Site compatibility application no. \_\_\_\_\_

## LODGEMENT

### Instructions to users

A site compatibility certificate is required under clause 50(2A) of the *Environmental Planning and Assessment Regulation 2000* to accompany development applications for certain proposed developments under the SEPP. The types of development applications to which the Regulation applies are listed in clause 24 of the SEPP.

Please note, amendments to the SEPP in October 2018 require you to submit a cumulative impact study if your proposed development is located within a 1km radius of 2 or more other parcels of land which have either a current site compatibility certificate or a site compatibility certificate application that has been made but not yet determined.

In addition, the amendments made in October 2018 also affect the way the SEPP applies to a site that includes land over which a previous site compatibility certificate has been issued (see clause 25(5)(c) and 25(5A)). As a result, you will now be required to include details of all previous site compatibility certificates that were issued over any portion of the land to which this application relates.

Before lodging this application, it is recommended that you contact the relevant regional office of the Department of Planning and Environment concerning your development proposal to arrange a pre-lodgement meeting.

To ensure that your application is accepted, you must:

- complete **all** parts of this form, **and**
- submit **all** relevant information required by this form, **and**
- provide **a copy** of this form and attached documentation in **hard copy**,
- provide form and documentation in **electronic format** (e.g. Memory stick).
- **provide** a cumulative impact study, if required.
- **provide** copies of any previously issued site compatibility certificates for the land, or any part of the land, to which the application relates.

- NB: The Department of Planning and Environment may request further information if your application is incomplete or inadequate.

All applications **must be lodged** with the Department, by courier or mail. Applications can be lodged with the relevant regional office of the NSW Department of Planning and Environment. Please refer to [www.planning.nsw.gov.au](http://www.planning.nsw.gov.au) for contact details.

## SCHEDULE 2

### Requirements imposed on determination:

1. To achieve a building height compatible with surrounding land uses, the built form of any future development application on the site relying on this SCC is to meet the following requirements:
  - a) Not exceed two storeys to Longueville Road;
  - b) Appropriately respond to the topography of the site, and have a maximum height of five storeys at the rear; and
  - c) Contain all habitable floor space so as not to exceed the maximum building height standard prescribed under *Lane Cove Local Environmental Plan 2009* being RL 62.8 AHD, except along Longueville Road.
2. Consideration is to be given to the final bulk and scale of any future development so as to ensure an acceptable built form relationship and minimisation of amenity impacts on the R2 Low Density Residential zoned land adjoining to the north.
3. To ensure that the adjoining E2 Environmental Conservation zoned land to the east is appropriately protected, managed and restored and that the objectives of the E2 zone are achieved, any future development is to consider the following:
  - a) the establishment of a bushland buffer “zone” within the rear of the site, separating the built form from the adjoining E2 Environmental Conservation zoned land;
  - b) protection, management and regeneration of remnant bushland to the east of the site; and
  - c) the removal of any tree within the adjoining E2 Environmental Conservation zoned land is not authorised under this SCC.
