

9 February 2024

The General Manager
Penrith City Council

Attention: Concurrence Referral

Rev23/0008 at 184 LORD SHEFFIELD CIRCUIT PENRITH 2750

Dear Sir or Madam

I refer to the referral of 19 January 2024 from NSW Planning & Environment regarding NSW Government concurrence and referral request CNR-64807 for Penrith City Council Development Application Rev23/0008 at 184 LORD SHEFFIELD CIRCUIT PENRITH 2750 [(Part) Lot 3003, Lot 3004, and Lot 3005 in DP1184498] for 'Review of Determination (Refusal) of DA22/0214 for Construction of Part 13 and Part 25 Storey Mixed Use Development, One Level of Basement Car Parking, Five Storey Podium with Above-Ground Parking, Retail and Commercial Tenancies and Two Residential Towers. Tower C has 74 Apartments and Tower D has 163 Apartments. Proposal includes an Offer for Community Infrastructure for Further Embellishment Works to Proposed Through-Site Link (Concurrent Review Application Rev23/0007 for DA22/0213)'. Submissions need to be made to Council by 9 February 2024.

Please refer to Endeavour Energy's submission made on 25 August 2022 via the NSW Planning Portal regarding NSW Government concurrence and referral request CNR-44495 for Penrith City Council Development Application DA22/0214.

From a review of the 'Division 8.2 Review: DA22/0213 ('DA2')' the reasons for refusal do not appear to relate to the conditions or advice included in Endeavour Energy's submission to DA22/0213. Similarly the Statement of Environmental Effects (please note it incorrectly refers to Ausgrid as the Referral Agency) and the Services Availability Report for DA prepared by S4B Studio Revision C dated 28 January 2022 does not appear to include any additional relevant advice.

Notwithstanding the proposed changes / additional information, the conditions and advice provided in Endeavour Energy's submission to DA22/0214 essentially remain applicable.

Please find attached for your reference copies of Endeavour Energy's:

- Land Interest Guidelines for Network Connection Works, Version 5, December 2022.
- Standard Conditions for Development Applications and Planning Proposals, Version 9, August 2023.

For further advice the applicant can call Endeavour Energy via Head Office enquiries on business days from 9am - 4:30pm on telephone: 133 718 or (02) 9853 6666 and the following contacts:

- Customer Network Solutions Branch for matters related to the electricity supply or asset removal / relocation who are responsible for managing the conditions of supply with the applicant and their Accredited Service Provider (ASP). Alternatively contact can be made by email cicadmin@endeavourenergy.com.au .
- Easements Officers for matters related to easement management, protected works or other forms of property tenure / interests. Alternatively contact can be made by email Easements@endeavourenergy.com.au .
- Property Branch for matters related to property tenure. Alternatively contact can be made by email network_property@endeavourenergy.com.au (underscore between 'network' and 'property').
- Field Operations Branch for safety advice for building or working near electrical assets in public areas. The site is in the area covered by Penrith Field Service Centre. Alternatively contact can be made by email Construction.Works@endeavourenergy.com.au .

Should you wish to discuss this matter, or have any questions, please do not hesitate to contact me or the contacts identified above or in Endeavour Energy's previous submission in relation to the various matters. Due to the high number of development application / planning proposal notifications submitted to Endeavour Energy, to ensure a response contact by email to property.development@endeavourenergy.com.au is preferred.

Yours faithfully

Cornelis Duba | Development Application Specialist

Endeavour Energy respectfully acknowledges the Traditional Custodians on whose lands we live, work, and operate and their Elders past and present.

Site Plan from Endeavour Energy's G/Net Master Facility Model

Please note the location, extent and type of any electricity infrastructure, boundaries etc. shown on the plan is indicative only. In addition it must be recognised that the electricity network is constantly extended, augmented and modified and there is a delay from the completion and commissioning of these works until their capture in the model. Easements benefitting Endeavour Energy are indicated by red hatching. Generally (depending on the scale and/or features selected), low voltage (normally not exceeding 1,000 volts) is indicated by blue lines and high voltage (normally exceeding 1,000 volts but for Endeavour Energy's network not exceeding 132,000 volts / 132 kV) by red lines (these lines can appear as solid or dashed and where there are multiple lines / cables only the higher voltage may be shown). This plan only shows the Endeavour Energy network and does not show electricity infrastructure belonging to other authorities or customers owned electrical equipment beyond the customer connection point / point of supply to the property. This plan does not constitute the provision of information on underground electricity power lines by network operators under Part 5E 'Protection of underground electricity power lines' of the *Electricity Supply Act 1995* (NSW).
