2-32 JUNCTION STREET, FOREST LODGE

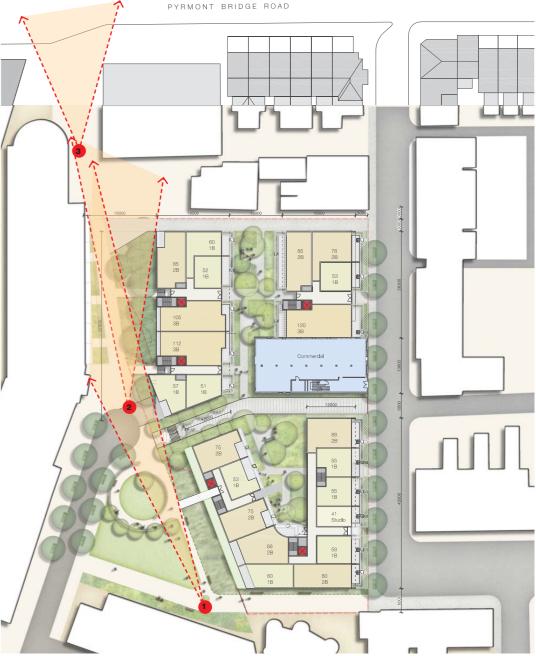

PHYSICAL & VISUAL ACCESS FROM PARK

PHYSICAL ACCESS FROM PARK

The following diagram illustrates clear and continuous physical connectivity across the site in the form of pathways as well as a series of landscaped zones that transition the north-south pathway from park to Pyrmont Bridge Rd:

- / Zone A The park is the main landscaped feature which connects multiple pathways and throughsite links. The southern corner of the five storey building reinforces and strengthens main east-west through-site link whilst allowing for clear north-south access.
- / Zone B A generously landscaped pathway serves to transition in scale from park to the northern stair whilst also connecting to the northern through-site link running east-west.
- / Zone C The existing small scale stair that leads to Pyrmont Bridge Rd. Connectivity to the park will be significantly improved.

VISUAL ACCESS FROM PARK

- the park towards Pyrmont Bridge Rd:
- southern corner.
- / 3) Sightline from stair to Pyrmont Bridge Rd.

BATESSMART

The following diagram illustrates clear and continuous sightlines from various points along the path from

/ 1) Sightline from the park indicates a clear line of sight without hindrance of the five storey building's

/ 2) Sightline from cul-de-sac indicates clear line of sight towards stairs and east-west through-site link.
