Natalia Celedon
Level 1 51 Walker St
North Sydney NSW 2060

Dear Natalia,

Re: 23-25 Charles St, Liverpool

We understand that you are seeking what the structural impact would be of changing and moving concrete columns to the above project.

We have worked extensively with the architect over an extended period of time to reduce the number of transfers by coordinating column positions. This was to simplify the construction and the cost of the building. Moving columns or changing the regular structural grid would require further modelling, additional structure and redocumentation.

Yours faithfully,

A handwritten signature in black ink, appearing to be "B. Whiting", with a stylized, overlapping loop at the end.
