Dear Kelly Dewar

On receiving proposed Development application number 19/2023 for a solar farm on lot:78DP:754309" Tabragar Park "Lawson Park Road Dunedoo which I strongly object to on the grounds it will be only a few hundred meters from my Kitchen window, not a view you can admire, especially if they were to go into disrepair such as hail storm damage, becoming redundant because of nuclear power eventually becoming our main source of energy and potentially becoming a fire hazard.

On viewing the map where the proposed solar farm will be, it would appear the transmission line to link the nearest substation would have to cross some of my property, which I would strongly oppose.

The Leeson family have successfully occupied this property since 1890 and I am very concerned that this solar farm would impact on the devaluation of my property.

"Anglewood" I am sure I can speak for all present and past this is just a blight on a beautiful piece of Agriculture land.

Regards Warren Malcolm Leeson

Subject: DA 19/2023

To whom it may concern,

I object to DA 19/2023 on the grounds that ninety percent of Lot 78 DP 754309 is flood prone agricultural land. This is also prime agricultural land that should not be used for industrial purposes as indicated.

Yours sincerely,

David Bowman

Subject: Objection to DA

To whom it may concern,

I would like to object to DA29/2023, use of land for solar farm at 126 Lawson Park Road, Dunedoo. Solar installations are unsightly and this one will be viewed from a lot of points around the area causing glare and ruining our scenic views. The run off from the solar panels will affect water courses that flow into the Talbragar River, not only causing erosion but polluting the river system. Using valuable agricultural land for power generation is wrong!
