding of bulk waste prior to collection.
181. Any bin bays must be:
- (a) Allocated with sufficient space within the bin bay to allow for access to all required bins by residents and waste collectors, as well as manoeuvring of bins within the bay and for the removal and return of bins by the waste collector;
 - (b) Provided with signage to be prominently displayed in each bin bay, or waste service room, as appropriate indicating that:
 - Only recyclable materials accepted by Council are to be placed within the recycling bins;
 - A phone number for arranging disposal of bulky items;
 - Maximum compaction ratio is 2:1
182. Waste bins must be stored in designated garbage/ trade refuse areas, which must be kept tidy at all times. Bins must not be stored or allowed to overflow in parking or landscaping areas, must not obstruct the exit of the building, and must not leave the site onto neighbouring public or private properties.

Operation, maintenance and cleaning of the garbage compactor and associated equipment is the responsibility of the strata management or body corporate. Maximum compaction ratio is 2:1.

Operation, maintenance and cleaning of the garbage chutes and associated waste cupboards, rooms, or equipment is the responsibility of the strata management or body corporate.

Graffiti

183. Any graffiti carried out on the property shall be removed, within 48 hours, at full cost to the owner/occupier of the site.

Washing on Balconies

184. The hanging of washing, including any clothing, towels, bedding or other article of a similar type on any balcony shall not be visible from any street.

Council's Infrastructure

185. Council's infrastructure shall be protected at all times. Any damages shall be rectified by the developer, to Council's satisfaction and at no cost to Council.

G. ADVISORY

- a) Section 4.53 of the EP&A Act provides that unless otherwise stated by a condition of this consent, this consent will lapse if development is not physically commenced within five years of the date of this notice.
- b) Section 8.2 of the EP&A Act provides that an applicant may request, within six (6) months of the date of the determination of the Development Application, that Council review its determination (this does not relate to designated development or Crown development).

An application under Section 8.2 of the EP&A Act cannot be reviewed/determined after 6 months of the date of determination. Therefore, the submission of a Section 8.2 Application must allow sufficient time for Council to complete its review within the prescribed timeframe, including the statutory requirement for public notification.

- c) Section 8.7 of the EP&A Act provides that an applicant who is dissatisfied with the determination of a Development Application, may appeal to the Land and Environment Court within six (6) months of the date of determination, or as otherwise prescribed by the EP&A Act.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

- d) Section 8.8 of the EP&A Act provides that an objector who is dissatisfied with the determination of the consent authority to grant consent to a Development Application for Designated Development (including any State significant development that would be designated development but for Section 4.10(2) of the EP&A Act), may, within 28 days after the date on which the application is taken to have been determined, appeal to the Land and Environment Court, against the determination.
- e) The Commonwealth Disability Discrimination Act 1992 may apply to this proposal. Approval of this application does not imply or infer compliance with this Act. Applicants and owners are required to satisfy themselves as to compliance and make their own enquiries to the Human Rights and Equal Opportunity Commission. Attention is also drawn to the provisions of Australian Standard 1428 – Design for Access and Mobility.
- f) The requirements of all authorities including the Environmental Protection Authority and the Work Cover Authority shall be met in regard to the operation of the building.
- g) “DIAL BEFORE YOU DIG”

Underground assets may exist in the area that is subject to your application. In the interest of health and safety and in order to protect damage to third party assets please contact Dial before you dig at www.1100.com.au or telephone 1100 before excavating or erecting structures (This is the law in NSW). If alterations are required to the configuration, size, form or design of the development upon contact the Dial before You Dig service, an amendment to the development consent (or a new development application) may be necessary. Individuals owe asset owners a duty of care that must be observed when working in the vicinity of plant or assets. It is the individual's responsibility to anticipate and request the nominal location of plant or assets on the relevant property via contacting the Dial before you dig service in advance of any construction or planning activities.

- h) TELECOMMUNICATIONS ACT 1997 (COMMONWEALTH)

Telstra (and its authorised contractors) are the only companies that are permitted to conduct works on Telstra's network and assets. Any person interfering with a facility or installation owned by Telstra is committing an offence under the Criminal Code Act 1995 (Cth) and is liable for prosecution. Furthermore, damage to Telstra's infrastructure may result in interruption to the provision of essential services and significant costs. If you are aware of any works or proposed works which may affect or impact on Telstra's assets in any way, you are required to contact: Telstra's Network Integrity Team on Phone Number 1800 810 443.

- i) The Liverpool City Council Local Government area soils and ground water may be subject to varying levels of Salinity. Whilst Council may require applicants to obtain Salinity reports relating to some developments, no assessment has been made by Council. Soil and ground water salinity levels can change over time due to varying factors. It is recommended that all applicants make their own independent inquiries

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au

as to appropriate protection against the current and future potential affect of Salinity to ensure the ongoing structural integrity of any work undertaken. Liverpool City Council will not accept any liability for damage occurring to any construction of any type affected by soil and or ground water Salinity.

- j) Care shall be taken by the applicant and the applicant's agents to prevent any damage to adjoining properties. The applicant or applicant's agents may be liable to pay compensation to any adjoining owner if, due to construction works, damage is caused to such an adjoining property.
- k) Letter boxes must be provided in accordance with the requirements of Australia Post. In this regard, the developer is required to obtain approval from Australia Post for letter box positioning and dimensions.
- l) The cost of any necessary adjustments to utility mains and services shall be borne by the applicant.

ATTACHMENT 3– CONDITIONS ISSUED BY Endeavour Energy

Chief Executive Officer
Liverpool City Council

19 April 2021

ATTENTION: Emmanuel Torres

Dear Sir or Madam

I refer to the referral of 31 March 2021 from NSW Planning, Industry & Environment regarding NSW Government concurrence and referral request CNR-20168 for Liverpool City Council Development Application DA-50/2021 at 23 - 25 CHARLES STREET LIVERPOOL 2170 (Lots 1 & 2 DP 500066) for 'Demolition of existing dwellings and the construction of a Residential Flat Building consisting of six storeys'. Submissions need to be made to Council by 21 April 2021.

As shown in the below site plans from Endeavour Energy's G/Net master facility model (and extracts from Google Maps Street View) there are:

- No easements over the site benefitting Endeavour Energy (active easements are indicated by red hatching).
- Low voltage underground cables to the Mill Road road verge / roadway.
- 33,000 volt / 33 kilovolt (kV) high voltage underground cables to the Charles Street road verge / roadway.
- At the corner of Mill Road and Charles Street there is a pole with low voltage overhead power lines as well as low voltage and 11,000 volt / 11 kV high voltage underground cables to the road verge / roadway.
- Two extended low voltage overhead service conductors coming from poles on the road verge to customer owned / private poles (indicated by the green circle) on the site providing the customer connection points for the existing dwellings.

Please note the location, extent and type of any electricity infrastructure, boundaries etc. shown on the plan is indicative only. In addition it must be recognised that the electricity network is constantly extended, augmented and modified and there is a delay from the completion and commissioning of these works until their capture in the model. Generally (depending on the scale and/or features selected), low voltage (normally not exceeding 1,000 volts) is indicated by blue lines and high voltage (normally exceeding 1,000 volts but for Endeavour Energy's network not exceeding 132,000 volts / 132 kV) by red lines (these lines can appear as solid or dashed and where there are multiple lines / cables only the higher voltage may be shown). This plan only shows the Endeavour Energy network and does not show electricity infrastructure belonging to other authorities or customers owned electrical equipment beyond the customer connection point / point of supply to the property. This plan is not a 'Dial Before You Dig' plan under the provisions of Part 5E 'Protection of underground electricity power lines' of the Electricity Supply Act 1995 (NSW).

Subject to the following recommendations and comments Endeavour Energy has no objection to the Development Application.

51 Huntingwood Drive, Huntingwood, NSW 2148
PO Box 811, Seven Hills, NSW 1730
T: 133 7118

Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

- Network Capacity / Connection

Endeavour Energy has noted the Statement of Environmental Effects does not appear to address in detail the suitability of the site for the development in regard to whether electricity services are available and adequate for the development.

3.6 UTILITIES

The site will be appropriately serviced to accommodate the proposed use. Some utility upgrades are likely to be required and will be confirmed with the relevant service authority.

The availability of electricity supply to a site is based on a wide range of factors eg. the age and design of the network; other development in the locality utilising previously spare capacity within the local network; the progress of nearby / surrounding sites including electricity infrastructure works eg. a smaller and isolated development that may not of its own accord require a substation may require a substation to facilitate the development and from which the spare capacity is made available to subsequent nearby development.

Distribution substations are required to transform the high voltage of the distribution feeder (usually at 11,000 volts / 11 kV) to the secondary system voltage (400/230 volts) to supply customers / developments. Distribution substations are divided into ground mounted substations most commonly being a padmount substations installed a complete unit on a concrete foundation / plinth and usually associated with underground distribution and pole mounted substations where there is overhead distribution.

Padmount substations (indicated by the symbol  on the site plan from Endeavour Energy's G/Net master facility model) can accommodate loads from 315 kVA up to 1,500 kVA (typically 500 kVA). Accordingly there is a significant variation in the number and type of premises able to be connected to a substation ie. a single distribution substation may serve one large building, or many homes.

As shown in the below site plan from Endeavour Energy's G/Net master facility model, whilst there are a few distribution substations in proximity of the site which are likely to have some spare capacity, however it is not unlimited. Given the size of the proposed development (23 units) there may not be sufficient spare capacity to facilitate the proposed development. As well as the capacity of distribution substations, other factors such as the size and rating / load on the conductors and voltage drop (which can affect the quality of supply particularly with long conductor runs) etc. need to be assessed.

Accordingly an extension and / or augmentation of the existing local network may be required. However the extent of the works will not be determined until the final load assessment is completed. Endeavour Energy's preference is to alert proponents / applicants (and Council) of the potential matters that may arise as further development of areas continues to occur.

In due course the applicant for the proposed development of the site will need to submit an appropriate application based on the maximum demand for electricity for connection of load via Endeavour Energy's Network Connections Branch to carry out the final load assessment and the method of supply will be determined. Straightforward applications can be completed online and permission to connect may be provided immediately if submitting a complying application.

Depending on the outcome of the assessment, any required padmount substation will need to be located within the property (in a suitable and accessible location) and be protected (including any associated cabling) by an easement and associated restrictions benefiting and gifted to Endeavour Energy. Please refer to Endeavour Energy's Mains Design Instruction MDI 0044 'Easements and Property Tenure Rights'.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

For more complex connections, advice on the electricity infrastructure required to facilitate the proposed development can be obtained by submitting a Technical Review Request to Endeavour Energy's Network Connections Branch, the form for which FPJ6007 is attached. The response to these enquiries is based upon a desktop review of corporate information systems, and as such does not involve the engagement of various internal stakeholders in order to develop a 'Connection Offer'. It does provide details of preliminary connection requirements which can be considered by the applicant prior to lodging a formal application for connection of load.

Further details are available by contacting Endeavour Energy's Network Connections Branch via Head Office enquiries on business days from 9am - 4:30pm on telephone: 133 718 or (02) 9853 6666 or on Endeavour Energy's website under 'Home > Residential and business > Connecting to our network' via the following link:

<http://www.endeavourenergy.com.au/> .

As part of the application for connection of load Endeavour Energy's Network Connections Branch as well as determining the method of supply requirements will also determine the funding arrangements. Depending on the circumstances not all the works may be customer funded or constructed and Endeavour Energy may supply materials, fund or construct works, make a capital contribution or seek reimbursements from the customer eg. for the use of spare ducts which Endeavour Energy has made a capital contribution as part of other nearby works.

Alternatively the applicant may need to engage an Accredited Service Provider (ASP) of an appropriate level and class of accreditation to assess the electricity load and the proposed method of supply for the development. The ASP scheme is administered by Energy NSW and details are available on their website via the following link or telephone 13 77 88:

<https://energy.nsw.gov.au/government-and-regulation/legislative-and-regulatory-requirements/asp-scheme-and-contestable-works> .

Endeavour Energy is urging applicants /customers to engage with an Electrical Consultant prior to finalising plans to in order to assess and incorporate any required electricity infrastructure. In so doing the consideration can also be given to its impact on the other aspects of the proposed development. This can assist in avoiding the making of amendments to the plan or possibly the need to later seek modification of an approved development application.

- **Network Asset Design**

Endeavour Energy's Company Policy 9.2.5 'Network Asset Design', includes the following requirements for electricity connections to new urban subdivision / development.

5.11 Reticulation policy

5.11.1 Distribution reticulation

In order to improve the reliability performance of and to reduce the operating expenditure on the network over the long term the company has adopted the strategy of requiring new lines to be either underground cables or where overhead is permitted, to be predominantly of covered or insulated construction. Notwithstanding this strategy, bare wire overhead construction is appropriate and permitted in some situations as detailed below.

In areas with the potential for significant overhanging foliage, CCT is used to provide increased reliability as it is less susceptible to outages from wind-blown branches and debris than bare conductors. CCT must only be used in treed² areas as the probability of a direct lightning strike is low. In open areas where the line is not shielded from a direct lightning strike, bare conductors must generally be used for 11kV and 22kV reticulation.

Non-metallic Screened High Voltage Aerial Bundled Cable (NMSHVABC) must be used in areas which are heavily treed and where it is not practicable to maintain a tree clearing envelope around the conductors.

² A 'treed' area is one with a substantial number of trees adjacent to the line, in each span. In these situations CCT is used to provide increased reliability as it is less susceptible to outages from wind-blown

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

5.11.1.1 Urban areas

Reticulation of new residential subdivisions will be underground. In areas of low bushfire consequence, new lines within existing overhead areas can be overhead, unless underground lines are cost justified or required by either environmental or local council requirements.

Where underground reticulation is required on a feeder that supplies a mixture of industrial, commercial and/or residential loads, the standard of underground construction will apply to all types of load within that development.

Where ducting is used, adequate spare ducts and easements must be provided at the outset to cover the final load requirements of the entire development plan.

Extensions to the existing overhead 11kV/22kV network must generally be underground. Bare wire will be used for conductor replacements and augmentations except in treed areas where CCT or NMSHVABC must be used.

Extensions to the existing overhead LV network and augmentations must either be underground or ABC. Conductor replacements greater than 100m in route length must utilise aerial bundled cable.

- **Streetlighting**

With the increase in both vehicular and pedestrian traffic resulting from the overall development occurring in the area, although the existing streetlighting is designed for an urban environment, the streetlighting may need to be reviewed and if necessary upgraded to comply with the series of standards applying to the lighting of roads and public spaces set out in with Australian/New Zealand Standard AS/NZS 1158: 2010 'Lighting for roads and public spaces' as updated from time to time.

Whilst the determination of the appropriate lighting rests with the road controlling authority, Endeavour Energy as a Public Lighting Service Provider is responsible for operating and maintaining the streetlights on behalf of local councils, Roads and Maritime Services and other utilities in accordance with the NSW Public Lighting Code 2019 (Code) as updated from time to time. Endeavour Energy recognises that well designed, maintained and managed Public Lighting offers a safe, secure and attractive visual environment for pedestrians and drivers during times of inadequate natural light.

For any Code implementation and administration / technical matters please contact Endeavour Energy's Substation Mains Assets Section via Head Office enquiries on business days from 9am - 4:30pm on telephone: 133 718 or (02) 9853 6666 or email mainsenquiry@endeavourenergy.com.au.

- **Earthing**

The construction of any building or structure (including fencing, signage, flag poles, hoardings etc.) whether temporary or permanent that is connected to or in close proximity to Endeavour Energy's electrical network is required to comply with Australian/New Zealand Standard AS/NZS 3000:2018 'Electrical installations' as updated from time to time. This Standard sets out requirements for the design, construction and verification of electrical installations, including ensuring there is adequate connection to the earth. It applies to all electrical installations including temporary builder's supply / connections.

Inadequate connection to the earth to allow a leaking / fault current to flow into the grounding system and be properly dissipated places persons, equipment connected to the network and the electricity network itself at risk from electric shock, fire and physical injury. The earthing system is usually in the form of an earth electrode consisting of earth rods or mats buried in the ground. It should be designed by a suitably qualified electrical engineer / ASP following a site-specific risk assessment having regard to the potential number of people could be simultaneously exposed, ground resistivity etc.

For details of the ASP scheme please refer to the above point 'Network Capacity / Connection'.

- **Vegetation Management**

The planting of large trees near electricity infrastructure is not supported by Endeavour Energy. Particularly for overhead power lines, ongoing vegetation management / tree trimming is a significant network cost and falling trees and branches during storms are a major cause of power outages.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

Suitable planting needs to be undertaken in proximity of electricity infrastructure (including any new electricity infrastructure required to facilitate the proposed development). Only low growing shrubs not exceeding 3.0 metres in height, ground covers and smaller shrubs, with non-invasive root systems are the best plants to use. Larger trees should be planted well away from electricity infrastructure (at least the same distance from overhead power lines as their potential full grown height) and even with underground cables, be installed with a root barrier around the root ball of the plant.

Landscaping that interferes with electricity infrastructure may become a potential safety risk, cause of bush fire, restrict access, reduce light levels from streetlights or result in the interruption of supply. Such landscaping may be subject to Endeavour Energy's Vegetation Management program and/or the provisions of the Electricity Supply Act 1995 (NSW) Section 48 'Interference with electricity works by trees' by which under certain circumstances the cost of carrying out such work may be recovered.

Endeavour Energy's recommendation is that existing trees which are of low ecological significance in proximity of overhead power lines be removed and if necessary replaced by an alternative smaller planting to ensure appropriate clearances are maintained whilst minimising the need for future pruning.

- **Prudent Avoidance**

The electricity industry has adopted a policy of prudent avoidance by doing what can be done without undue inconvenience and at modest expense to avert the possible risk to health from exposure to emissions from electricity infrastructure such as electric and magnetic fields (EMF) and noise which generally increase the higher the voltage ie. Endeavour Energy's network ranges from low voltage (normally not exceeding 1,000 volts) to high voltage (normally exceeding 1,000 volts but not exceeding 132,000 volts / 132 kV).

In practical terms this means that when designing new transmission and distribution facilities, consideration is given to reducing exposure and increasing separation distances to more sensitive uses such as residential or schools, pre-schools, day care centres or where potentially a greater number of people are regularly exposed for extended periods of time.

These emissions are usually not an issue but with Council's permitting or encouraging development with higher density, reduced setbacks and increased building heights, but as the electricity network operates 24/7/365 (all day, every day of the year), the level of exposure can increase.

Endeavour Energy believes that irrespective of the zoning or land use, applicants (and Council) should also adopt a policy of prudent avoidance by the siting of more sensitive uses eg. the office component of an industrial building, away from and less susceptible uses such as garages, non-habitable or rooms not regularly occupied eg. storage areas in a commercial building, towards any electricity infrastructure – including any possible future electricity infrastructure required to facilitate the proposed development.

Where development is proposed near electricity infrastructure, Endeavour Energy is not responsible for any amelioration measures for such emissions that may impact on the nearby proposed development.

Please find attached a copy of Energy Networks Association's 'Electric & Magnetic Fields – What We Know' which can also be accessed via their website at <https://www.energynetworks.com.au/electric-and-magnetic-fields> and provides the following advice:

Electric fields are strongest closest to their source, and their strength diminishes rapidly as we move away from the source.

The level of a magnetic field depends on the amount of the current (measured in amps), and decreases rapidly once we move away from the source.

Typical magnetic field measurements associated with Endeavour Energy's activities and assets given the required easement widths, safety clearances etc. and having a maximum voltage of 132,000 volt / 132 kV, will with the observance of these separation distances not exceed the recommended magnetic field public exposure limits.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

- Dial Before You Dig

Before commencing any underground activity the applicant is required to obtain advice from the *Dial Before You Dig 1100* service in accordance with the requirements of the *Electricity Supply Act 1995* (NSW) and associated Regulations. This should be obtained by the applicant not only to identify the location of any underground electrical and other utility infrastructure across the site, but also to identify them as a hazard and to properly assess the risk.

- Removal of Electricity Supply

Approval for the permanent disconnection and removal of supply must be obtained from Endeavour Energy's Network Connections Branch (contact via Head Office enquiries on business days from 9am - 4:30pm on telephone: 133 718 or (02) 9853 6666) by Accredited Service Providers (ASP) with the relevant class of Authorisation for the type of work being carried out. The work could involve:

- The disconnection and removal of an underground service cable or overhead service line,
- Removal of metering equipment.

The written request must be submitted to Endeavour Energy using Form FPJ4603 'Permission to Remove Service / Metering by Authorised Level 2 Accredited Service Provider' which must be accompanied by Notification of Service Works (NOSW) forms provided as a result of service work activity performed by a Level 2 ASP. The retailer must also provide written agreement for the permanent removal of supply.

For details of the ASP scheme please refer to the above point 'Network Capacity / Connection'.

- Demolition

Demolition work is to be carried out in accordance with Australian Standard AS 2601—2001: 'The demolition of structures' as updated from time to time. All electric cables or apparatus which are liable to be a source of danger, other than a cable or apparatus used for the demolition works shall be disconnected ie. all electrical apparatus shall be regarded as live until isolated and proved de-energised by approved means.

Depending on the extent of the demolition works, the low voltage service conductor and customer connection may need to be isolated and/or removed during demolition. Please refer to the below point 'Removal of Electricity Supply' for further information.

Appropriate care must be taken to not otherwise interfere with any electrical infrastructure on or in the vicinity of the site eg. streetlight columns, power poles, overhead power lines and underground cables etc.

- Site Remediation

Endeavour Energy's Environmental Business Partner Team have advised that the remediation of soils or surfaces impacted by various forms of electricity infrastructure is not uncommon but is usually not significant eg. transformer oil associated with leaking substations, pole treatment chemicals at the base of timber poles etc. The method of remediation is generally the removal of the electricity infrastructure, removal of any stained surfaces or excavation of any contaminated soils and their disposal at a licensed land fill. The decommissioning and removal of the redundant electricity infrastructure will be dealt with by Endeavour Energy's Network Connections Branch as part of the application for the connection of load for the new development – please refer to the above point 'Network Capacity / Connection'.

If the applicant has any concerns over the remediation works related to redundant electricity infrastructure they should contact Environmental Business Partner Team via Head Office enquiries on business days from 9am - 4:30pm on telephone: 133 718 or (02) 9853 6666.

Customer Service Centre Ground floor, 33 Moore Street, Liverpool NSW 2170
All correspondence to Locked Bag 7064 Liverpool BC NSW 1871
Call Centre 1300 36 2170 **Email** lcc@liverpool.nsw.gov.au
Web www.liverpool.nsw.gov.au **NRS** 13 36 77 **ABN** 84 181 182 471

- Public Safety

Workers involved in work near electricity infrastructure run the risk of receiving an electric shock and causing substantial damage to plant and equipment. Please find attached copies of Endeavour Energy's public safety training resources, which were developed to help general public / workers to understand why you may be at risk and what you can do to work safely. The public safety training resources are also available via Endeavour Energy's website via the following link:

<http://www.endeavourenergy.com.au/wps/wcm/connect/ee/nsw/nsw+homepage/communitynav/safety/safety+brochures>.

If the applicant has any concerns over the proposed works in proximity of the Endeavour Energy's electricity infrastructure to the road verge / roadway, as part of a public safety initiative Endeavour Energy has set up an email account that is accessible by a range of stakeholders across the company in order to provide more effective lines of communication with the general public who may be undertaking construction activities in proximity of electricity infrastructure such as builders, construction industry workers etc. The email address is Construction.Works@endeavourenergy.com.au.

- Emergency Contact

In case of an emergency relating to Endeavour Energy's electrical network, the applicant should note the Emergencies Telephone is 131 003 which can be contacted 24 hours / 7 days. Endeavour Energy's contact details should be included in the any risk or safety management plan.

I appreciate that not all the foregoing issues may be directly or immediately relevant or significant to the Development Application ie. if a padmount substation is not required on site. However, Endeavour Energy's preference is to alert proponents / applicants of the potential matters that may arise should development within closer proximity of the existing and/or required electricity infrastructure needed to facilitate the proposed development on or in the vicinity of the site occur.

Could you please pass on a copy of this submission and the attached resources to the applicant? Should you wish to discuss this matter, or have any questions, please do not hesitate to contact me or the contacts identified above in relation to the various matters. Due to the high number of development application / planning proposal notifications submitted to Endeavour Energy, to ensure a response contact by email to property.development@endeavourenergy.com.au is preferred.

With the easing of the current COVID-19 health risk, whilst a significant number of Endeavour Energy staff are returning to the office they are at times still working from home. Although working from home, access to emails and other internal stakeholders can still be somewhat limited and as a result it may take longer than usual to respond to enquiries. Thank you for your ongoing understanding during this time.

Yours faithfully

Cornelis Duba
