The Concept Plan divides the subject area into five precincts: Minimi East, Minimi Extension, Village Centre, Link Road North and Link Road South. The precincts consist of a balanced mix of urban characteristics, which will assist in the delivery of a cohesive out diverse built landscape that will define the new township of Minimi. The natural features of the landscape, including topography, riparian zones and significant vegetation formed the basis for the identification of each of the five precincts. The layout and design of each precinct has also been directly influenced by the physical attributes of the land. Consideration has been given to the relationship between future development and these attributes. The following sections provide an overview of the defining characteristics of each of the precincts.
