Attention: Leigh Jackson,

Dear Sir,

RE: Development Application: 2022/029 - Lot: 1 DP: 821515 439 Wilshire Road, RANKIN SPRINGS NSW 2669 – Propose expansion and continued use of Quarry.

WaterNSW has reviewed the information submitted with the application for the proposed expansion and continued use of the Quarry, WaterNSW considers that for the purposes of the Water Management Act 2000, no further investigation is required by this agency. The applicant has the relevant approval for the bore at the proposed development location, although no water attached to the works.

The landowner should be aware that any extraction and use of water, must be done so in accordance with Water Management Act 2000.

It is noted that the current water supply works approval for the location 70CA617191, is for the works being a Bore and its use being Industrial Sand and Gravel. There is no water connected to the works (WAL or Water Access Licence). The applicant must make application to WaterNSW to attach a Water Access Licence to the works prior to any water being taken through the bore. Should the applicant use the bore to extract water without having a Water Access Licence attached they will be in breach of the Water Management Act.

Yours sincerely
