

Recommended Conditions of Consent

1.0 - General Conditions of Consent

The following conditions of consent are general conditions applying to the development.

- (1) **Approved Plans and Documents** - Development shall be carried out in accordance with the following plans and documents, and all recommendations made therein, except where amended by the conditions of this development consent:

Plan Reference/ Drawing No.	Name of Plan	Prepared by	Date
AD-DA2001 Issue B	Site Plan	Scott Carver	6 May 2020
AD-DA2100 Issue B	Basement 2 Plan	Scott Carver	6 May 2020
AD-DA2101 Issue B	Basement 1 Plan	Scott Carver	6 May 2020
AD-DA2102 Issue B	Ground Floor Plan	Scott Carver	6 May 2020
AD-DA2103 Issue B	Level 1 Podium Plan	Scott Carver	6 May 2020
AD-DA2105 Issue B	Roof Plan	Scott Carver	6 May 2020
AD-DA2110 Issue B	Floor Plan - Level 1	Scott Carver	6 May 2020
AD-DA2111 Issue B	Floor Plans – Building 2	Scott Carver	6 May 2020
AD-DA2200 Issue B	Site Elevations Sheet 1	Scott Carver	6 May 2020
AD-DA2201 Issue B	Site Elevations Sheet 2	Scott Carver	6 May 2020
AD-DA2202 Issue B	North Elevation Main Street	Scott Carver	6 May 2020
AD-DA2203 Issue B	East Elevation Central Avenue	Scott Carver	6 May 2020
AD-DA2204 Issue B	South Elevation Peter Brock Drive	Scott Carver	6 May 2020
AD-DA2205 Issue B	West Elevation – Section Sheet 1	Scott Carver	6 May 2020
AD-DA2206 Issue B	Section Sheet 2	Scott Carver	6 May 2020
AD-DA2207 Issue B	Section Sheet 3	Scott Carver	6 May 2020

Document Title	Prepared by	Date
Acoustic Assessment Stage 2 Oran Park	Acoustic Logic	14 August 2018
Water Management Report Podium Stage 2 Oran Park Town Centre	INSYNC Services	4 October 2018
BASIX Certificate No. 858674M_03	Cundall	19 May 2020

- (2) **BASIX Certificate** - The applicant shall undertake the development strictly in accordance with the commitments listed in the approved BASIX certificate(s) for the development to which this consent applies.
- (3) **National Construction Code – Building Code of Australia (BCA)** - All building work shall be carried out in accordance with the BCA. In this condition, a reference to the BCA is a reference to that Code as in force on the date the application for the relevant Construction Certificate is made.
- (4) **Home Building Act** - Pursuant to Section 4.17(11) of the *EP&A Act 1979*, residential building work within the meaning of the *Home Building Act 1989* shall not be carried out unless the principal certifier for the development to which the work relates:
- a) in the case of work for which a principal contractor has been appointed:
 - i) has been informed in writing of the name and licence number of the principal contractor; and
 - ii) where required has provided an insurance certificate with the name of the insurer by which the work is insured under Part 6 of that Act.
 - b) in the case of work to be carried out by an owner-builder;
 - i) has been informed in writing of the name of the owner-builder; and
 - ii) if the owner-builder is required to hold an owner-builder permit under that Act; has provided a copy of the owner builder permit.
- (5) **Home Building Act – Insurance** - Building work that involves residential building work within the meaning of the *Home Building Act 1989*, shall not commence until such time as a contract of insurance is in force in accordance with Part 6 of that Act.

This clause does not apply:

- a) to the extent to which an exemption is in force under Clause 187 or 188 of the EP&A Regulation 2000, subject to the terms of any condition or requirement referred to in Clause 187(6) or 188(4) of the EP&A Regulation 2000; or
 - b) to the erection of a temporary building, other than a temporary structure to which subclause (1A) of Clause 98 of the EP&A Regulation 2000 applies.
- (6) **Infrastructure in Road and Footpath Areas** – Infrastructure must not be removed and/or reconstructed without prior written approval from Council. Any costs incurred due to the relocation, restoration or reconstruction of pram ramps, footpath, light poles, kerb inlet pits, service provider pits, street trees or other infrastructure in the street footpath area for the proposed development shall be borne by the applicant, and not Council.

Note. The issue of this development consent does not imply concurrence or approval of any required public infrastructure work associated with the development.

- (7) **Engineering Specifications** - The entire development shall be designed and constructed in accordance with Council's Engineering Specifications.
- (8) **Car parking allocation** - All residential units are to be allocated at least one car parking space in accordance with the Oran Park Precinct Development Control Plan 2007. Adaptable units should be allocated accessible car parking spaces.

- (9) **Prohibition of Burning** - The open burning of waste and other refuse is prohibited throughout the Camden LGA.
- (10) **Reflectivity** - The reflectivity of glass index for all glass used externally shall not exceed 20%.
- (11) **Roof Mounted Equipment** - All roof mounted equipment such as air conditioning units, etc., required to be installed shall be integrated into the overall design of the building or appropriately screened and not appear visually prominent or dominant from any public view.
- (12) **Future Strata Subdivision Requirements** – Any future application for Strata Subdivision of the building approved by this consent shall ensure the following:
- Each unit is to be allocated at least one car parking space under the strata title
 - All visitor car parking spaces shall be shown as common property and must not be allocated to individual units.
 - The residents of all units on the site approved by this consent and DA/2018/1223/1 shall have legal access to the communal open space area above the Podium Level.
- (13) **Waste storage and collection areas** – All waste storage and collection areas shall provide the following:
- Combined Bin Collection Area:
 - must have a smooth graded ground surface;
 - must be protected from inclement weather conditions via a roof;
 - must have a minimum ceiling height of 2.4m;
 - must provide an external water tap adjacent to the storage area;
 - must provide a drain in the bin storage area discharging to a sewer connection.
 - Doors on all waste rooms must be a minimum of 1.8m wide.
- (14) **Safer By Design** - The following safer-by-design features must be incorporated into the approved development:
- a) Store and Electrical Meter Rooms must have doors locked at all times and only accessible by authorised persons.
 - b) A closed circuit television system (CCTV) which complies with the Australian Standard - Closed Circuit Television System (CCIV) AS:4806:2006 must be implemented to receive, hold or process data for the identification of people involved in anti-social or criminal behaviour. This system should consist of surveillance cameras strategically located in and around the development to provide maximum surveillance coverage of the area, particularly in areas which are difficult to supervise including entry and exit points, car parking areas and stairwells.
 - c) Effective lighting must be installed in and around the car parking areas as well as the public / private areas.
 - d) Warning signs must be strategically posted around the buildings to warn intruders of what security treatments have been implemented to reduce opportunities for crime.
 - e) The main access to the residential car park should have restricted access with a security pass. The opening/closing mechanism should be protected from vandalism and tampering. All exit doors from the car park should have striker plates installed to minimise chance of tampering. Other than residents, only

tenants of the associated Commercial Building shall be given a security pass to access this part of the car parking area. All security passes granted to commercial tenants shall be surrendered once future residential buildings are constructed on the site.

- f) Entry into buildings shall use electronic access control equipment to enhance physical security. Intercom facilities should be incorporated into these entry/exit points at the front and back of the dwelling to enable residents to communicate and identify with people prior to admitting them to the premises.

(15) **Graffiti Resistant Materials and Finishes** - Graffiti resistant materials and finishes must be used where possible.

(16) **Shoring and Adequacy of Adjoining Property Works** - If the approved development involves an excavation that extends below the level of the base of the footings of a building, structure or work on adjoining land, the person having the benefit of the consent shall, at the person's own expense:

- a) protect and support the adjoining building, structure or work from possible damage from the excavation; and
- b) where necessary, underpin the building, structure or work to prevent any such damage.

This condition does not apply if the person having the benefit of the consent owns the adjoining land or the owner of the adjoining land has given consent in writing to that condition not applying.

A copy of the written consent must be provided to the principal certifier prior to the excavation commencing.

2.0 - Prior to Issue of a Construction Certificate

The following conditions of consent shall be complied with prior to the issue of a Construction Certificate.

- (1) **Structural Engineer's Details** - The piers/slabs/footings/structural elements shall be designed and certified by a suitably qualified structural engineer and shall take into consideration the recommendations of any geotechnical report applicable to the site. A statement to that effect shall be provided to the accredited certifier.
- (2) **Soil, Erosion, Sediment and Water Management** - An erosion and sediment control plan shall be prepared in accordance with 'Managing Urban Stormwater – Soils and Construction ('the blue book')'. Details demonstrating compliance shall be provided to the certifier with the Construction Certificate application.
- (3) **Works in Road Reserves** - Where any works are proposed in a public road reservation, a Road Opening Permit shall be obtained from Council in accordance with Section 138 of the *Roads Act 1993* prior to works commencing.
- (4) **Long Service Levy** - In accordance with Section 34 of the *Building and Construction Industry Long Service Payments Act 1986*, the applicant shall pay a long service levy at the prescribed rate to either the Long Service Payments Corporation or Council for any building work that cost \$25,000 or more.
- (5) **Garbage Room** - Plans showing the location and details of garbage room(s) and room(s) used for the washing and storage of garbage receptacles shall be provided to

the accredited certifier for approval. Garbage room(s) are to be constructed of solid material and finished as a smooth even surface. Floors are to be impervious, coved, graded and drained to an appropriate floor waste connection. Walls are to be smooth impervious surfaces to ensure no moisture, oils or similar material can soak in. Ventilation, pest proofing and a hose tap must be provided.

- (6) **Performance Bond** - The applicant is to lodge a bond with Council to provide security for works undertaken within the existing public domain in accordance with Council's Development Infrastructure Bonds Policy.

Note. Fees are payable for the lodgement and refund of the bond.

- (7) **Civil Engineering Plans** - Civil engineering plans indicating drainage, roads, accessways, earthworks, pavement design, details of line-marking, traffic management, water quality and quantity facilities including stormwater detention and disposal, shall be prepared in accordance with the approved plans and Council's Engineering Design and Construction Specifications. Details demonstrating compliance shall be provided to the certifier with the Construction Certificate application.

A stormwater plan is to be submitted to the certifier prior to the augmentation of the existing drainage system to accommodate drainage from the approved development and to protect other property to the satisfaction of the certifier.

Note. Under the *Roads Act 1993*, only the Roads Authority can approve commencement of works within an existing road reserve.

- (8) **External Walls and Cladding Flammability** – The external walls of the building, including attachments, must comply with the relevant requirements of the National Construction Code (NCC). Prior to the issue of a Construction Certificate the accredited certifier must:

- a) be satisfied that suitable evidence is provided to demonstrate that the products and systems proposed for use in the construction of external walls, including finishes and claddings such as synthetic or aluminium composite panels, comply with the relevant requirements of the NCC; and
- b) ensure that the documentation relied upon in the approval processes includes an appropriate level of detail to demonstrate compliance with the NCC as proposed.

- (9) **Stormwater Detention and Water Quality** - An on-site detention system and water quality system shall be provided for the site and designed in accordance with Council's Engineering Specifications as approved under DA/2018/1223/1.

Where a Construction Certificate is required by this development consent, a detailed on-site detention and water quality report reflecting the Construction Certificate plans shall be provided to the certifier with the Construction Certificate application.

- (10) **Fibre-Ready Facilities/Telecommunications Infrastructure** – Documentary evidence must be provided to the certifier demonstrating that satisfactory arrangements have been made for:

- a) the installation of fibre-ready facilities to all individual lots and/or premises in a real estate development project so as to enable fibre to be readily connected to any premises that is being or may be constructed on those lots. The carrier

- must confirm in writing that they are satisfied that the fibre-ready facilities are fit for purpose; and
- b) the provision of fixed-line telecommunications infrastructure in the fibre-ready facilities to all individual lots and/or premises in a real estate development project demonstrated through an agreement with a carrier.

This condition does not apply where an applicable exemption exists under Commonwealth law. Documentary evidence of any exemption relied upon must be provided to the certifier.

- (11) **Damages Bond** - The applicant is to lodge a bond with Council to ensure any damage to existing public infrastructure is rectified in accordance with Council's Development Infrastructure Bonds Policy.

Note. A fee is payable for the lodgement of the bond.

- (12) **Special Infrastructure Contribution** - The applicant shall make a special infrastructure contribution (SIC) in accordance with the determination made by the Minister administering the *EP&A Act 1979* under Section 7.23 of that *EP&A Act* and as in force on the date of this consent. This contribution shall be paid to the Department of Planning and Environment (DPE).

Evidence of payment of the SIC shall be provided to Council and the Certifying Authority.

Alternatively, the applicant must obtain written confirmation from DPE that the SIC is not required to be paid for the approved development.

- (13) **Design Verification** - A statement from a qualified Architect, verifying that the plans and specifications achieve or improve the design quality of the development for which development consent was granted, having regard to the design principles set out in Schedule 1 of State Environmental Planning Policy No. 65 – Design Quality of Residential Apartment Development must be submitted to the Certifying Authority's satisfaction.

- (14) **Construction Management Plan** - A construction management plan that includes dust, soil and sediment and traffic management, prepared in accordance with Council's Engineering Design Specification, shall be provided to the principal certifier.

The construction management plan shall show staging plans or similar that show how car parking access and egress and pedestrian access is maintained. This must include maintenance of the existing pedestrian access or creation of an alternative direct pedestrian access from The Oran Park Library through Perich Park to the existing Oran Park Podium Shopping Centre and Oran Park Drive beyond.

- (15) **Hoarding Application** – If necessary, a hoarding application for the erection of a class A (fence type) or class B (overhead type) hoarding along any public frontage complying with WorkCover requirements shall be provided to Council for approval with a footpath occupancy fee based on the area of footpath to be occupied.

A Public Risk Insurance Policy with a minimum cover of \$20 million in relation to the occupation of and works within Council's land, for the full duration of the proposed works, shall be obtained. The Policy is to note Council as an interested party and nominate the location of works. Hoardings shall not be erected until written approval has been received from Council.

- (16) **Drainage System** - Prior to the issuing of a Construction Certificate the Certifying Authority must ensure that the proposed drainage system has been designed in accordance with the requirements of AS3500 and Camden Council Engineering Specifications.
- (17) **Acoustic Treatment for Mechanical Plant and Equipment** - Air handling plant rooms, refrigeration units, and cooling towers will all require acoustic treatment/s consistent with "Section 6.3- Mechanical Plant and equipment" in the report *Acoustic Assessment Stage 2 Oran Park*, prepared by Acoustic Logic, and dated 14 August 2018.
- (18) **Mechanical Plant Selection and Control** - Mechanical plant selection for the development and its operation should not exceed the following noise criteria when measured outside of the closest habitable room opening for the nearest noise affected residential unit located on the development site:
- Day 55 dB(A) (LAeq, 15min)
 - Evening 50 dB(A) (LAeq, 15min)
 - Night 45 dB(A) (LAeq, 15min)

All plant must be suitably located on site and screened with suitable acoustic materials (where necessary) to meet the criteria. Selection of suitable mechanical plant must be undertaken with the involvement of a suitably qualified acoustic consultant.

3.0 - Prior to Commencement of Works

The following conditions of consent shall be complied with prior to any works commencing on the development site.

- (1) **Public Liability Insurance** - The owner or contractor shall take out a Public Liability Insurance Policy with a minimum cover of \$20 million in relation to the occupation of, and works within, public property (i.e. kerbs, gutters, footpaths, walkways, reserves, etc) for the full duration of the proposed works. Evidence of this Policy shall be provided to Council and the certifier.
- (2) **Notice of Principal Certifier** - Notice shall be given to Council at least two (2) days prior to subdivision and/or building works commencing in accordance with Clause 103 of the EP&A Regulation 2000. The notice shall include:
- a) a description of the work to be carried out;
 - b) the address of the land on which the work is to be carried out;
 - c) the registered number and date of issue of the relevant development consent;
 - d) the name and address of the principal certifier, and of the person by whom the principal certifier was appointed;
 - e) if the principal certifier is an accredited certifier, his, her or its accreditation number, and a statement signed by the accredited certifier consenting to being appointed as principal certifier; and
 - f) a telephone number on which the principal certifier may be contacted for business purposes.
- (3) **Notice of Commencement of Work** - Notice shall be given to Council at least two (2) days prior to subdivision and/or building works commencing in accordance with Clause 104 of the EP&A Regulation 2000. The notice shall include:

- a) the name and address of the person by whom the notice is being given;
- b) a description of the work to be carried out;
- c) the address of the land on which the work is to be carried out;
- d) the registered number and date of issue of the relevant development consent and construction certificate;
- e) a statement signed by or on behalf of the principal certifier (only where no principal certifier is required) to the effect that all conditions of the consent that are required to be satisfied prior to the work commencing have been satisfied; and
- f) the date on which the work is intended to commence.

- (4) **Construction Certificate Required** - In accordance with the requirements of the *EP&A Act 1979*, building or subdivision works approved by this consent shall not commence until the following has been satisfied:

- a) a Construction Certificate has been issued by a certifier;
- b) a principal certifier has been appointed by the person having benefit of the development consent;
- c) if Council is not the principal certifier, Council is notified of the appointed principal certifier at least two (2) days before building work commences;
- d) the person having benefit of the development consent notifies Council of the intention to commence building work at least two (2) days before building work commences; and
- e) the principal certifier is notified in writing of the name and contractor licence number of the owner/builder intending to carry out the approved works.

- (5) **Sign of Principal Certifier and Contact Details** - A sign shall be erected in a prominent position on the site stating the following:

- a) that unauthorised entry to the work site is prohibited;
- b) the name of the principal contractor (or person in charge of the site) and a telephone number on which that person can be contacted at any time for business purposes and outside working hours; and
- c) the name, address and telephone number of the principal certifier.

The sign shall be maintained while the work is being carried out and removed upon the completion of works.

- (6) **Site is to be Secured** - The site shall be secured and fenced.

- (7) **Sydney Water Approval** – The approved construction certificate plans must also be approved by Sydney Water to determine if sewer, water or stormwater mains or easements will be affected by any part of the development. Go to www.sydneywater.com/tapin to apply.

A copy of the approval receipt from Sydney Water must be submitted to the principal certifier.

- (8) **Soil Erosion and Sediment Control** - Soil erosion and sediment controls must be implemented prior to works commencing on the site in accordance with 'Managing Urban Stormwater – Soils and Construction ('the blue book') and any Sediment and Erosion plans approved with this development consent.

- (9) **Protection of Existing Street Trees** - No existing nature strip, street tree, tree guard, protective bollard, garden bed surrounds or root barrier installation shall be disturbed, relocated, removed or damaged during earthworks, demolition, excavation (including

any driveway installation), construction, maintenance and/or establishment works applicable to this consent, without Council agreement and/or consent.

The protection methods for existing nature strip, street tree, tree guard, protective bollard, garden bed surrounds or root barrier installation during all works approved by this development consent shall be installed in accordance with AS 4970-2009 Protection of Trees on Development Sites.

- (10) **Construction Waste Management Plan** - A construction waste management plan must be prepared for all construction work on the site. The plan must incorporate the concept of recycling and reuse where practicable, include the requirement to dispose of material not suitable for reuse or recycling at a licenced waste facility. The plan must be kept on site for compliance until the completion of all construction works.
- (11) **Dilapidation Report – Council Property** - A dilapidation report prepared by a suitably qualified person, including a photographic survey of existing public roads, kerbs, footpaths, drainage structures, street trees and any other existing public infrastructure within the immediate area of the site shall be prepared. The report must be submitted to the principal certifier and Council at least 2 days prior to the commencement of works.

Should any public property or the environment sustain damage during the course of and as a result of construction, or if the construction works put Council's assets or the environment at risk, Council may carry out any works necessary to repair the damage or remove the risk. The costs incurred will be deducted from the applicant's damages bond.

- (12) **Traffic Management Plan** - A traffic management plan shall be prepared in accordance with Council's Engineering Specifications and AS 1742.3. The plan must be submitted to the principal certifier.
- (13) **Construction Management Plan** - A construction management plan that includes dust, soil and sediment and traffic management, prepared in accordance with Council's Engineering Design Specification, shall be provided to the principal certifier.
- (14) **Environmental Management Plan** - An environmental management plan (EMP) prepared in accordance with Council's Engineering Design Specification shall be provided to the principal certifier.

The EMP shall address the manner in which site operations are to be conducted and monitored to ensure that adjoining land uses and the natural environment are not unacceptably impacted upon by the proposal. The EMP shall include but not be necessarily limited to the following measures:

- a) measures to control noise emissions from the site;
- b) measures to suppress odours and dust emissions;
- c) soil and sediment control measures;
- d) measures to control air emissions that includes odour;
- e) measures and procedures for the removal of hazardous materials that includes waste and their disposal;

- f) any other recognised environmental impact;
 - g) work, health and safety; and
 - h) community consultation.
- (15) **Construction Noise Management Plan** – A construction noise management plan shall be provided to the principal certifier and include the following:
- a) noise mitigation measures;
 - b) noise and/or vibration monitoring;
 - c) use of respite periods;
 - d) complaints handling; and
 - e) community liaison and consultation.

4.0 - During Works

The following conditions of consent shall be complied with during the construction phase of the development.

- (1) **Construction Hours** - All work (including delivery of materials) shall be restricted to the hours of 7.00am to 5.00pm Monday to Saturday inclusive. Work is not to be carried out on Sundays or Public Holidays.
- (2) **Compliance with BCA** - All building work shall be carried out in accordance with the requirements of the BCA.
- (3) **Building Height** - A survey report prepared by a registered land surveyor confirming that the building height complies with the approved plans or as specified by the development consent, shall be provided to the principal certifier prior to the development proceeding beyond frame stage.
- (4) **Site Management** - The following practices are to be implemented during construction:
 - a) stockpiles of topsoil, sand, aggregate, spoil or other material shall be kept clear of any drainage path, easement, natural watercourse, kerb or road surface and shall have measures in place to prevent the movement of such material off site;
 - b) builder's operations such as brick cutting, washing tools, concreting and bricklaying shall be confined to the building allotment. All pollutants from these activities shall be contained on site and disposed of in an appropriate manner;
 - c) waste shall not be burnt or buried on site or any other properties, nor shall wind-blown rubbish be allowed to leave the site. All waste shall be disposed of at a licenced waste disposal facility;
 - d) a waste storage area shall be located on the site;
 - e) all building materials, plant, equipment and waste control containers shall be placed on the building site. Building materials, plant and equipment (including water closets), shall not to be placed on public property (footpaths, roadways, public reserves, etc);

- f) toilet facilities shall be provided at, or in the vicinity of, the work site at the rate of 1 toilet for every 20 persons or part thereof employed at the site. Each toilet shall:
- i) be a standard flushing toilet connected to a public sewer; or
 - ii) have an on-site effluent disposal system approved under the *Local Government Act 1993*; or
 - iii) be a temporary chemical closet approved under the *Local Government Act 1993*.
- (5) **Survey Report** - The building shall be set out by a registered land surveyor. A peg out survey detailing the siting of the building in accordance with the approved plans shall be provided to the principal certifier prior to the pouring of concrete.
- (6) **Vehicles Leaving the Site** - The construction supervisor must ensure that:
- all vehicles transporting material from the site cover such material so as to minimise sediment transfer;
 - the wheels of vehicles leaving the site:
 - do not track soil and other waste material onto any public road adjoining the site; and
 - fully traverse the site's stabilised access point.
- (7) **Removal of Waste Materials** - Where there is a need to remove any identified materials from the site that contain fill/rubbish/asbestos, the waste material shall be assessed and classified in accordance with the NSW EPA Waste Classification Guidelines 2014 (refer to: www.epa.nsw.gov.au/wasteregulation/classify-guidelines.htm)
- Once assessed, the materials shall be disposed of to a licensed waste facility suitable for that particular classification of waste. Copies of tipping dockets shall be retained and supplied to Council upon request.
- (8) **Soil, Erosion, Sediment and Water Management – Implementation** - All requirements of the erosion and sediment control plan and/or soil and water management plan shall be maintained at all times during the works and any measures required by the plan shall not be removed until the site has been stabilised.
- (9) **Disposal of Stormwater** - Water seeping into any site excavations is not to be pumped into the stormwater system unless it complies with relevant EPA and ANZECC standards for water quality discharge.
- (10) **Offensive Noise, Dust, Odour and Vibration** - All work shall not give rise to offensive noise, dust, odour or vibration as defined in the *Protection of the Environment Operations Act 1997* when measured at the property boundary, measured in accordance with the NSW EPA Noise Policy for Industry.
- (11) **Protection for Existing Trees** – The protection of existing trees (on-site and street trees) must be carried out as specified by AS 4970 Protection of Trees on Development Sites.
- (12) **Unexpected Finds Contingency (General)** - Should any suspect materials (identified by unusual staining, odour, discolouration or inclusions such as building rubble, asbestos, ash material, etc.) be encountered during any stage of works (including earthworks, site preparation or construction works, etc.), such works shall cease

immediately until a certified contaminated land consultant has been contacted and conducted a thorough assessment.

In the event that contamination is identified as a result of this assessment and if remediation is required, all works shall cease in the vicinity of the contamination and Council shall be notified immediately.

Where remediation work is required, the applicant will be required to obtain consent for the remediation works.

- (13) **Traffic Management Plan Implementation** - All traffic management procedures and systems identified in the approved traffic management plan shall be introduced and maintained during construction of the development to ensure safety and to minimise the effect on adjoining pedestrian and traffic systems.

- (14) **Site Signage** - A sign shall be erected at all entrances to the site and be maintained until the development has been completed. The sign shall be constructed of durable materials, be a minimum of 1200mm x 900mm, and read as follows:
"WARNING UP TO \$8,000 FINE. It is illegal to allow soil, cement slurry or other building materials to enter, drain or be pumped into the stormwater system. Camden Council (02 4654 7777) – Solution to Pollution."

The wording shall be a minimum of 120mm high and the remainder a minimum of 60mm high. The warning and fine details shall be in red bold capitals and the remaining words in dark coloured lower case letters on a white background, surrounded by a red border.

- (15) **Location of Stockpiles** - Stockpiles of soil shall not be located on / near any drainage lines or easements, natural watercourses or water bodies, footpath or roadway without first providing suitable protective measures adequate to protect these water bodies. All stockpiles of contaminated materials shall be suitably covered to prevent dust and odour nuisance.

- (16) **Erosion and Sedimentation Control** - Soil erosion and sedimentation controls are required to be maintained for the duration of the works. The controls must be undertaken in accordance with version 4 of the Soils and Construction – Managing Urban Stormwater manual (Blue Book).

Soil erosion and sediment control measures shall only be removed upon completion of the works when all landscaping and disturbed surfaces have been stabilised (for example, with site turfing, paving or re-vegetation).

- (17) **Salinity Management Plan** - All approved development that includes earthworks, imported fill, landscaping, buildings and associated infrastructure must be carried out or constructed in accordance with the management strategies as contained within the report titled *Salinity Management Plan: proposed Residential and Commercial Subdivision Tranche 20 and Tranche 29 Oran Park* prepared by Douglas Partners and dated March 2014.

- (18) **Noise During Work** - Noise levels emitted during works shall be managed in accordance with the current NSW EPA Interim Construction Noise Guidelines.

- (19) **Delivery Register** - The applicant must maintain a register of deliveries which includes date, time, truck registration number, quantity of fill, origin of fill and type of fill delivered.

This register must be made available to Council officers on request and be provided to the Council at the completion of the development.

- (20) **Air Quality** - Vehicles and equipment used on site must be maintained in good working order and be switched off when not operating. The burning of any waste material is prohibited.
- (21) **Construction Waste Management Plan/s** – *The “Oran Park Podium Stage 2 Operational Waste Management Plan” Prepared by Waste Audit Consultancy, Dated August 2018,”* (or similar plan) is to be provided and followed to manage all waste generated from all construction activities. Recycling of waste material where appropriate must be incorporated into the plan.
- (22) **Pedestrian and Vehicular Access** – As outlined the required Construction Management Plan, existing access and egress is not be obstructed at any time. If any temporary obstruction of access and egress is required during construction, details of the obstruction including, length of time and justification is to be provided to and approved by Council prior to the obstruction occurring.
- (23) **Residential Building Facade Treatments** - For the residential building, the external facade must incorporate a minimum glazing thickness of 6mm glass or higher for living rooms and, 6.38mm glass for bedrooms.

5.0 - Prior to Issue of an Occupation Certificate

The following conditions of consent shall be complied with prior to the issue of an Occupation Certificate.

- (1) **Occupation Certificate Required**- An Occupation Certificate shall be obtained prior to any use or occupation of the development.
- (2) **Survey Certificate** - A registered surveyor shall prepare a Survey Certificate to certify that the location of the building in relation to the allotment boundaries complies with the approved plans or as specified by this consent. The Survey Certificate shall be provided to the satisfaction of the principal certifier.
- (3) **Building Height** - A registered surveyor shall certify that the maximum height of the building is consistent with the height in the approved plans and this consent. The certification/verification shall be provided to the satisfaction of the principal certifier.
- (4) **Waste Management Plan** - The principal certifier shall ensure that all works have been completed in accordance with the approved waste management plan referred to in this development consent.
- (5) **Stormwater – Plan of Management (POM)** - The registered proprietor of the land shall prepare a Plan of Management (POM) for the on-site detention facilities as approved under DA/2018/1223/1. The POM shall set out all design and operational parameters for the detention facilities including design levels, hydrology and hydraulics, inspection and maintenance requirements, and time intervals for such inspection and maintenance. The POM shall be provided to the principal certifier for approval.
- (6) **External Walls and Cladding Flammability** – The external walls of the building, including attachments, must comply with the relevant requirements of the National

Construction Code (NCC). Prior to the issue of an Occupation Certificate the Principal Certifying Authority must:

- a) be satisfied that suitable evidence is provided to demonstrate that the products and systems used in the construction of external walls, including finishes and claddings such as synthetic or aluminium composite panels, comply with the relevant requirements of the NCC; and
 - b) ensure that the documentation relied upon in the approval processes includes an appropriate level of detail to demonstrate compliance with the NCC as built.
- (7) **Waste Collection Contract** - The building owner shall ensure that there is a contract with a licensed contractor for the removal of all waste. A copy of the contract is to be held on the premises at all times.
- (8) **Indemnity Agreement** – The strata body corporate or community association must have an indemnity agreement in place with Council before occupation and before waste collection will occur from private roads where waste is to be collected by Council.
- (9) **Mechanical Exhaust System** - A Certificate of Compliance prepared by a suitably qualified engineer confirming that the mechanical exhaust systems have been designed, constructed and installed in accordance with the relevant requirements of Clause F4.12 of the BCA and AS1668 Parts 1 and 2, shall be provided to the principal certifier. Certification shall be provided that the air handling system as installed has been tested and complies with the approved plans and specifications, including ventilation requirements and fire precautions.
- (10) **Services** - Certificates and/or relevant documents shall be obtained from the following service providers and provided to the principal certifier:
- a) Energy supplier – A Notice of Arrangement for the provision of distribution of electricity from Endeavour Energy to service the proposed development;
 - b) Water supplier – A Section 73 Compliance Certificate demonstrating that satisfactory arrangements have been made with a water supply provider to service the proposed development.

The assessment will determine the availability of water and sewer services, which may require extension, adjustment or connection to Sydney Water mains. Sydney Water will assess the development and if required will issue a Notice of Requirements letter detailing all requirements that must be met. Applications can be made either directly to Sydney Water or through a Sydney Water accredited Water Servicing Coordinator (WSC). Go to www.sydneywater.com.au/section73 or phone 1300 082 746 to learn more about applying through an authorised WSC or Sydney Water.

- (11) **Rainwater Harvesting and Tanks** – For the purpose of harvesting rainwater for reuse on site, only rain water captured from the roof catchment is allowed to be reused to flush toilets / urinals, supply cooling towers, and water gardens (if non-potable water is preferred).
- (12) **Rainwater Harvesting and Tanks** – The proposed use of rainwater must comply fully with *Australian Guidelines for Water Recycling: Managing Health and Environmental Risks (Phase 2) Stormwater Harvesting and Re-use, July 2009*, and in particular with Section 2 – Roofwater Reuse.
- (13) **Rainwater Harvesting and Tanks** – Prior to the issue of an Occupation Certificate, a detailed operation and procedure manual shall be developed and submitted to the

principle certifying authority detailing the rainwater harvesting system and identifying specific risk areas and treatments. It is mandatory to address the requirements of "Table 2.1 – Inspection and Maintenance of Roofwater Reuse Systems" of "Section 2 – Application of standard approach" within the *"Australian Guidelines for Water Recycling: Managing Health and Environmental Risks (Phase 2) Stormwater Harvesting and Re-use, July 2009,"* that includes identification of who shall carry out inspections and when, details of emergency shutdown procedures, and the conducting of periodic testing to ensure water quality.

- (14) **Incomplete Works Bond** - Where the applicant proposes deferral of work in accordance with Council's engineering specifications, a bond is to be lodged with Council for the construction of incomplete works in accordance with Council's Development Infrastructure Bonds Policy.

Note. Fees are payable for the lodgement and refund of the bond.

- (15) **Surveyor's Report** - Prior to the issue of the Subdivision Certificate a certificate from a registered surveyor must be provided to the principal certifier, certifying that all drainage lines have been laid within their proposed easements. Certification is also to be provided stating that no services or accessways encroach over the proposed boundary other than as provided for by easements as created by the final plan of subdivision.
- (16) **Value of Works** - Itemised data and value of civil works shall be provided to Council for inclusion in Council's Asset Management System in accordance with Council's Engineering Specifications.
- (17) **Services** - Certificates and/or relevant documents shall be obtained from the following service providers and provided to the principal certifier:
- a) Energy supplier – A Notice of Arrangement for the provision of distribution of electricity from Endeavour Energy to service the proposed development;
 - b) Water supplier – A Section 73 Compliance Certificate demonstrating that satisfactory arrangements have been made with a water supply provider to service the proposed development.

The assessment will determine the availability of water and sewer services, which may require extension, adjustment or connection to Sydney Water mains. Sydney Water will assess the development and if required will issue a Notice of Requirements letter detailing all requirements that must be met. Applications can be made either directly to Sydney Water or through a Sydney Water accredited Water Servicing Coordinator (WSC). Go to www.sydneywater.com.au/section73 or phone 1300 082 746 to learn more about applying through an authorised WSC or Sydney Water.

- (18) **Works As Executed Plan** - Works As Executed Plans shall be prepared and provided in accordance with Council's Engineering Specifications.

Digital data must be in AutoCAD .dwg or .dxf format, and the data projection coordinate must be in (GDA94.MGA zone 56).

- (19) **Section 88B Instrument** - The applicant shall prepare a Section 88B Instrument for approval by the principal certifier which incorporates the following easements, positive covenants and restrictions to user where necessary:

- a) easement for services
- b) easement to drain water and drainage easement/s over overland flow paths;
- c) easement for on-site-detention;
- d) positive covenant over the on-site detention / water quality facility for the maintenance, repair and insurance of such a facility

(20) **Water Quality Facility** - A water quality facility must be constructed for the site in accordance with the approved plans under DA/2018/1223/1 and Council's Engineering Specifications.

(21) **Defects and Liability Bond** - The applicant is to lodge a bond with Council to cover any defects and liabilities of any new public infrastructure in accordance with Council's Development Infrastructure Bonds Policy.

Note. Fees are payable for the lodgement and refund of the bond.

(22) **Environmental Management and Performance of Centre** - Prior to the issue of an occupation certificate the proponent shall prepare an operational management plan demonstrating how the overall sustainability performance of the centre will be monitored. The plan shall also outline how centre management propose to engage tenants, staff, customers and the community on the features and sustainable performance of the centre.

A report shall be submitted to Council within one year of the Occupation Certificate demonstrating how the development complies with the mandatory controls as set out in Attachment B, Oran Park Sustainability Development Controls of the Oran Park Development Control Plan 2007.

(23) **Positive Covenant – OSD / On Site Retention / Water Quality Facility** - A positive covenant shall be created under Section 88E of the *Conveyancing Act 1919* burdening the owner(s) with a requirement to maintain the on-site detention, water quality facility and on-site retention/re-use facilities on the property as approved by DA/2018/1223/1, prior to the issue of an Occupation Certificate.

The terms of the Section 88E instrument with positive covenant shall include the following:

- a) the Proprietor of the property shall be responsible for maintaining and keeping clear all pits, pipeline s, trench barriers and other structures;
- b) the proprietor shall have the facilities inspected annually by a competent person;
- c) the Council shall have the right to enter upon the land referred to above, at all reasonable times to inspect, construct, install, clean, repair and maintain in good working order the facilities; and
- d) The registered proprietor shall indemnify the Council and any adjoining land owners against damage to their land arising from the failure of any component of the OSD and OSR, or failure to clean, maintain and repair the OSD and OSR.

The proprietor or successor shall bear all costs associated in the preparation of the subject Section 88E instrument. Proof of registration with NSW Land Registry Services shall be provided to and approved by the principal certifier prior to the issue of an Occupation Certificate.

(24) **Compliance with previous Consent** - All conditions of consent under DA/2018/1223 are to be satisfied prior to the release of any Occupation Certificate.

- (25) **Acoustic Compliance Report** - An acoustic assessment report based on noise monitoring of the operation of all mechanical plant on the site must be submitted to Camden Council (Consent Authority) prior to the issue of an occupation certificate for the building. The monitoring shall be undertaken by a qualified acoustic consultant to demonstrate compliance with the following:

(a) Mechanical plant noise complies with:

- Day 55 dB(A) (LAeq, 15min)
- Evening 50 dB(A) (LAeq, 15min)
- Night 45 dB(A) (LAeq, 15min)

when measured outside of the closest habitable room opening for the nearest noise affected residential unit located on the development site:

(b) Materials and Mitigation Controls

That all noise attenuation materials and structures used for the mitigation / control of noise is constructed and compliant with the conditions of the consent.

For any non-compliance, the acoustic compliance report must include recommendations for compliance and these recommendations will be enforced by Council at the cost of the owner / occupier. An application pursuant to Section 4.55 'Modification' of the EP&A Act for the modification of the development consent must be submitted to the consent authority (Camden Council) for determination, with the recommended amendments to be implemented following Council Consent.

6.0 - Ongoing Use

The following conditions of consent are operational conditions applying to the development.

- (1) **Residential Air Conditioning Units** - The operation of air conditioning units shall operate as follows:
- a) be inaudible in a habitable room during the hours of 10pm – 7am on weekdays and 10pm to 8am on weekends and public holidays; and
 - b) emit a sound pressure level when measured at the boundary of any neighbouring residential property, at a time other than those specified in (a) above, which exceeds the background (LA90, 15 minutes) by more than 5dB(A). The source noise level shall be measured as a LAeq 15 minute.
- (2) **No Waste to Be Stored Outside of the Site** – No waste is to be placed on any public land (eg. footpaths, roadways, plazas, reserves, etc.) or any other properties at any time.
- (3) **Removal of Graffiti** - The owner/manager of the site is responsible for the removal of all graffiti from the building and fences within 48 hours of its application.
- (4) **Parking Areas to be Kept Clear** - At all times, the loading docks, car parking spaces, driveways and footpaths shall be kept clear of goods and shall not be used for storage purposes.

- (5) **No Waste to Be Stored Outside of the Site** – No waste is to be placed on any public land (e.g. footpaths, roadways, plazas, reserves, etc.) or any other properties at any time.
- (6) **Communal Open Space** - Noise levels when measured within the communal open space area must comply with the following:
- Day (7am to 6pm): 58 dB(A) LAeq15min
 - Evening (6pm to 10pm): 48 dB(A) LAeq 15min
 - Night (10pm to 7am): 43 dB(A) LAeq 15min)
- (7) **Waste Management Plan** – The “*Oran Park Podium Stage 2 Operational Waste Management Plan Waste Management Plan, Prepared by Waste Audit Consultancy, Dated August 2018,*” must be adhered to at all times.
- (8) **Offensive Noise** - The use and occupation of the premises including all plant and equipment shall not give rise to any offensive noise within the meaning of the *Protection of the Environment Operations Act 1997* and shall comply with the NSW EPA Noise Policy for Industry.
