## Report Reading Guide

The scope of this CPTED review is to document the crime statistics pertinent to the proposed development at 896 Woodville Rd, Villawood, analyse these statistics to identify areas of concern and conduct a CPTED review based on site architectural drawings.

### EXECUTIVE SUMMARY

1.0	INTRODUCTION
2.0	DISCLAIMER AND LIMITATIONS
3.0	METHODOLOGY
4.0	CONDUCT OF THE REVIEW
5.0	PROJECT APPRECIATION
6.0	STATISTICAL ANALYSIS
7.0	CPTED ANALYSIS
8.0	CRIME MAPS AND ANALYSIS
9.0	CONCLUSIONS
Annex A	CPTED MARK-UP OF ARCHITECTURAL PLANS
Annex B	NSW POLICE CPTED CHECKLIST

The project stakeholders will have varying degrees of involvement in the crime prevention design and implementation process with an interest in different sections. It is recommended that each stakeholder read the entire document, paying particular attention to the sections indicated in Table A.

**Table A – Recommended reading guide table for project stakeholders**

## Executive Summary

A Crime Prevention Through Environmental Design (CPTED) review was undertaken for the proposed Mixed-use Local Centre, which is located on 896 Woodville Rd, Villawood. This review incorporated Australian and international standards, as well as the Safer by Design guidelines developed by the NSW Police. Additionally, key documents such as Fairfield City Wide Development Control Plan 2024 were considered in the development of Lote's CPTED strategy. Adherence to the control measures and recommendations in these documents can help bolster the security posture of this development. The security recommendations contained within this report are marked to the attention of the project design teams and subsequently the operations teams to serve as an ongoing basis to mitigate risks to security.

Lote Consulting has conducted a review of 60-months of crime statical data for the Fairfield City Council LGA, showing some trends warranting attention –including increased prohibited and regulated weapons offences, domestic violence related assault and intimidation, stalking and harassment. This report will highlight the relevant crime categories pertaining to the development in Section 6.1.

A more focused analysis was carried out of the crime statistics for the suburb of Villawood where the site is located, with some categories of crime rates increasing over the last 24 months. The crime rate in Villawood is generally higher than the rates for Fairfield City Council LGA and the average crime rates for NSW. A crime hotspot analysis was carried out to determine the proximity of the site to crime hotspots and the crime category of malicious damage to property, drug offences and non-domestic related assault were flagged for risk mitigation treatments that have been recommended in the mark-up of the architectural plans. Additionally, the site architectural plans were reviewed and assessed against CPTED criteria. It is recommended that these risk treatments are implemented during the construction stage through security design development and subsequently the development of a Total Security Management Plan for the ongoing management of security outcomes.

## 1.0 Introduction

Lote Consulting Pty Ltd was engaged to conduct a Crime Prevention Through Environmental Design (CPTED) assessment of the 896 Woodville Road, Villawood. This is in response to the requirements of the Fairfield City Wide Development Control Plan 2024 for CPTED integration. Additionally, this report will reference the NSW Police's *Safer by Design* methodology. This report seeks to utilise the statistical crime context in conjunction with an evaluation of the site architectural plans to conduct a comprehensive CPTED analysis - using the Safer by Design methodology and CPTED principles.

## 2.0 Disclaimer and Limitations

Nothing contained in this report is intended to be, and nor should it be construed as, the provision of legal advice. The opinions and recommendations contained herein are based on information provided to the reviewer by the architect and other sources during the review. All reasonable attempts have been made to confirm and verify the information thus provided within the time frame allowed for the review. This report has been prepared based on the instructions of the party to whom it is addressed and may not be suitable for other purposes.

## 3.0 Methodology

This report has been prepared in accordance with ISO 22341:2021 – Security and Resilience – Protective Security – Guidelines for Crime Prevention through Environmental Design. It has also been prepared in consideration of the NSW Department of Urban Affairs and Planning publication: 'Crime prevention and the assessment of development applications – Guidelines under Section 4.15 of the Environmental Planning and Assessment Act 1979', 2001.

The Fairfield City Wide Development Control Plan 2024 is also a core document for the development of this report.

### 3.1 Reference Documents

- Fairfield City Wide Development Control Plan 2024
- Villawood Town Centre Development Control Plan 2020
- ISO 22341:2021 – Security and Resilience
- AS/NZS 4282:2019 – Outdoor Lighting Obtrusive Effects
- AS/NZS 1428:2021 – Design for Access and Mobility
- AS/NZS 2208:1996 – Buildings Safety Glazing Materials
- AS/NZS 62676.1.1:2020 – Set Video Surveillance Systems
- AS/NZS 2201.1:2007 – Set Alarm and Electronic Security Systems
- AS/NZS 1680.0-2009 – Interior Lighting – Safe Movement

## 4.0 Conduct of the Review

The review will involve the following steps:

- 1) Review and security mark-up of architectural drawings dated October 2024.

- 2) Crime statistical and 60-month trends analysis.
- 3) Completion of the NSW Police CPTED checklist.
- 4) Assessment of the plans against CPTED criteria.
- 5) Preparation of the draft report.
- 6) Review of report and final release.

## 5.0 Project Appreciation

### 5.1 Building Description

We understand the project involves the development of 896 Woodville Road Villawood, for ABA Pty Ltd. The proposal includes a Mixed-Use Building with 148 units along with ground floor retail spaces as well as residential and commercial parking spaces as shown in Figure 5-1.

Figure 5-1 – Proposed development.

## 5.2 Location

The site is shown by the aerial view in Figure 5-2. The development is a C shaped building with its south-east side having the longest frontage facing Woodville Road sharing common boundaries with the adjacent fuel station.

Figure 5-2 – Aerial view of Proposed Development (Courtesy of Six Maps)

### 5.3 Proximity to Emergency Services

896 Woodville Road, Villawood is near a range of emergency services. This ensures a rapid response in case of any emergencies, as tabulated in Table 5-1.

**Table 5-1 Distance to Emergency Services**

Emergency Services	Distance	Figure
<b>Liverpool</b> Hospital	8.1 km or approximately a 14-minute drive	Figure 5-3
NSW Ambulance Station, <b>Fairfield</b>	2.0 km or approximately a 4-minute drive	Figure 5-4.
<b>Fairfield</b> Police Station	3.7 km or approximately a 7-minute drive	Figure 5-5
Rural Fire Brigade, <b>Chester Hill</b>	2.2 km or approximately a 4-minute drive	Figure 5-6

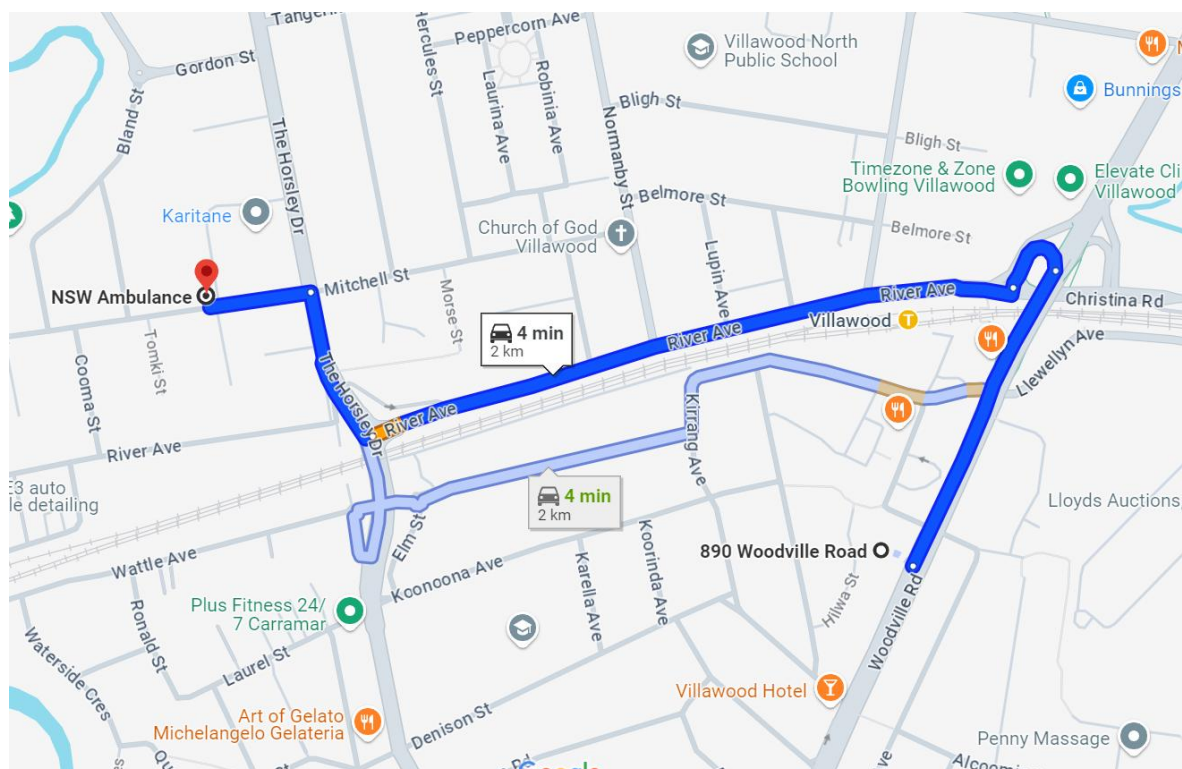

Figure 5-4 Proximity to NSW Ambulance Station Fairfield and Approximate Drive Time (courtesy of Google Maps).

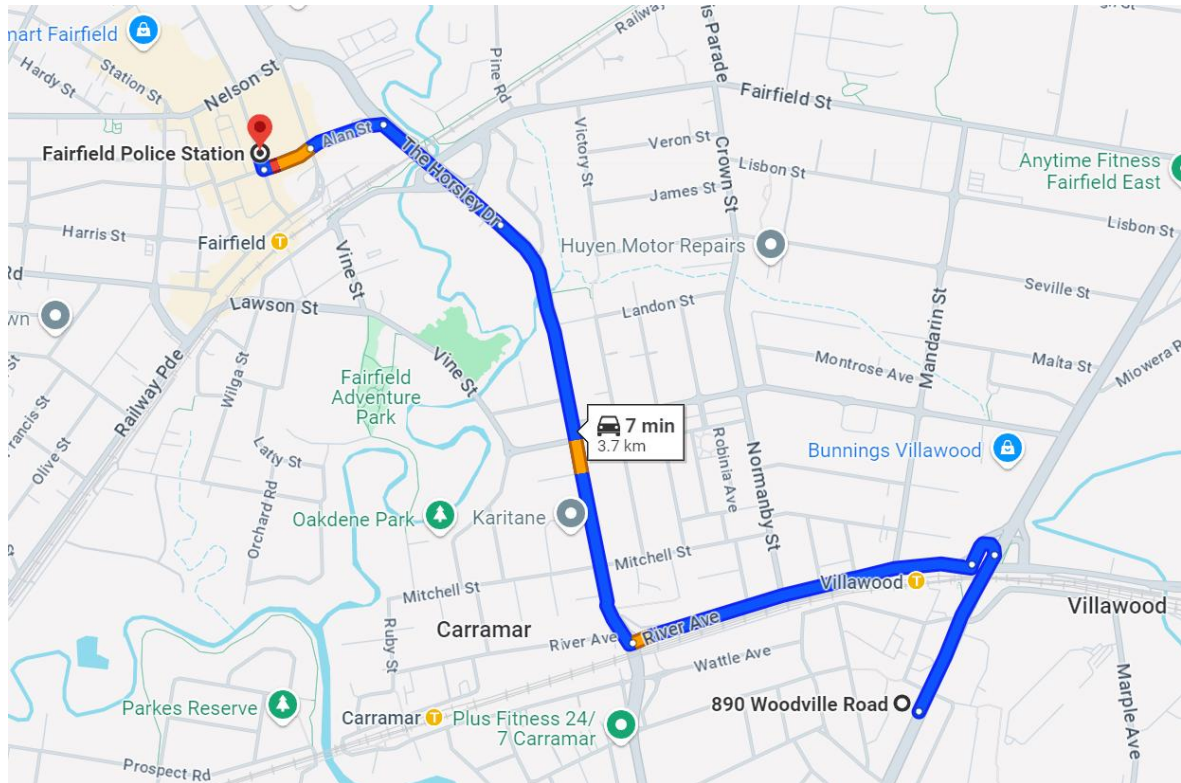

Figure 5-5 Proximity to Fairfield Police Station and Approximate Drive Time (courtesy of Google Maps)

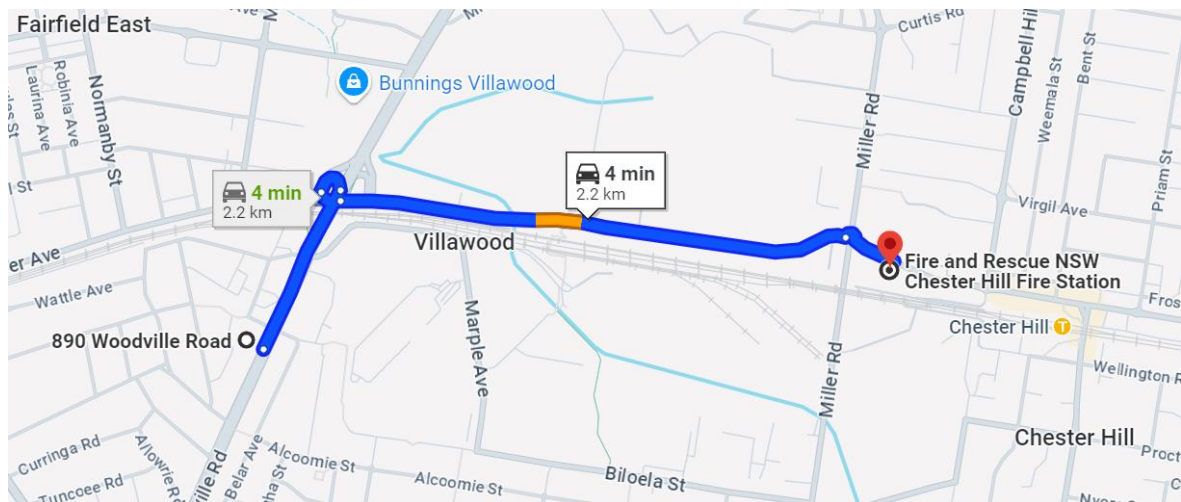

Figure 5-6 Proximity to Fire and Rescue NSW Chester Hill Fire Station and Approximate Drive Time (courtesy of Google Maps)

## 6.0 Statistical Analysis

Villawood is a suburb west of Sydney and is part of the Fairfield City Council LGA with a population of 7,051. According to the 2021 Census date, the median age of the population is 34 years with an approximate even distribution across the genders and a median weekly family income of \$1,230 (ABS, 2021 Census).

### 6.1 Fairfield City Council Crime Statistics

Looking into 60-months of crime statistics in the Fairfield City Council LGA, tabulated in Table 6-2, there are three crime trends warranting attention, including non-domestic assault related incidents, malicious damage to property incidents and drug offences. The rates of crimes in the Fairfield LGA such as robbery and stealing from motor vehicles are stable compared to other LGAs.

### 6.2 Villawood Crime Statistics

- Villawood experiences a rate of 745.6 per 100,000 population for non-domestic assault incidents on par with NSW (427.9 per 100,000 population), indicating a higher assault rate when compared to other NSW suburbs.
- Villawood experiences more theft incidents (3629.7 per 100,000 population) compared to NSW (2366.8 per 100,000 population).
- Villawood experiences slightly higher arson incidents (56.3 per 100,000 population) compared to NSW (56.1 per 100,000 population), suggesting a relatively similar risk of arson-related crimes in Villawood.

The rate of malicious damage to property incidents in Villawood, at 970.7 per 100,000 people, surpasses the NSW average of 611.6 per 100,000 people, highlighting a greater frequency of such incidents in Villawood.

Between January 2022 and December 2023, Villawood experienced a trespass rate of 168.8 per 100,000 residents, which exceeds the NSW average rate of 152.4 per 100,000 residents. This indicates a relatively higher frequency of trespass crimes in Villawood.

It is important to recognise that trends in crime statistics do not necessarily indicate actual risk levels. While some data may reflect a decline in crime rates over a year, the frequency of such incidents can still be substantially high, and thus warrant mitigation measures.

### 6.3 Crime Hotspot Analysis

Further, specific analysis was conducted on the various crime categories in Villawood in relation to its geography. This is presented in Section 7 Crime Maps and Crime Hotspot Maps.

Table 6-1 - Villawood Crime Trends

Crime type	NSW Rate per 100,000 population, January 2022 to December 2023	Villawood Rate per 100,000 population, January 2022 to December 2023	Number of Incidents
<b>Non-domestic assault incidents</b>	427.9	745.6	53
<b>Intimidation, stalking, harassment</b>	582.4	970.7	69
<b>Robbery</b>	24.5	98.5	7
<b>Homicide</b>	1.2	0.0	0
<b>Sexual offences</b>	226.7	436.1	31
<b>Theft incidents</b>	2366.8	3629.7	258
<b>Malicious damage to property incidents</b>	611.6	970.7	69
<b>Drug offences incidents</b>	489.3	1814.9	129
<b>Prohibited and Regulated Weapons Offences</b>	183.9	197.0	14
<b>Arson</b>	56.1	56.3	4
<b>Trespass</b>	152.4	168.8	12

### 6.4 Villawood Crime Maps, Hotspots and Charts

Please note that Crime Maps, Hotspots and Charts for Villawood should be considered when appreciating the preceding statistics and the CPTED Analysis to follow. It is recommended that these are examined prior to viewing the CPTED Analysis below. They can be found in Section 7 of this report.

## 6.5 NSW Recorded Crime Statistics 2019-2023

Fairfield City Council Local Government Area: Number of recorded incidents and rate per 100,000 population; 24 and 60-month trend.

Resist or hinder officer	141	66.6	117	56.0	115	55.6	146	70.6	99	47.9	-32.2%	-4.9%
Other offences against justice procedures	31	14.6	45	21.5	21	10.2	24	11.6	31	15.0	Stable	nc**
Transport regulatory offences	3,138	1,481.8	2,237	1,070.0	1,421	687.1	1,569	758.7	1,194	577.3	Stable	-10.2%
Other offences	425	200.7	561	268.3	2,988	1,444.8	294	142.2	209	101.1	-28.9%	Stable

^ For murder and manslaughter, the data are counts of recorded victims, not criminal incidents.

^^ The trend test used was a two-tailed Kendall's rank-order correlation test with a 0.05 level of significance.

For the 24-month trend the annual percentage change is provided if the trend was significant.

For the 60-month trend the average annual percentage change is provided if the trend was significant.

\* Ranks and rates are only calculated for Local Government Areas (LGAs) with populations of 3000 people or more (n = 120).

Sydney LGA is excluded from the rankings because the resident population does not reflect the number of people present each day.

Ranks and rates are not calculated for the 'In Custody' category

Rates are only calculated for the major offences. Ranks are not calculated for murder due to the low number of recorded victims per LGA.

The robbery and sex offence categories are combined because the numbers are too small within the individual categories to calculate reliable rate estimates.

\*\* Trend information is not calculated (nc) if at least one 12-month period in the selected timeframe had less than 20 incidents.

Source: NSW Bureau of Crime Statistics and Research

**Red** highlighted statistics indicate rising crime trends or high incidents of crime occurrence.

**Green** highlighted statistics indicate declining crime trends.

## 7.0 Crime Maps and Crime Hotspot Maps

This section illustrates the crime maps and crime hotspot maps, along with graphs comparing certain crime trends to the rates in NSW. The categories are tabulated below:

Crime type	Link to Figure	Crime Maps and Comparison Graphs

## 8.0 CPTED Analysis

Crime Prevention Through Environmental Design incorporates eight essential principles aimed at reducing crime opportunities. These principles are divided into two categories. The "First Generation" principles focus on designing the physical structure of environments to deter crime. The "Second Generation" principles concentrate on enhancing community and social measures to secure environments. Both categories are illustrated in Figure 8-1.

The following is an assessment of the site at 896 Woodville Road, Villawood, against criteria identified within the CPTED guidelines. In addition to the completion of the CPTED Markup in Annex A, the NSW Police CPTED Checklist 2018 was completed, as shown in Annex B.

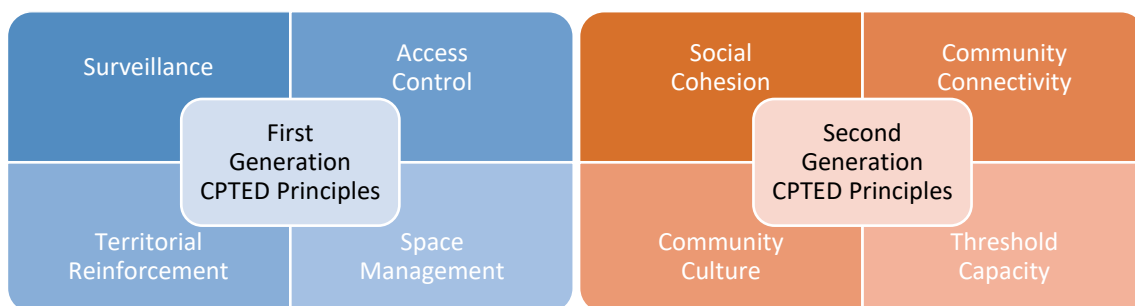

Figure 8-1 – CPTED Principles

### 8.1 Natural Surveillance

#### 8.1.1 *Blind Corners*

CPTED principles require that the design eliminate any entrapment opportunity by ensuring no hidden spaces, recesses or voids exist that could provide a person with the ability to conceal themselves or others from general view. There are many blind spots on site that have been identified in the markup of the architectural plans shown in Annex A; these locations include:

- Staircases
- Corners of buildings
- Lift lobbies
- Fire exits
- Some areas of the basement- around the lifts and fire stairs

These locations and other areas such as common areas including the common open space, retail spaces and car parks are recommended to be covered by effective lighting and video surveillance where reliable natural surveillance opportunities cannot be produced.

#### 8.1.2 *Site and Building Layout*

The site has two-street frontages on Woodville Road and Howatt Street, which have good passive surveillance opportunities. Many sightlines within the building and open spaces are blocked due to

the surrounding buildings as well as the fuel station in front of the development. It is recommended that security lighting and surveillance cameras are added, as marked up in Annex A.

#### **8.1.3 Public Access**

Given the nature of the mixed-use development, it is recommended that site access to the upper level of the development is limited to only the residents and their authorised visitors, shown in the markup in Annex A. However, access control systems such as card readers should be utilised to ensure that residents are only allowed to access common areas, the car park and their specific floor. The opened retail spaces are to be unlocked during operational hours to be accessed by owners and customers. During off hours all spaces are to be locked using keys given to the retail owner. Emergency service parking for emergency personnel shall be available in the basement.

#### **8.1.4 Common Areas**

Common areas in this mixed-use development include the carpark, corridors and common open space. Adequate lighting and CCTV is necessary in these areas due to the limited passive surveillance and the presence of recesses that create opportunities for ambush. Additionally, wayfinding signage should be utilised to help guide residents through common areas.

#### **8.1.5 Entrances**

There are three pedestrian entrances to the mixed-use flat building and two vehicle entry point into the common basement. All entrances are recessed well within the building with minimal passive surveillance and creating ambush zones. It is recommended that vandal resistance video surveillance and security lighting is provisioned, as per the mark-up in Annex A, to mitigate this risk. Additionally, adequate signage and wayfinding, which is sufficiently lit at night-time is required. There should be clear wayfinding signage and map at the entrance of the facility and all entry points. All entry and exit points should have video surveillance and adequate security.

#### **8.1.6 Landscaping**

It is recommended that all vegetation that impedes sight lines or can be used as climbing aids is assessed and replaced with plants that in their mature form do not impede sightlines nor serve as climbing aids. Landscaping should not allow anyone to hide within it. It is recommended to use harsh landscaping in certain areas of the building to deter access. Landscaping utilised within common areas of the building should also be maintained and not exceed sightlines to allow for passive surveillance in and out of units nearby.

#### **8.1.7 Lighting**

Effective lighting is a key element of the CPTED strategy and for the effective operation of the video surveillance cameras. Design is to be undertaken to ensure effective lighting, in line with AS 4282, of the building façade, entrances and exits signage, building approach vectors, and vehicle entry points, car park area and the inside of the facility. Each unit should have effective lighting. Common areas such as corridors and the car park must be adequately lit during day and night. Security lighting is recommended in the car park, around the perimeter and at all entry points as shown in the mark-up in Annex A. Additionally, motion sensor-based vandal proof lighting is recommended for the inside of the premises, in line with AS 1680. Light switches, circuit breakers and distributions boards for all

lights must be in a secure area within the premises. Moreover, a safe pedestrian walkway must be clearly marked with pedestrian level lighting. Lighting must consider vegetation, in its current and mature form, as well as any other element that may have the potential for blocking light. Lighting to comply with the lighting plan shall comply with relevant Australian Standards with attention to the transition to poorly lit areas such as the car park, where additional lighting poles may need to be employed to effectively light the area as noted in the CPTED Markup in Annex A. Emphasis must be placed on the uniformity of lighting and where video surveillance is employed, to aid its performance through white light illumination or infra-red illumination, as required.

## **8.2 Access Control**

### **8.2.1 Landscaping**

Landscaping is utilised at the front and sides of the building as well as in the common open space. The landscaping is effective in deterring access to the building facade and serves to control access, demarcating the public space from the private residential space.

### **8.2.2 Security**

Site security measures such as signage are recommended to achieve a level of separation between the mixed-use development and retail facilities. Vandal proof lighting and video surveillance is recommended for the car park areas. Additional security measures including video surveillance, access control are recommended for the multi-purpose development. Emergency personnel should have access to the building in cases of an emergency.

Access into common areas should have a general lock to prevent access. Only residents on a specific floor should have access to the corridor leading to apartments on that floor. Reed switches should be installed on fire doors to allow the door status to be monitored and alarms to be raised when door are left opened for too long or used in non-emergency purposes. Stakeholders such as residents, residential visitors, building management and trades people should be the only people to have access into the upper levels of units. Anyone should be able to access the retail spaces during staffed hours.

All garages in the basement must have individual locks that the unit owner has access to. The garage facility must have floor to ceiling wall. The contents inside each individual unit's garage must not be visible from the outside. The main roller door must be secured with an electronic access system. All residents must be supplied with additional storage facilities so that items are not left in common areas.

Garbage bays must be locked to restrict unauthorised entry. Access must not be restricted by large garbage bins or other objects.

It is further recommended that the power distribution boards and mains power to the site are located within locked rooms or cabinets fitted with a lock set approved by the local authority. Access to mechanical and electrical utility rooms shall be restricted to authorised personnel as approved by the local authority. Additionally, the letter box must be fitted with an appropriate lock set and kept locked. The letter box collection facility must be enclosed in the foyer window of the property or in a locked foyer with access for Australia Post via swipe card stored in Safe Cylinder Storage.

It is recommended that the security system should comprise video surveillance with a minimum of 14 days of storage, electronic access control, intruder alarm system, and its purpose is to effectively manage and monitor entry to and activity on the site. Dummy cameras should not be utilised at the building.

### **8.2.3 Doors**

All external door hinges must be mounted so they cannot be removed. External doors and framed must be of solid construction. The doors must be fitted with quality lock sets to restrict access when not in use. In this mixed-use development, these locks must be fitted in storerooms to prevent unauthorised people from entering. Peep holes must be installed on the front door of every unit as noted in the markup in Annex A.

### **8.2.4 Windows**

All external windows must be solidly constructed. All windows must be fitted with quality lock sets. All unused windows must be permanently closed & secured.

## **8.3 Territorial Reinforcement**

### **8.3.1 Entrances**

Entrances should be celebrated and have lighting, video surveillance and signage that reinforces ownership of the site and conveys a secure entry point to its users and would-be vandals or criminals near the location. Therefore, the entry and exit gates must be adequately lit at all times.

### **8.3.2 Signage**

The recommended signage should be appropriately lit to ensure day and night-time legibility. It is also recommended that wayfinding signage directs vehicle and pedestrian traffic and the driveway to the appropriate entrance. These are required both at street level as within the basement car parks. Additionally, the street number must be clearly visible from the road, and adequately lit so that it is visible at night. Car park restrictions should also be clearly visible, as indicated in Annex A. Each unit number must be visible from outside the unit. Appropriate warning signage should also be utilised around necessary locations such as near roller door.

### **8.3.3 Perimeters**

The perimeter of the site has been designed to reinforce ownership and jurisdiction of the site as opposed to the general footpath and road. At present, the use of features such as landscaping is effective at demarcating this ownership and separation of the mixed-use development from public spaces. Landscaping must be maintained allowing for passive surveillance.

### **8.3.4 Design Elements**

Clearly defining transitions and boundaries between public and private spaces. The retail customer car park has been separated from the residential car park through the use of a boom-gate. While this may prevent a vehicle from entering this area, it does not prevent pedestrians from freely entering the residential car park. A security roller door is recommended instead. This has been effectively achieved through the current architectural plans.

Clearly defining the use of spaces, with particular attention to the pedestrian walkway in between and around the building. Clear signage restricting entry and use of the car park should be stipulated. Please refer to Annex A for additional notes in this regard. Common areas such as garbage areas should be appropriately separated from the private unit's garage and storage space.

## **8.4 Space Management**

### **8.4.1 Maintenance**

Create a "cared for" image. Ensure that landscaping is well maintained, to give an impression of ownership, care, and security in an ongoing manner. This can be provided for by creating a Total Security Management Plan (TSMP) that can be handed over to the Centre Management at the appropriate time.

Provisions to be specifically addressed in the Total Security Management Plan include:

- 1) All exit doors must be free from obstructions and/or rubbish.
- 2) The locks must be in good working order.
- 3) All high-risk doors must be locked at all times.
- 4) The access control system must be regularly purged to remove any old owners from the database.
- 5) The landscaping is regularly cared for and pruned to ensure that it does not impede sightlines.
- 6) Lighting around the premises should be regularly checked and replaced as required.
- 7) Walk-throughs of the premises should be regularly carried out to identify any left objects.
- 8) Gutters must be kept clean.

It may be prudent to treat the site with anti-graffiti paint at certain key locations to deter graffiti offenders targeting the building and to institute a policy of rapid graffiti removal as part of the TSMP. This will preserve the building and increase a sense of maintenance and ownership of the site.

### **8.4.2 Materials**

Use materials which reduce the opportunity for vandalism. Consider using strong, wear resistant laminate, impervious glazed ceramics, treated masonry products, stainless steel materials, anti-graffiti paints, and clear over sprays to reduce opportunities for vandalism. Avoid flat or porous finishes in areas where graffiti is likely to be a problem. Where large walls are unavoidable, consider the use of barriers and/or apply anti-graffiti treatment. There are not many large walls exposed to the street front. Methods to counter graffiti vandalism of property include: the context and susceptibility of the property, the design, selection, and use of construction materials that are resistant to graffiti, and surface protection. Rapid graffiti removal policies and the use of anti-graffiti coatings to prevent penetration into the substrate to facilitate the ease of removal of graffiti have been identified as the most effective means of combating graffiti. The graffiti resistance of exposed surfaces is a function of its susceptibility to penetration by the marking agent (e.g. aerosol spray paints) and its sensitivity to damage during cleaning. Hard, non-porous, impermeable, and smooth surfaces generally have a good graffiti resistance and cleanability. Permeable or porous surfaces are difficult to clean. Similarly, rough, and heavily textured surfaces also pose cleaning difficulties. Resistant substrates such as hand glazed ceramic tiles, glass, polished stone, hard glazed brick, and metals are recommended in high-

risk areas. Protective anti-graffiti coatings are recommended where construction materials with lower graffiti resistant substrates are utilised such as concrete, sandstone, limestone, normal brick, timber, cement render and painted surfaces. These surfaces are difficult to clean, and repeated chemical and wet-abrasive blasting damages the surfaces and leaves unsightly markings.

Anti-graffiti coatings are recommended to be applied to exposed surfaces that utilise lower graffiti resistant substrates. These coatings facilitate subsequent graffiti removal. They act as a barrier between the graffiti marking agent and the substrate preventing penetration into pores and firm attachment of the markings to the surface. These coatings are available in both clear and pigmented coatings applied in two or more coats with some available with a priming sealer. Anti-graffiti coatings are either permanent long-life coatings that provide protective layer that can withstand repeated cleaning or temporary or sacrificial layer that gets partially or fully removed during cleaning.

Floors, walls, and ceilings must be constructed of solid materials.

Useful standards include AS 1580.408.5 (Adhesion), AS 1580.602.3 (Boller Test), AS 1627.1 (Cleaning), AS 1627.4 (Abrasive Blast Cleaning), AS 2311 (Painting of Buildings), AS 2700 (Standard Colours), and Australian Paint Approval Scheme (APAS) Specifications APAS 1441 (Permanent Graffiti Barrier), APAS 1442 (Temporary Graffiti Barrier and APAS 1443 (Graffiti Remover).

#### **8.4.3 Bollards**

The use of bollards as a tool for space management helps define pedestrian and vehicular zones, as well as public and private zones. Effective use of bollards prevents accidental or purposeful harm to pedestrians from vehicles. The markup in Annex A shows an effective use of bollards to create a safe pedestrian path and to protect pedestrians from errant vehicles.

Bollards should be spaced at 1.6 metre centres. This should prevent most cars sold in Australia from driving between them. They should be approximately 1 metre in height and include a reflective panel. The space between a bollard and building should allow for pedestrian movement (including people with disabilities). Bollards are prone to vandalism and to unauthorised removal particularly if there is an ardent desire for vehicle access to a location. They should have sufficient foundation strength to resist being pushed by a large 4x4 vehicle. Bollards should conform to AS/NZS 3845:2015.

It should be noted that the use of vehicle-rated landscaping (such as planters and concrete spheres) can be used instead of bollards, allowing architects to produce their safety benefits and encourage Territorial Reinforcement without damaging the site's aesthetics.

#### **8.4.4 Ongoing Action**

Even the most robust security strategy requires frequent action to upkeep. Maintenance and ongoing security actions should be governed by a set schedule with responsible parties and accountability in-built. A Security Risk Register should work in conjunction with ongoing management of the site and appropriate security responses should be generated based on the type of events that are recorded as issues. It is recommended that all communications, custodial and management staff for the buildings should undergo police checks before being allowed to work on-site. This must be followed by security inductions and training to ensure they are aware of the upkeep of security at the site, both in terms of how security measures work and how they are to upkeep security operationally.

## 8.5 Activity Support

Maximising the safety and security of the proposed storage facility can also benefit from more intangible approaches to supporting the space. Second Generation 'Social' principles of CPTED can and should be explored here to encourage an environment that is safer through the development of a community, centred on the site.

### 8.5.1 *Social Cohesion*

Social cohesion involves nurturing an environment where there exists a mutual respect and appreciation of the similarities and differences between people and groups within a community. A socially cohesive community values diversity shares a common vision and a sense of belonging and works to develop positive relationships between people from different backgrounds.

### 8.5.2 *Community Connectivity*

Community connectivity involves partnerships within the community. These can be formal and informal, with businesses, community organisations and other potential user groups included. This connectivity can help to encourage and maintain community self-policing by encouraging a broader range of parties to value the site and its wellbeing, maintenance and upkeep, freedom from crime, and so on.

### 8.5.3 *Community Culture*

This is present when users and user groups come together and share a sense of place and partly explains why they can display territoriality. Building a community culture around significant events and people builds community investment and appreciation. Individuals who value the spaces in their community are naturally less likely to commit crimes which damage or degrade these spaces and will also feel as though they have dedicated areas to engage and participate – a lack of which can also contribute to criminal intent.

### 8.5.4 *Threshold Capacity*

Threshold capacity relates to neighbourhoods as ecosystems with a finite carrying capacity for certain activities and land uses. This threshold capacity is recognised and managed to maintain the local community ecosystem by promoting human-scale and pedestrian-oriented land uses and activities. By appropriately managing and curating the use of spaces for certain activities, site management can determine which kind of community engagement is important.

### 8.5.5 *Community Guardianship*

As alluded to in Section 8.5.2, the goal of this is to establish a community of individuals and groups who feel appreciated and engaged with the site and the activities which regularly occur there.

### 8.5.6 *Developing a Management Strategy – Community Guardianship*

Space and Activity Management strategies are an important way to develop and maintain natural community control. Space management involves the formal supervision, control, and care of these spaces. All space, even well-planned and well-designed, needs to be effectively used and maintained to maximise community safety. Places that are infrequently used are commonly abused. There is a high correlation between urban decay, fear of crime and avoidance behaviour. Developing

Community Guardianship ensures that community members will fight this decay and become more likely to not only commit less crime, but also stand up to those committing any. Therefore, we would strongly encourage site management to develop an operational management plan for fostering community guardianship. Importantly, appreciation of the space and a feeling of security will promote usage and drive business.

## **8.6 Site hardening**

### **8.6.1 Errant Vehicles**

Bollards and other landscaping measures can be utilised to control vehicle approach speed and paths in a manner that minimises the capacity to cause damage. The use of bollards is standard practice for pedestrian and vehicular shared zones such as near lift lobbies in the basement carpark; increasing the efficacy of bollards to higher impact standards and covering a wider area with this is recommended. Vehicle rated planters may also be used to ensure the aesthetic profile of the site is unaffected.

### **8.6.2 Emergency Management Planning**

In addition to static security measures, site hardening relies on a critical human factor in order to be truly effective. Knowing how to act and what to do in the event of an emergency is a vital component that can save lives. A suitable emergency management plan is recommended to be developed for the site.

## **8.7 Graffiti Management Plan**

### **8.7.1 Graffiti Deterrent**

Graffiti vandalism can be minimised by using anti-graffiti material on the building, windows and fencing as outlines in Section 8.4.2. Harsh landscaping surrounding the building can help deter vandalism by preventing vandals from approaching the sides of the building. Additional security measures such as security lighting and cameras can be used as a deterrent.

Graffiti vandalism can be minimised through a comprehensive approach integrating anti-graffiti materials, strategic landscaping, and security measures. Utilising anti-graffiti materials on building, windows, and fencing, as outlined in Section 8.4.2, facilitates easy paint removal. Strategic landscaping, particularly the implementation of harsh vegetation, serves as a natural barrier, physically deterring vandals from accessing building sides. Additional security measures, such as security lighting and cameras, illuminate potential blind corners. Regular maintenance and review of these strategies ensure their continued effectiveness and responsiveness to changing graffiti vandalism patterns.

### **8.7.2 Graffiti Removal**

In the event of graffiti vandalism, all stakeholders must notify management. The relevant authorities should promptly remove the damages and create an incident register log with information on location and magnitude of vandalism. All graffiti must be removed within 48 hours of discovery. An annual review of any "management agreement" for the removal of graffiti to ensure the property is maintained at its optimum level can be undertaken. Landscaping should be maintained to minimise the potential of graffiti attacks. Refer to Table **8-1** for relevant activities.

Table 8-1 Graffiti Management activities

Activity	Description	Frequency
Graffiti Monitoring	Regular patrols to identify new graffiti.	Daily
Graffiti Reporting	Documenting instances of graffiti, including photographs and location details.	As needed
Graffiti Removal	Using appropriate methods to remove graffiti without damaging surfaces.	Within 48 hours of reporting
Preventive Measures	Installation of anti-graffiti coatings, surveillance cameras, or improved lighting as outlined in Section 8.2.1, 0 and 8.4.2.	As needed
Law Enforcement Liaison	Working with local law enforcement to report and track graffiti incidents.	As needed

## 9.0 Conclusions

A Crime Statistical Review and Crime Prevention Through Environmental Design (CPTED) review was conducted for 896 Woodville Road, Villawood. The mixed-use development is in a residential area with passive surveillance opportunities.

It is recommended that adequate security lighting, video surveillance and access control methods are implemented to the necessary areas outlined throughout this report and in Annex A. A specific focus was placed on blind spots and the lack of effective security surveillance in these areas.

Recommendations for electronic access control and better surveillance using CCTV and security lighting were made for the waste storage and collection room. Wayfinding signage is a major recommendation for the site, to help residents, retail owners, retail staff, and visitors to effectively navigate the site, and has been included in the markup in Annex A.

Security recommendations were made to help reduce the risk of malicious damage to property, specifically graffiti damage. As per DA requirements, graffiti mitigation was highlighted in section 8.0 of this report in the form of anti-graffiti material and security measures like security lighting and CCTV coverage.

FAIRFIELD CITY DCP  
(Residential Flat Buildings and Shop Top Housing Parking Rate):  
1 space per dwelling = 148  
1 visitor space per 4 dwellings = 37  
Retail & Cafe = 61  
**247 PARKING SPACES IN TOTAL REQUIRED**

PROPOSED PARKING **257 PARKING SPACES**  
incl. 60 Retail Parking Spaces  
1 Accessible Retail Parking Spaces  
36 Visitor Parking Spaces  
1 Accessible Visitor Parking Spaces  
144 Residential Parking Spaces  
15 Accessible Residential Parking Spaces  
1 Residential Car Wash Bay

Use of bollards to create a safe pedestrian path and to protect pedestrians from errant vehicles. Bollards should be spaced at 1.6 metre centres. This should prevent most cars sold in Australia from driving between them.  
They should be approximately 1 metre in height and include a reflective panel. The space between a bollard and building should allow for pedestrian movement (including people with disabilities).

Bollards should be used to segregated vehicle traffic from areas where pedestrians are likely to congregate

Car park will use light colours and appropriate motion-activated lighting will ensure adequate illumination.

Hidden areas should be covered by video surveillance and have security lighting

Lift lobbies should be protected from accidental or malicious vehicle damage and monitored with video surveillance and vandal proof security lighting.

Video surveillance within the lift lobby and the lift car is necessary.

Wayfinding signage is recommended in all lift lobbies providing directions and specifying what areas each lift provides access to.

Lift access control systems to limit access to residential parking and residential floors

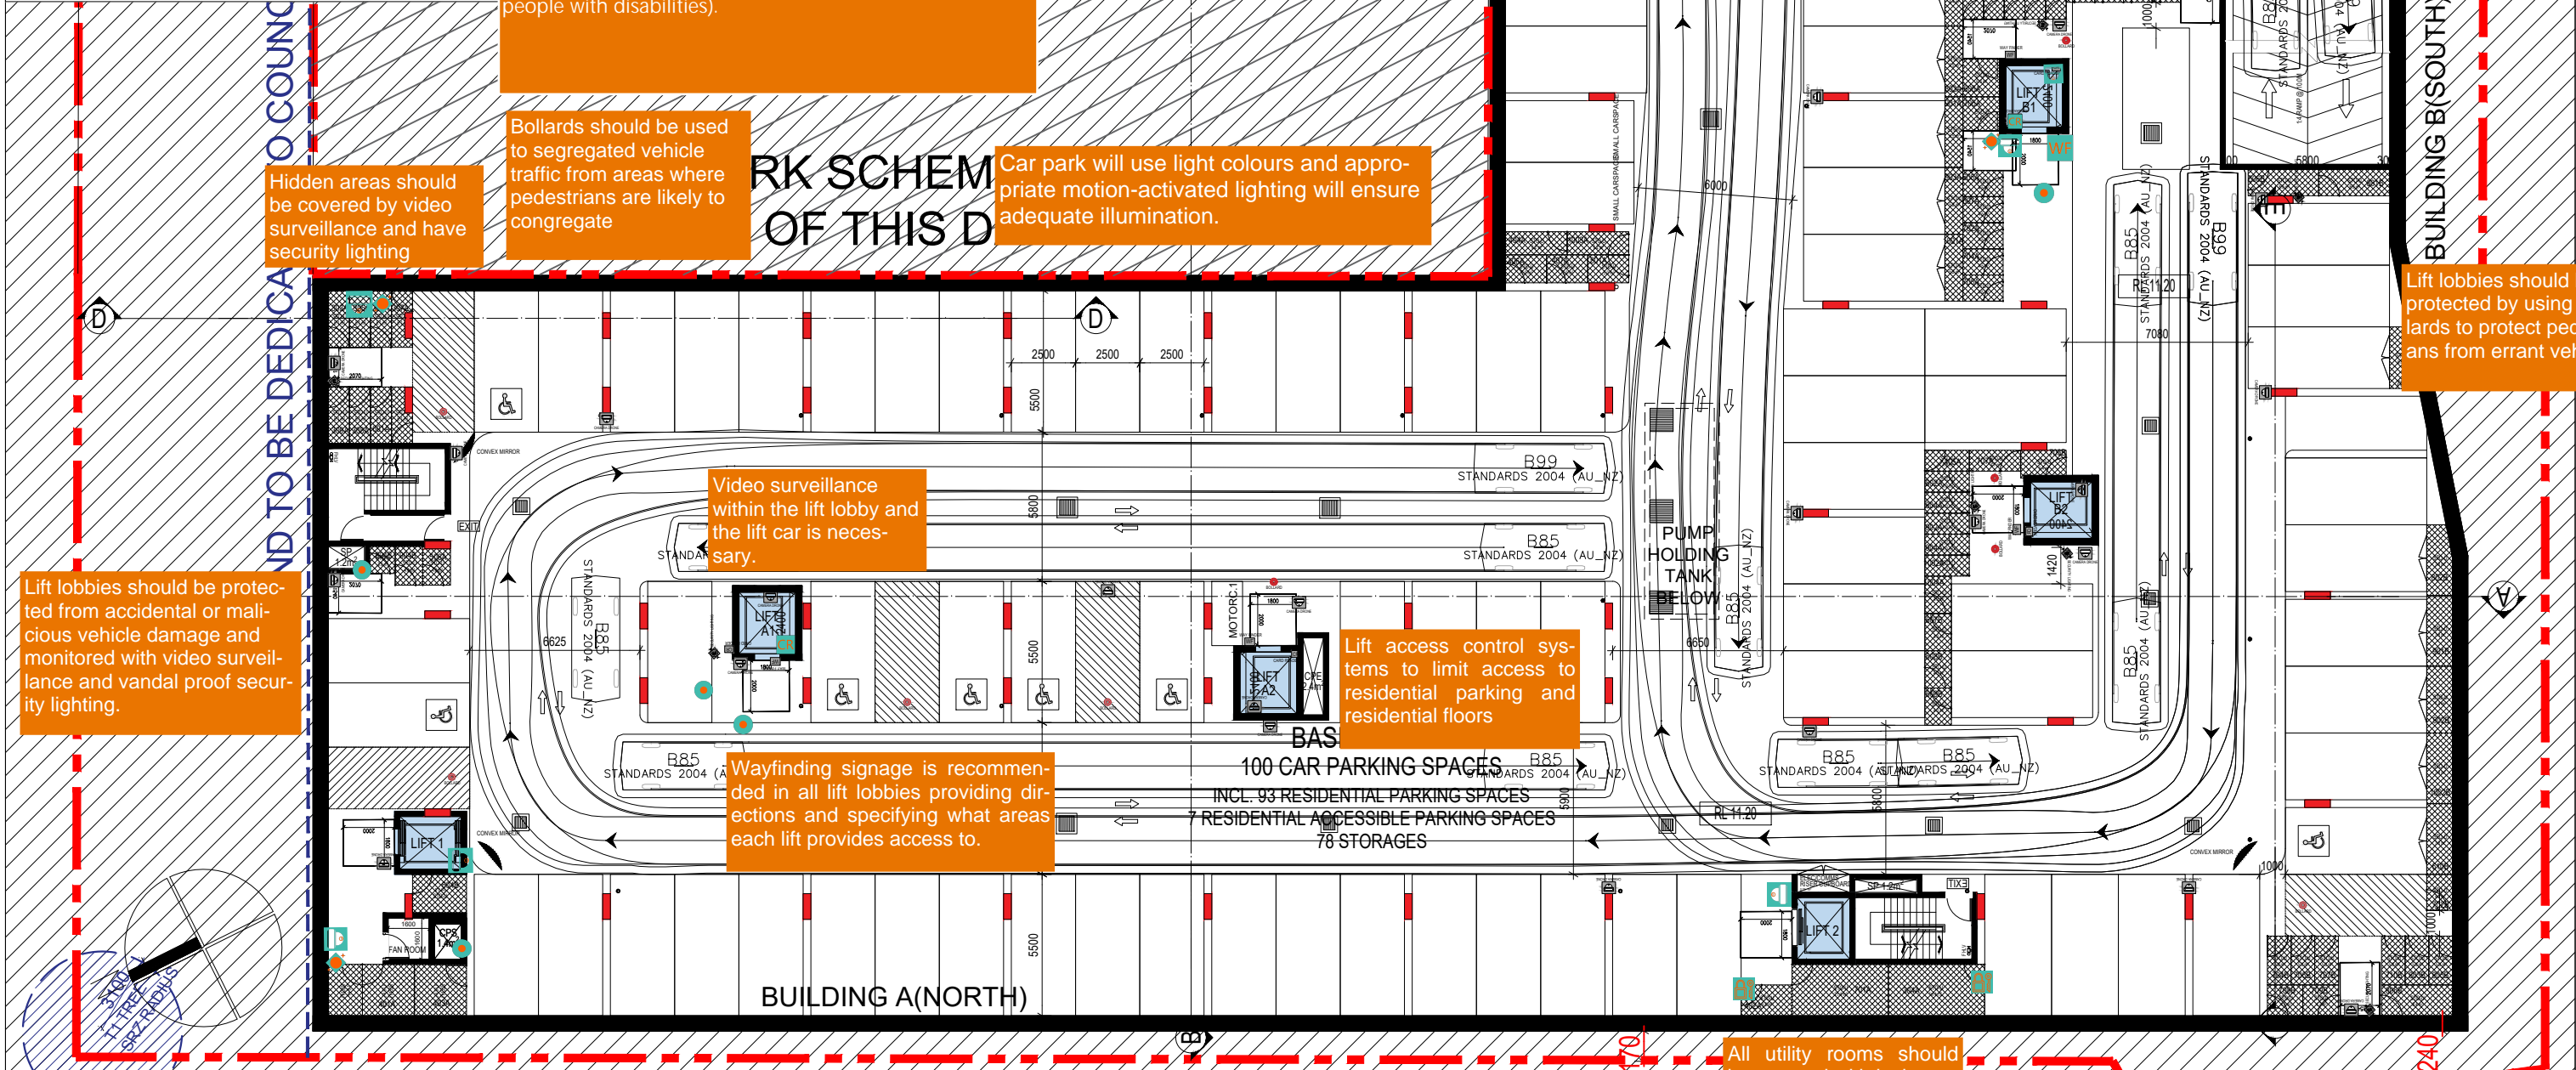

All utility rooms should be secured with locks

Video surveillance coverage of the basement car park area is recommended.

Oncoming vehicle alarm to ensure vehicular safety

Mirrors to be used to create sight lines around corners

Lift lobbies should be protected by using bollards to protect pedestrians from errant vehicles

**BENCHMARK SCHEME**  
Car park will use light colours and appropriate motion-activated lighting will provide adequate illumination.

Car park will use light colours and appropriate motion-activated lighting will ensure adequate illumination.

Include timer based lighting and/or motion sensor lighting systems

Video surveillance within the lift lobby and the lift car is necessary.

Lift access control systems to limit access to residential parking and residential floors

Wayfinding signage is recommended in all lift lobbies providing directions and specifying what areas each lift provides access to.

95 CAR PARKING SPACES  
INCL. 36 VISITOR PARKING SPACES  
1 VISITOR ACCESSIBLE PARKING SPACES  
50 RESIDENTIAL PARKING SPACES  
8 RESIDENTIAL ACCESSIBLE PARKING SPACES  
1 RESIDENTIAL CAR WASH BAY  
73 STORAGES

Ensure the inclusion of safe parking and pedestrian-aware signage in the car park to reduce the likelihood of accidents.

Lift lobbies should be protected by using bollards to protect pedestrians from errant vehicles

Use of bollards to create a safe pedestrian path and to protect pedestrians from errant vehicles. Bollards should be spaced at 1.6 metre centres. This should prevent most cars sold in Australia from driving between them.

They should be approximately 1 metre in height and include a reflective panel. The space between a bollard and building should allow for pedestrian movement (including people with disabilities).

Instead of using a boom gate, a roller shutter is recommended as a more effective means of separating the retail section of the car park from the residential section.

All retail spaces are to be locked by owners during off hours.

Video surveillance is recommended for fire exits discharging externally.

Security lighting must be installed and operating. The entry and exit points must be adequately lit. Lighting must be positioned in a way to reduce opportunities for vandalism. The lighting must be sufficient to support images obtained from CCTV footage.

Video intercom to be installed at main entrance in order for guests to gain access into the building and keypad access to be used by residents.

The letter box collection facility must be enclosed in the foyer window of the property or in a locked foyer with access for Australia Post via swipe card stored in Safe Cylinder Storage.

**SIGNAGE**  
There must be directional signage located at the entry to the estate/complex clearly indicating location of estate managers office, building names and unit numbers.

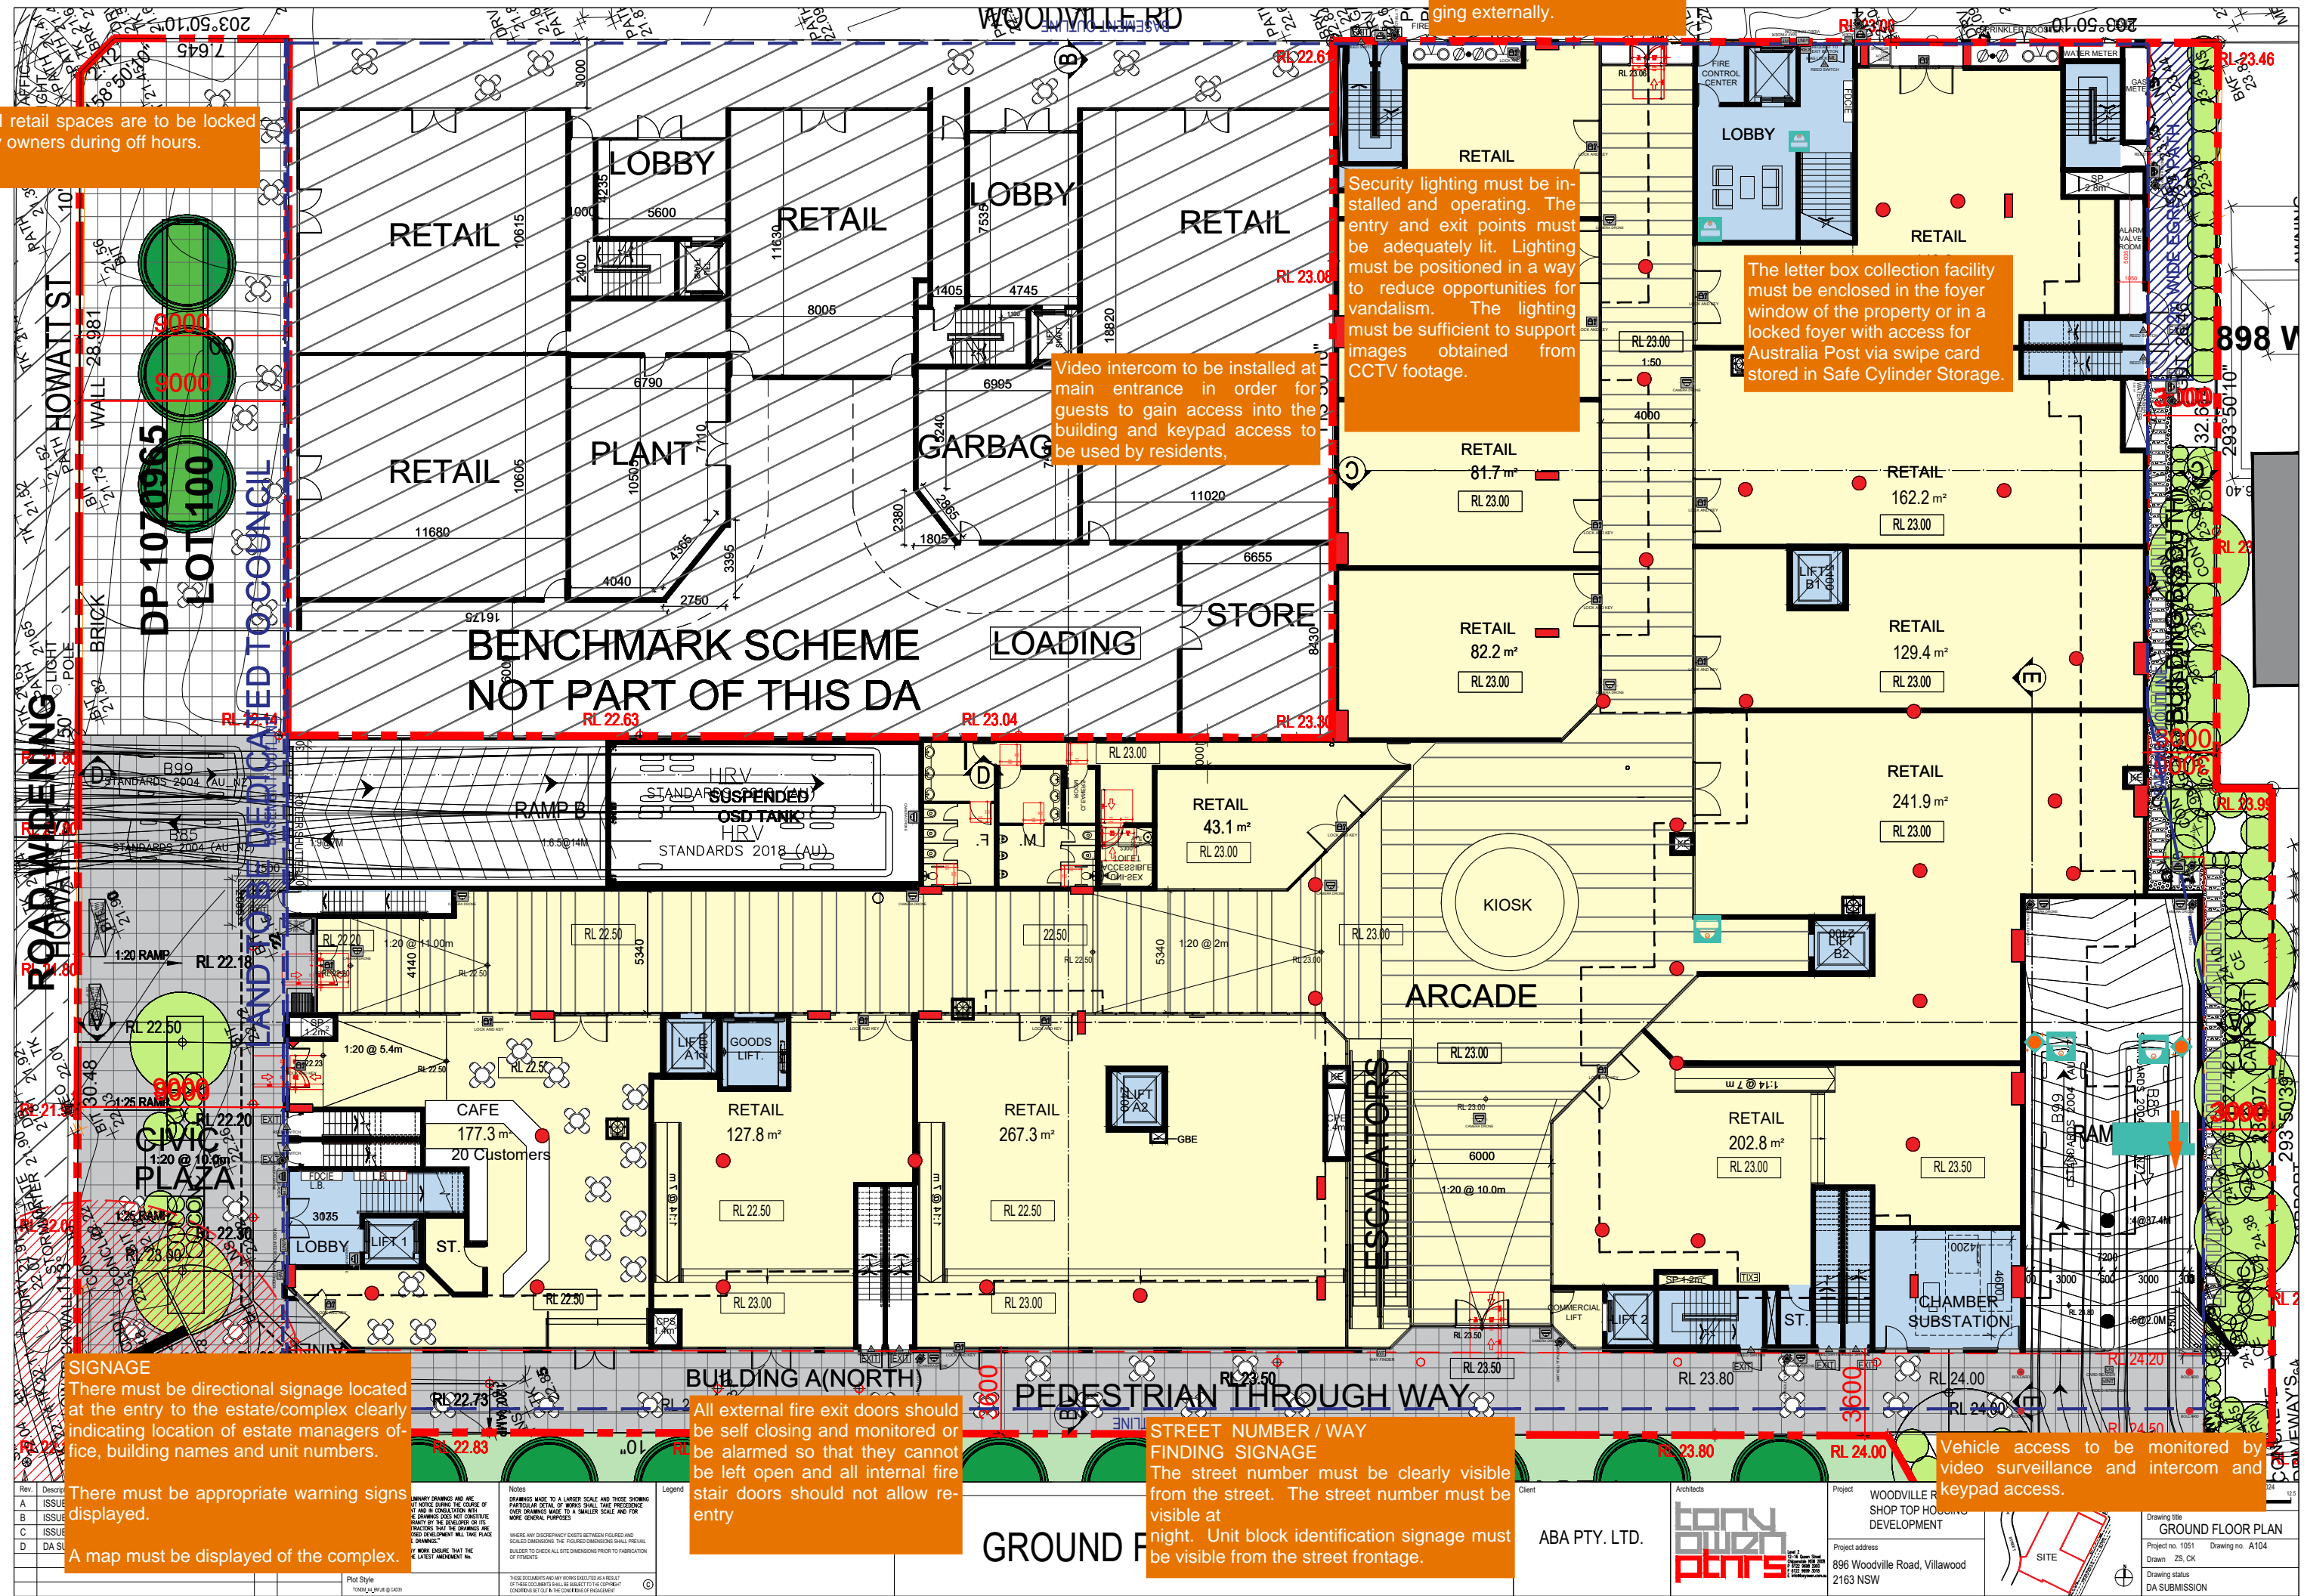

There must be appropriate warning signs displayed.

A map must be displayed of the complex.

All external fire exit doors should be self closing and monitored or be alarmed so that they cannot be left open and all internal fire stair doors should not allow re-entry

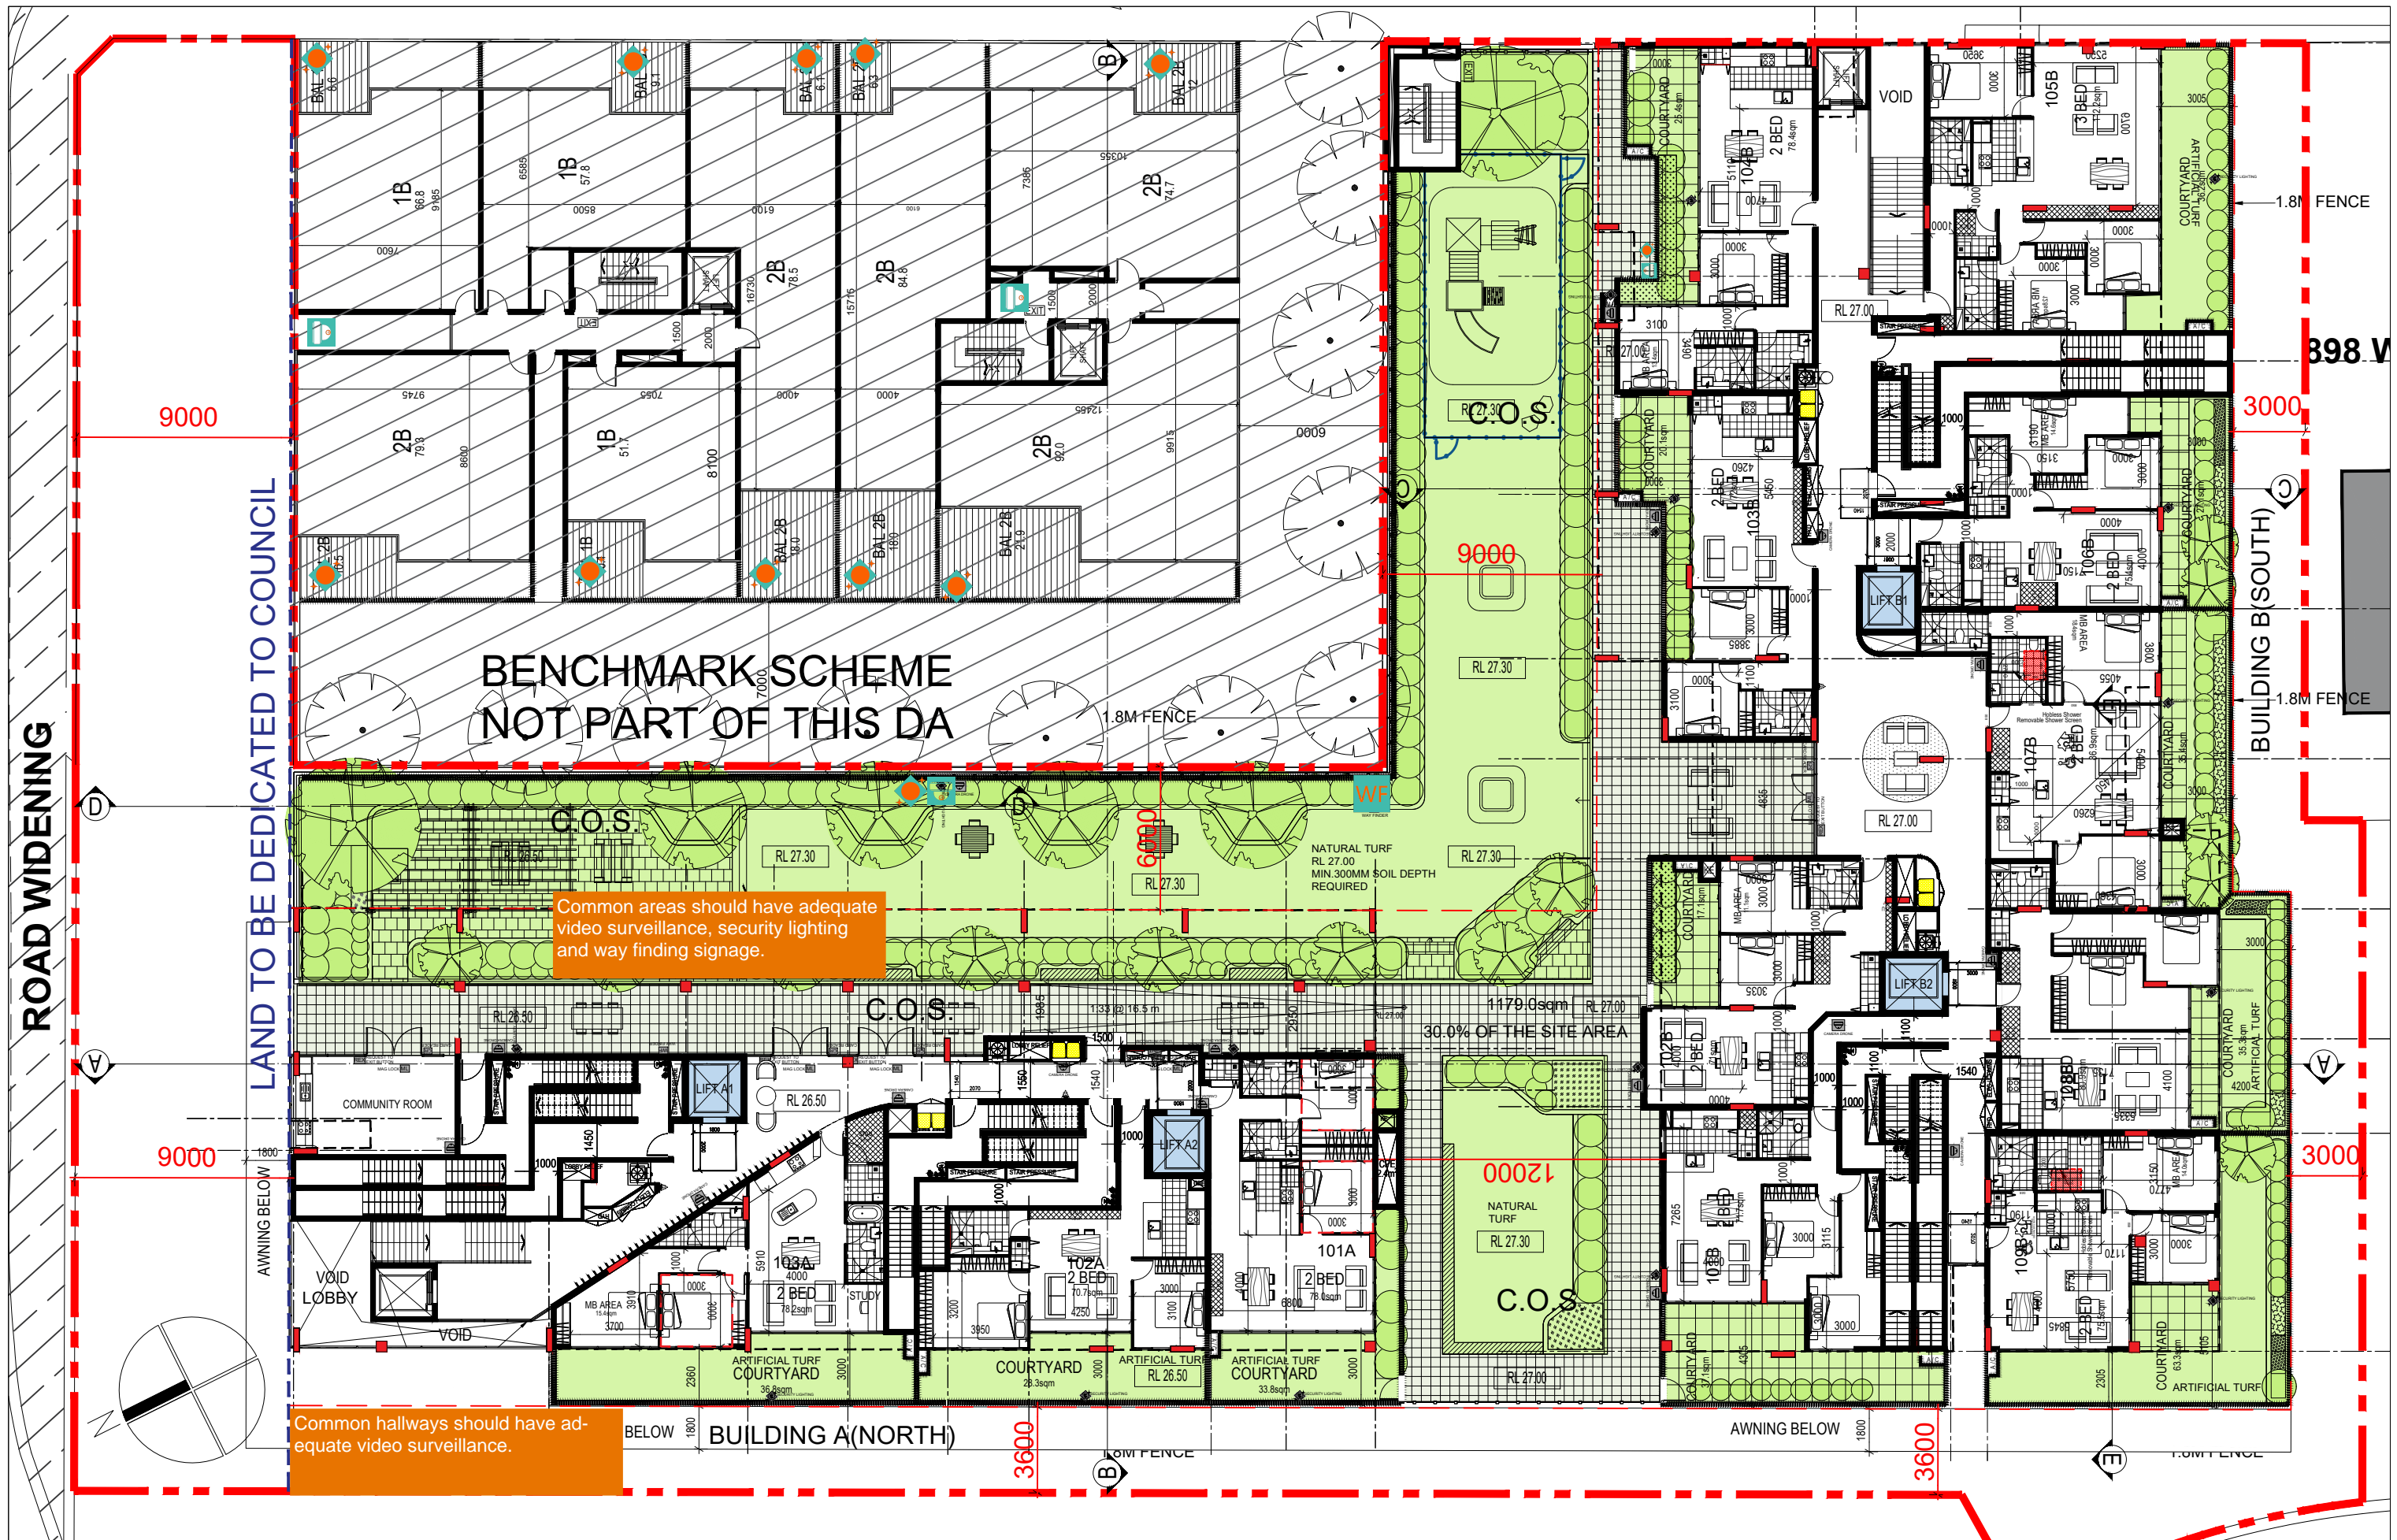

**STREET NUMBER / WAY FINDING SIGNAGE**  
The street number must be clearly visible from the street. The street number must be visible at night. Unit block identification signage must be visible from the street frontage.

Vehicle access to be monitored by video surveillance and intercom and keypad access.

Architectural elevation drawing of a building facade, showing levels from Level 1 to Level 10, with corresponding Reduced Levels (RL) and height controls. The drawing includes a ground line, a natural ground line, and a height control line at 35.1m. The building is situated on a street corner with Hilwa Street and Woodville Road. The drawing also shows a 'NATURAL GROUND LINE' and a 'LEVEL 1' line at 27.00m. The drawing is a technical architectural elevation with various labels and dimensions.

[illegible]

## Crime Prevention through Environmental Design Requirements

CPTED MEASURES	RECOMMENDATIONS	PLEASE NOTE * If this form is not completed correctly with an accompanying Safer By Design Report, the NSW Police will resubmit the application back to Council for completion.
ENGAGE SECURITY CONSULTANT	With all developments it is advantageous to engage a Security Consultant with qualifications in Crime Prevention through Environmental Design (CPTED). This consultant will be qualified to compile a Safer by Design Report that is required by Police.	The measures that must be in the Safer By Design Report are listed in column 1.  ALL DETAILS MUST BE COMPLETED AND PAGE AND PARAGRAPH REFERENCE ARE TO BE LISTED BELOW.
1. STREET NUMBER / WAY FINDING SIGNAGE	1.1 The street number must be clearly visible from the street. 1.2 The street number must be visible at night. 1.3 Unit block identification signage must be visible from the street frontage.	1.1 Section 8.3.2, Annex A 1.2 Section 8.3.2, Annex A 1.3 Section 8.3.2, Annex A
2. SIGNAGE	2.1 There must be directional signage located at the entry to the estate/complex clearly indicating location of estate managers office, building names and unit numbers. 2.2 There must be appropriate warning signs displayed. 2.3 A map must be displayed of the complex.	2.1 Section 8.3.2, Annex A 2.2 Section 8.3.2, Annex A 2.3 Annex A
3. BUILDING DESIGN	3.1 The orientation of buildings must allow for easy natural surveillance between the street, neighbouring property and the buildings. 3.2 The floors, walls and ceilings must be of solid construction. 3.3 There must be adequate steps taken to ensure that persons cannot utilise the design of the premises to climb structures from the outside. 3.4 Entry/exit points to the estate and/ or buildings been limited. 3.5 At entry/exit points there must be electronic entry for example keypad or swipe card entry. 3.6 Alcoves or recesses must be monitored by CCTV. 3.7 Garbage bays must be locked to restrict unauthorised entry.	3.1 Section 8.1.2 3.2 Section 8.2.4, Section 8.4.2 3.3 Section 8.1.6, Annex A 3.4 Section 8.1.5, Annex A 3.5 Section 8.1.5, 8.2.2, Annex A 3.6 Section 8.1.1, Annex A 3.7 Section 8.2.2, Annex A

	<p>3.8 There must be a 'Rapid Removal' policy for graffiti.</p> <p>3.9 There must be graffiti resistant materials utilised in the design of the building. For example, painted on masonry garden walls, fencing.</p>	<p>3.8 Section 8.4.1, 8.4.3, Section 8.4.2, Annex A</p> <p>3.9 Section 8.4.2</p>
<b>4. FENCES AND GATES</b>	<p>4.0 There must be perimeter fences erected around the property.</p> <p>4.1 Access must not be restricted by large garbage bins or other objects.</p> <p>4.2 Fences and gates must be fitted with locks.</p> <p>4.3 Fences must be constructed of appropriate materials that cannot be cut through.</p> <p>4.4 If the estate complex is a gated complex local Ambulance, Fire Brigade and Police must have keys/swipe cards etc for access in an emergency. Please explain safe or cylinder system to store keys/swipe cards.</p> 	<p>4.0 n/a.</p> <p>4.1 Section 8.2.2 and 8.4.1.</p> <p>4.2 n/a.</p> <p>4.3 n/a.</p> <p>4.4 Section 8.2.2</p>
<b>5. LANDSCAPING</b>	<p>5.0 People must be able to see your unit/premises clearly from the street.</p> <p>5.1 Landscaping must be regularly maintained. Please explain maintenance plan in report.</p> <p>5.2 No person should be able to conceal themselves behind vegetation or gardens.</p>	<p>5.0 Section 8.1.6, Annex A</p> <p>5.1 Section 8.4.1 and 8.1.6</p> <p>5.2 Section 8.1.6</p>
<b>6. SECURITY LIGHTING</b>	<p>6.0 Security lighting must be installed and operating.</p> <p>6.1 The entry and exit points must be adequately lit.</p> <p>6.2 Lighting must be positioned in a way to reduce opportunities for vandalism.</p> <p>6.3 The lighting must be sufficient to support images obtained from CCTV footage.</p> <p>6.4 Light switches for all lights must be located in a secure area within the premises.</p> <p>6.5 There must be light timers.</p>	<p>6.0 Section 8.1.7, 8.4.1, Annex A</p> <p>6.1 Section 8.1.5, Annex A</p> <p>6.2 Section 8.1.7, Annex A.</p> <p>6.3 Section 8.1.7, Annex A</p> <p>6.4 Section 8.1.7, 8.2.2</p> <p>6.5 Section 8.1.7, Annex A</p>

<p><b>7. POWER BOARD &amp; LETTERBOX</b></p>	<p>7.0 The power board must be enclosed in a cabinet or room.</p> <p>7.1 The cabinet or room must be fitted with a lock set approved by the local authority.</p> <p>7.2 The letter box must be fitted with an appropriate lock set and kept locked.</p>  <p><b><i>This is a strongly recommended method on how to secure the letter box system in a unit complex</i></b></p> <p>7.3 The letter box collection facility must be enclosed in the foyer window of the property or in a locked foyer with access for Australia Post via swipe card stored in Safe Cylinder Storage.</p>  <p>Safe Storage Cylinder</p>	<p>7.0 8.2.2, Annex A</p> <p>7.1 8.2.2, Annex A</p> <p>7.2 8.2.2, Annex A</p> <p>7.3 8.2.2, Annex A</p>
<p><b>8. BASEMENT CAR PARKING FACILITIES</b></p>	<p>8.0 The garage facilities must be individual lockable garage facilities.</p> <p>8.1 The garage 'tilta' door must have a bolt lock installed.</p> <p>8.2 The garage facility must have floor to ceiling wall. For example, strong welded mesh or masonry walls.</p> <p>8.3 The garage ceiling and walls must be painted white or a light-coloured concrete must be used. This will enhance the light in the basement.</p> <p>8.4 The contents inside the garage facility must not be able to be visible from the outside.</p> <p>8.5 The garage facilities must have CCTV coverage.</p> <p>8.6 The garage facility area must be restricted to non-residents by way of security gates.</p>	<p>8.0 Section 8.2.2</p> <p>8.1 Section 8.2.2</p> <p>8.2 Section 8.2.2, Annex A</p> <p>8.3 Annex A</p> <p>8.4 Section 8.2.2</p> <p>8.5 Section 8.1.4</p> <p>8.6 Section 8.2.2</p>

<b>9. BALCONY</b>	<p>9.0 The balcony must be designed so as not to act as a natural ladder.</p> <p>9.1 The balcony must be adequately designed so as not to allow hand and foot holds to potential offenders trying to scale up the outside of the building.</p> <p>9.2 The railings must be designed so that foot or hand grips cannot be used by offenders.</p> <p>9.3 The balcony must have a sensor light to automatically activate when motion is detected.</p> <p>9.4 Sliding doors and windows adjacent to balconies must be re-enforced with adequate locks etc to restrict unauthorised access.</p>	<p>9.0 Section 8.2.3, Annex A</p> <p>9.1 Section 8.2.3</p> <p>9.2 Section 8.2.3</p> <p>9.3 Section 8.1.8, Annex A</p> <p>9.4 Section 8.2.3</p>
<b>10. DOORS AND FIRE EXITS</b>	<p>10.0 The external doors and frames must be of solid construction.</p> <p>10.1 The doors must be fitted with quality lock sets to restrict access when not in use.</p> <p>10.2 The locks must be in good working order.</p> <p>10.3 A peep hole (door viewer) must be installed.</p> <p>10.4 An Australian standard security/screen door must be installed on the front door or any glass sliding doors.</p> <p>10.5 Sliding Security balcony screen doors are recommended form ground to 3<sup>rd</sup> Floor unit complexes.</p> <p>10.6 Balconies are to be designed with anti-climb features.</p> <p>10.7 Sliding doors must be fitted with a suitable lock set.</p> <p>10.8 Entry/exit points must be clearly identified by signage.</p> <p>10.9 All fire exit doors must be self-closing.</p> <p>10.10 All external door hinges must be mounted so they cannot be removed.</p>	<p>10.0 Section 8.2.3.</p> <p>10.1 Section 8.2.3</p> <p>10.2 Section 8.4.1</p> <p>10.3 Section 8.2.3</p> <p>10.4 n/a.</p> <p>10.5 Section 8.2.3</p> <p>10.6 Section 8.2.3, Annex A.</p> <p>10.7 Section 8.2.3</p> <p>10.8 Annex A</p> <p>10.9 Section 8.2.2</p> <p>10.10 Section 8.2.3.</p>
<b>11. WINDOWS</b>	<p>11.0 All external windows must be solidly constructed.</p> <p>11.1 All windows must be fitted with quality lock sets.</p> <p>11.2 All unused windows must be permanently closed &amp; secured.</p> <p>11.3 Windows must be able to be locked in a partially open position. For example, with a bolt lock.</p> <p>11.4 Skylights must be suitably secured.</p>	<p>11.0 Section 8.2.4</p> <p>11.1 Section 8.2.4</p> <p>11.2 Section 8.2.4</p> <p>11.3 n/a</p> <p>11.4 Section 8.2.4</p>

<b>12. CARPARKING FACILITIES AT GRADE AND BASEMENT LEVEL</b>	<p>12.1 There must be security car parking facilities available at grade level and basement level.</p> <p>12.2 The access to residential car park must be restricted to residents only. This must be done by roller shutter or boom gate at grade level car parks. Keypad, swipe card or remote systems must be used.</p> <p>12.3 'Park Smarter' signage must be displayed within this area to warn motorists to secure their vehicle and property.</p> <p>12.4 CCTV system must be installed and monitor inside all car park facilities.</p> <p>12.5 All residents must be supplied with additional storage facilities so that items are not left in areas where they can be seen or easily removed.</p> <p>12.6 The car park must be well lit.</p> <p>12.7 The ceiling of the car park must be painted white.</p> <p>12.8 Bicycle racks must be positioned in visible areas from the street.</p> <p>12.9 Emergency Services parking should be provided in a large unit complex.</p>	<p>12.1 Annex A</p> <p>12.2 Section 8.2.2</p> <p>12.3 Annex A.</p> <p>12.4 Annex A, Section 8.2.2</p> <p>12.5 Section 8.2.2</p> <p>12.6 Annex A, Section 8.1.7 12.7 Car park will use light colours and appropriate motion-activated lighting will ensure adequate illumination. Annex A</p> <p>12.8 n/a 12.9 Section 8.1.3</p>
<b>13. SURVEILLANCE SYSTEM</b>	<p>13.0 CCTV systems must be installed at vehicle entry points.</p> <p>13.1 CCTV systems must be installed at all foyer entry points.</p> <p>13.2 CCTV systems must be installed on the perimeter of the building.</p> <p>13.3 CCTV systems must be installed near to letter box collection facilities.</p> <p>13.4 CCTV systems must be installed near to waste facilities.</p> <p>13.5 CCTV systems must be installed near to fire exits.</p> <p>13.6 Footage must be recorded appropriately.</p> <p>13.7 Footage must be kept for a minimum of 14 days.</p> <p>13.8 The property must be free of dummy cameras.</p> <p>13.9 The cameras must be placed in suitable locations to positively identify an individual from recorded images.</p>	<p>13.0 Annex A</p> <p>13.1 Annex A</p> <p>13.2 Annex A</p> <p>13.3 Annex A</p> <p>13.4 Annex A</p> <p>13.5 Annex A</p> <p>13.6 Annex A</p> <p>13.7 Section 8.2.2</p> <p>13.8 Section 8.2.2</p> <p>13.9 Annex A</p>

<b>14. FIRE SAFETY</b>	<p>14.1 Smoke detectors must be installed within foyer areas, garages and in the unit complex to comply with the Building Code of Australia?</p> <p>14.2 Gutters must be kept clean.</p> <p>14.3 The unit complex must have a site plan displayed in a prominent position.</p> <p>14.4 Waste bins must be stored in a secure place after hours.</p>	<p>14.1 Action for BCA Consultant and/or Fire Safety Engineer</p> <p>14.2 8.4.1</p> <p>14.3 Annex A</p> <p>14.4 Annex A, 8.2.2</p>
<b>15. CONSTRUCTION STAGE</b>	<p>15.1 During Construction Stage all tools and building materials must be stored in strong rooms with tamper proof security systems.</p> <p>15.2 Construction sites should be fenced with appropriate security fencing.</p> <p>15.3 Security Guards should be used during high risk times.</p> <p>15.4 CCTV should be used during construction stage.</p> <p>15.5 Lighting should be installed on the grounds of the construction site.</p> <p>15.6 Lighting should be installed near to containers/storage facilities.</p>	<p>15.1 Action for Project Team</p> <p>15.2 Action for Project Team</p> <p>15.3 Action for Project Team</p> <p>15.4 Action for Project Team</p> <p>15.5 Action for Project Team</p> <p>15.6 Action for Project Team</p>
<b>16. ROOF TOP</b>	<p>16.1 The retaining walls/fencing/ barriers adequate to prevent accidental falls/ slips/suicide attempts.</p> <p>16.2 There must be protocols in place to monitor and regulate the times in which the roof common areas can be used by residents (to minimise noise and antisocial issues).</p> <p>16.3 CCTV should be installed in these areas.</p>	<p>16.1 Annex A.</p> <p>16.2 Annex A.</p> <p>16.3 Annex A.</p>
<b>17. EMERGENCY MANAGEMENT</b>	<p>17.1 An Emergency Management/ Evacuation Plan must be developed for the building prior to occupation and forwarded to local Police Area Commands.</p>	<p>17.1 Action for Project Team.</p>
<b>18. NSW POLICE INSPECTION PRIOR TO OCCUPATION STAGE.</b>	<p>18.1 Police recommend that there must be an inspection with a Town Planner and the Building Manager prior to Occupancy Certificate Stage.</p>	<p>18.1 Action for Project Team.</p>
